

Walmart Brand Guidelines

Welcome to the Walmart brand.

Walmart has never stood still. As we evolve—with new products, services, locations, and innovations—our brand must also evolve.

In this document, you’ll find details of our brand strategy and identity, along with plenty of guidance on how to use both. Much will be familiar; we’re proud to build on the foundations that have brought us success and added so much value to the lives of our customers. Other aspects will be new, created for the omni-channel, digital-first world in which we, our customers, and our partners all live.

We now have a purpose-built, flexible system, crafted for all the touchpoints we use. We’re excited to share it with the world, and we hope you are too. Disciplined management of the Walmart brand will enable us to protect the equity we’ve built and help us become the brand people want as much as they need.

This is an exercise in having the tools to be more ourselves and more Walmart. We all win when everyone who’s part of Walmart is inspired and equipped to deliver a great Walmart experience. Thank you for taking the time to read these guidelines, and thank you for all you do to help people save money and live better.

Brand Foundation

Brand Foundation

This section is the bedrock of our brand, outlining our purpose, positioning, and principles.

It guides us in all the ways Walmart comes to life: how we look, what we stand for, and how we act in the world.

Brand Purpose
Guides the enterprise

Our brand purpose is inspired by the words of Sam Walton: “If we work together, we’ll lower the cost of living for everyone...we’ll give the world an opportunity to see what it’s like to save and have a better life.”

This purpose guides our daily actions and behaviors to best serve our customers, associates, and communities. It is the driving force behind everything we do.

Save money.
Live better.

Company Positioning

We are a people-led,
tech-powered,
omnichannel retailer
dedicated to helping
people save money
and live better.

Brand Principles

Brand Principles are simple descriptors that exist to guide our brand identity and experience across channels.

They're an articulation of the image Walmart should spark in the minds of our customers. They're not external-facing, but are always at the core of how we look, feel, sound, speak, and act.

Brand
Principles

Grassroots

We never forget our humble beginnings;
we’re relatable, down-to-earth, and part of
the community.

Brand Principles

Agile

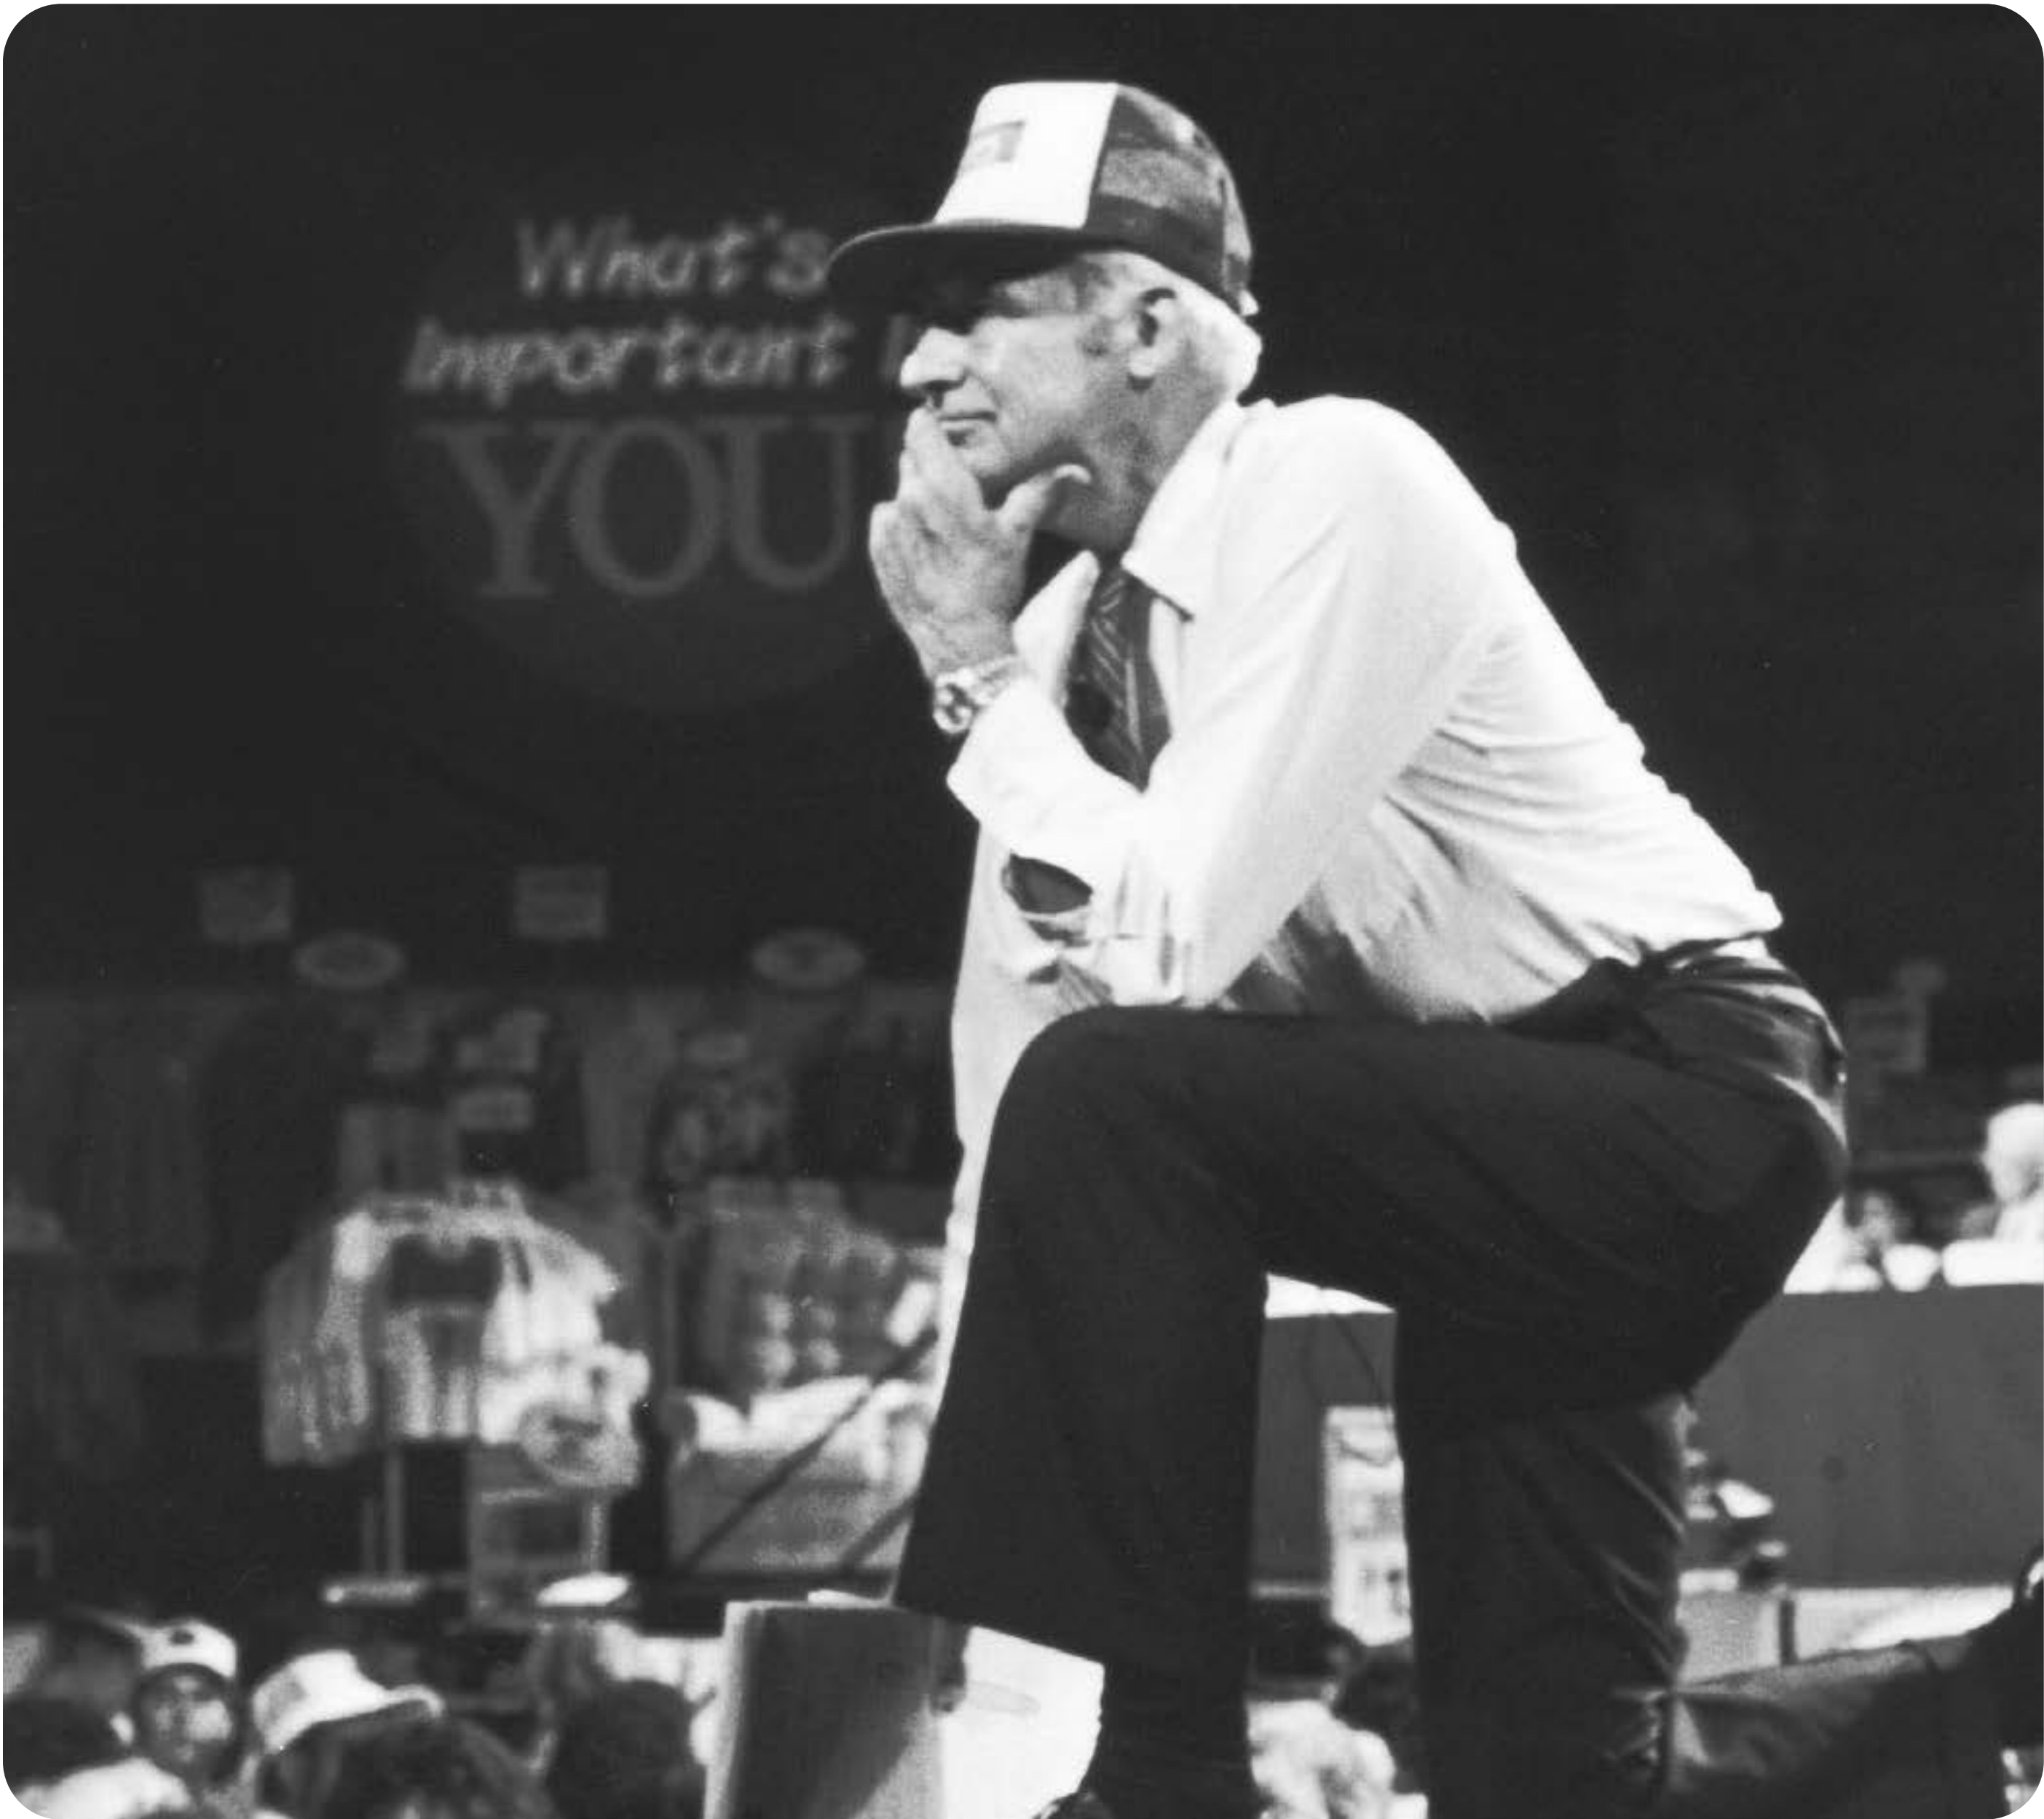

Agility is our x-factor. We are constantly improving, endlessly testing, always adapting.

Brand
Principles

Pioneering

Since the beginning, we’ve blazed a path
and never settled, because that’s what it
takes to make life better and easier.

Pioneering

Since the beginning, we’ve blazed a path and never settled because that’s what it takes to make life better and easier.

2.0

Brand Voice

Voice Principles

Our Voice Principles inform how we speak to customers, from the content on their social feeds to their experience in a local Walmart store.

These principles are a direct translation of our core Brand Principles, specifically tailored for verbal and written expression.

Voice Principles

These principles guide the execution of our brand voice across all communications. Each one ladders up to a specific Brand Principle, but has been adjusted for easy expression through language.

Our Voice Principles can be dialed up or down to best suit your specific communication needs. Sometimes, you'll need to emphasize one principle more heavily than another, while other times you'll have copy that leverages all three principles equally. Flexible usage is encouraged, as long as you can point to one or more Voice Principle in your copy.

01 Grassroots →

Conversational

Our voice is just as down-to-earth as our customers and associates. We want to be the realest voice in retail.

02 Agile →

Captivating

We must always engage the reader, so our voice needs to be dynamic and energizing.

03 Pioneering →

Confident

Because Walmart is a leader, our voice should be decisive and inspiring.

Principle 1

Conversational

Our voice is just as down-to-earth as our customers and associates. We want to be the realest voice in retail, so we need to avoid confusing our customers with marketing speak.

Our tone is familiar and straightforward while using friendly, dressed-down language. We maintain a positive and optimistic perspective on everyday life, from parties to chores and everything in between.

DO

Aim for the easy read. Use simple word choices, clear sentence structures, and well-known turns of phrase.

DON'T

Complicate things with industry jargon, uncommon phrasing or complex words. When in doubt, ask yourself: would you say this in an everyday conversation?

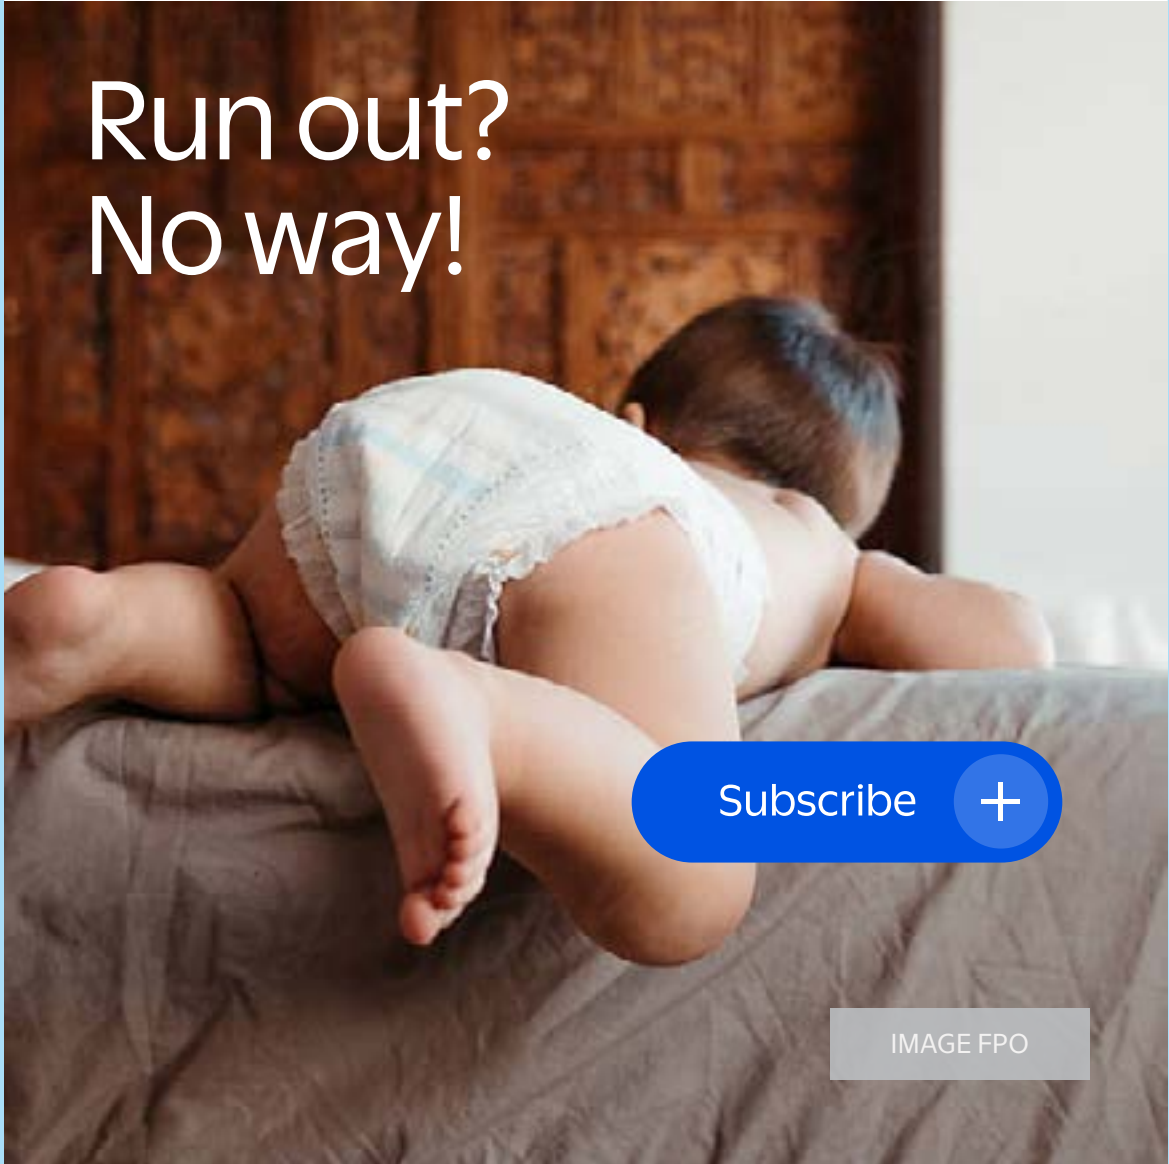

Principle 1
Conversational
Examples

Walmart
Sponsored

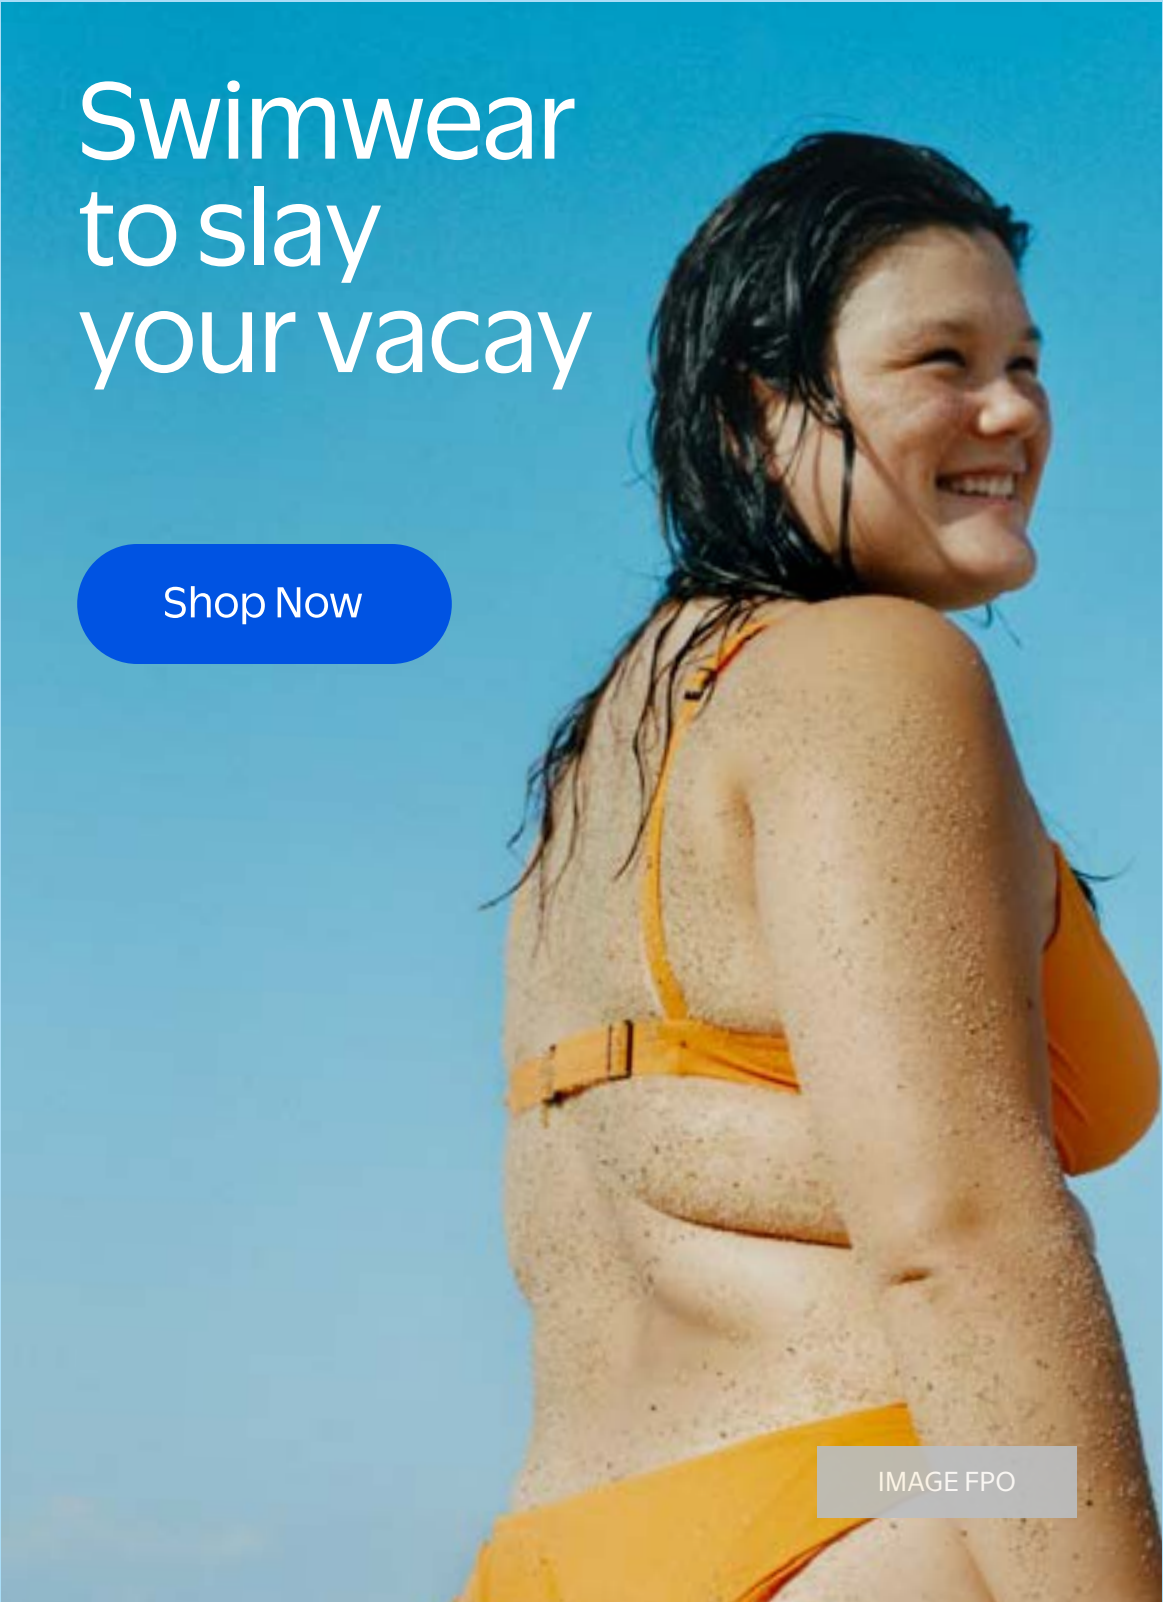

From diapers and wipes to formula and snacks, get what your little one uses most sent to your door automatically.*

Run out?

IMAGE FPO

Walmart
Sponsored

Halloween without candy? Terrifying. Tame the creatures that come crawling with extra treats delivered in as fast as one hour. Restrictions and fees apply.

From “boo” to “woo!”

Principle 2

Captivating

We have to engage the reader, so our voice needs to be dynamic and energizing.

We always make sure that Walmart’s tone combines levity with an irresistible magnetism that appeals to our readers. Whatever the subject, we talk about it in a current, relevant way with infectious energy. We choose words that are memorable and interesting while still being conversational. We never shy away from moments that are relatable, entertaining, and timely.

DO

Use wordplay, subtle rhymes, and punchy sentence structures. Have fun with your writing and make it engaging and vibrant.

DON'T

Tell jokes. Our humor and fun come from a place of relatability, centering the customer and their experiences so we never become cheesy or contrived.

Principle 2
Captivating
Examples

Easter is March 31

Get crackin’

summer family fun inspo

IMAGE FPO

IMAGE FPO

She’s going out tonight

Let’s be real: getting dressed up is half the fun

Shop Now

Principle 3

Confident

Because Walmart is a leader, our voice is decisive and inspiring.

We speak with a positivity that’s impactful and reassuring. Remember: when we write confidently, our customers feel they can be confident too. Our words help them save money and live better, so we don’t speak in ambiguity—we’re declarative and direct, inspiring people to act.

DO

Be specific and direct. Showing expertise when discussing moments or products helps your copy connect with customers. Tie everyday complications and quick solves to product use cases.

DON'T

Be vague. Vagueness clouds the intent of your copy and will feel passive, bland, and boring.

Principle 3
Confident
Examples

Calling all outdoor explorers

Save on all you need to hit the trails, catch some rays, & maybe a few fish, too.

Voice Principles Cheat Sheet

Best Practices

At Walmart, it's important that we speak with a consistent, unified voice.

The following section includes best practices and guidance to help maintain our verbal style so we always sound authentically Walmart.

On Clarity

- 1 Clarity is crucial in conveying information.
- 2 Ensure your intent cannot be misunderstood.

Our brand voice is Conversational, Captivating, and Confident, but there’s a fourth C that’s vital to everything we write: **Clarity**.

We never lose sight of how large our audience is and that our primary objective in every communication is to convey information to that audience. The brief is always top of mind, so ask yourself: Does my copy translate the brief so clearly that the intent can’t be misunderstood? The best copy incorporates shades of all our Voice Principles, but first and foremost, all copy should be clear.

On Value

- 1 Find new ways to say repeated phrases.
- 2 Consider how value affects the reader.

When storytelling with value, push yourself to find **new ways to say commonly repeated phrases** like “faves,” “finds,” “essentials” or “must-haves.” While these words work in a pinch, we always want to beat them.

Also consider how value affects the reader. Will less expensive bathing suits mean more vacation options to pack? Will this Rollback on sweatpants mean a cozier winter? Find the relationship between the item and the customer **beyond the price**.

On Humor

- 1 Be observational and relatable.
- 2 Don't tell jokes outside our social channels.

Walmart embraces the humor in everyday life rather than telling jokes.* We love the little things that make life great, and we relate to the moments that can be groan-worthy. Our humor comes from that relatability—when we get a smile from our readers and they think “Ha, Walmart gets me.”

*Jokes are the lifeblood of social media, and we’re in on the joke. Our relevance on those platforms depends on it, so we make jokes, share memes, and engage with our followers in ways that differ from our interactions in other channels.

On Puns

1 Don't use puns.

We resist using puns. While we admit they're a fun and helpful shortcut, they're also the lowest-hanging fruit. We believe there is always a deeper truth or more entertaining story to be told behind each pun.

There will be exceptions over time (such as headlines inspired by dad-worthy puns for Father's Day) but please keep our general "no puns" rule in mind when writing as Walmart.

On Being Current

- 1 Learn through social listening.
- 2 Be relatable-at-scale.
- 3 Use contemporary language.

We stay current with culture through social listening. Discovering new turns of phrase, shared cultural references and sentence structures is as easy as scrolling through social media.

Ultimately, however, we need to temper our language to be **relatable-at-scale**. Our writing shouldn't be on the cutting edge of slang or internet speak, but should employ contemporary language that is used or understood by the majority of our customers and helps Walmart feel modern and fresh.

On Emojis

- 1 Use smileys to convey general emotion.

Emojis are a powerful tool in our CRM and social media platforms. We use them when they add to—and do not distract from—the story we’re telling. Inclusivity is always top of mind, so use this general rule of thumb.

Smileys convey general emotion and are only available in the yellow skin tone. Use these emojis as you like.

- 3 Use body part emojis in sets of three to reflect our diverse customers.

Body part emojis reflect specific human movements and are available in multiple skin tones. Always use a set of 3 versions of the same emoji to convey the full range our customers’ identities.

**Best Practices
Summary**

1

We're always Conversational, Captivating, and Confident, but our writing will lean into—or away from—a principle depending on what we're writing and who we're writing for.

2

Consider every customer. Demographics and backgrounds matter, so make sure your words are clear and resonate with the majority.

3

Write how you talk. Literally.

4

We are the realest voice in retail.
Live it. Breathe it. Own it.

3.0

Brand Architecture

Brand Architecture

Brand architecture is a strategic framework that defines the relationship between all offerings in Walmart's portfolio.

This architecture gives our Enterprise Brand a leading role, helping build strong and consistent associations across all audiences. Offerings feel united within the brand system, with minimal flexibility where needed.

What is brand architecture?

Brand architecture is:

- A dynamic framework that takes into account current and future business strategies
- A clarifying system for how products, services, and solutions relate to one another—influencing how audiences search and select within a portfolio
- A business tool, guiding branding governance and decision-making

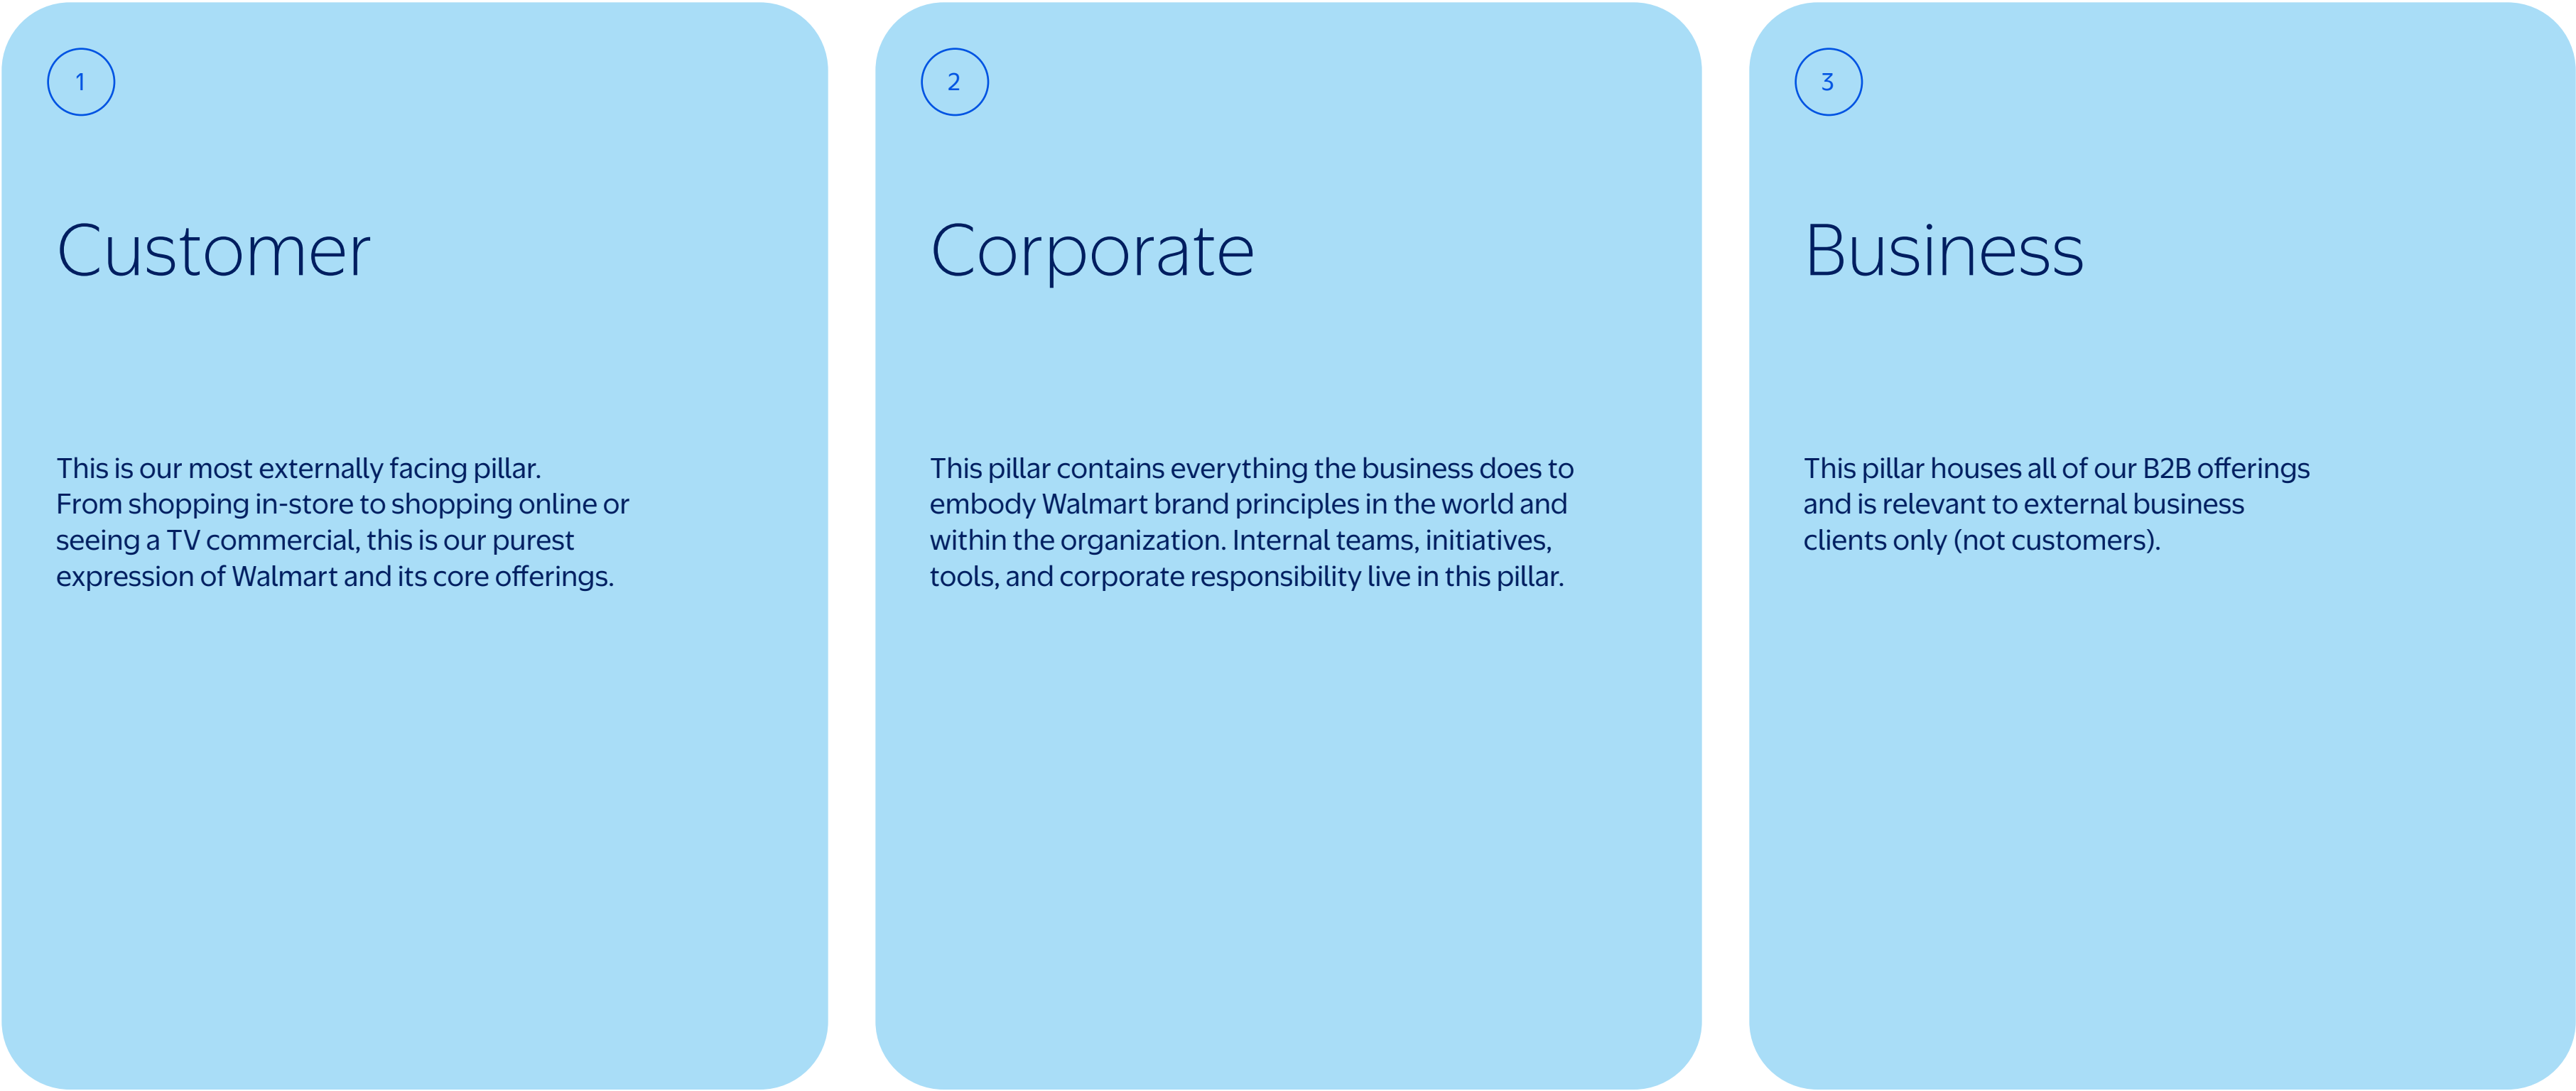

Brand architecture is not:

- An organizational chart or legal structure
- Web navigation

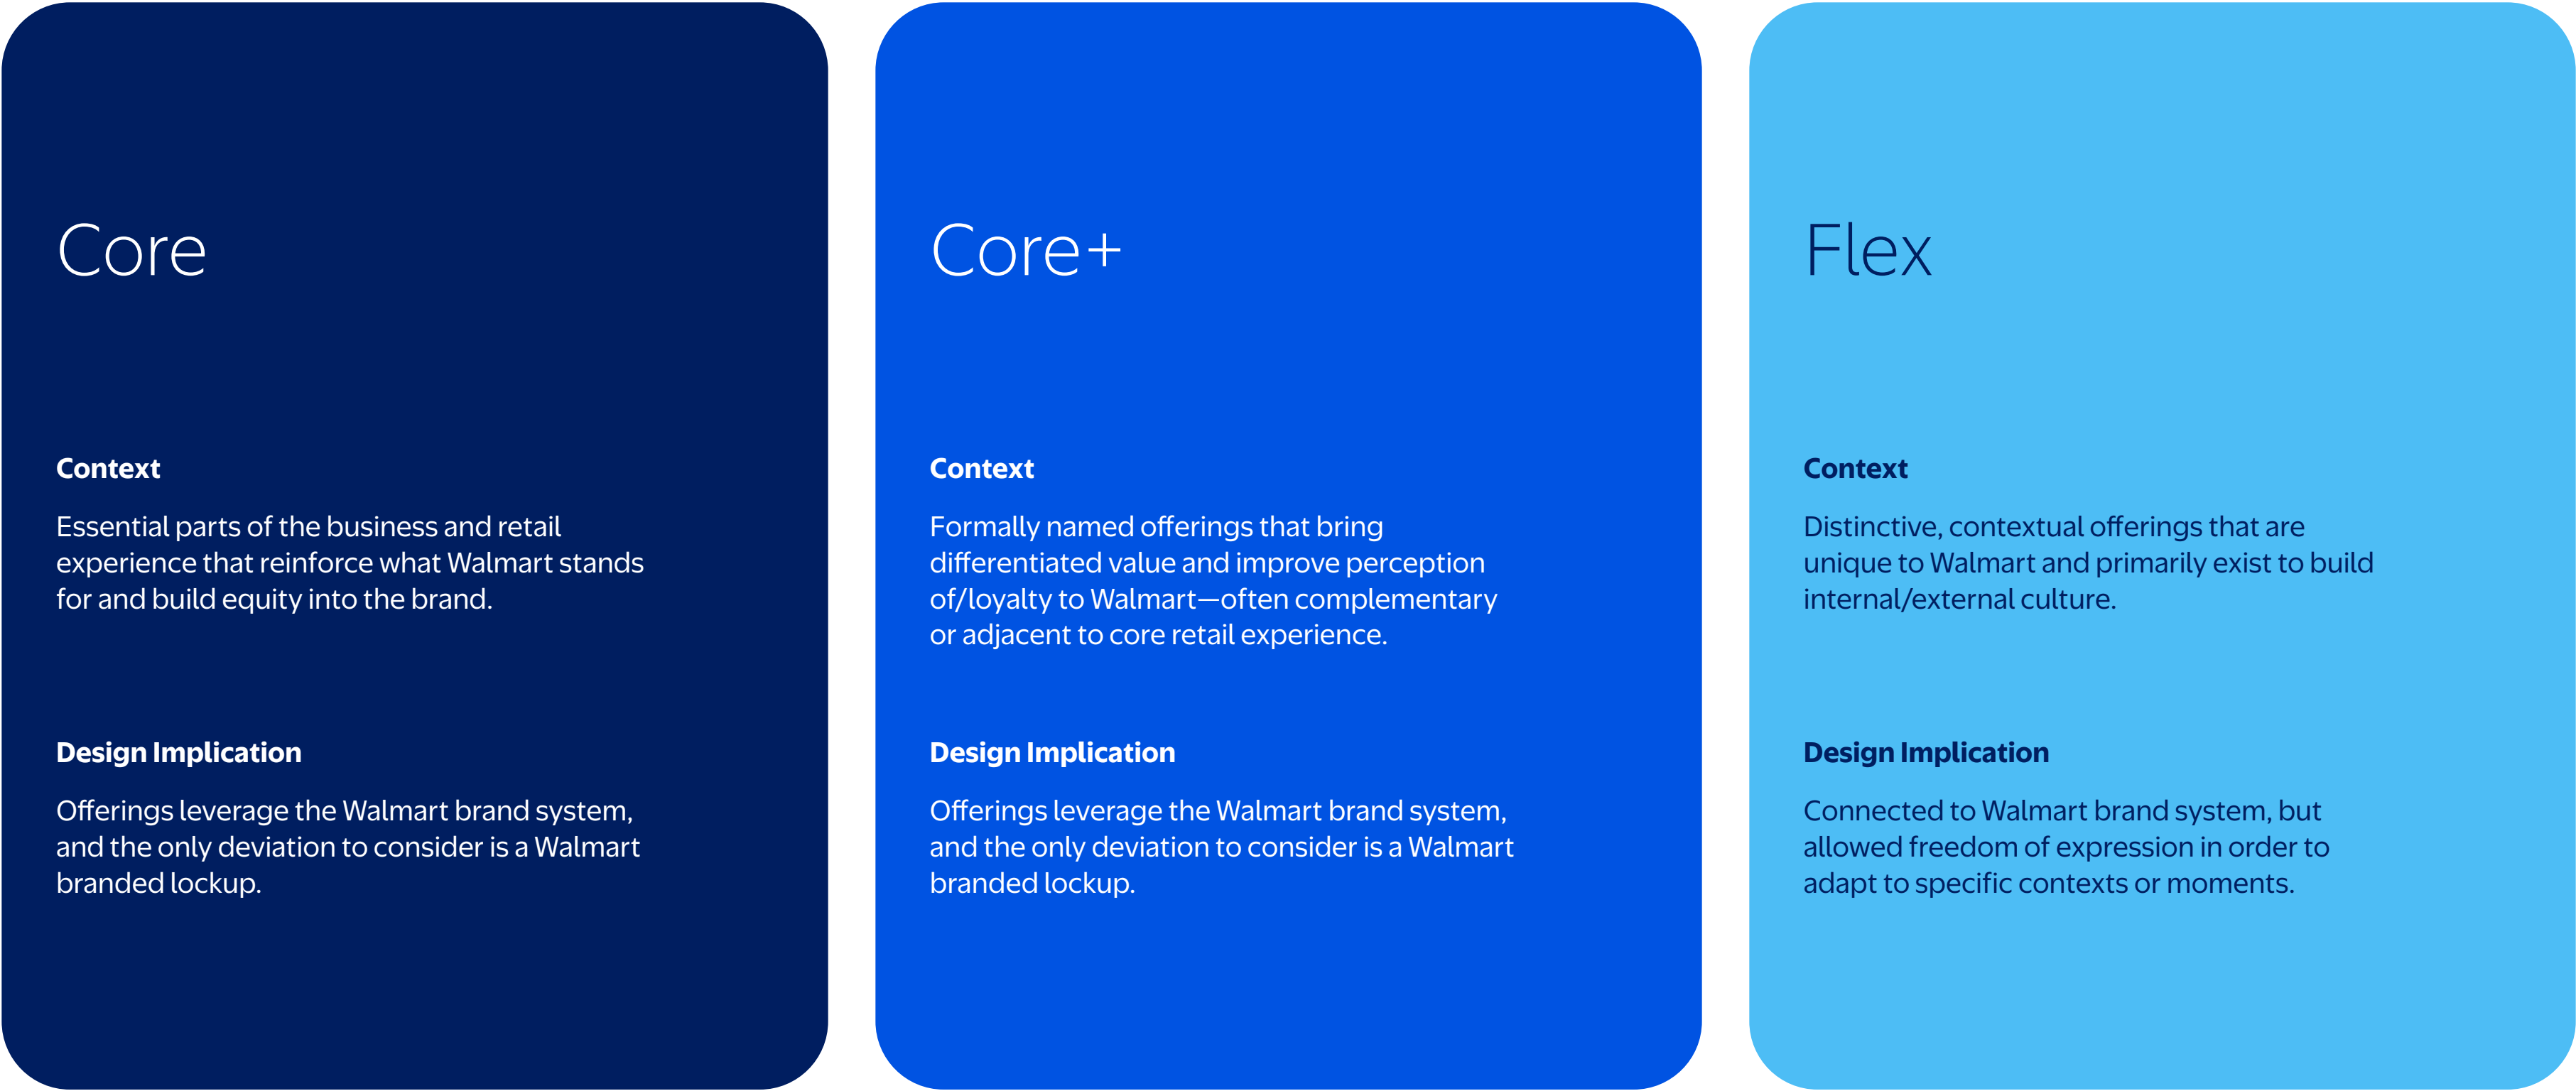

Audience Pillars

Our architecture is organized by audience opportunity: strengthening our Enterprise Brand while helping different stakeholders navigate to the right offering, quickly.

Design Flexibility

Within each pillar, we have three degrees of design flexibily.

Overview

Positioning

We are a people-led, tech-powered, omnichannel retailer dedicated to helping people save money and live better.

Pillars

Customer

This is our most externally facing pillar. From shopping in store to shopping online or seeing a TV commercial, this is our purest expression of Walmart and its core offerings.

Lockups & Logos

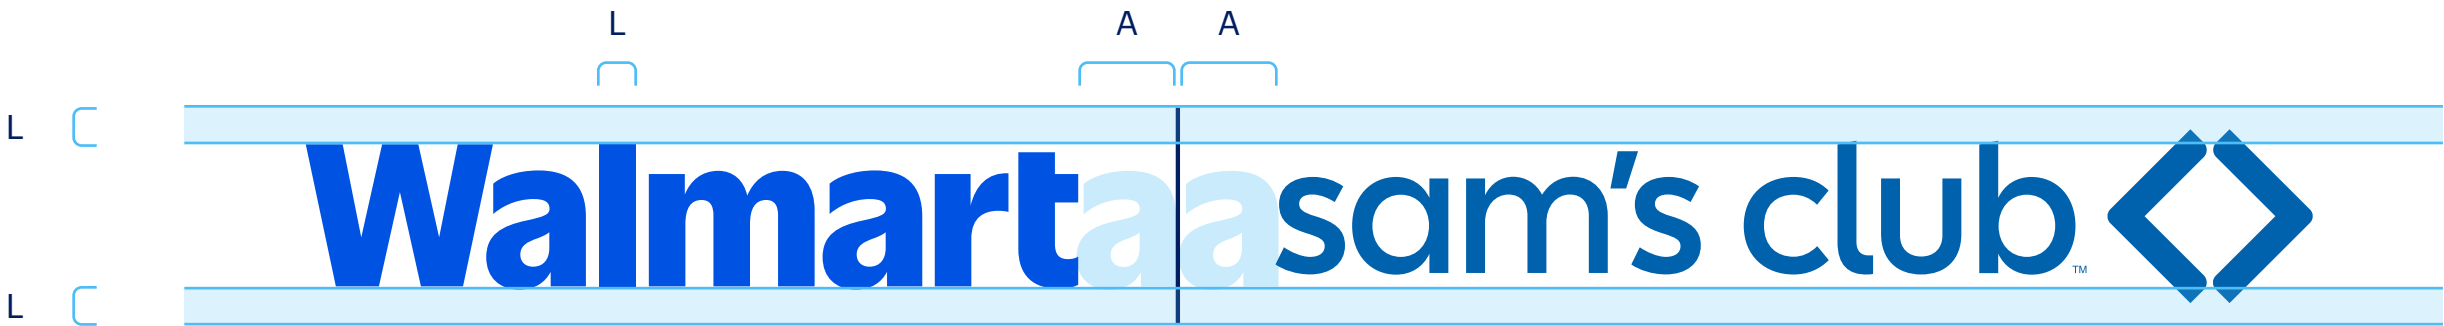

This section provides sample assets and construction guidelines for crafting new lockups and logos within Walmart's brand architecture.

It currently covers partnerships, consumer programs, internal teams, and internal events, with more to come in the future.

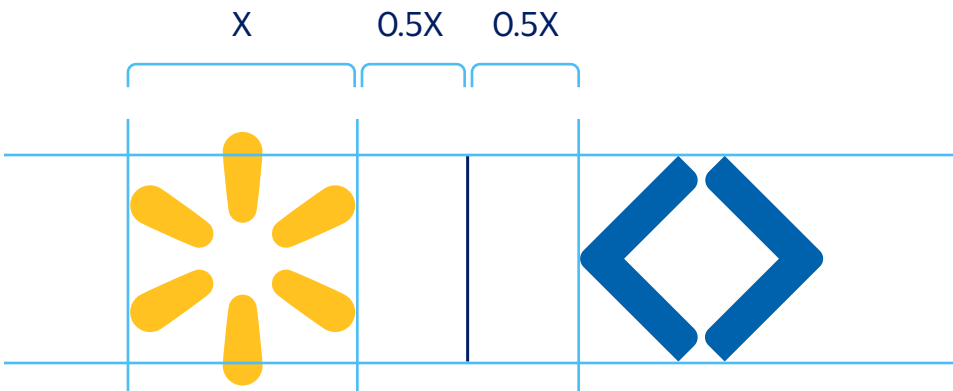

Walmart + Sam’s Club

Walmart and Sam’s Club share two partner lockups for use in co-branded communications. We usually stick to the standard version, but the shorthand version can be used in instances with limited space.

Standard

Shorthand

Consumer Programs

For Consumer Programs, this is our default lockup treatment. Lockups for certain consumer programs can be given a greater deal of flexibility and expression, depending on the need, its placement, and if deemed appropriate internally.

Always use our Walmart wordmark when creating lockups. Don't typeset “Walmart” in Everyday Sans.

Stacked

Single Line

Internal Teams

This is our lockup treatment for internal teams. All teams must follow this approach and may not create alternative bespoke lockups.

Always use our Walmart wordmark when creating lockups. Don't typeset "Walmart" in Everyday Sans.

Stacked

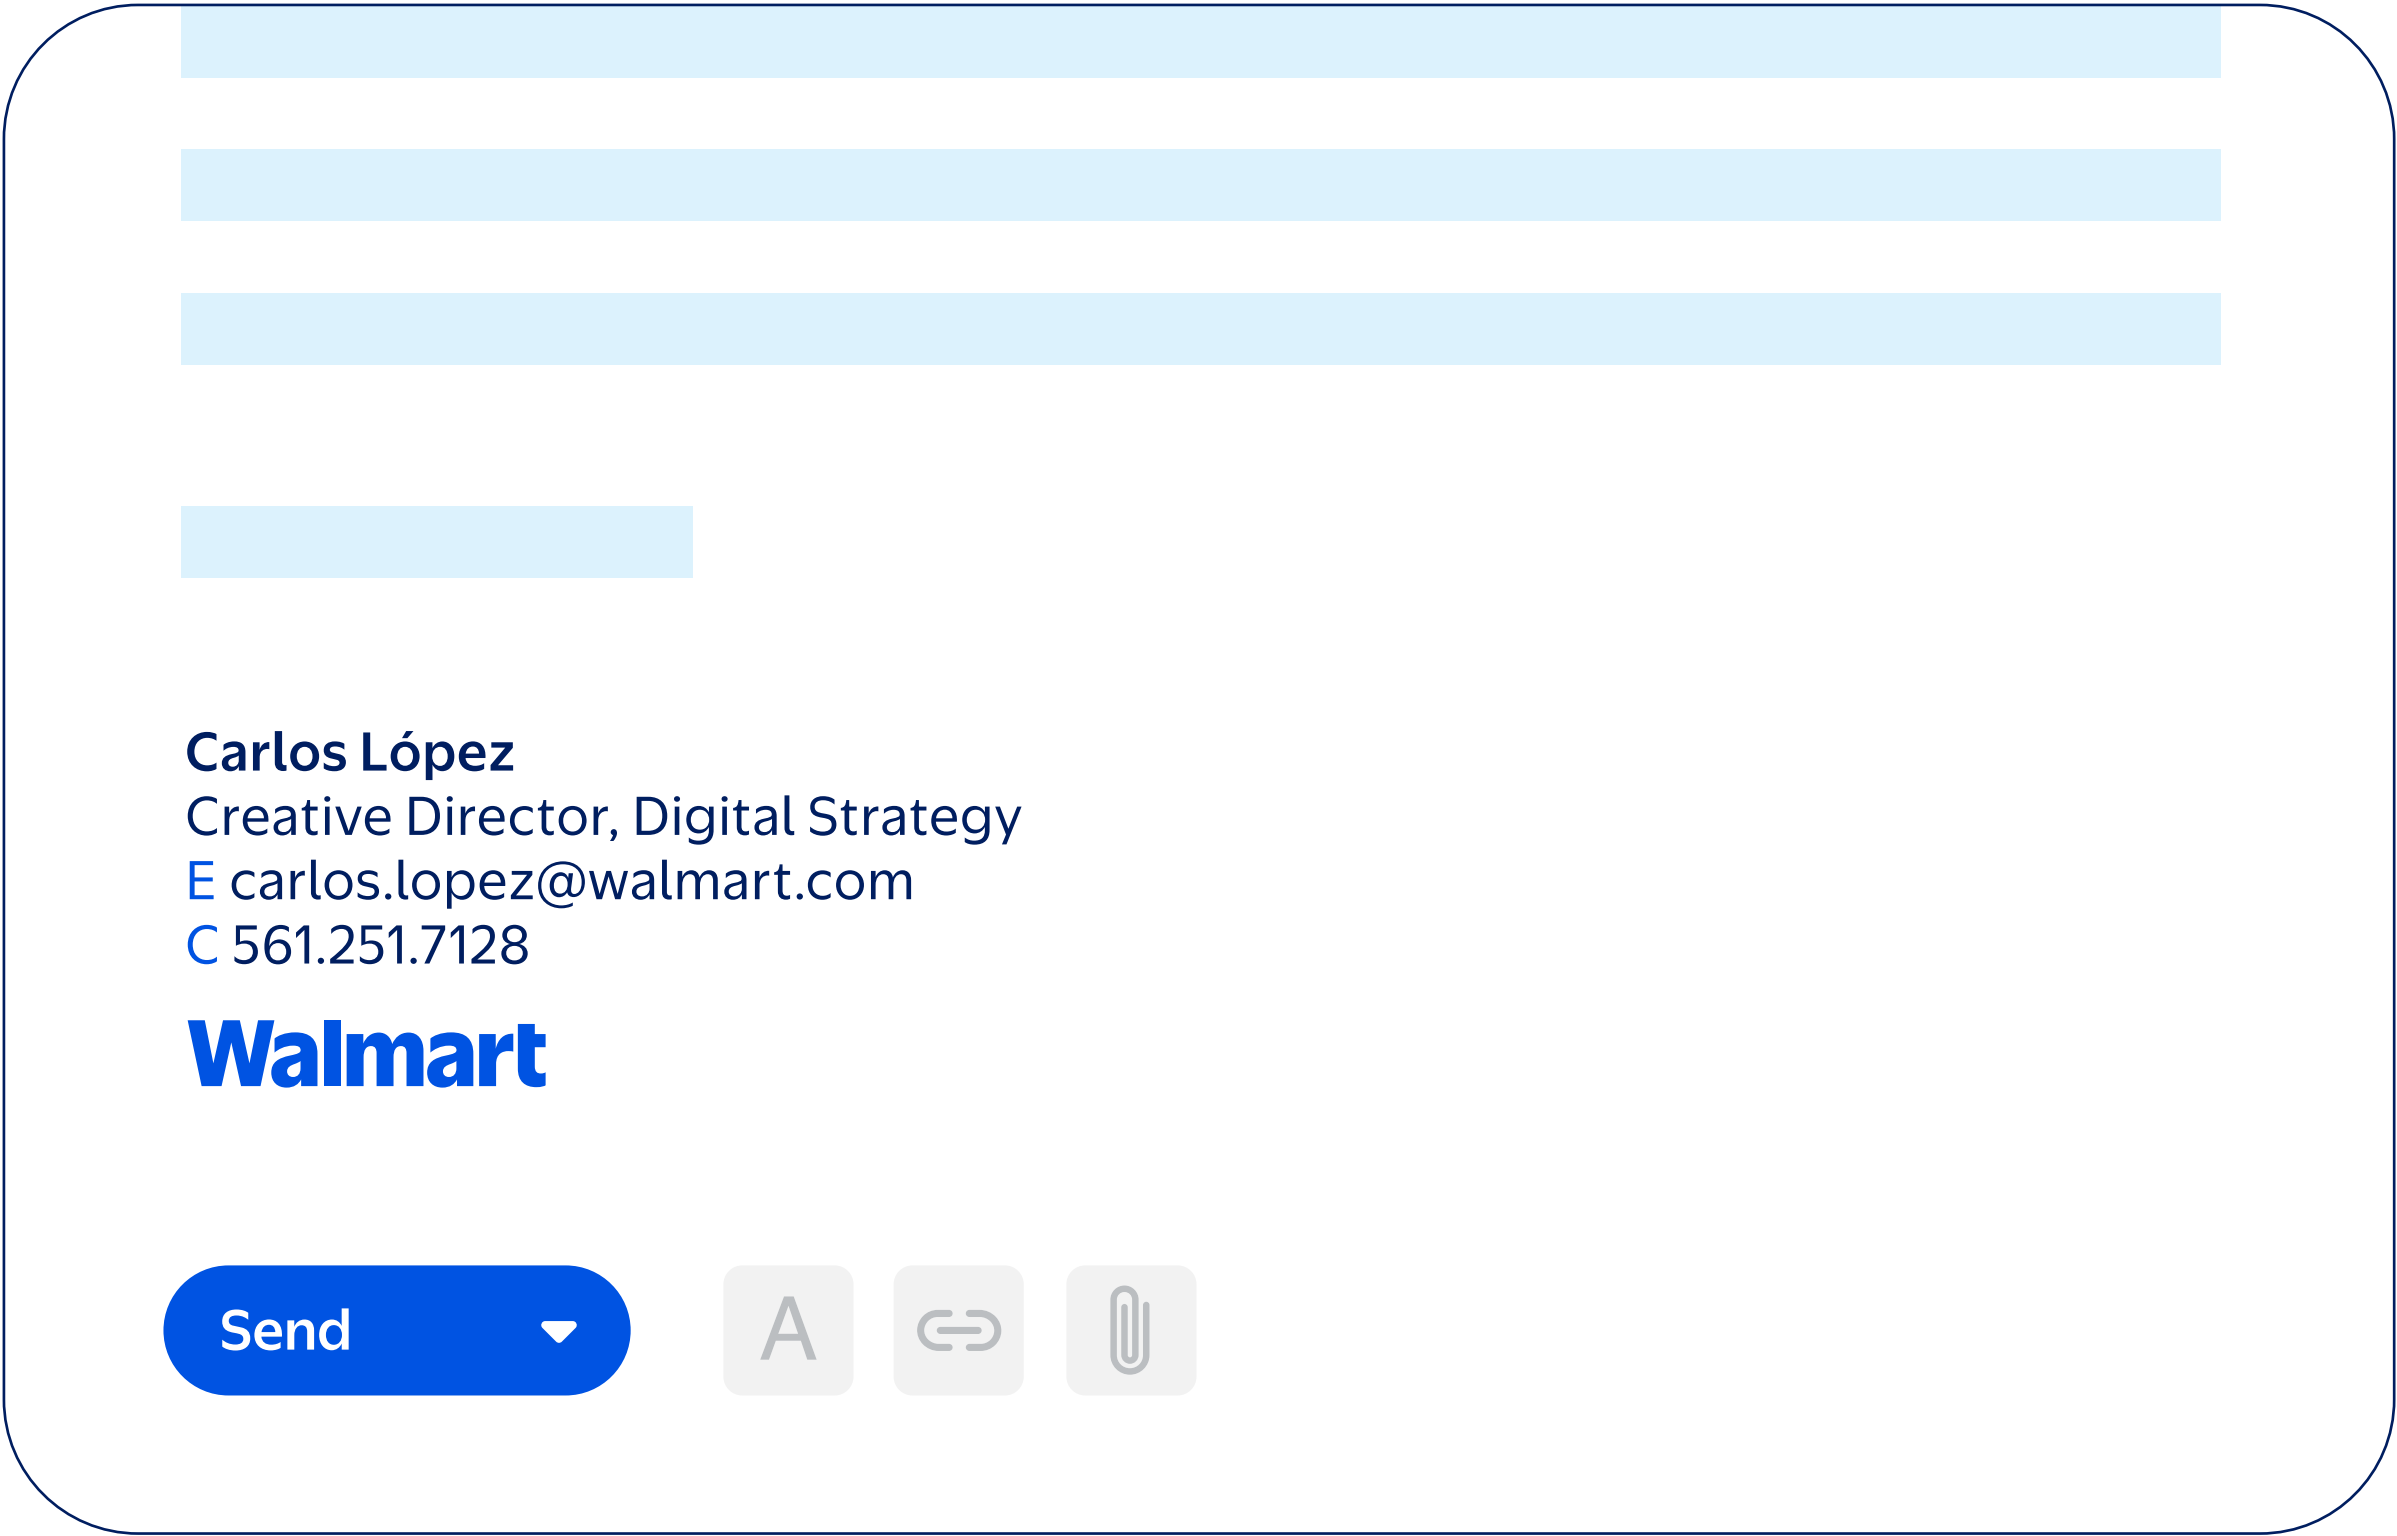

Single Line

Email Signatures

Walmart associates identify themselves using our standard email signature shown here. It features their name, title, contact information, and the Walmart wordmark.

Internal Events

This is our lockup treatment for internal events. When an event is led by two or more businesses, we recommend a partner lockup that is separate from the main event lockup.

Always use our Walmart wordmark when creating lockups. Don't typeset "Walmart" in Everyday Sans.

Spark

Spark

The Spark is our primary logo.

It's an iconic symbol synonymous with Walmart that represents our brand clearly and succinctly across all communications.

Spark

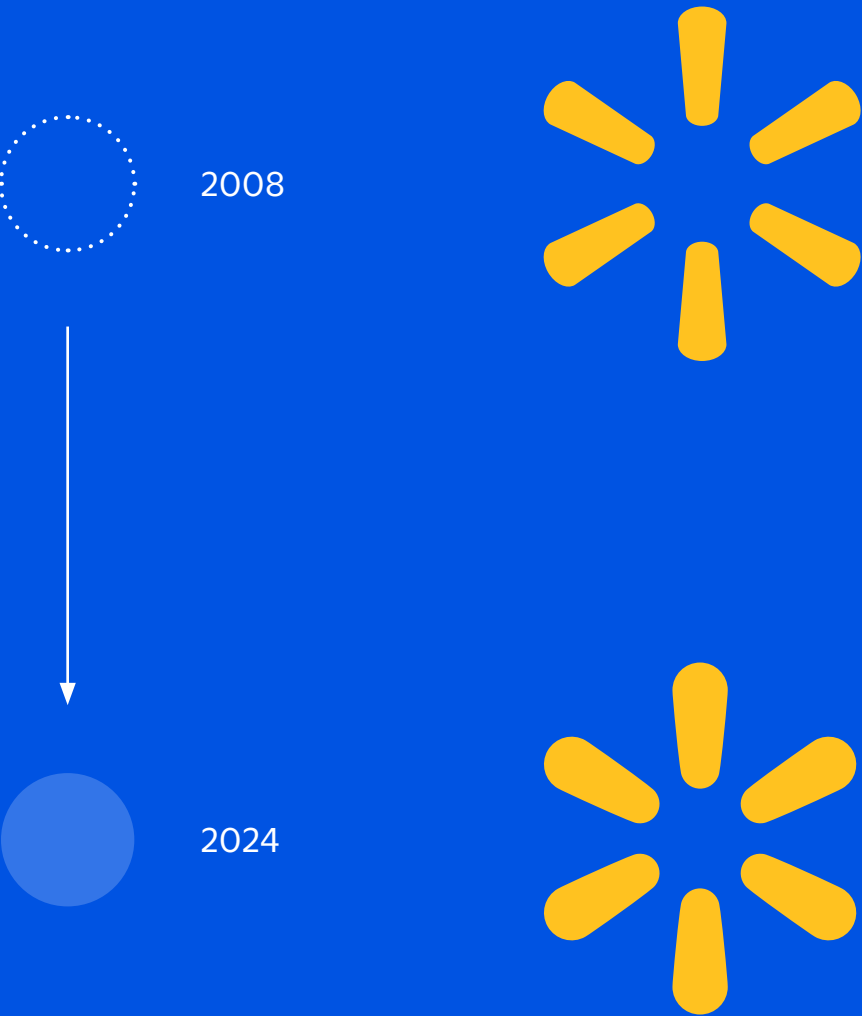

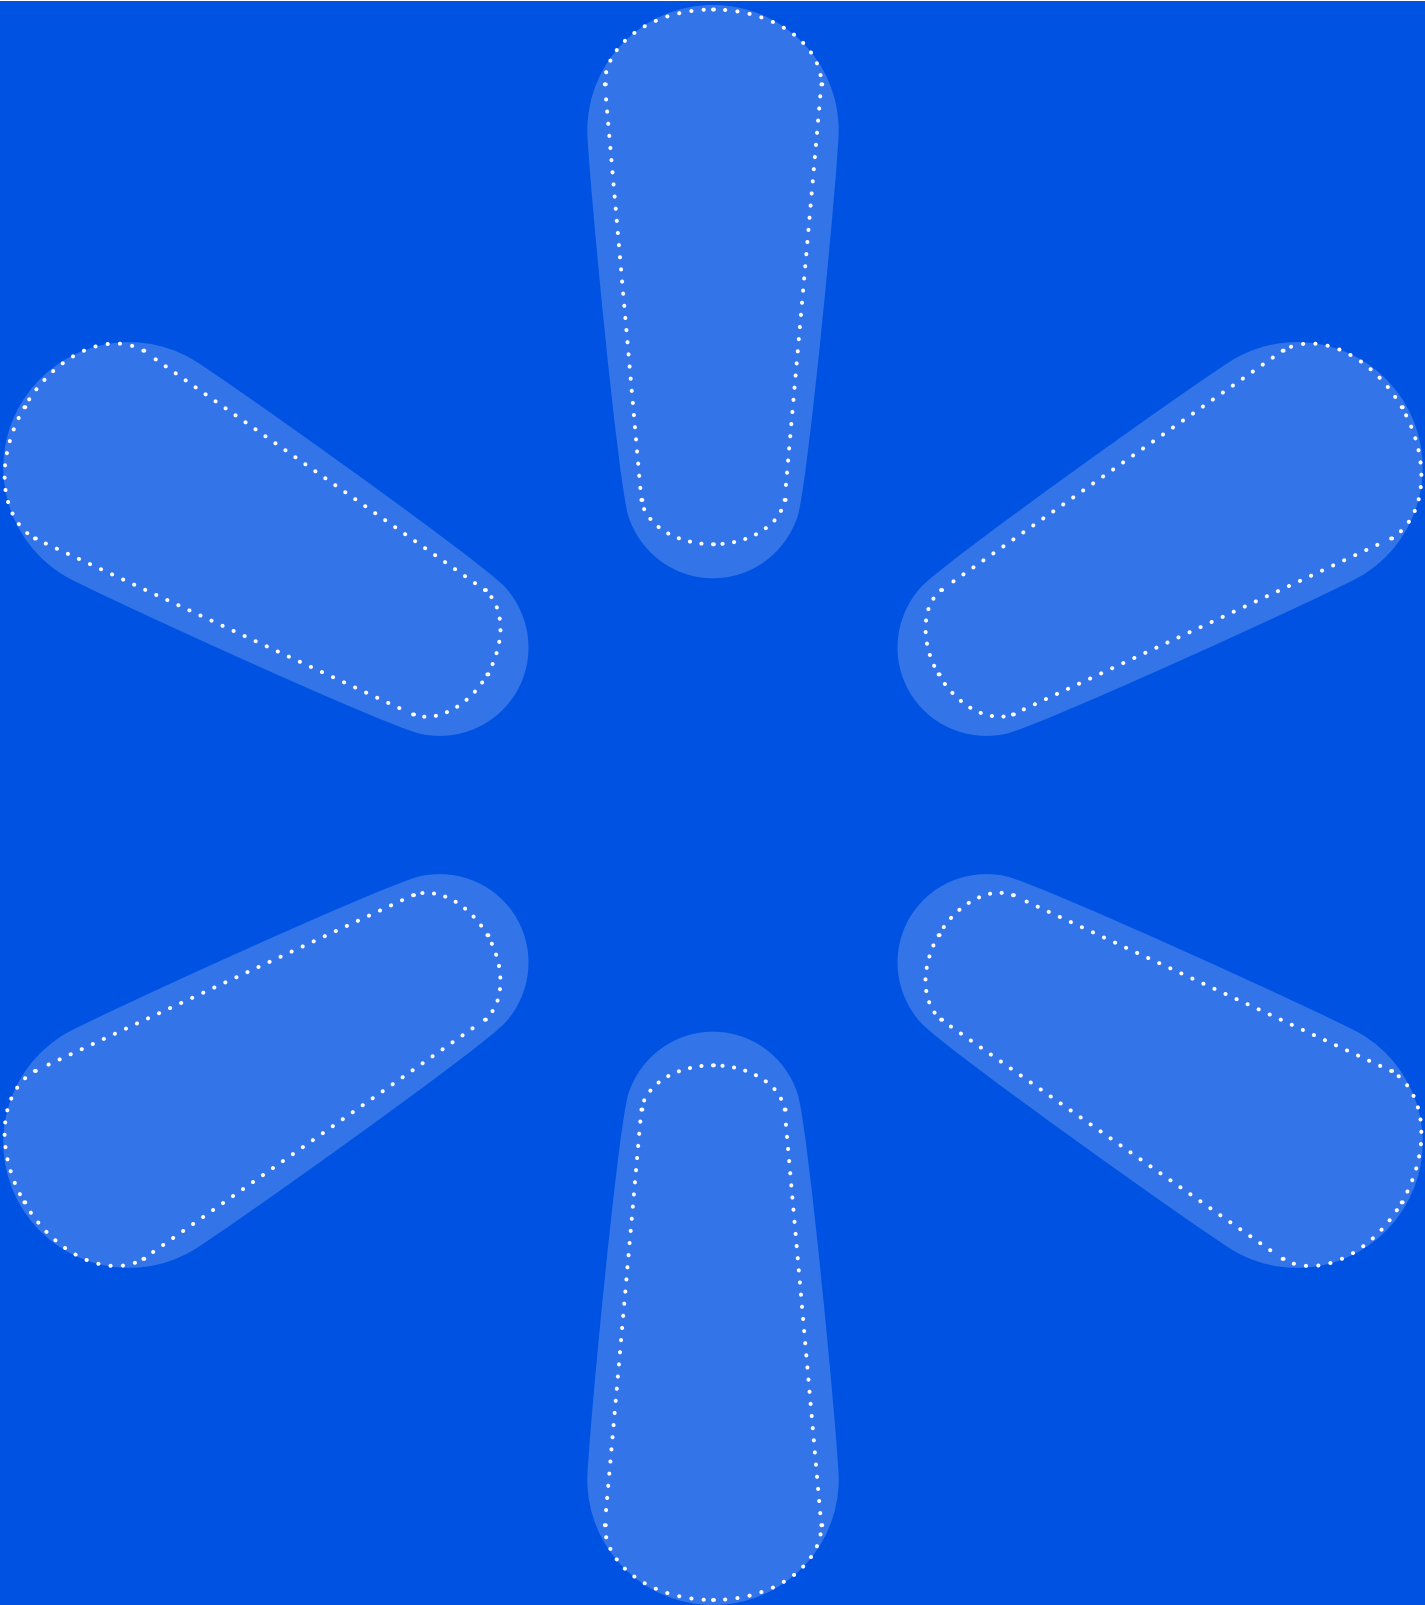

The Spark is our most iconic symbol and the quickest shorthand for the Walmart brand, radiating energy and optimism wherever it appears.

The Spark can appear as a standalone representation of Walmart, or together with our wordmark in the same composition. When they appear together, they behave as individual marks placed in opposing corners—**never** locked up as a singular logo.

Evolution

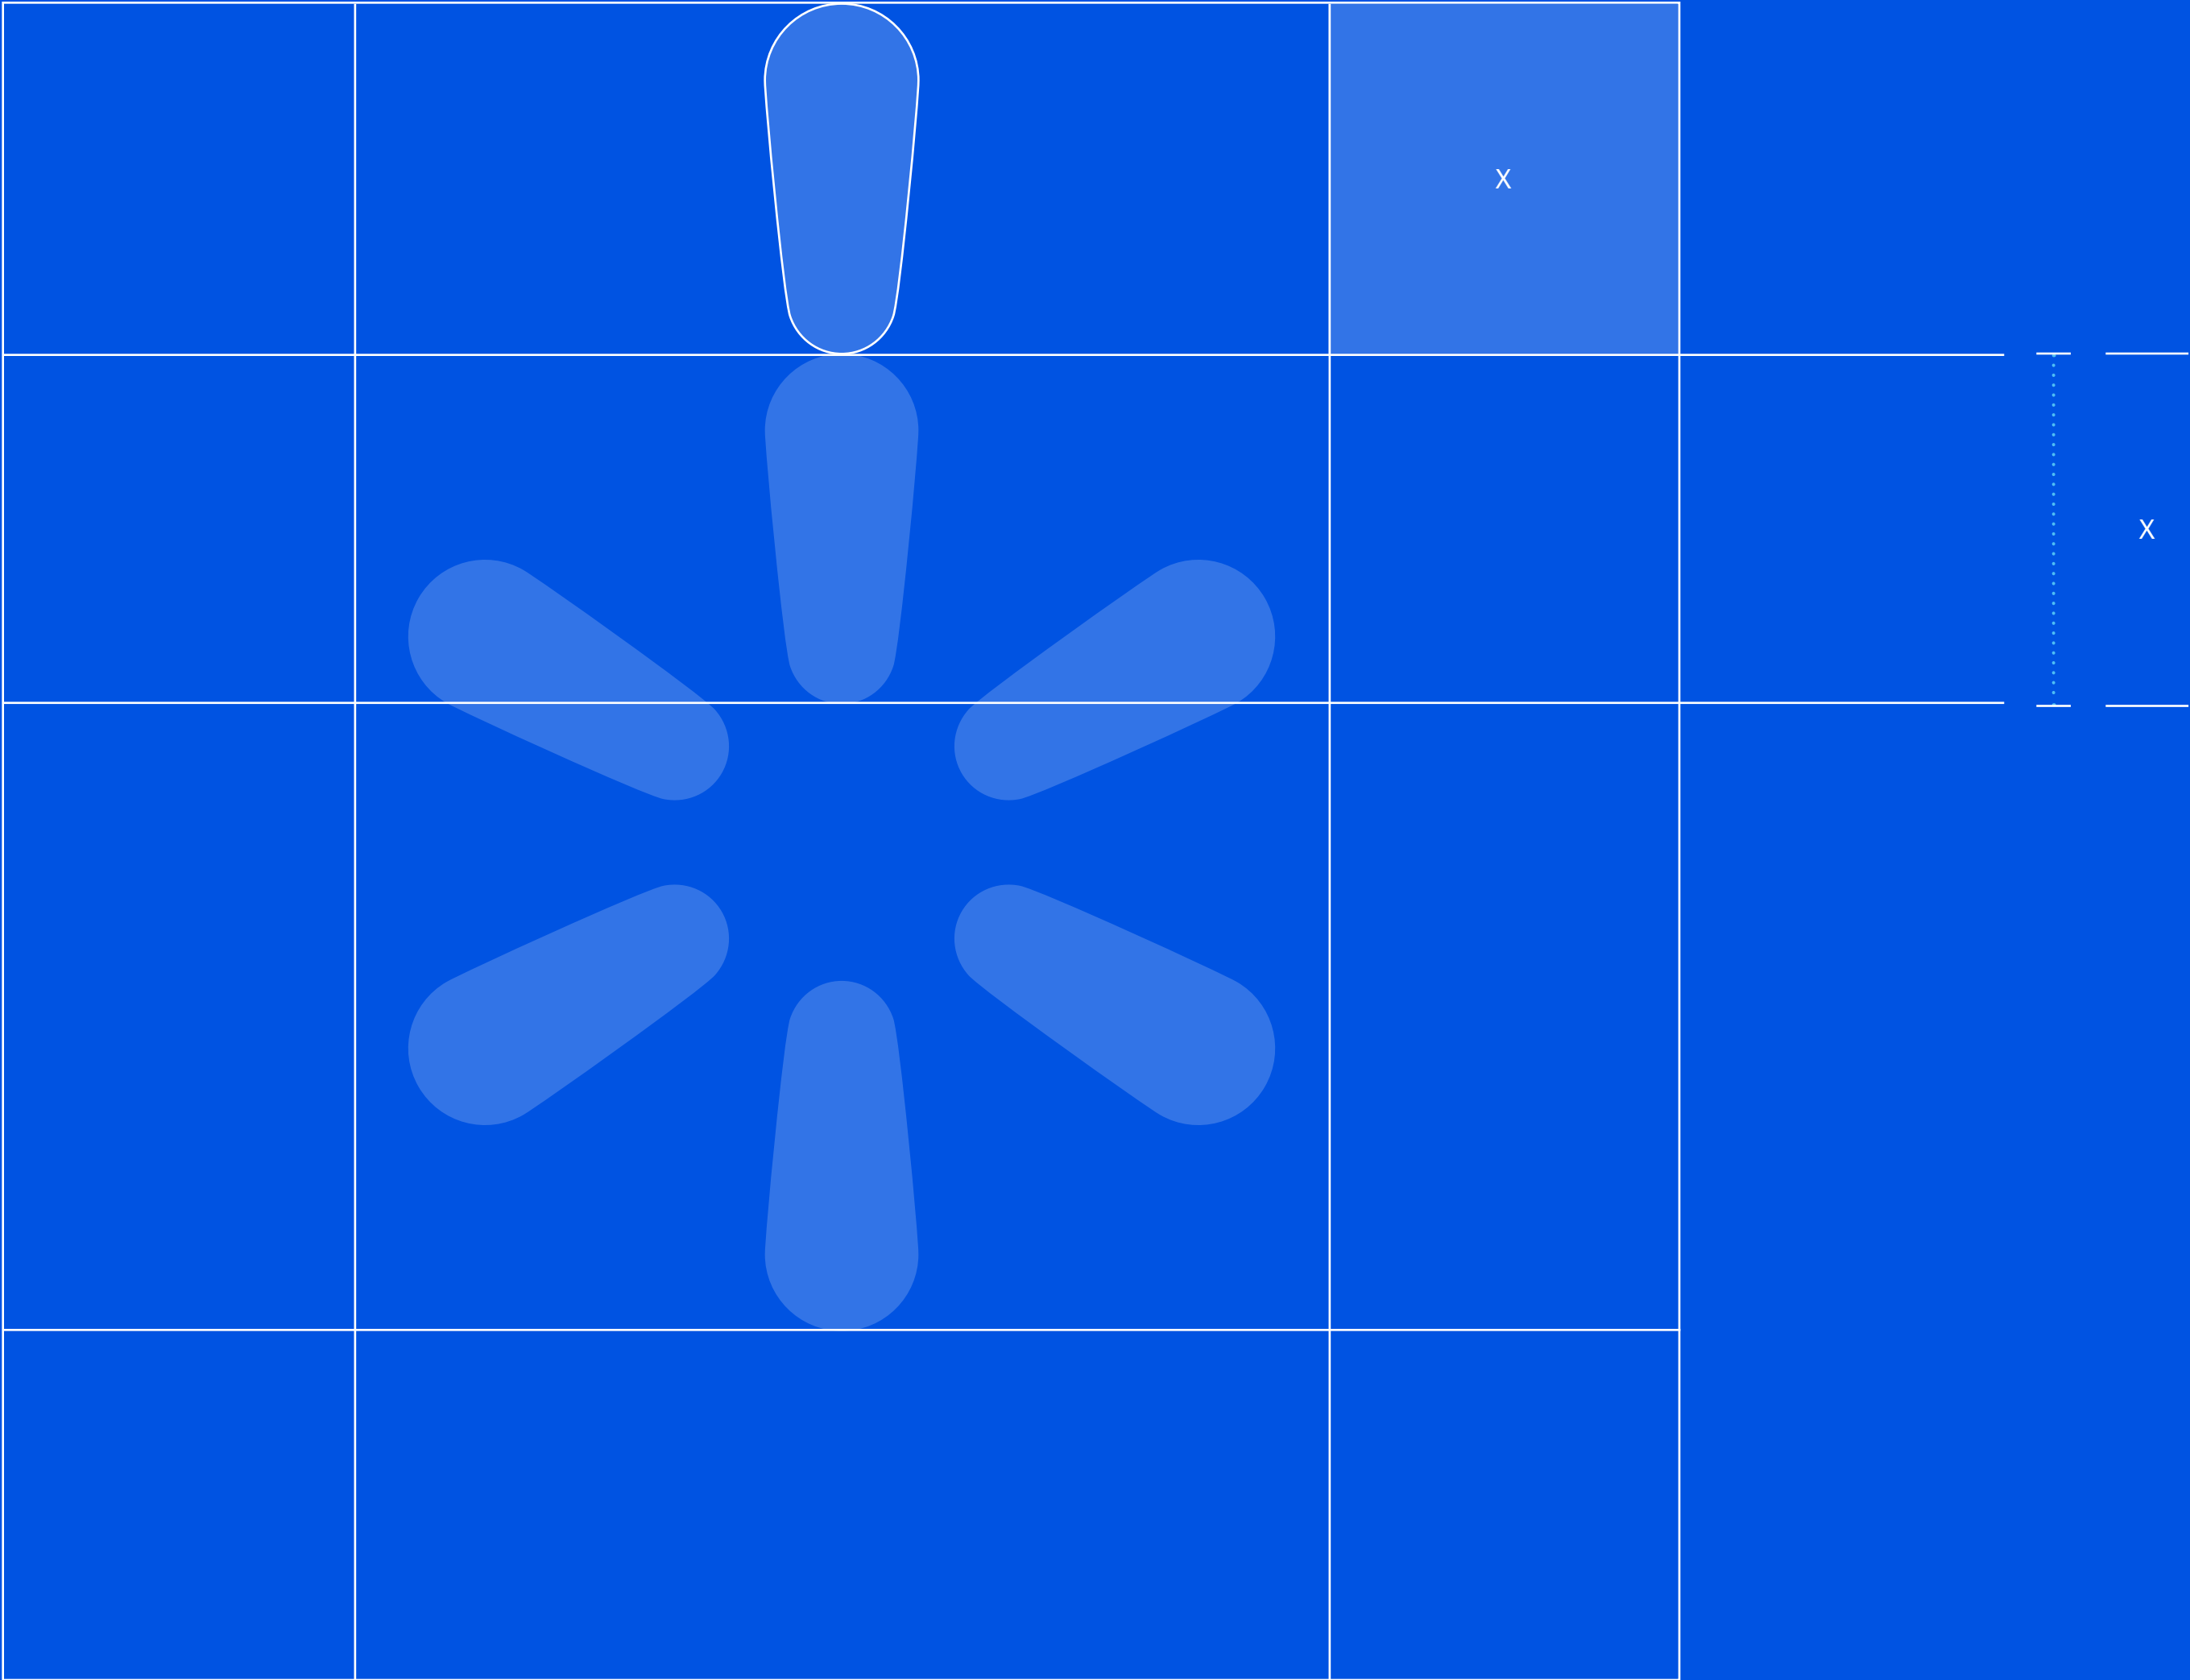

The original Spark was introduced to the world in 2008. Our new Spark has been refreshed and redrawn to appear bold at all scales, featuring organic curves that feel approachable and less rigid.

Clearspace

The clearspace of our Spark is equal to height of a single vertical “Sparklet”. This establishes a defined boundary to ensure it’s free from any surrounding elements, text, or graphics.

This space maintains the Spark’s visual integrity and impact by preventing any interference or crowding from other design elements.

Primary Color Usage

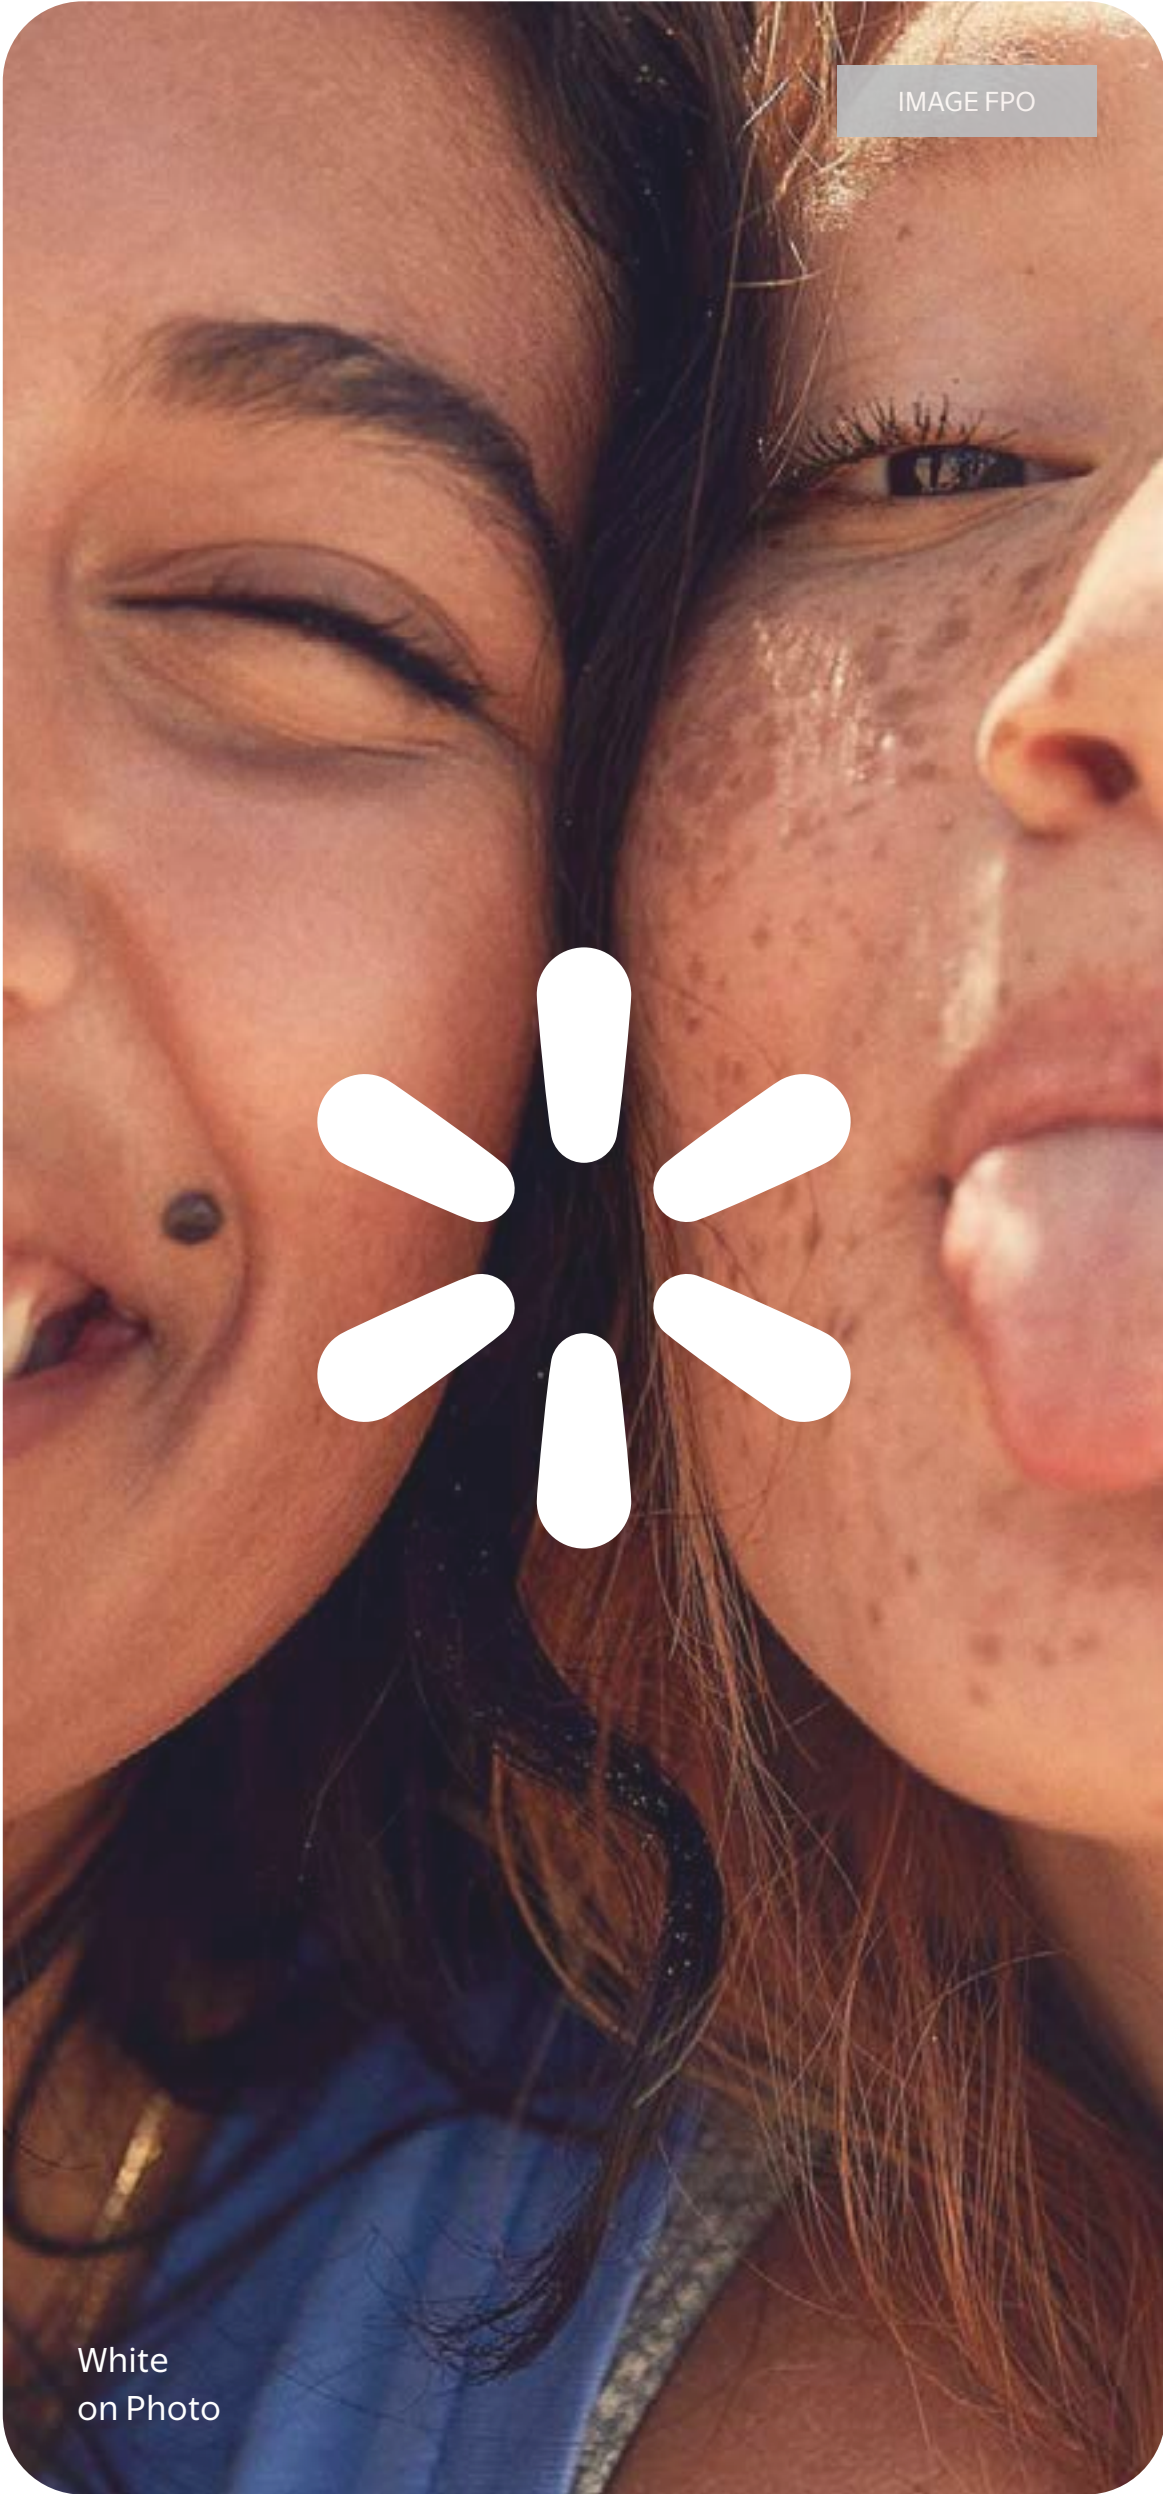

Whenever possible, our Spark appears in Spark Yellow against a True Blue or White background. These are our most iconic and recognizable colorways.

In small-scale digital applications, our yellow Spark can also be used on a Bentonville Blue background to improve contrast and optimize legibility.

Secondary Color Usage

If our yellow Spark does not provide enough visual contrast against a given background, the Spark can appear in White. This is primarily used in applications where the Spark is presented at small sizes in a supporting role to larger imagery or messaging. We don't use the Spark in any colors beyond Spark Yellow or White.

Minimum Sizing

Our redrawn Spark is bold enough to maintain visual integrity across all sizes and formats, from large physical signage to digital favicons.

To ensure legibility, we don't use our Spark at sizes smaller than 16 pixels high in digital applications or 0.25 inches high in print. Note that our digital minimum is slightly smaller than our print minimum, as it accommodates the use of our Spark as a favicon.

Note:

Sparks here are not shown to scale. Refer to pixel and inch measurements for proper sizing.

Print Minimum Size

Digital Minimum Size

0.25 INCH

16 PIXELS

App Icon

Walmart’s app icon features our yellow Spark on a True Blue background. Our standard clearspace around the Spark is equal to the width of one Spark segment.

Holding Shapes

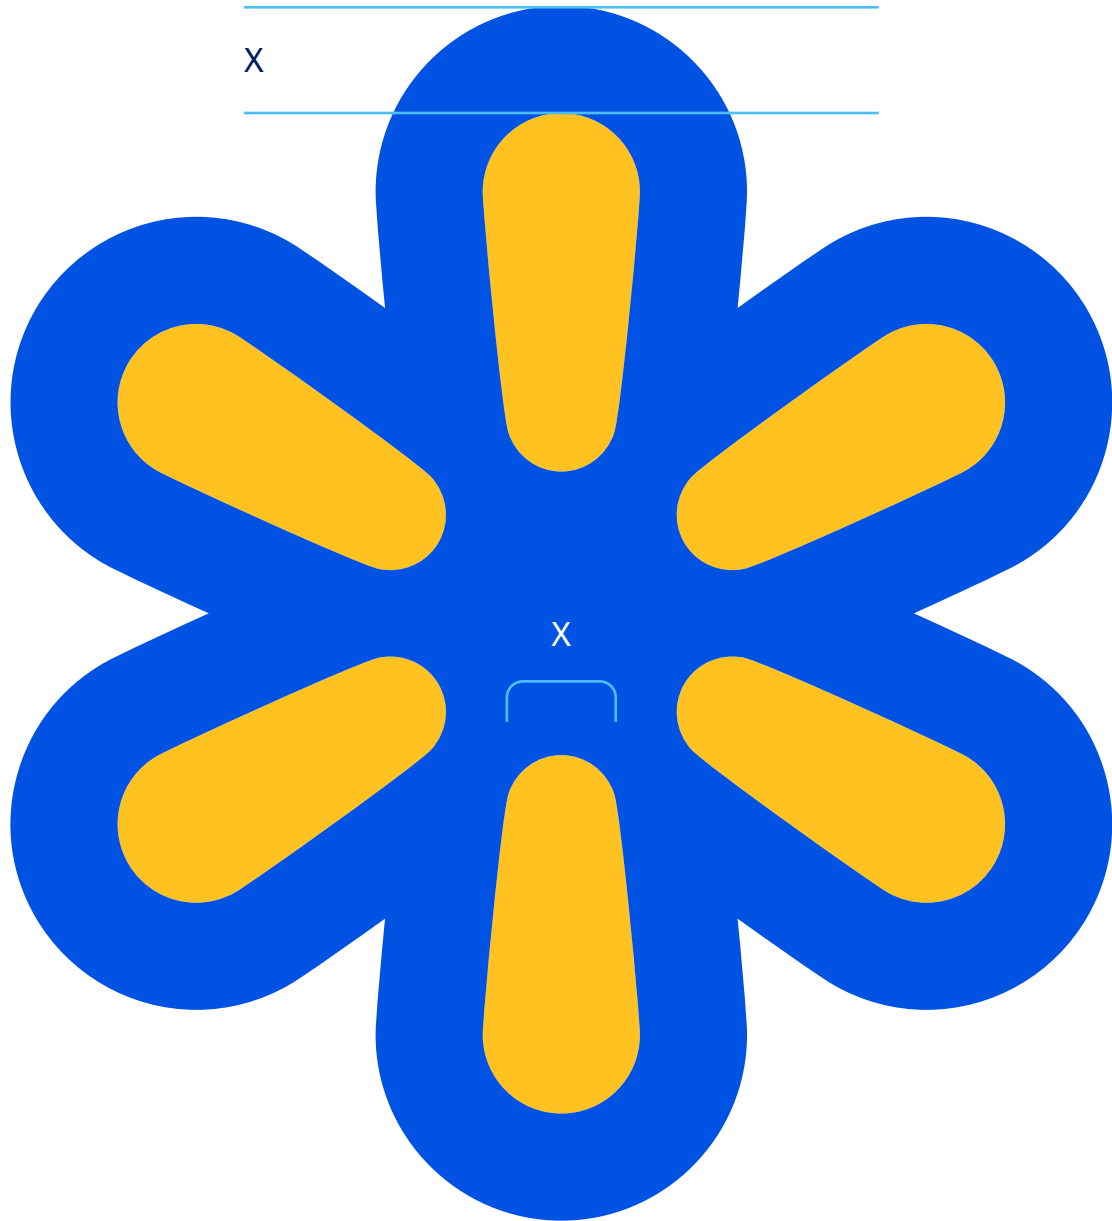

When creating physical representations of our Spark, such as pins, patches, stickers, or other merchandise that require our logo to be die-cut or molded from a substrate, we can utilize one of the holding shapes shown here.

These graphics are for limited use and should only be employed in the instances outlined above. Follow the construction guidance to the right for a consistent and correct appearance.

Don't use any other holding shapes for the Spark, aside from when it's depicted in our app icon.

Form-Fitting Border

Border width is equal to narrow end of each Sparklet.

Circle

Clear space is equal to the width of one Sparklet.

Don'ts

- 1
- Don't** use the Spark in unapproved colors.
- 2
- Don't** use a partially transparent Spark.
- 3
- Don't** separate or remove pieces of the Spark.
- 4
- Don't** use individual Sparklets for any purpose.
- 5
- Don't** crop off the edges of the Spark.
- 6
- Don't** use multiple colors on the Spark.
- 7
- Don't** create a pattern out of the Spark.
- 8
- Don't** apply our Waterfall to the Spark.
- 9
- Don't** tilt or rotate or skew the Spark.

Wordmark

Wordmark

Our wordmark is Walmart's secondary brand logo, inspired by Sam Walton's iconic trucker hat from the cover of his autobiography "Made in America."

It's a distinct and ownable reinterpretation of a core piece of Walmart's visual legacy, adapted for modern use.

Wordmark

Our wordmark is our secondary brand mark, used in conjunction with our Spark. While our Spark can be used as a standalone logo, our wordmark is **not** used without our Spark present in the same application. In layouts with limited space, such as a narrow banner ad, our wordmark does not need to be included.

Its letterforms are drawn to match the Bold weight of our proprietary typeface, Everyday Sans, for consistency and equity across our brand system.

Note:

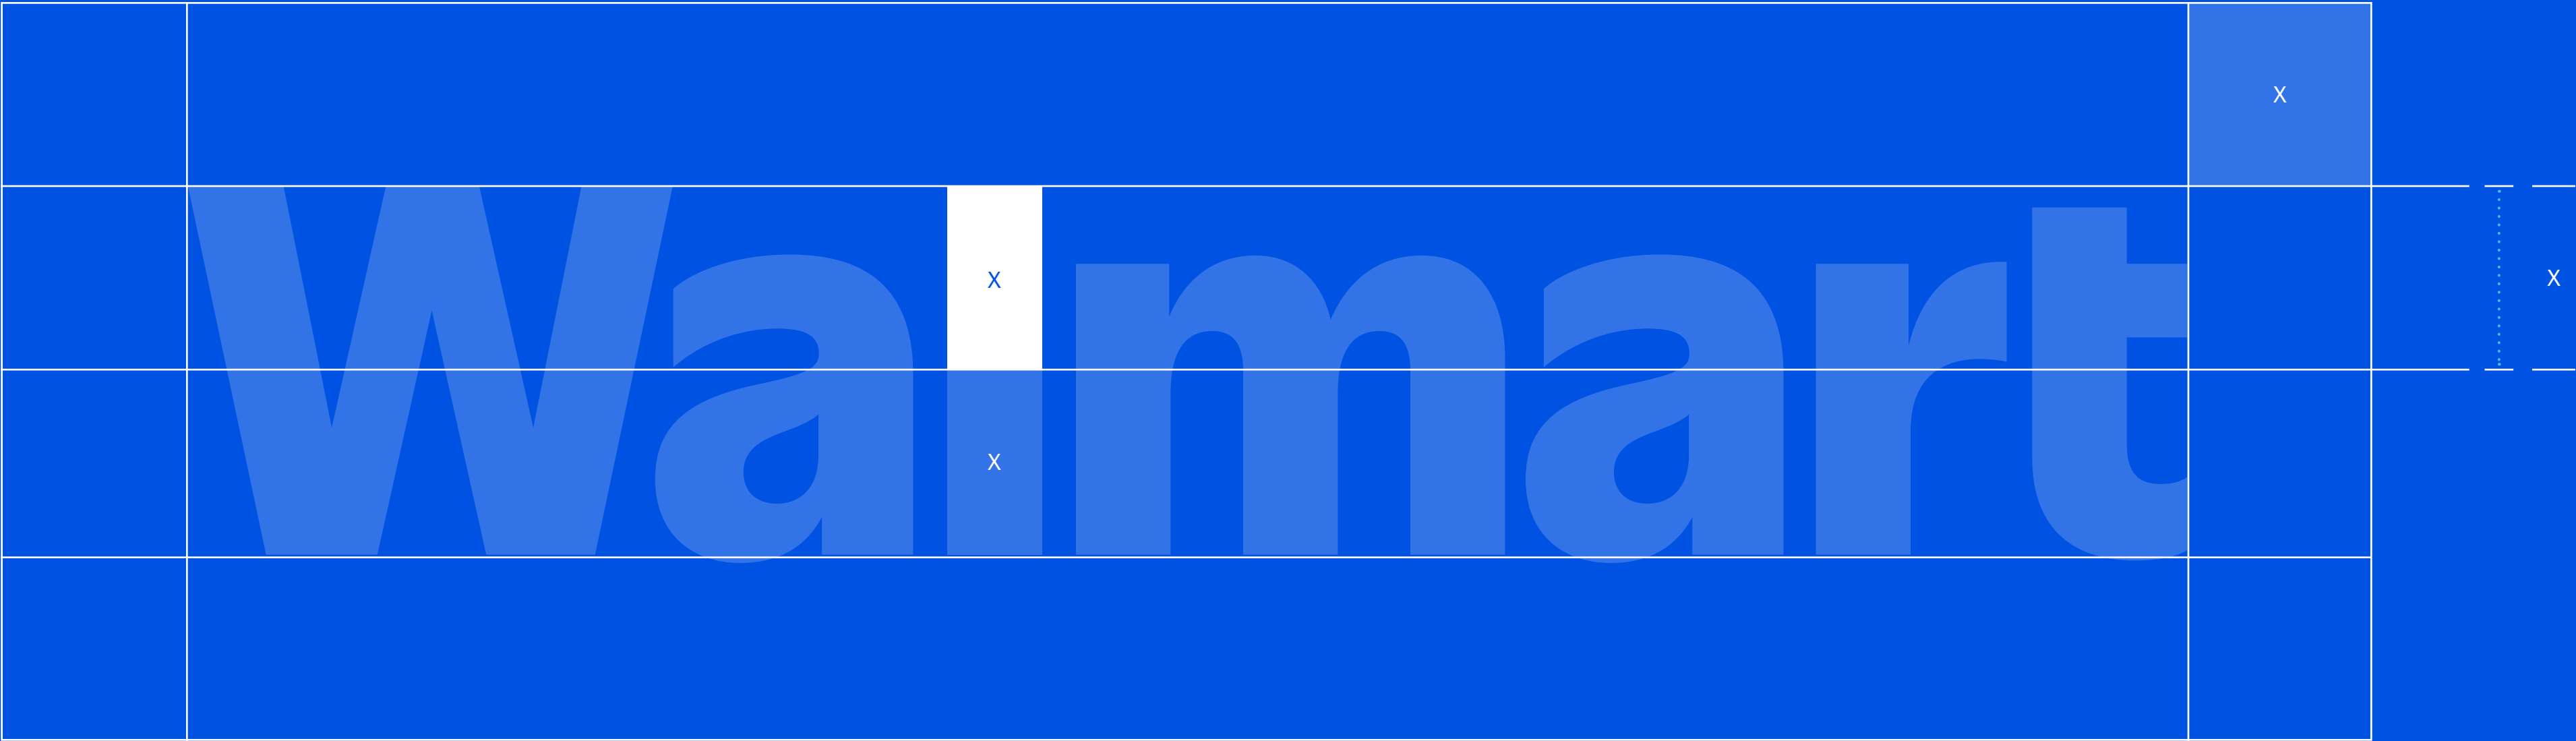

Our wordmark is a custom piece of artwork, not just the word “Walmart” typeset in Everyday Sans. It must be used as shown here and never altered or recreated.

Walmart

Clearspace

The clearspace of our wordmark is equal to half the height of the letter “L”. This establishes a defined boundary to ensure it’s free from any surrounding elements, text, or graphic clutter.

This space serves to maintain the wordmark’s visual integrity, legibility, and impact by preventing any interference or crowding from other design elements.

Primary Color Usage

Our wordmark primarily appears in True Blue on White backgrounds or in White on True Blue backgrounds. These are our most iconic and universal colorways and should be used to represent our brand wherever possible.

Walmart

True Blue on White

Walmart

White on True Blue

Secondary
Color Usage

When applying our wordmark over dark backgrounds or photography, we use White for maximum contrast and legibility.

Note:

In the case of photographs with lighter backgrounds, our True Blue wordmark may provide better contrast—please use your best judgment to ensure legibility.

White on Bentonville Blue

White on Photo

IMAGE FPO

Minimum Sizing

Our system includes two variations of our wordmark for use at different scales. Our standard wordmark is our default version and should be used for most sizes and placements.

Our small-use wordmark is reserved for sizes less than 0.25 inches (or 24 pixels) in height. This wordmark is a unique piece of art that has been optimized for legibility at small scales. It is **not** interchangeable with our standard wordmark and should be used with great care. If in doubt, always opt for our standard wordmark.

Walmart

Standard Minimum Size

STANDARD

0.25 INCH
24 PX

Walmart

Small-Use Minimum Size

SMALL USE

0.15 INCH
14 PX

Note
Wordmarks here are not shown to scale. Refer to pixel and inch measurements for proper sizing.

Holding Shapes

When creating physical representations of our wordmark, such as pins, patches, stickers, or other merchandise that require our logo to be die-cut or molded from a substrate, we may utilize one of the holding shapes shown here.

These graphics are for limited use and should only be employed in the instances outlined above. Follow the construction guidance to the right for a consistent and correct appearance.

Do not use any other holding shapes for our wordmark including circles, squares, or ovals.

Form-Fitting Border

Border width is equal to the interior arch of the m.

Rounded Rectangle

Clear space is equal to the width of the t.

Don'ts

- 1 **Don't** use the wordmark in unapproved colors.
- 2 **Don't** make the wordmark partially transparent.
- 3 **Don't** use low-contrast color combinations.
- 4 **Don't** crop off pieces of the wordmark.
- 5 **Don't** rotate the wordmark.
- 6 **Don't** outline the wordmark.
- 7 **Don't** lock up the Spark to the left of the wordmark.
- 8 **Don't** lock up the Spark above the wordmark.
- 9 **Don't** lock up the Spark to the right of the wordmark.

Color

Color

Our color palette provides distinctiveness and differentiation through the consistent use of Walmart's most iconic and recognizable colors: True Blue and Spark Yellow.

Color Palette

Our primary palette are the colors that are most instantly recognizable as Walmart: True Blue, Spark Yellow, and White.

Our accent blues bring warmth and depth to our brand identity. Bentonville Blue is used for typography, while Everyday Blue and Sky Blue help with hierarchy in presentations, graphs, infographics, and charts.

Color Pairings

When combining different pieces in a layout, we use the combos shown here for consistency and legibility.

Over solid backgrounds, we prefer our iconic and recognizable colorways. These should be used for most communications.

Over photography, we default to using White type and White logos. In the case of photos with lighter backgrounds, our True Blue wordmark and yellow Spark can provide better contrast—please use your best judgment for legibility.

***Note:**

True Blue type is reserved for high-impact, low-content applications such as video end cards, supers, or signage. We don't use True Blue for applications with small, dense, or detailed copy.

Solid Backgrounds

Photo Backgrounds

Waterfall

In some instances, we apply a waterfall treatment that organizes our secondary palette of blues (plus White) into a gradient. This treatment can be used to help establish hierarchy when organizing information into charts, tables, or graphs.

2 Sky Blue

3 Everyday Blue

4 True Blue

5 Bentonville Blue

Web Accessibility

The Web content Accessibility Guidelines (WcAG) are standards that help make the internet accessible to everyone, including people with disabilities. With color, they tell us the amount of visual contrast required between a piece of text and the background to maintain legibility for users with visual impairments.

When picking colors for web, we aim to comply with WcAG 2.0 standards for both large and normal text sizes. Large text is 14pt (18.66px) when set in a bold weight, or 18pt (24px) when set in a lighter weight. Any text beneath these sizes is considered normal text.

We always want to achieve a AAA rating, which is the highest possible compliance level (noted in green). True Blue text is not AAA compliant at small sizes and should be avoided.

Don'ts

- 1 **Don't** use the wordmark in unapproved colors.
- 2 **Don't** use the wordmark at partial opacity.
- 3 **Don't** use low-contrast colors for the wordmark.
- 4 **Don't** use text colors that inhibit legibility.
- 5 **Don't** use text colors that cause visual discomfort.
- 6 **Don't** combine too many type colors in layout.
- 7 **Don't** recolor individual sparklets.
- 8 **Don't** use the Spark in unapproved colorways.
- 9 **Don't** use a yellow Spark on low-contrast colors.

4.4

Everyday Sans
Typesetting
Value & Pricing

Typography

Everyday Sans

Everyday Sans is our own type family designed as an extension of our Walmart wordmark.

It includes a wide range of weights and styles to maximize the function and flexibility of our system.

Everyday Sans

Everyday Sans is a custom type family crafted exclusively for Walmart. Utilitarian yet beautiful, it's designed to carefully balance expression with function and is used in all brand expressions.

Save
money.
Live
better.

Characteristics

Everyday Sans' shapes are sleek and modern while retaining some unique quirks and characteristics:

- 1 Vertical terminals
- 2 Teardrop counter shapes
- 3 Strong diagonal legs
- 4 Elongated circular forms

Weights

Everyday Sans includes five standard weights ranging from Light to Black to provide flexibility across a range of communications.

Black is reserved for special use cases including pins, patches, swag, and limited campaigns. It is not to be used for routine marketing or internal materials.

Light

Regular

Medium

Slab serifs to ensure narrow characters occupy the same width as wider characters.

Typesetting

Typesetting is the process of selecting and arranging our fonts with consistent sizing, spacing, and alignment principles.

This section outlines our standard typographic hierarchy and demonstrates use cases for each member of our font family.

Hierarchy

1 Extra Large Headline

Extra large headlines do not appear in all standard documents, appearing in places like presentation covers, divider slides or physical signage.

Extra large headlines are set in Everyday Sans Headline Light. If you do not have access to this font, use Everyday Sans Light.

2 Headline

Everyday Sans Medium is used for all external-facing headlines, set in title case for everyday documents or sentence case for comms.

3 Subhead

Everyday Sans Medium is used for all standard subheads, set in title case for everyday documents or sentence case for comms.

4 Body Copy

Use Everyday Sans Regular for body text, captions, and other detailed info.

4 Body copy

Scale

Size, scale, and placement are all important. To ensure clear hierarchy, follow the **50/50 rule**: each level of type shouldn’t be bigger than 50% of its larger neighbor. For example, a subhead may be no larger than 50% of the headline, and body copy may be no larger than 50% of the subhead.

Extra large headlines are a special use case and require an even greater size difference. For type to be considered “Extra Large”, it must be at least 5x the height of an application’s body copy.

This is our rule of thumb for differentiation—we always encourage greater contrast in type sizes, where possible.

Ex. 50pts+

5X+

XL Headline

Ex. 40pts

4X

Headline

Ex. 20pts

2X

Subhead

Ex 10pts

X

Body copy

Tracking

Everyday Sans has been made for function and legibility. Please do not adjust the spacing on headlines, subheads, or body copy. In these instances, tracking should always remain at 0.

On extra large headlines, tracking may be reduced up to -15 to avoid type feeling loose or gappy. Please use your best judgment for legibility.

Tracking may be reduced up to **-15** on extra large headlines.

-15

XL Headlin

Do not modify tracking at any other level of hierarchy.

0

Headline

0

Subhead

0

Body copy

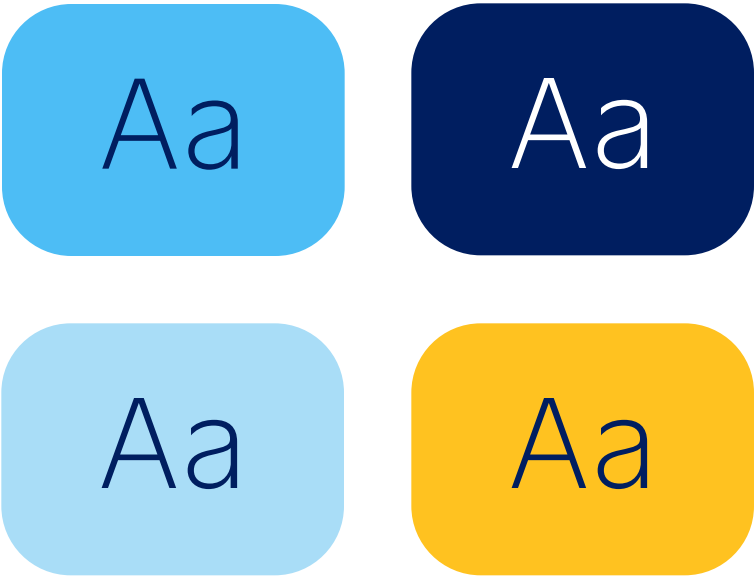

Standard Color

When applying color to type, keep it simple. Our standard approach is to utilize Bentonville Blue or White across all levels. Limit yourself to a single type color per layout.

Always choose your type color to maximize contrast and legibility. For example, do not use Bentonville Blue text over a True Blue background. See below for some approved type and background combinations.

If implementing type color on our website or app, please consider the guidelines for ADA compliance outlined on page [65](#).

Headline

On light backgrounds, set all text in Bentonville.

Subhead

Limit yourself to one text color per layout.

Body Copy

Color use should match across headlines, subheads, and body copy to help keep our layouts streamlined and clean.

On dark backgrounds, set all text in White.

Limit yourself to one text color per layout.

Color use should match across headlines, subheads, and body copy to help keep our layouts streamlined and clean.

Graphic Color

True Blue is used for headlines only in the case of high-impact, low-content applications where color and type are our main means of generating brand recognition. This includes instances like OLV end cards, video supers, large-scale signage, or environmental graphics.

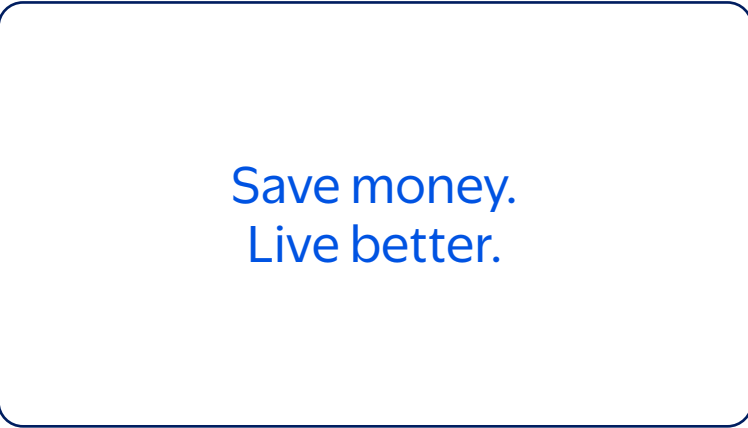

We don't use True Blue type in applications with small, dense, or detailed copy.

Headline

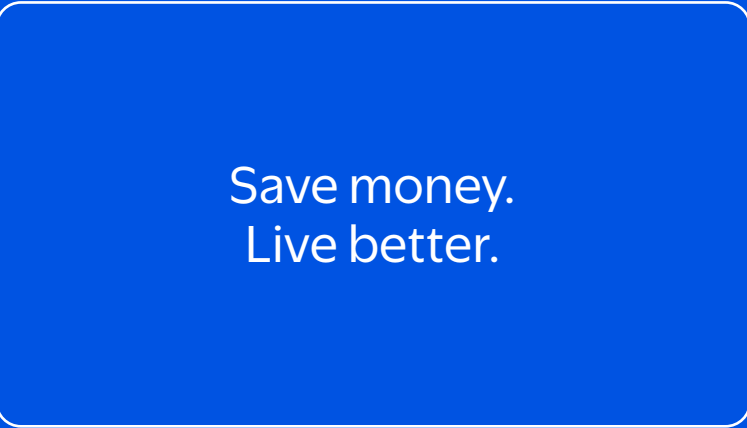

● ○

Graphic type is set in True Blue over White.

Example:
Video super

Graphic type is set in White over True Blue.

Padding

As our type sizes shift between applications, the vertical padding should scale.

The minimum space following any headline should be 75% of the headline's cap height. The minimum space following a subhead or body paragraph is equal to 100% of the subhead or body copy's cap height.

4X

Headline

3X

2X

Subhead

2X

x

Body copy

Note:

This is a good rule of thumb for most applications. In layouts with limited space, padding between type can be condensed.

Leading

Use this formula to determine leading values based on type size. Leading ratios (L) are predetermined for each level of type hierarchy according to the table here. For example, if your subhead size is 100pts, your leading is 100 x 1.2, or 120pts.

***Note:** Some extra large headlines may require tighter leading. Always begin with a 1.0 ratio and reduce incrementally, if desired.

Type Level	Leading Ratio
Extra Large Headline	1.0*
Headline	1.2
Subhead	1.2
Body Copy	1.2
Small Body Copy	1.3

Type Size

Expressed in pts

×

L

Expressed as a decimal

=

Leading

Expressed in pts

Capitalization

Headlines and subheads in external communications are set using **sentence case** capitalization. This keeps our content colloquial, casual, and consistent. Punctuation may be included where necessary for tone and grammar.

Please note that this differs from our rule for internal documents (like Powerpoint presentations or Word documents) which use **title case** capitalization for presentation titles, page headers, or section names.

Headlines are set
in sentence case

 Use sentence case capitalization when speaking externally to customers.

Internal	WE NEVER
Headlines Are	SET HEADLINES
Set in Title Case	IN ALL-CAPS

 Use title case capitalization for routine internal documents.

 Don't use all-caps headlines for any document type or audience.

Line Lengths

For best legibility, lines of text shouldn't be too long or short. Headlines should have between 4 and 15 characters per line, and paragraphs should have between 40 and 70 characters per line.

If the line length of a body paragraph becomes too long, divide the text into columns. Remember, spaces and punctuation count as characters.

 Too short

Lots

Typesetting Cheat Sheet

Here's an overview of our typesetting rules for typeface, weight, leading, tracking, and scale. Tiers of messaging that use specialty fonts are noted in blue. If you are not a member of a team with access to these fonts, use Everyday Sans instead.

Note

Extra large headlines are our largest and most expressive level of typography and require some specialized formatting:

- * **Leading** may be manually tightened if lines of copy feel too loose. Begin with a ratio of 1.0 and tighten gradually, if needed.
- * **Tracking** should be tightened to -15 to avoid large gaps between letters.

	Typeface	Weight	Leading	Tracking	Scale
XL Headline	Everyday Sans Headline	Light	1.0*	-15*	5X+
Headline	Everyday Sans	Medium	1.2	0	4X
Subhead	Everyday Sans	Medium	1.2	0	2X
Inline Header	Everyday Sans	Bold	1.2	0	1X
Body Copy	Everyday Sans	Regular	1.2	0	1X
Captions + Legal Copy	Everyday Sans	Regular	1.3	0	1X-
DATA + CODE	Everyday Sans Mono	Regular	1.3	0	1X-

Don'ts

- 1 **Don't** set headlines in Everyday Sans Mono.
- 2 **Don't** set text in unapproved weights.
- 3 **Don't** set levels of type too close together.
- 4 **Don't** track out our typography.
- 5 **Don't** use all-caps for headlines or subheads.
- 6 **Don't** set our levels of type too close in size.
- 7 **Don't** use low-contrast color combinations.
- 8 **Don't** use colors that cause visual vibration.
- 9 **Don't** use too many type colors in layout.

Value & Pricing

This section outlines our standard method for typesetting prices for maximum consistency and clarity.

Price Callouts

Price callouts are used in layout to highlight specific products or to promote bundled/ bucketed pricing. Prices can be displayed in one of two ways: as a standalone superscript lockup or basic inline text.

Superscript callouts are used when pricing is the focus of an application and should be set at large sizes in Everyday Sans Light.

Inline callouts are used to include price details within a subhead or section of body copy, or when setting prices at small sizes.

Remember—prices without cents don’t need “.00”. For example, \$80.00 should be set as \$80.

Style 1
Superscript

For standalone use in price-led comms at large sizes.

Superscript numbers and symbols should always be set using the automated “superscript” function. These numerals have been optimized for small usage to maintain consistent weight alongside our large numerals.

Don’t attempt to create your own superscript characters by manually reducing the size of our regular type.

Style 2
Inline

For use within a longer subhead or copy line.

Ex.

Starting at
\$34.98

Standard Lockups

Price lockups are designed to work as scalable units using the structures shown here. Signifiers such as “lbs”, “each”, or “& below” can be added to the right of the price, aligned to the price’s cap height. The signifier’s size and formatting matches the product name.

Inline Pricing

When pricing is used in headlines, subheads, or body copy, we don't use superscripts. Inline prices should be formatted like the copy they live in, using decimals to indicate cents. If desired, the weight can be increased by one level for added emphasis. **Don't** increase pricing by more than one weight.

Lockup Supers

Price lockups can be used as film supers where cost is the main selling point. Supers are sized based on our grid system.

The width of the price should be scaled to 1/8 of the layout's width, utilizing an 8-column structure. Lockup placement can vary and doesn't need to live in a single section of the grid. In most cases, we set our prices in White. Bentonville Blue can be used where needed for legibility.

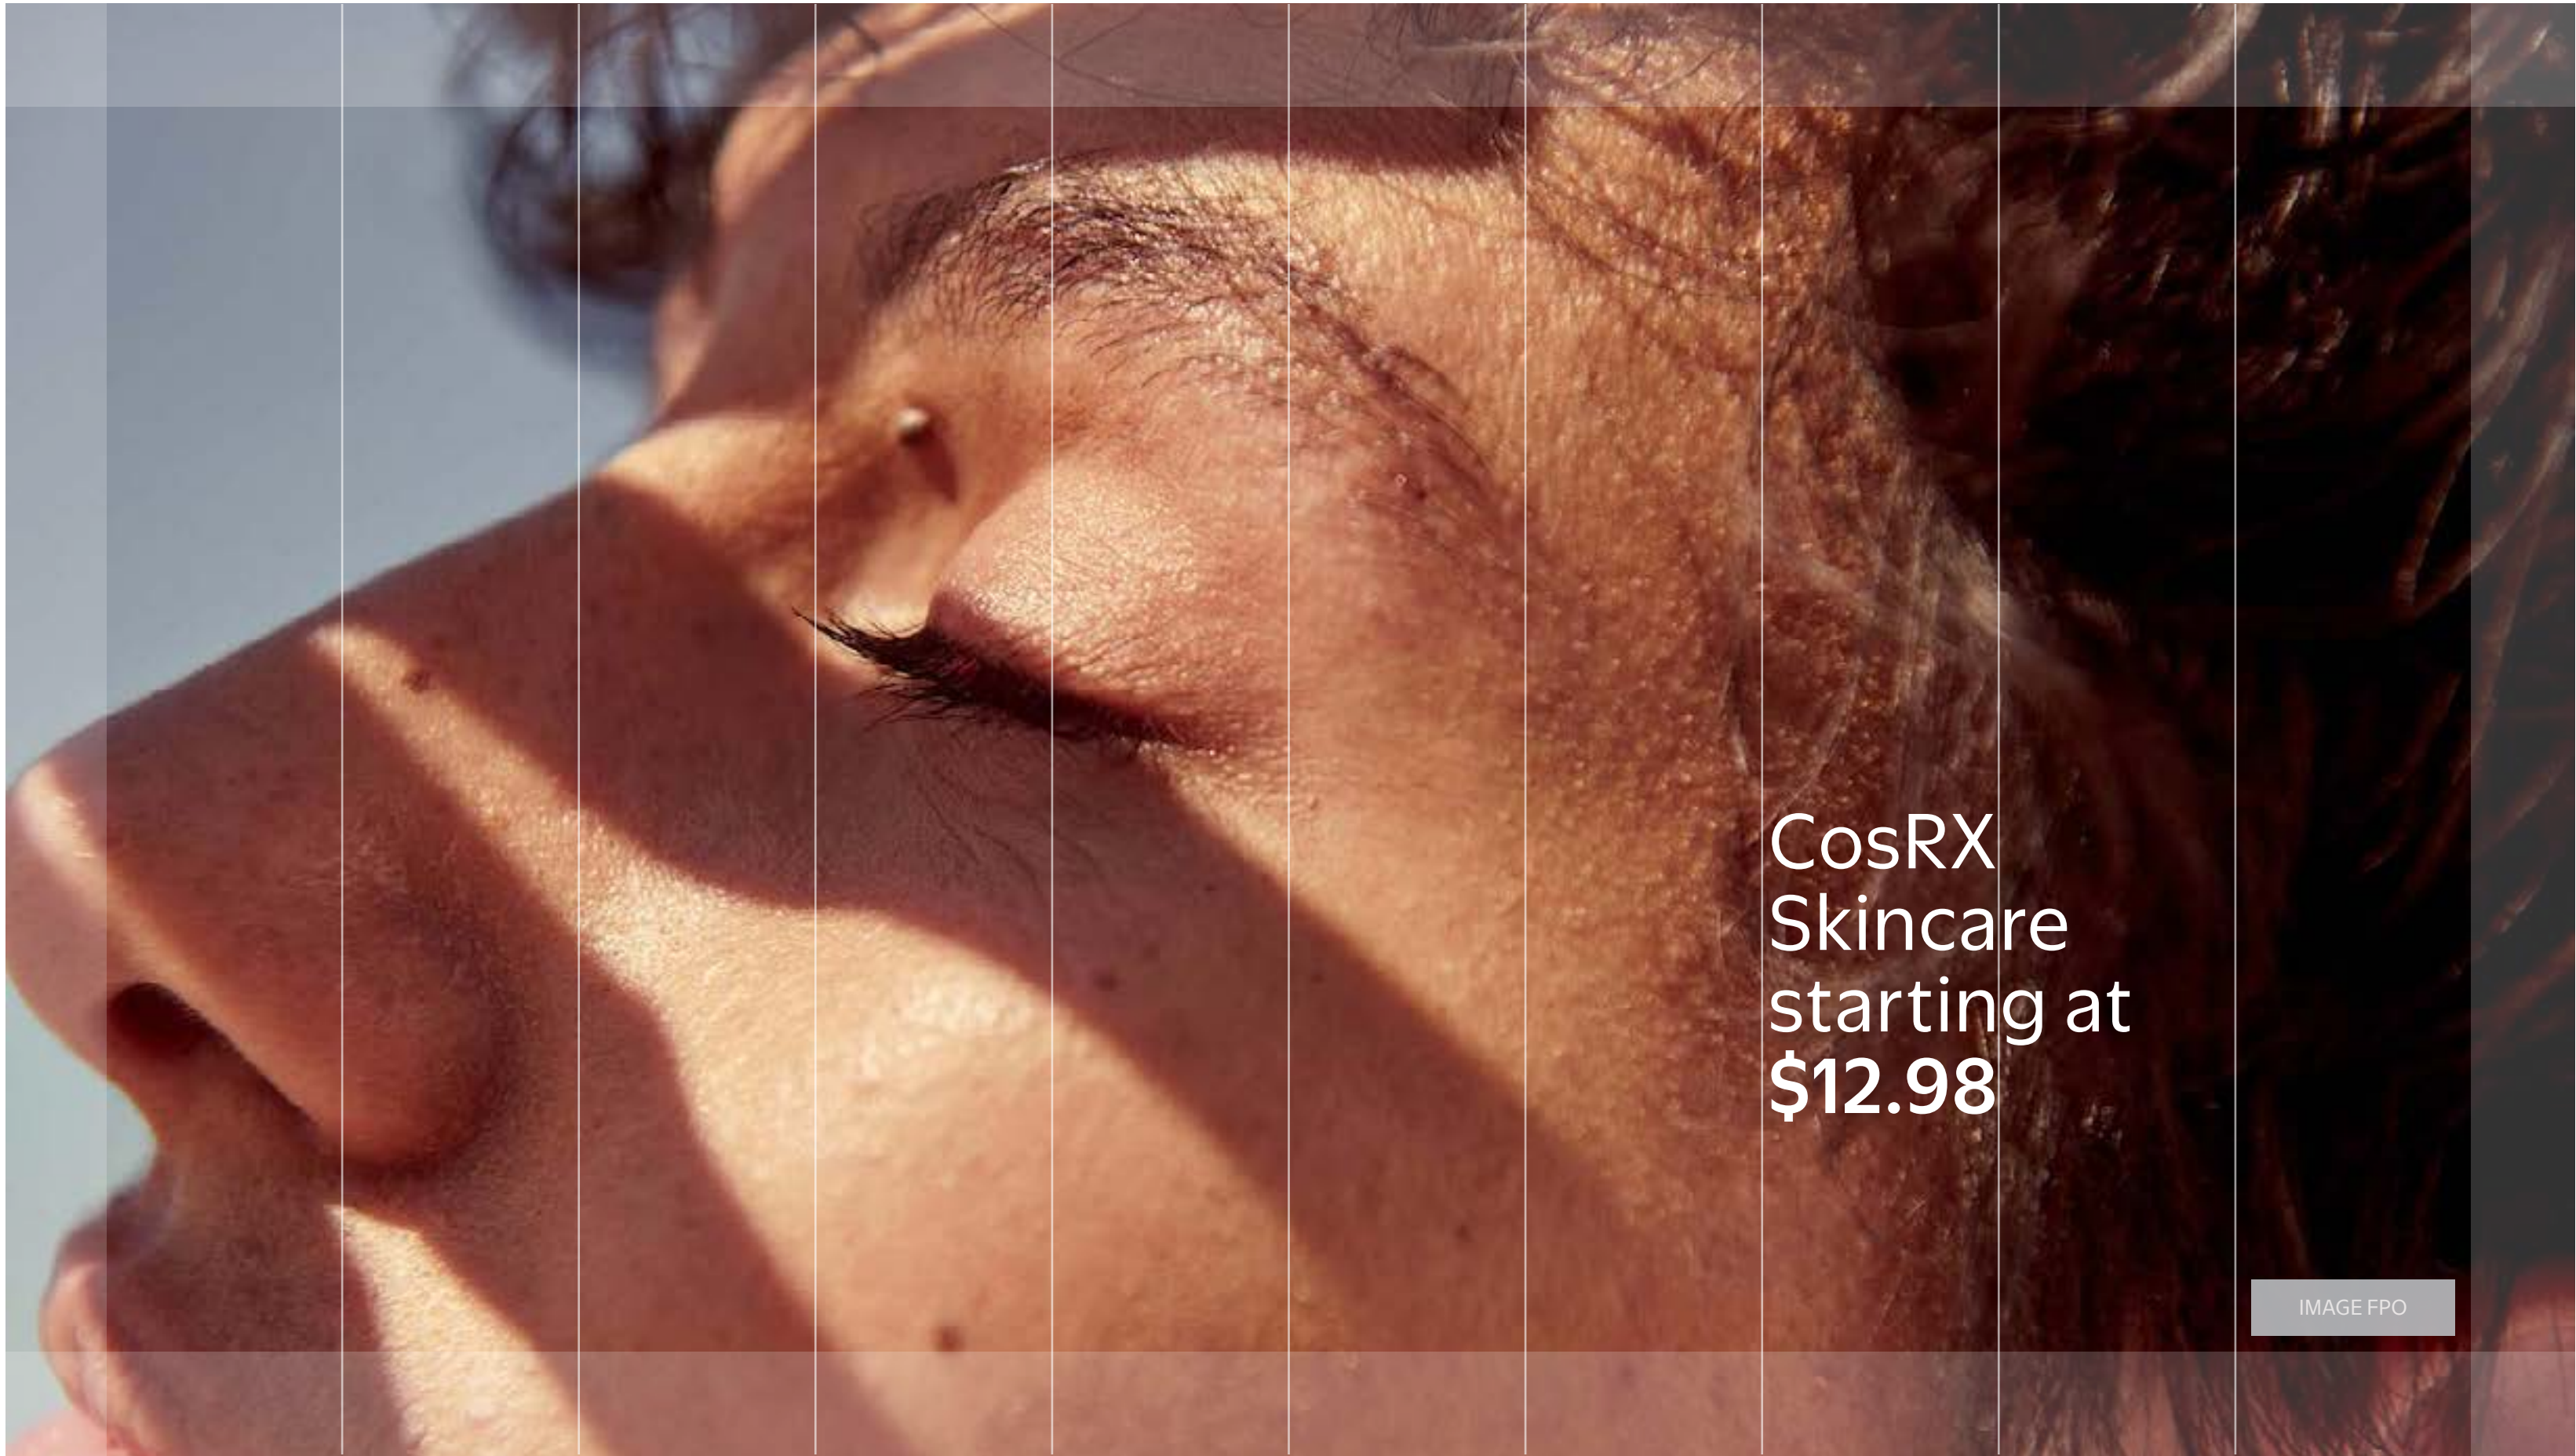

Inline Supers

Inline pricing can be used as film supers where we intend for the brand name to be the main selling point. Supers are sized based on our grid system.

The width of the price should be scaled to 1/10 of the layout's width, utilizing a 10-column structure. Lockup placement can vary and does not need to live within a single section of the grid. In most cases, we set our prices in White. Bentonville Blue can be used where needed for legibility.

Label Design

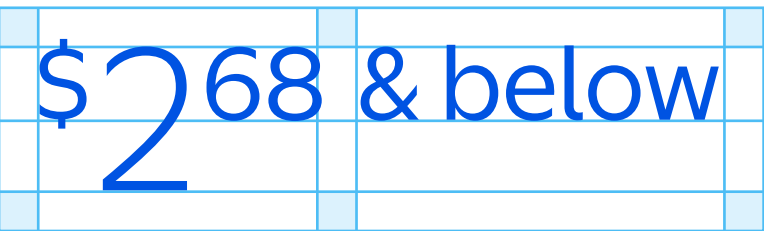

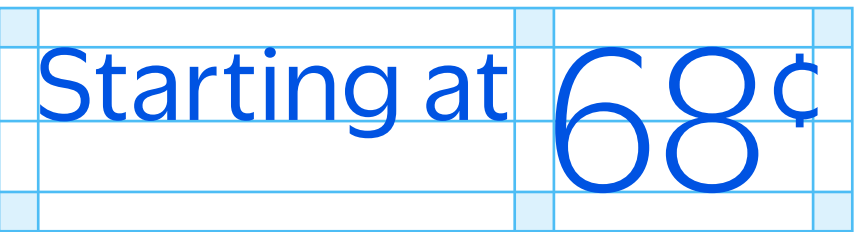

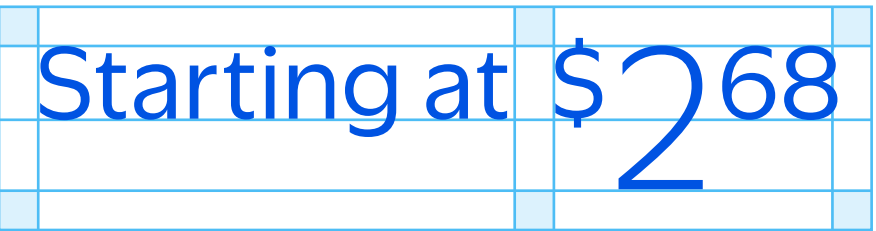

Pricing labels are designed for key price information while creating brand attribution with color. These examples represent the range of information included in pricing labels. Labels are used in White type on True Blue or True Blue type on White.

Pricing labels consist of one or two elements:

- 1 Price only
- 2 Promotional copy with price

Pricing labels can be used in:

- 1 Digital banners
- 2 Social posts
- 3 Print and OOH
- 4 In-store signage
- 5 Walmart.com

Lockups

Brand Lockups

Brand lockups are pre-determined assets that pair our logos with additional elements like taglines, campaign lines, or partner logos.

Consistent use of lockups ensures uniform expression of the Walmart brand and streamlines the design process for internal teams, vendors, and partners.

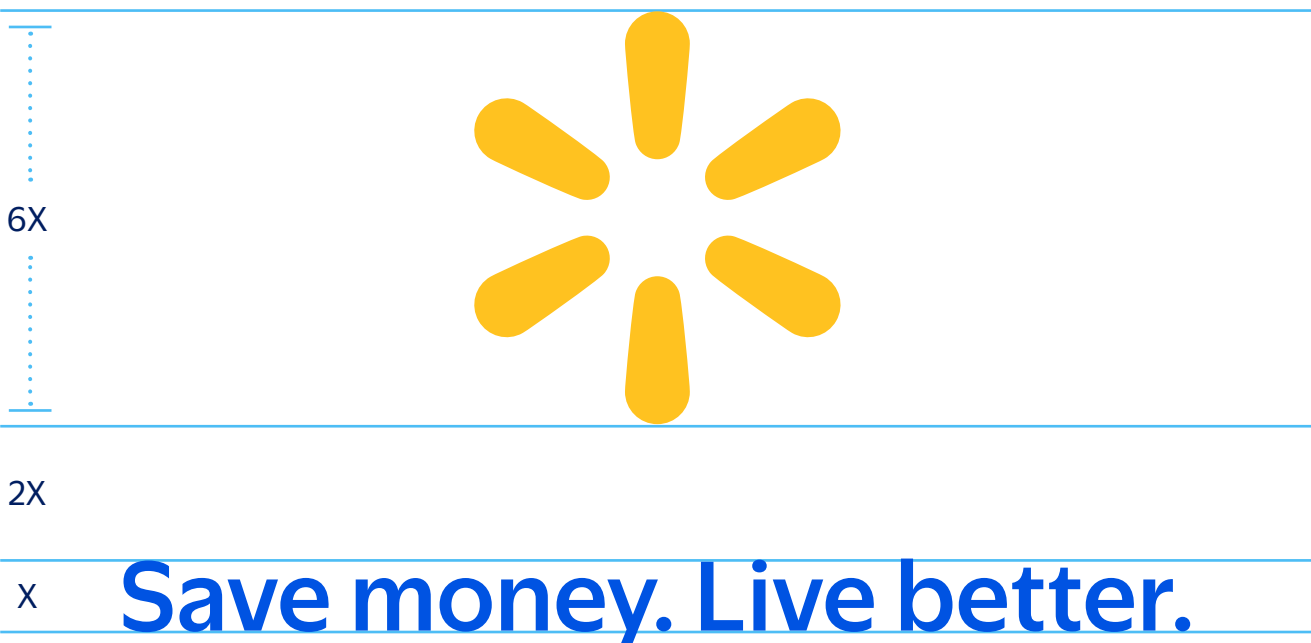

Tagline Lockups: TVC, Video

These are our primary tagline lockups used for TVC and video end cards. Text is set in Everyday Sans Medium with a leading ratio of 1.2 to determine the space between lines of copy. They are always placed in the center of the video frame, as shown below.

Always use our lockups exactly as provided. Don't attempt to modify or resize elements.

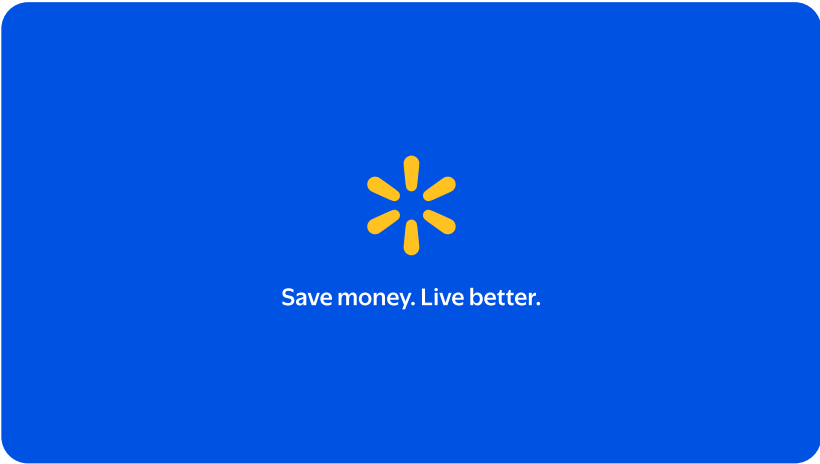

Horizontal Video
Ex. TVC

Vertical Video
Ex. Social

Usage Example:
16:9 end card

Save money. Live better.

Save money.
Live better.

Tagline Lockups: Display, OOH

Our left-aligned tagline lockup is reserved for instances where the lockup appears as a static signoff in the bottom-left corner of a layout. This includes applications like display ads or OOH.

When used in a layout with a headline, the color of our lockup text should **match the color of the headline**. This helps avoid busy, cluttered layouts with too many colors. If a lockup appears with no headline, default to True Blue or White. Type is set in Everyday Sans Medium with a 1.2 leading ratio.

True Blue
Pair with True Blue headlines

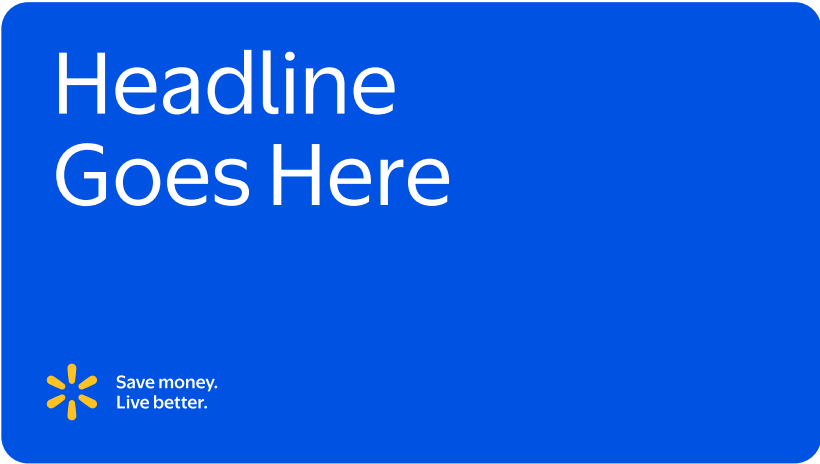

White
Pair with White headlines

Usage Example:
Horizontal billboard

Bentonville Blue
Pair with Bentonville Blue headlines

Tagline Lockups: In Layout

Our tagline lockups may only be placed over True Blue or White backgrounds.

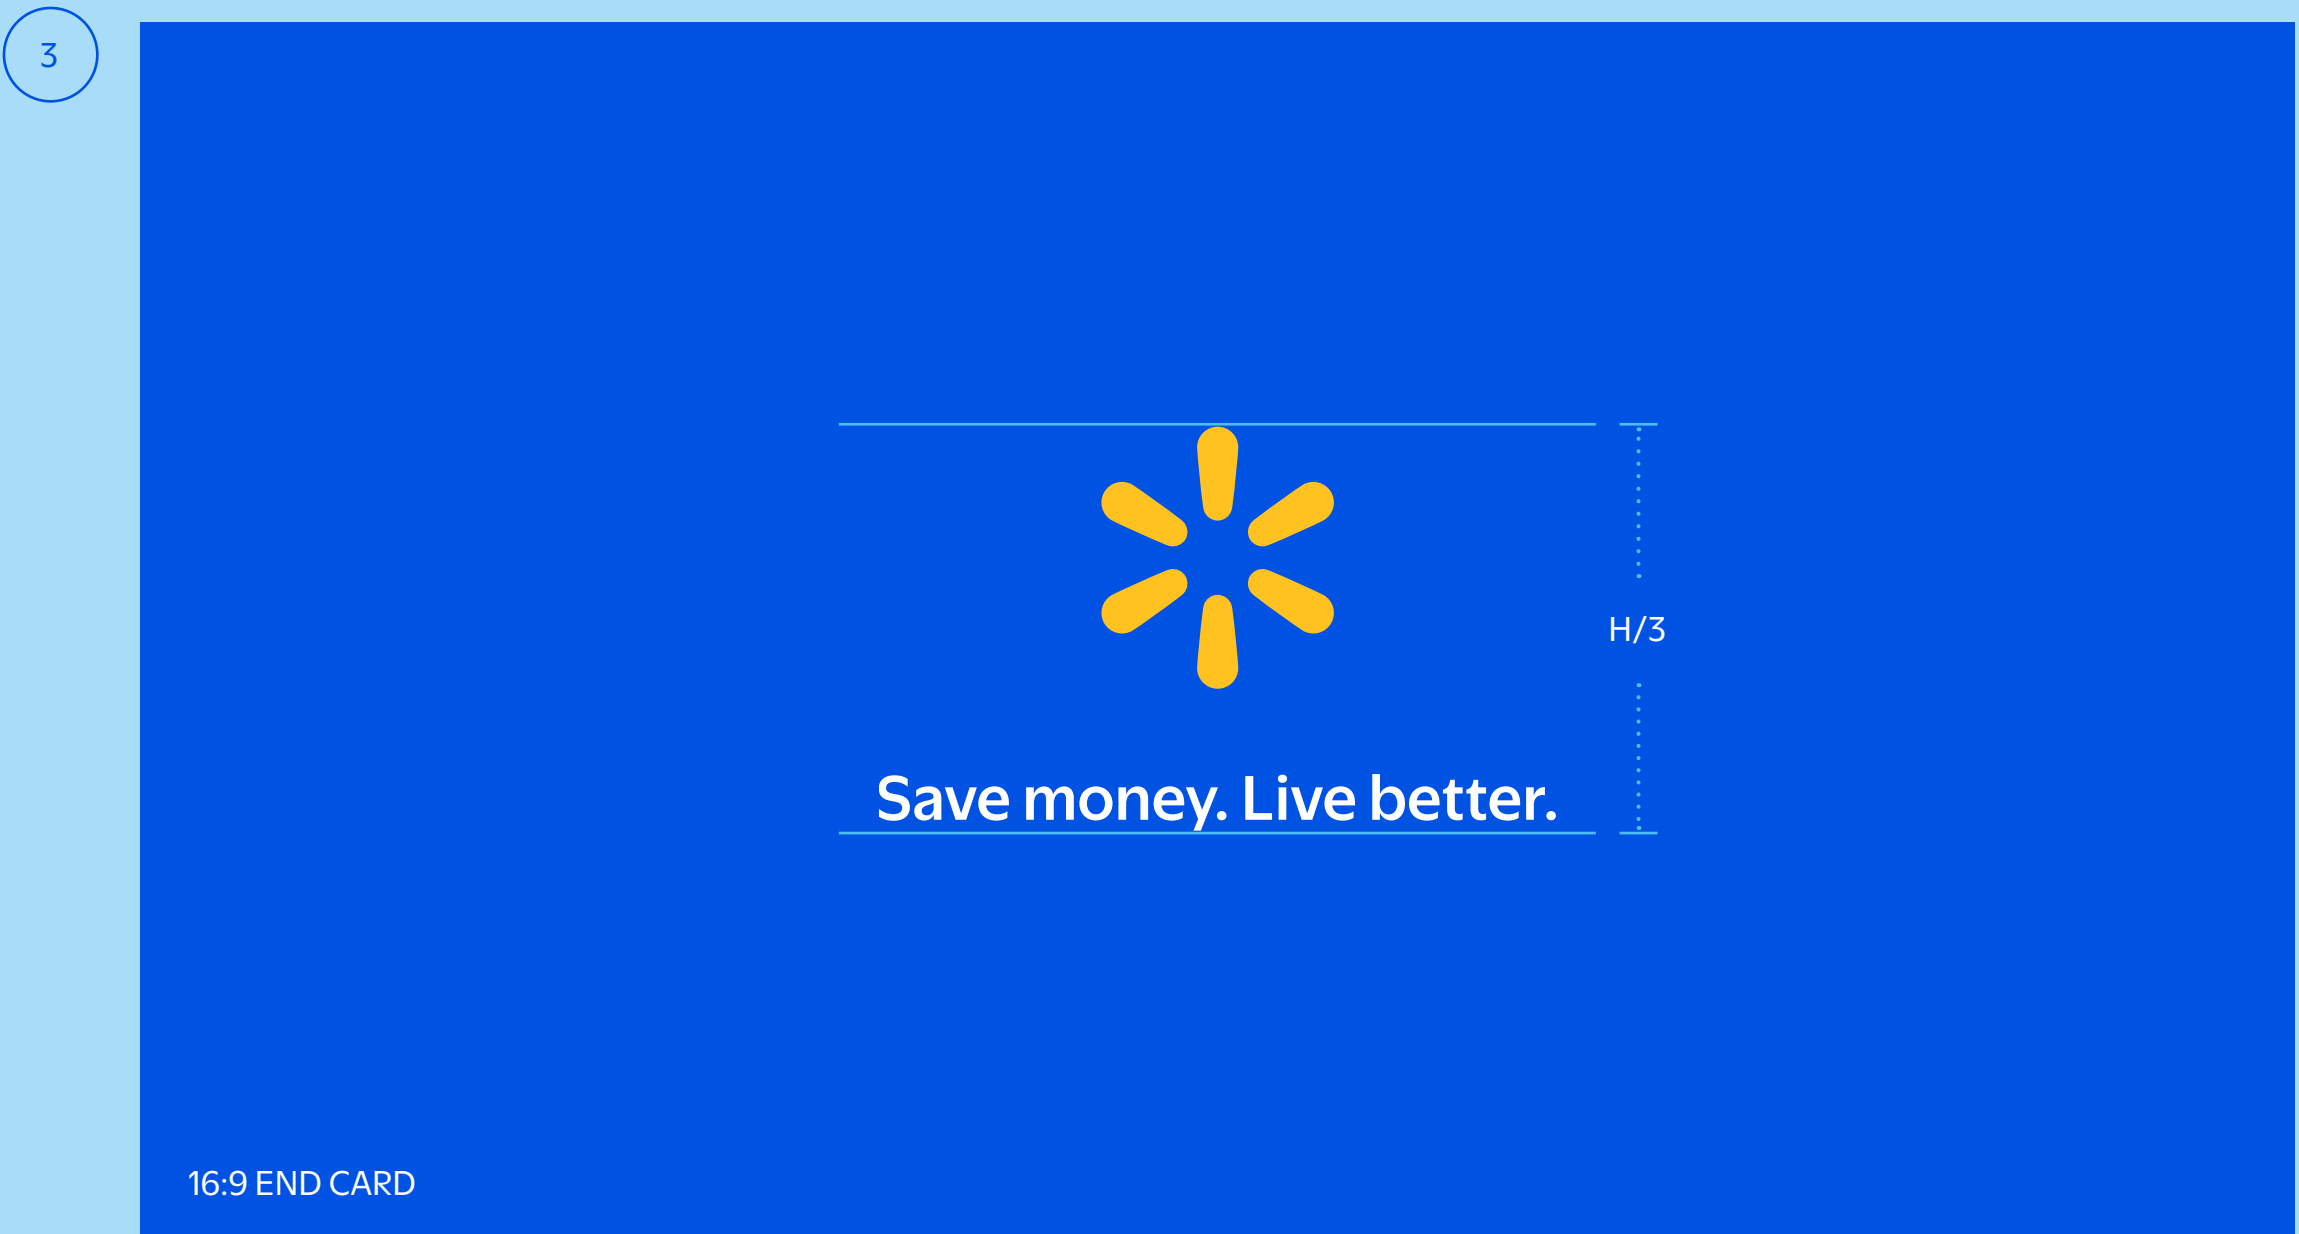

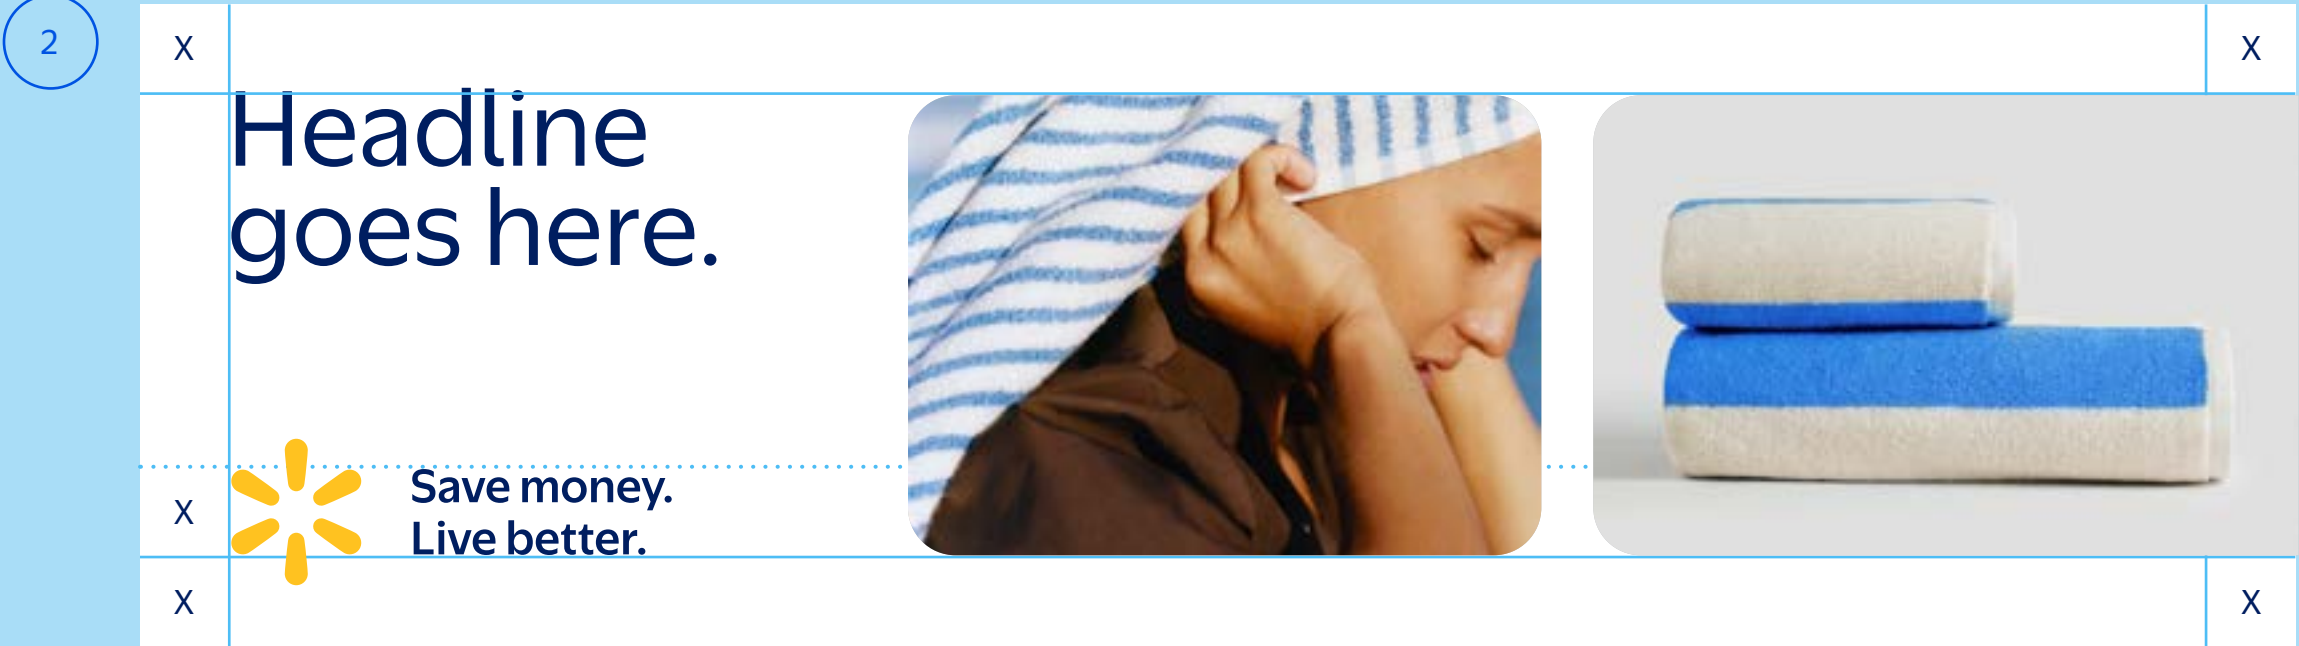

When used as an end card, lockup text always appears in True Blue or White. When used in a static layout, lockup text should match the color of the headline, as shown in example two.

- 1

The height of our lockup is 1/5 of the video height (H) when used in vertical orientation.
- 2

Lockup is anchored in the lower left corner when used in static layouts. The height of the text is equal to the size of the margin.
- 3

The height of our lockup is 1/3 of the video height when used in horizontal orientation.

Campaign Lockups: Display, OOH

Our left-aligned campaign lockup is reserved for instances where the lockup appears as a static signoff in the bottom-left corner of a layout with other text or image content. This includes applications like display ads or OOH.

When used in a layout with a headline, the color of our lockup text should **match the color of the headline**. This helps avoid busy, cluttered layouts with too many colors. If a lockup appears with no headline, we default to True Blue or White. Type is set in Everyday Sans Medium with vertical spacing determined by our standard 1.2 leading ratio.

True Blue
Pair with True Blue headlines

Bentonville Blue
Pair with Bentonville Blue headlines

Usage Example:
Horizontal billboard

Note
Our campaign lockups don't include reverse colorways, as our app icon may not be used over a True Blue background. We only use these over White.

Campaign Lockups: In Layout

In layout, our campaign lockups may only be used over White backgrounds. Follow the placement guidance outlined here.

When used as an end card, lockup text always appears in True Blue. When used in a static layout, lockup text should match the color of the headline, as shown in example two.

- 1

The height of our lockup is 1/5 of the video height (H) when used in vertical orientation.
- 2

Lockup is anchored in the lower left corner when used in static layouts. The height of the text is equal to the size of the margin.
- 3

The height of our lockup is 1/3 of the video height when used in horizontal orientation.

9:16 END CARD

2

X	Headline goes here.		X
X	 Welcome to your Walmart		
X			X

3

Welcome to your Walmart

16:9 END CARD

Only at Walmart

Our “Only at Walmart” lockup is a limited use lockup for use as a TVC or video end card. It is always placed in the center of the frame with type set in Everyday Sans Medium.

In layout, the height of the lockup is 1/10 the height of the video frame. If appearing as part of a longer sequence prior to our Wordmark, the Wordmark size should remain consistent throughout the duration of the sequence.

Usage Example:
16:9 end card

Only at Walmart

Lockup Cheat Sheet

	Save money. Live better.	Welcome to your Walmart	Only at Walmart
TVC/Video Centered in layout, two text color options: 	 Save money. Live better.	 Welcome to your Walmart	
Horizontal Video Vertical Video	 Save money. Live better.	 Welcome to your Walmart	Only at Walmart
Display/OOH Lower-left corner, three text color options (match headline): 	 Save money. Live better.	 Welcome to your Walmart	

Vendor Advertising

Vendor-tagged ads are created by our vendors to promote their products on Walmart.com and in our stores.

Review this section for guidance on VTAs, including details on our approval process, accepted categories, required branding elements, and more.

Criteria Checklist

Please review the following criteria to determine if a product or brand is eligible for a vendor-tagged ad. If you answer no to one or more of these questions, a VTA is not permitted.

Supplier Relationship	Supplier Relationship	☐ Do we have an existing relationship with this supplier? (i.e., Zoom, PayPal, etc.)? ☐ Have we collaborated with this supplier in the past (catalog, store, etc.)?
	Brand Reputation	☐ Does this supplier have a known reputation consistent with our “live better” focus? ☐ Does the brand support “live better” positioning? ☐ Does the supplier have an average rating of 4+ stars online?
	Media Guidelines	☐ Is the ad in line with media guidelines? ☐ Is the ad free from TV-MA ratings, political themes, medical or police reality shows, or non-family-friendly programming? ☐ Is the ad free from controversial or derogatory content that could have a negative impact on Walmart?
Category Criteria	Product Check	☐ Is the product a Walmart exclusive or new product? ☐ Is the item shared on both online and in stores? ☐ Is the product relevant for a current season or category theme? ☐ Do we have enough inventory to support an ad?
	Family-Friendly	☐ Is the product on the accepted category list?

Accepted Categories

Accepted VTA products fall into the preapproved categories listed here. Any content from our “Category Exclusions” list is ineligible for a VTA.

Accepted Categories	
Apparel	Ladies’, men’s, children’s, accessories, shoes, infant/toddler clothes, intimate apparel, jewelry, accessories
Home	Storage, furniture, cooking & dining, crafts & fabric, home decor, bath, bedding
Entertainment	Photo, electronics, media & gaming, cellular
Toys	Girls’ toys, boys’ toys, preschool toys, activities, bikes, outdoor toys
Seasonal	Seasonal, celebrations
Hardlines	Sporting goods, automotive, hardware, stationary, lawn & garden
Food	Bakery, service deli, meat, seafood, produce, dry grocery, frozen, dairy, commercial bread, deli, candy impulse, DSD, snacks, adult beverages
Services	Services, financial services, digital acceleration, cards & lending, digital merchandising (delivery, pickup, payments, etc.)
Consumables	Personal care, beauty, pets, paper goods, cleaning supplies, baby consumables, OTC
Wellness	Health & Wellness, vitamins, pharmacy services

Category Exclusions	
Alcohol	Including any content on drinks, recipes, any related diseases, news about DUI, drinking, associated violence, birth defects, etc.
Drugs & Narcotics	Including drugs and narcotics, drug culture, busts, crime, drug effects on people, rehab, and personal stories
Firearms & Ammunition	Including content about firearms, ammunition, shooting, guns laws, the National Rifle Association, etc.
Gambling & Casino Games	Including gambling, betting casinos, online gambling, and gambling related news
Tobacco	Including tobacco, the tobacco industry, or tobacco’s negative impact such as diseases
Entertainment File Sharing & Download	Including pages where users will download music, movies, or TV shows illegally
Sex-related Products	Including content that would be deemed inappropriate for “family-friendly” programming such as reproductive aids, male enhancement products, nudity/semi-nudity, sex life, sex advice, medical sex and education sex, or sex-related products
Government-related products	Including content state, government, the body politic, public administration, policymaking, elections, propaganda, military, war, etc.(delivery, pickup, payments, etc.)
Profane Language	Inappropriate use of profane language, cursing, swearing, and hate speech of any kind

VTA Dos & Don'ts

The ad must:

- Be approved by buyer and complete all Walmart approvals to be accepted.
- Feature a product that is new (introduced within past 6 months) and/or exclusive at Walmart.
- Conform to Walmart brand standards and guidelines.
- Conform to Walmart accepted categories list.
- Contain family-safe content.
- Strengthen Walmart’s “live better” message.
- Use “Only at” or “New at” Walmart tags ONLY with new or exclusive products.

The ad must not:

- Contain, be adjacent to, or reference a coupon.
- Have a price listed. No “net math” permitted.
- List other retailers besides Walmart
- Include Walmart bags, boxes, associates, or store visuals.
- Use Walmart proprietary assets (i.e., Rollback, Made in America, two-day delivery, or pickup today logos).
- Look like a Walmart ad.
- Contain sexual or misleading content.
- Advertise competitive content.

Roles & Responsibilities

Merchants – Review supplier request and approve against category plans/ guidelines – Escalate to DMM/ VPs as required for any high-urgency, exception-based requests – Inform supplier of approval and/or any rejects and why	Brand marketer/creative lead – Review request against VTA criteria and brand standards – Confirm VTA fit with broader campaign strategy – Confirm messaging with corp comms (as needed) – Share feedback, non-approvals, or approval with PM
PM – Confirm Merchant approval before submitting – Obtain all required documentation from supplier – Supply vendor with tagged ad guidelines and assets – Record request – Review and manage feedback workflow – Inform supplier of approval and/or any rejects and why – Provide supplier with Approval No.	Media – Review media plan against media criteria and schedule – Review planned media buy to identify any conflicts – Share feedback, non-approvals, or approval with PM
Retail marketer – Understand VTA fit with broader strategy – Evaluate VTA with AOP and planned in-market activations – Share feedback, non-approvals, or approval with PM	Legal – Review creative and approval – Share feedback, non-approvals, or approval with PM

Influencer Guidelines

We only permit partnerships with influencers who embody our ethics and values. Their association with Walmart should enhance our brand's credibility and foster positive public sentiment around Walmart and our products.

Influencer must not have any past posts that featured any of the following:

- Disparaging or negative commentary about Walmart
- Profanity
- Sexual references
- Political commentary or activism
- Disparaging remarks about other ethnicities, religions, political figures, etc.
- Body shaming

Influencer must disclose the sponsor of the blog/post.

Exceptions to VTA Guidelines

- If a VTA is requested for a supplier or product outside our approved criteria, an escalation review with Merch DMM/ VP and Retail Marketing VP approval is required for submission.
- In rare cases, multiple retailer tagging may be permitted. Strategic exception may be allowed with escalated approval by the Merchandising DMM/ VP, Brand Marketer, and Marketing Creative Lead.
- Use beyond standard VTA tags, such as event or special partnerships request require escalated approval to DMM/ VP and Retail Marketing VP required

VTA Lockups: Horizontal

Vendors must choose from our list of approved VTA lockups. Here are our horizontal English language lockups, which are also available in a stacked vertical format for use in small spaces (see next page).

Use when next to shared retailers

Use for general products

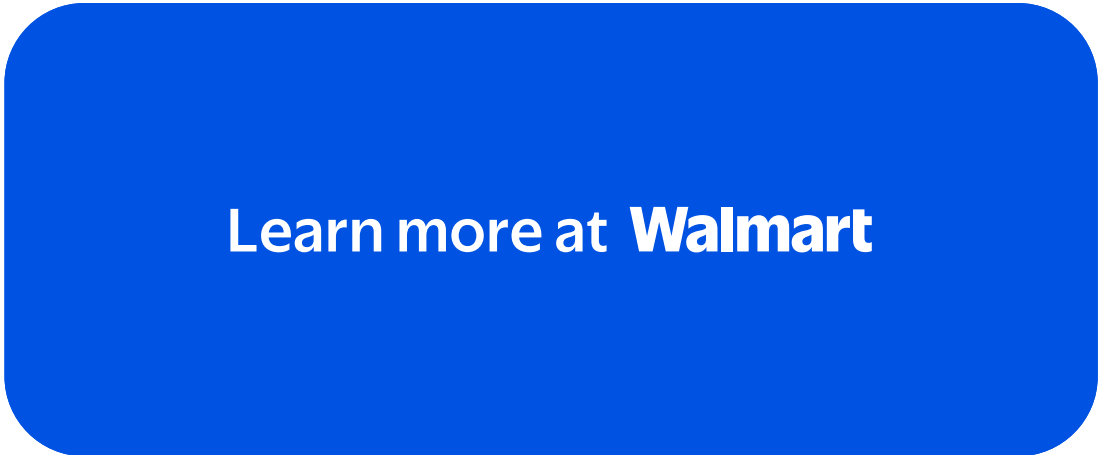

Use for exclusive products

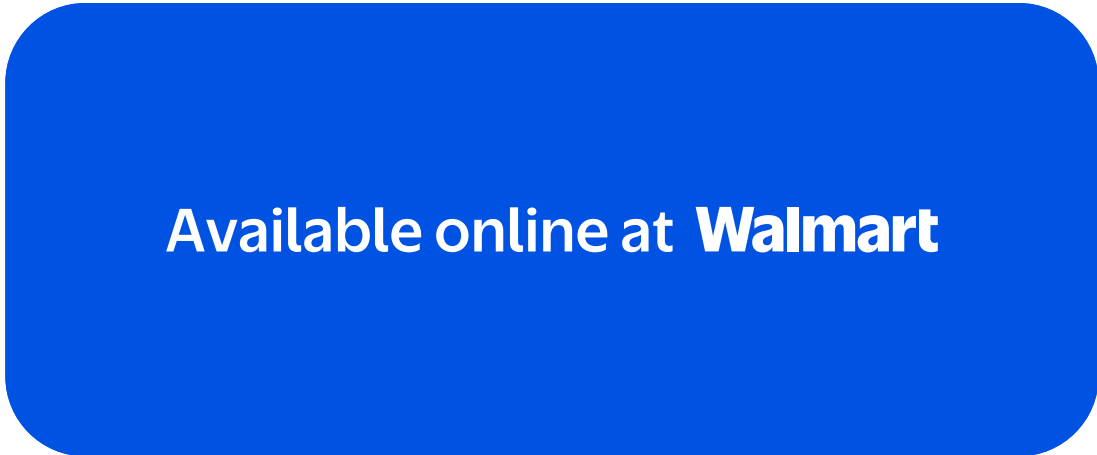

Use within six months of product arrival

Services only

Online only

Color

All VTA lockups are provided in two colorways—Bentonville Blue and White Use whichever provides the best contrast against your background.

Bentonville Blue
Light backgrounds

White
Dark backgrounds

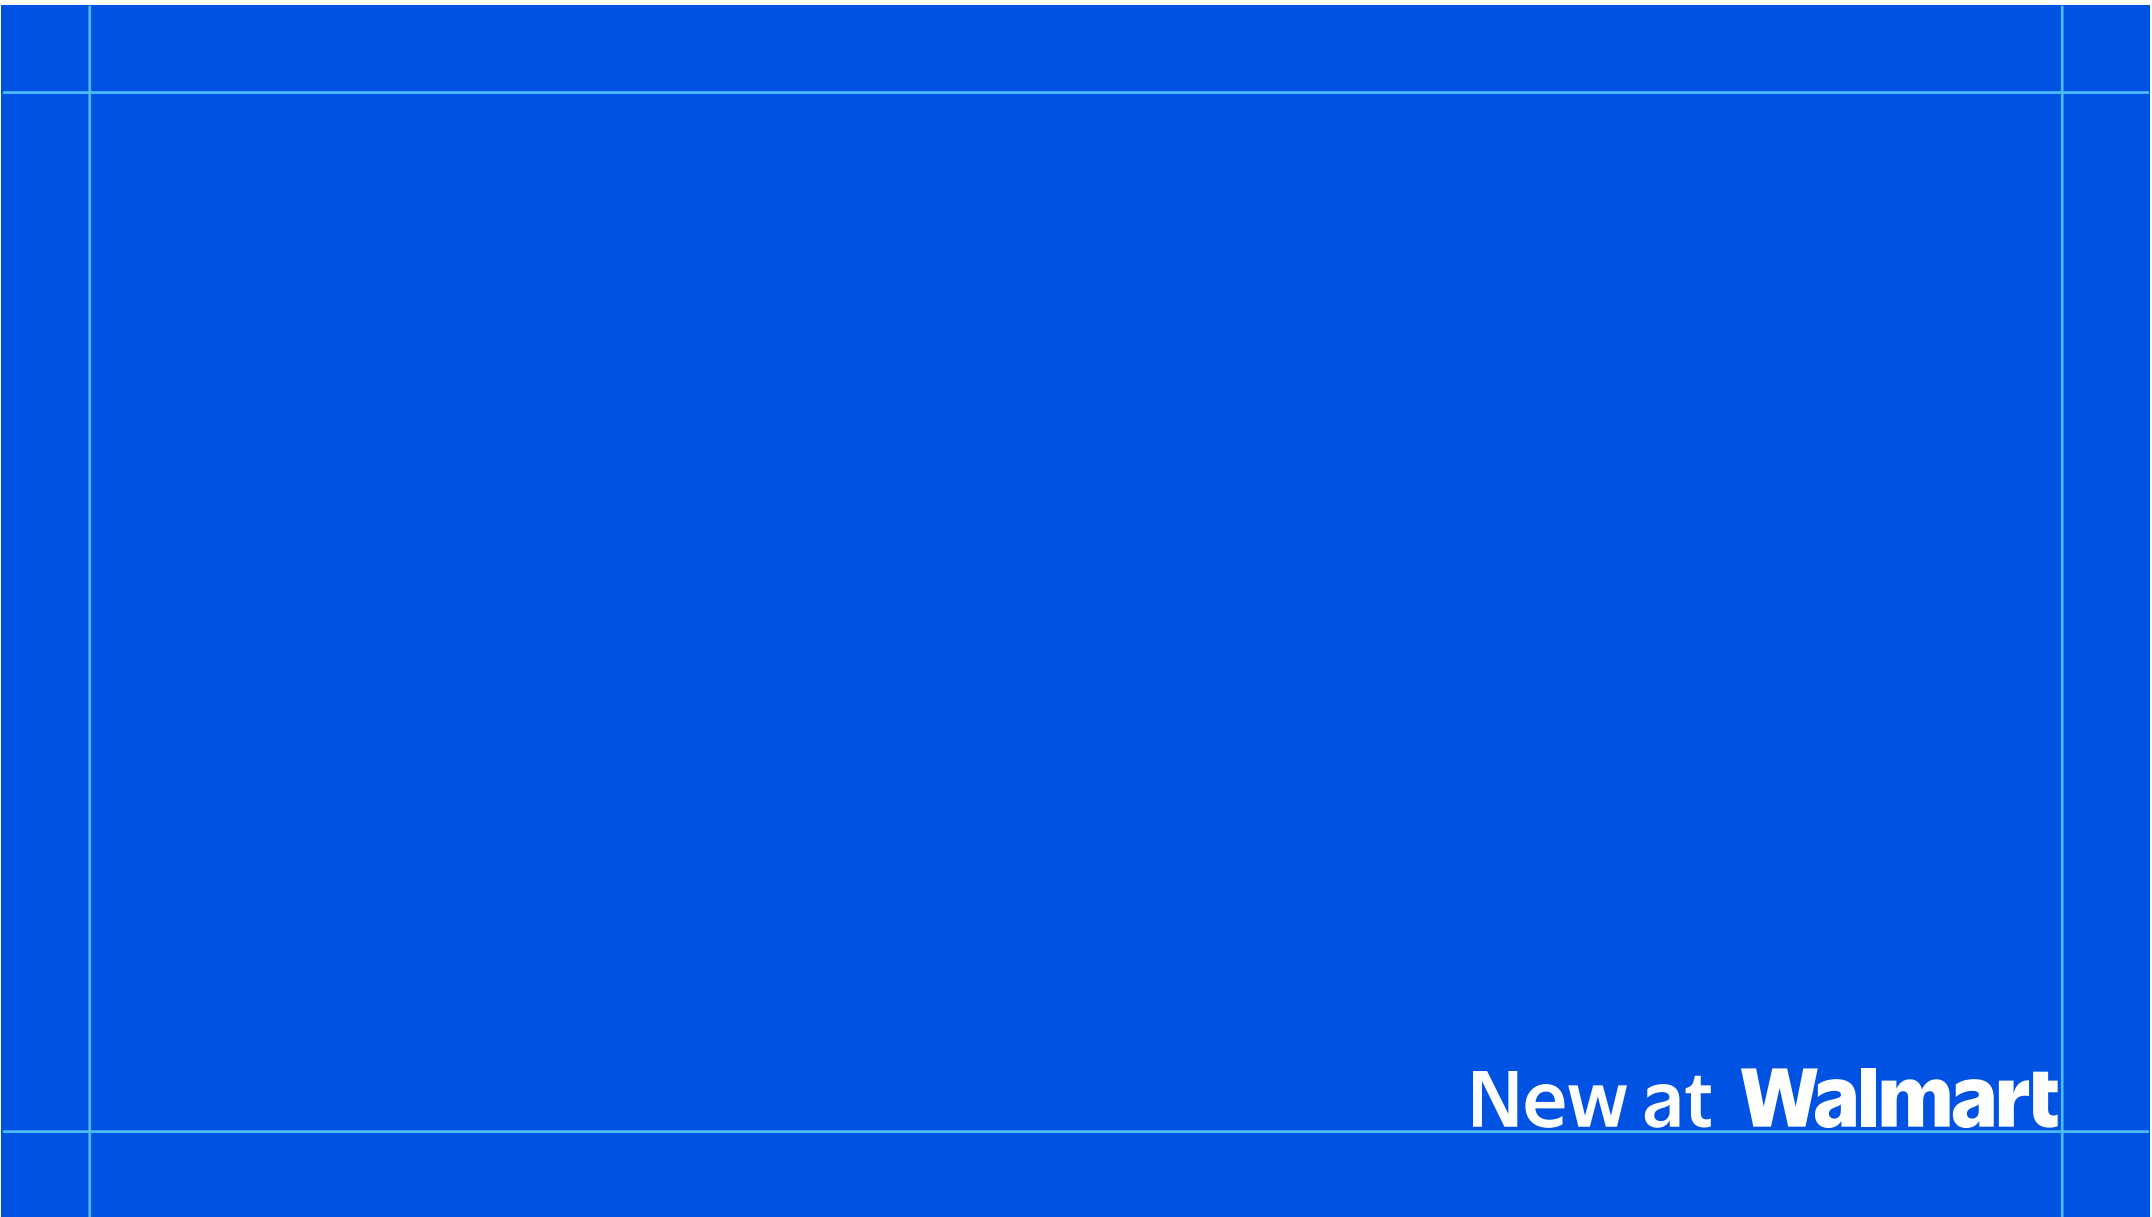

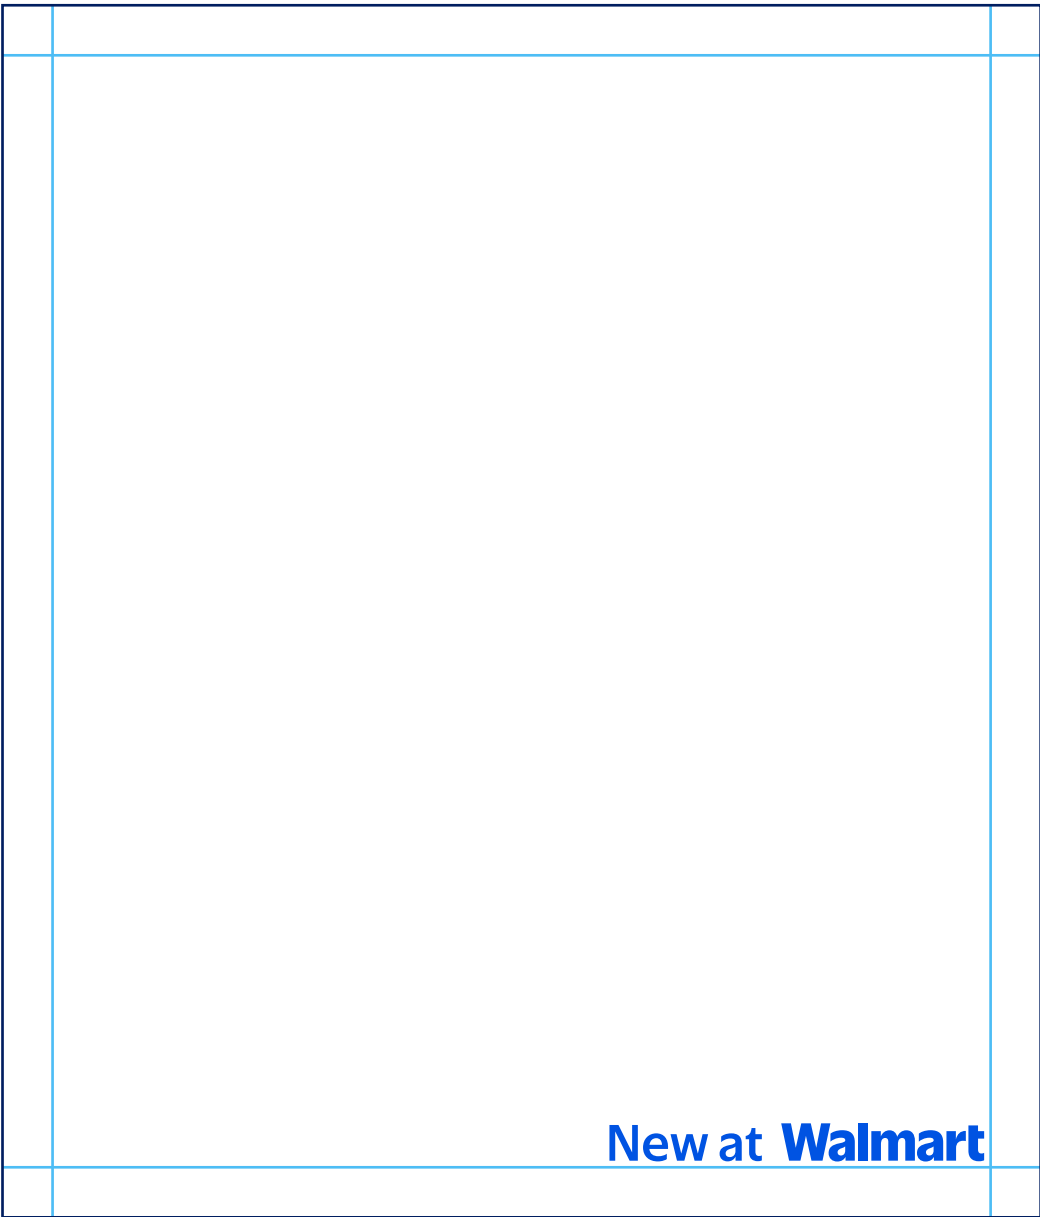

Sizing & Placement

Walmart branding always appears in the lower right corner of an ad, aligned to the edges of the margin (print/digital) or title safe area (TV). Scan lines are at 98 HD and 45 SD. In flash or rich media banners, Walmart branding should always appear on the last frame.

Walmart branding should be small but legible. It must never dominate an ad or be featured more prominently than vendor branding. Accompanying ad copy may utilize the Walmart name, but not the Walmart logo. If applicable to the format, the Walmart name must be linked to the product page on Walmart.com.

Keep tags clear from clutter and obstructions. Make sure they don't touch or overlap other graphic elements, especially vendor branding.

Animation & Timing

Please follow this approved animation and timing when using Walmart branding in motion advertisements.

1

Walmart branding slides in from the right edge of the frame 3 seconds from the end of a spot. For longer read VO, branding slides in slightly earlier with 4.5 seconds remaining.

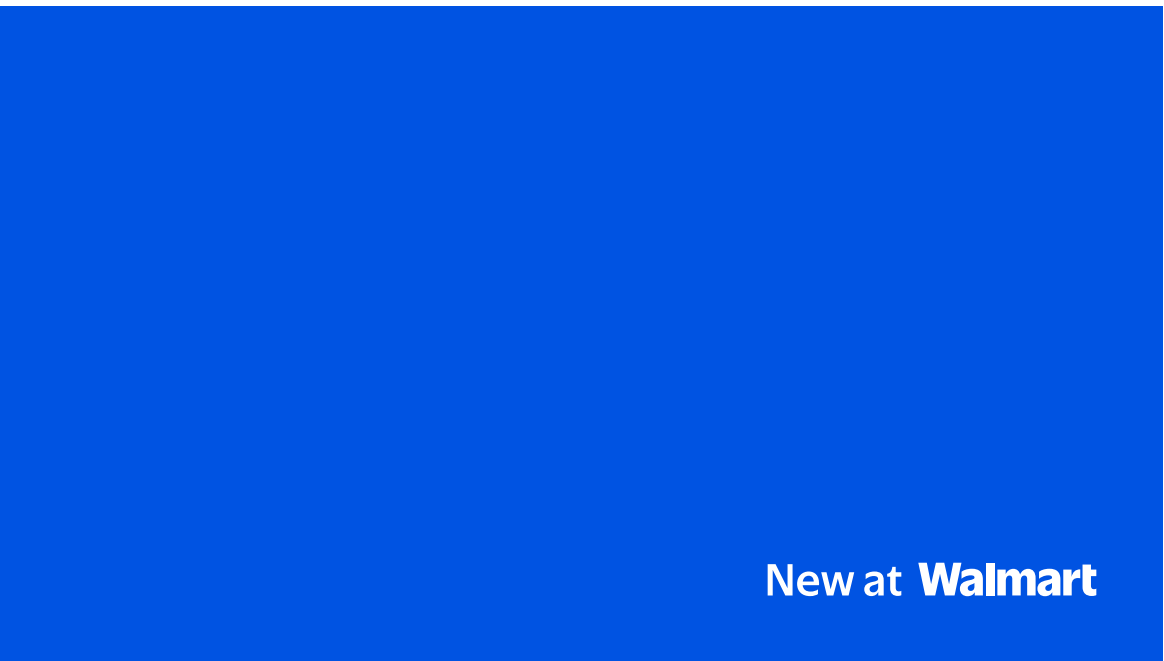

2

As Walmart branding slides in, a sliding sound indicates its entry. Slide motion occurs quickly, lasting approximately 0.5 seconds.

3

Walmart logo should be in place for 2.5 seconds with shorter read VO and up to 4 seconds for longer read VO.

Voiceovers

Vendors may choose from six preapproved Walmart voiceovers for use in a VTA. Vendors must use these exact voiceovers and may not create their own.

The Walmart VO must appear at the end of a spot and may not be followed by any other VO. Allow a half-second between the end of the vendor VO and the beginning of the Walmart VO. Walmart branding should be timed to appear when we hear the Walmart VO.

Do not mention Walmart outside of the approved Walmart VO. Remember to mix the Walmart VO at the same volume as the vendor VO.

Short Options
1.5 Seconds

Icons

Icon System

Iconography is a universal visual language that bridges linguistic barriers to communicate ideas quickly, simply, and effectively.

Our icon set is carefully constructed with three distinct styles for different use cases outlined in the following pages.

Icon Tiers

Our icon system contains three distinct tiers of iconography. Each tier is designed with a different level of visual complexity to serve a specific purpose within our system:

1 Functional Icons

Functional icons are our simplest tier of iconography. They are optimized for use as small-scale UI elements or for simple wayfinding signage.

2 General Icons

General icons are our most robust tier of iconography. They are used in both digital and print applications to visually organize content into sections, groups, or lists.

3 Pictograms

Pictograms are our most detailed tier of iconography. They are used to articulate more nuanced concepts at larger sizes with an added emphasis on storytelling.

Functional Icons

General Icons

Pictograms

Icon Sizing

Our icon tiers are designed to gradually increase in complexity while maintaining a consistent visual link. Here we see all three tiers of our pharmacy icon, each of which uses a similar representation of a pill bottle with an additional level of fidelity introduced at each tier.

An icon's level of detail corresponds with its intended sizing. Pictograms are our most complex icons, which means they should be used at the largest scale. Functional icons are the most simple and should be used at the smallest scale.

Note:

The size limits noted here are for digital use only. In the case of physical applications, our icons may break these rules. For example, functional icons will occasionally be used at large sizes for simple wayfinding signage.

Icon Hierarchy

1 Functional Icons

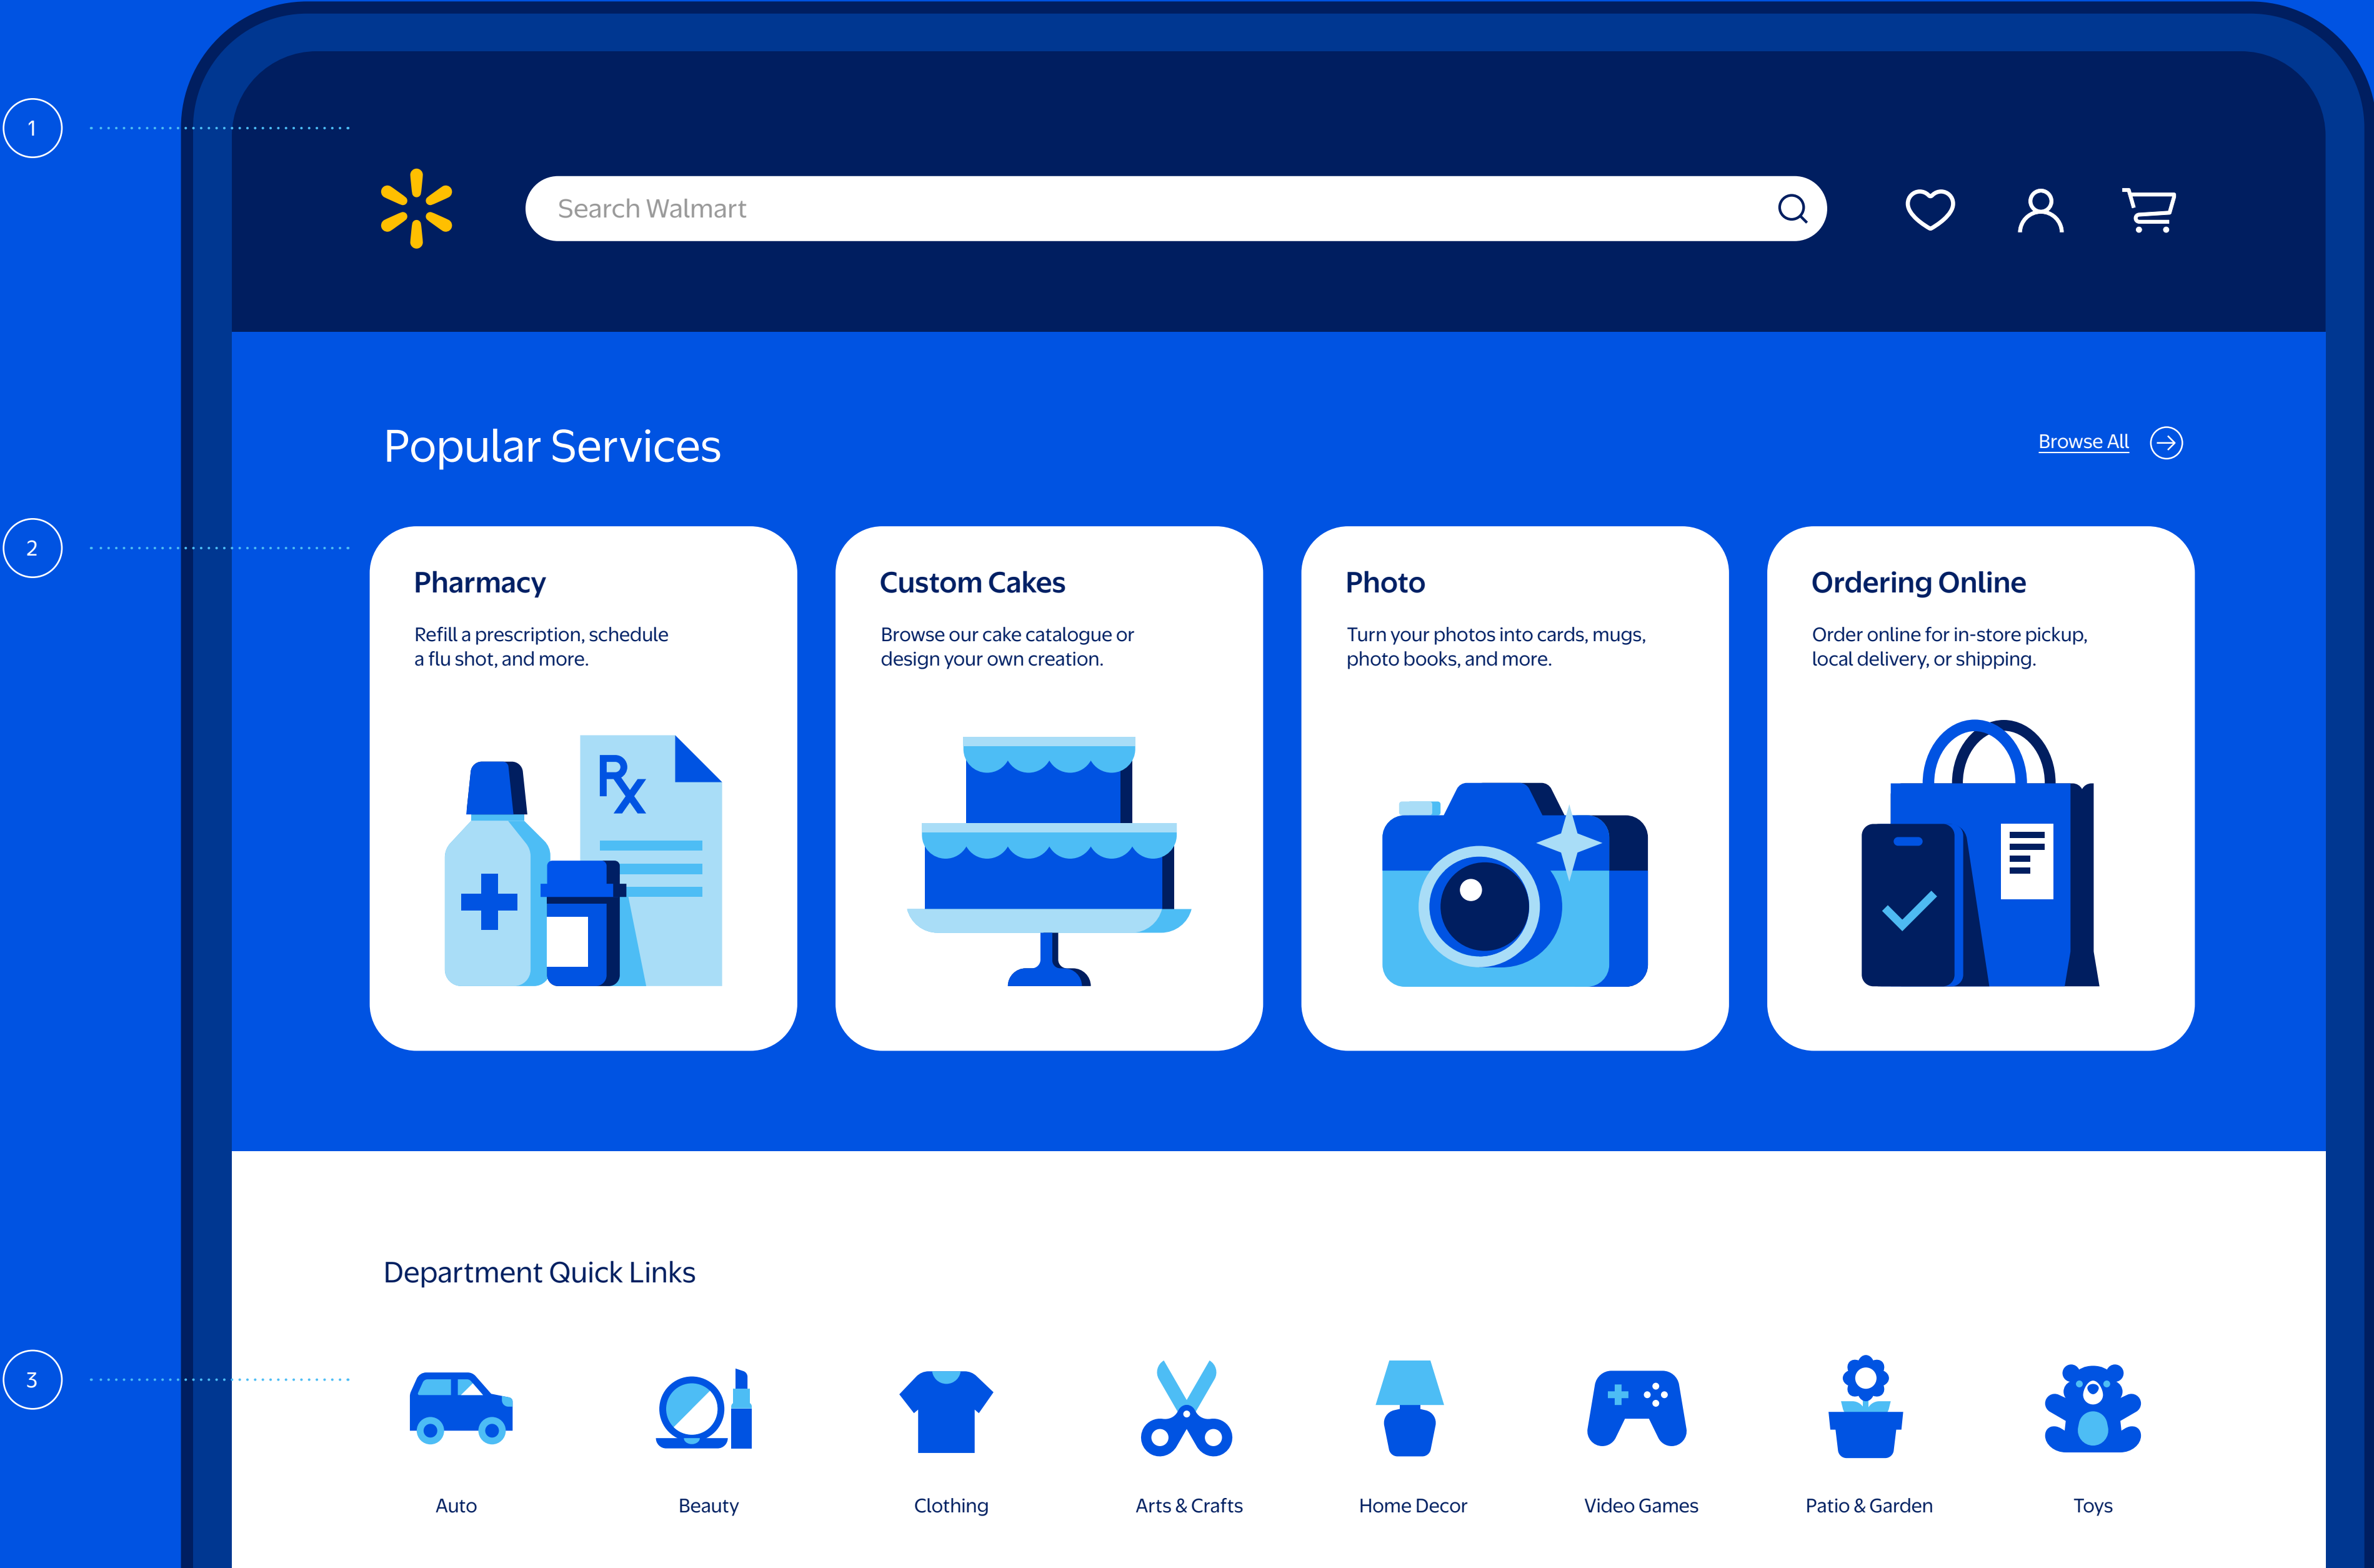

Functional icons are used primarily as small-scale UI elements for basic digital navigation. They should feel subtle and recessive in application.

2 Pictograms

Pictograms bridge the gap between icons and illustrations. They're applied at large scales and should be the hero of their compositions.

3 General Icons

General icons are our mid-sized workhorses. Although they're used at fairly small sizes, they have significantly more visual impact than our functional icons to help add visual interest and warmth to layouts.

Functional Icons

Functional icons are our simplest tier of iconography, composed of streamlined monolinear strokes for easy legibility at small sizes.

Appearing in digital interfaces or on basic wayfinding signage, they help ensure a seamless experience for our customers.

Functional Icon Construction

- 1

Monolinear Strokes

All strokes are uniform in weight with rounded corners. Wherever possible, use straight vertical or horizontal strokes.
- 2

Open Gaps

Keep icons open and airy by including strategic gaps in conintuous strokes.
- 3

Mechanical Curves

All curves are created based on a perfect circle to impart a feeling of utility and precision. Do not use organic or unstructured curves.
- 4

Square Terminals

Terminals of all strokes are cut in a square shape with 90 degree corners. Stroke ends are never rounded or angled.

Functional Icon Grid

Our functional icons are built on a 16 x 16 pixel grid with a 1 pixel margin of clear space on all sides. Our key shapes (shown in Everyday Blue) help define the basic proportions of each icon to ensure consistent optical sizing.

We always align horizontal and vertical strokes cleanly to the grid for crisp and accurate rendering. Strokes are always **1 pixel wide**.

Icons will not always adhere perfectly to this grid. It is a general guideline and may occasionally be broken for aesthetic reasons.

16 PX

Functional Icon Colorways

Our primary colorway is Bentonville Blue for use over White or light backgrounds. If using our icons over a darker background, we instead use our reverse colorway (White).

Primary

Reverse

Primary

Reverse

Functional Icon Color Approach

Our functional icons always appear in 100% Bentonville Blue or 100% White.. They are treated as utilitarian tools, not colorful decorative elements. We never recolor them.

Functional Icon

Don'ts

 Use our reverse colorway over dark backgrounds.

 Stick to our approved colorways.

 Use square stroke ends.

 Apply icons between 16px and 32px wide.

 Don't put icons in containers.

 Don't recolor icons.

 Don't use rounded stroke ends.

 Don't use icons too large.

General Icons

General icons are our most widely applicable style of iconography.

Colorful yet minimal, they add visual interest to communications while acting as an easy visual shorthand to help organize information and guide viewers.

General Icon Construction

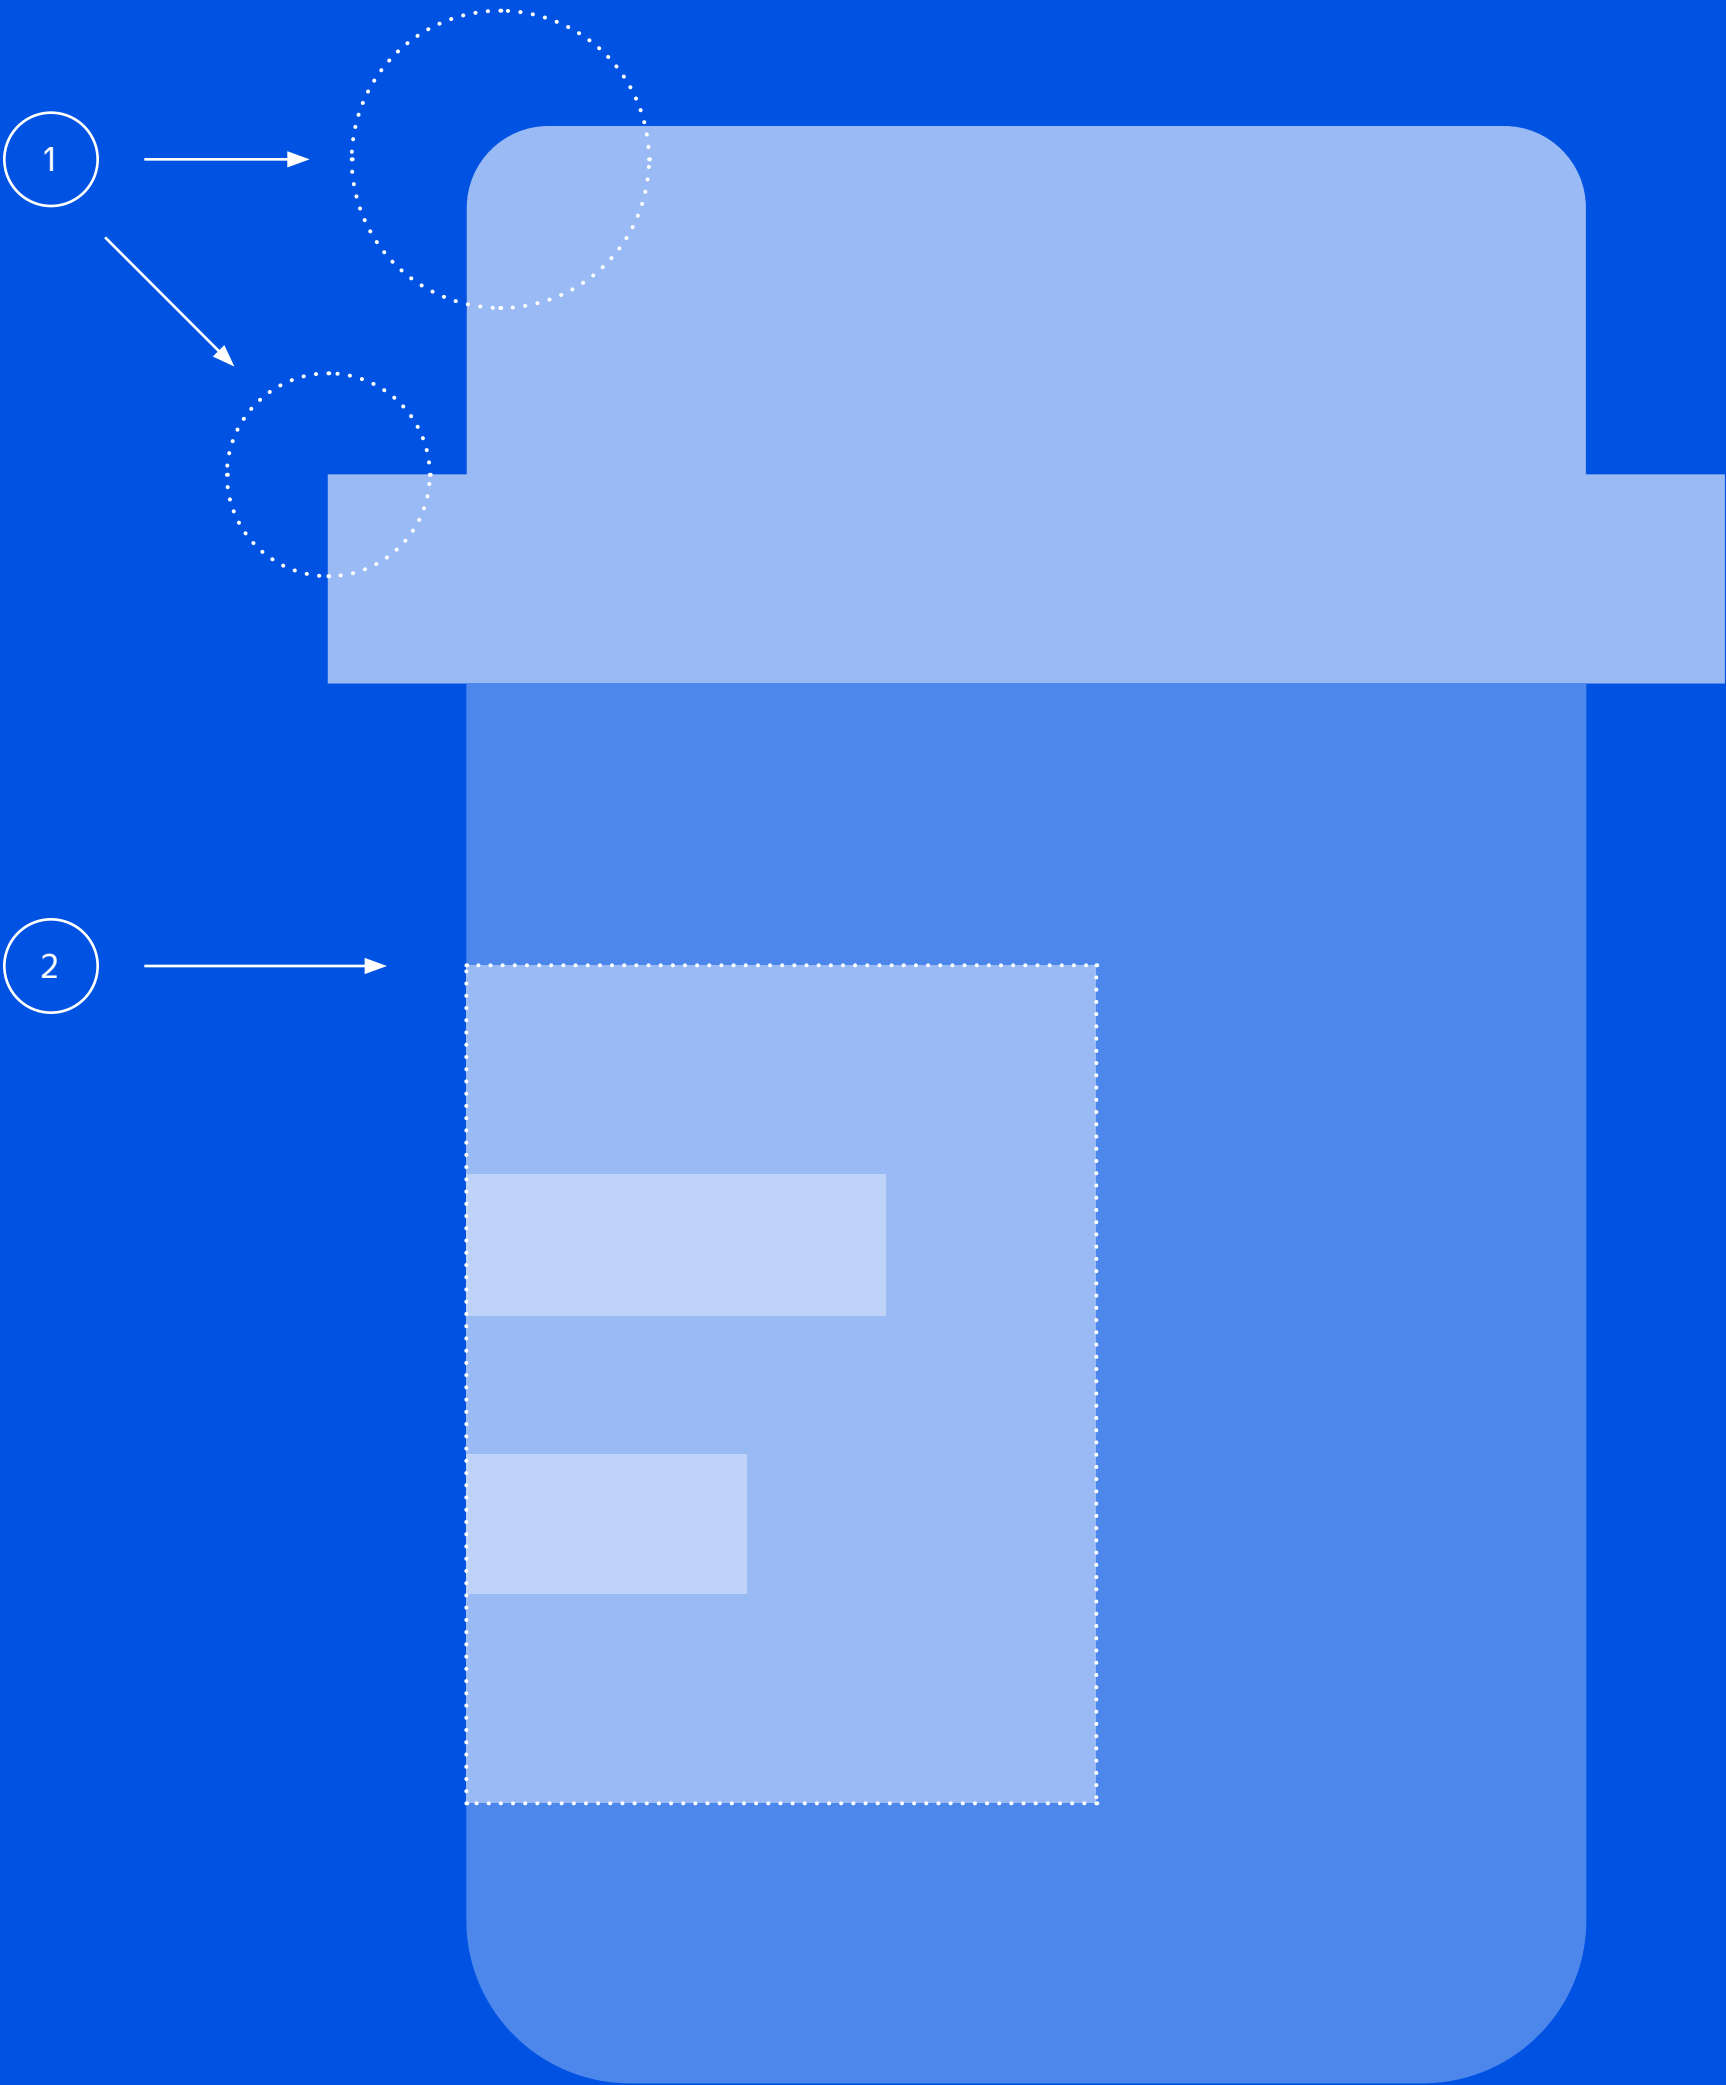

- 1

Sharp & Rounded Corners
Icons employ a mixture of both sharp and rounded corners, where appropriate for the item depicted. Ends of strokes are always square, never rounded.
- 2

Geometric Shapes
Where possible, icons are constructed using simple geometric shapes and straight horizontal or vertical lines for maximum clarity.
- 3

Flat Projection
Icons are rendered as flat 2D shapes without dimension, perspective, or shadow.
- 4

Simplicity
When crafting general icons, the simpler the better. They should never feel too complex or detailed.

General Icon Grid

Our general icons are built on a 32 x 32 pixel grid with a 2 pixel margin of clear space on all sides. Our key shapes (shown in Everyday Blue) help define the basic proportions of each icon to ensure consistent optical sizing.

We always align horizontal and vertical strokes cleanly to the grid for crisp and accurate rendering. Strokes are always **2 pixels wide**.

Icons will not always adhere perfectly to this grid. It is a general guideline and may occasionally be broken for aesthetic reasons.

General Icon Don'ts

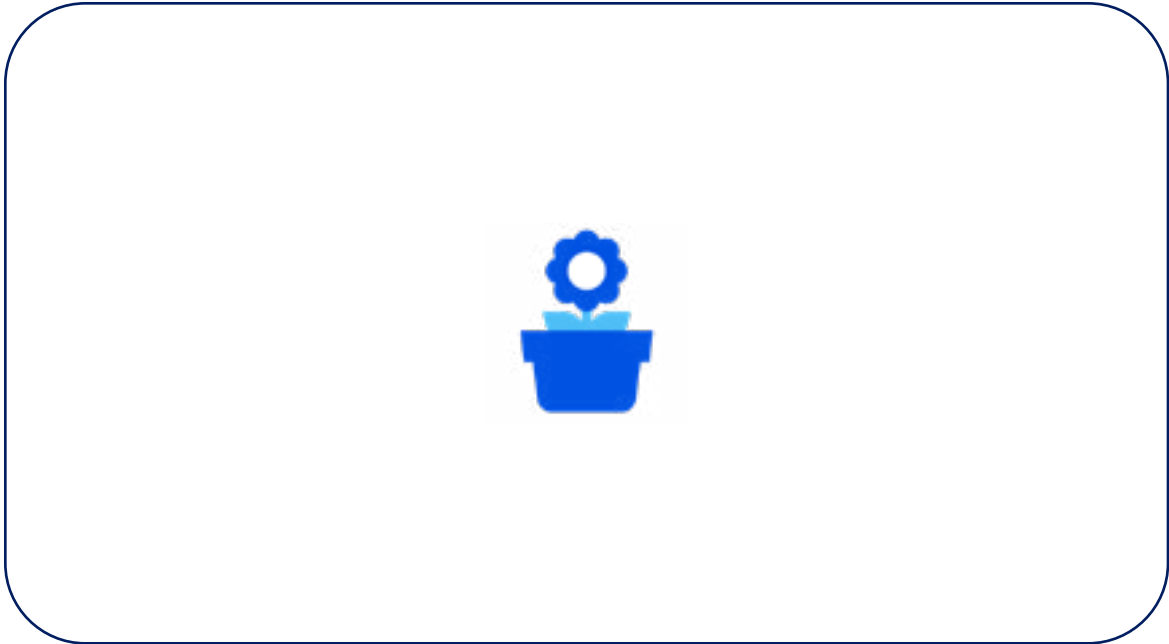

✔ Use our reverse colorway over dark backgrounds.

✔ Use our approved colorways without altering or modifying.

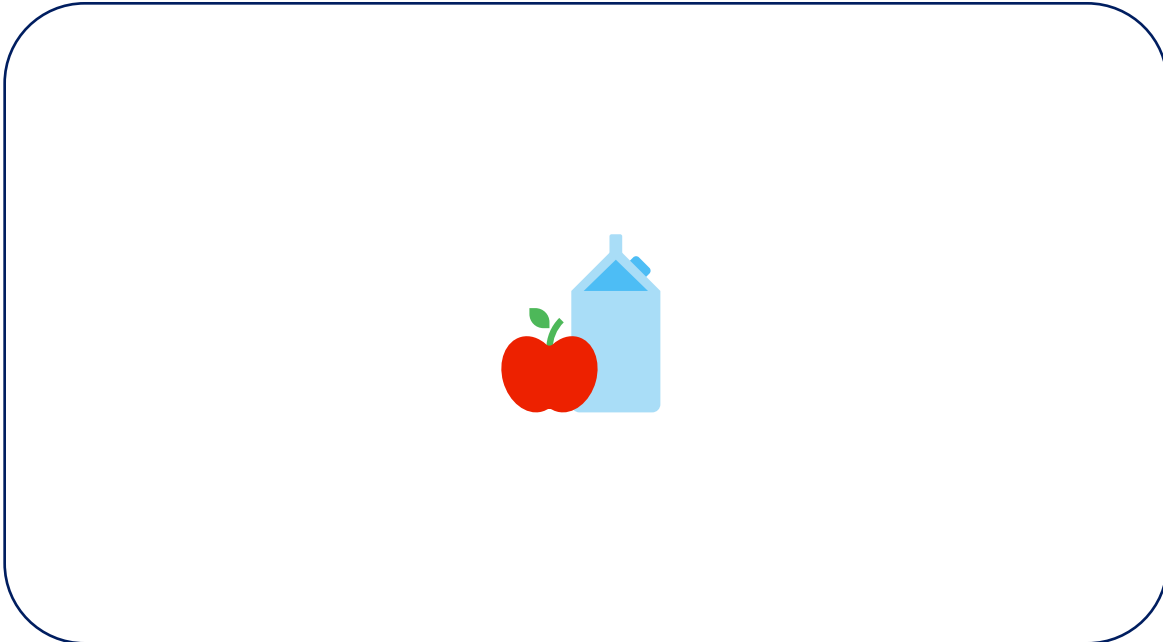

✔ Render objects as flat 2D shapes with straightforward geometry.

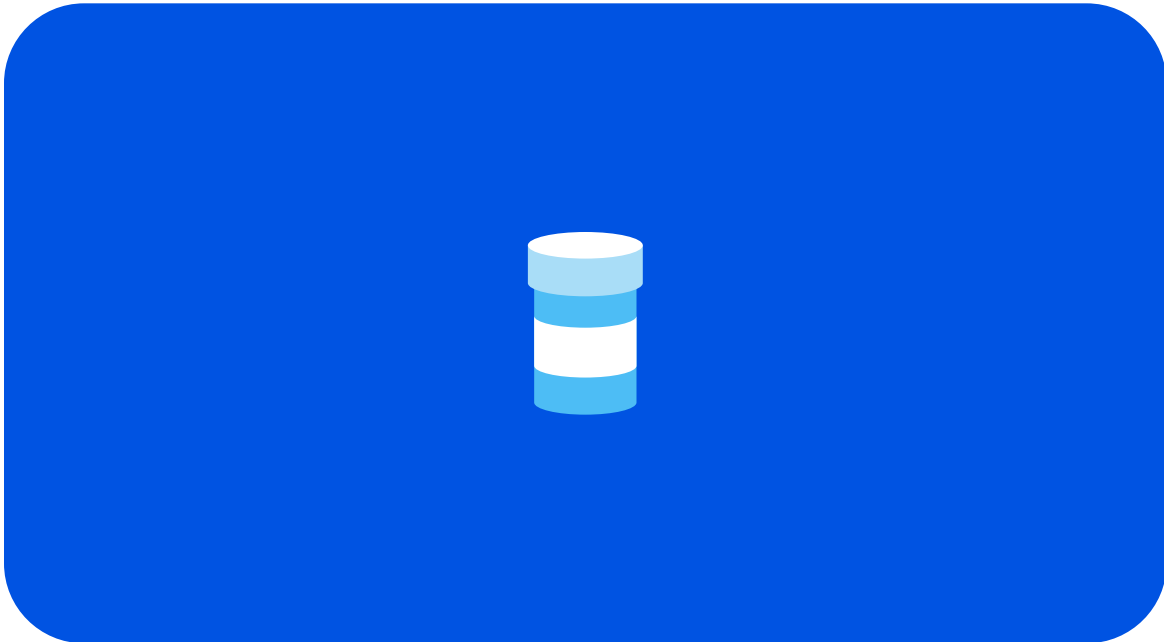

✔ Choose icons that can be represented in simple, compact forms.

✘ Don't put icons in containers.

✘ Don't recolor icons.

✘ Don't add depth, dimension, or shading.

✘ Don't make icons too complex.

Pictograms

Pictograms are our most illustrative tier of iconography.

They are used to communicate more nuanced concepts at larger sizes with an added emphasis on visual storytelling.

Pictogram Construction

- 1

Parallel Construction

Use parallel lines to establish a consistent dimetric perspective. Wherever possible, lines should be fully vertical or horizontal, not angled or curved.
- 2

Sharp & Rounded Corners

Icons employ a mixture of both sharp and rounded corners, where appropriate for the item depicted. Ends of strokes are always square, never rounded.
- 3

Planes & Depth

Color is used to delineate between planes to suggest depth. Recessive planes are darker in color and are always located on the right side of an object to establish a common perspective across icons.
- 4

Common Baseline

Pictograms are build on a consistent baseline to give the impresseion of resting on a surface. When using multiple pictograms, keep these baselines aligned.
- 5

Shadows

Shadows are used to amplify depth. They are always located on the right side of an object to establish a consistent light source. They may run along the edge of an object, or project at at angle onto the object behind.

Pictogram Grid

Our pictograms are built on a 64 x 64 pixel grid with a 4 pixel margin of clear space on all sides. Our key shapes (shown in Everyday Blue) help define the basic proportions of each pictogram to ensure consistent optical sizing. Note that our pictogram keyshapes align to the **bottom** of the grid, which keeps all pictograms aligned to a common baseline.

We always align horizontal and vertical strokes cleanly to the grid for crisp and accurate rendering. Our pictograms employ two different widths for stroked details—1 pixel for our thinnest details (such as a line of text) or 2 pixels for slightly thicker details (like the handle of a bag or purse).

Pictograms will not always adhere perfectly to this grid. It is a general guideline and may occasionally be broken for aesthetic reasons.

64 PX

Primary

Reverse

Pictogram Colorways

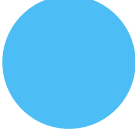

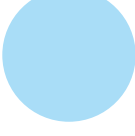

Our pictograms only exist in one colorway for use over White backgrounds. When applied over darker background colors, they should be placed in White containers.

Pictogram Color Approach

Our pictograms utilize all four Walmart blues, plus White where needed for small highlights or accents. This color approach is more flexible than with our general or functional icons—use the color proportions shown here as your starting point, adjusting as needed to portray different subject matter.

The chart at the right also shows which colors should be used to add shadows over each of our fill colors. We always utilize these pairings to maintain appropriate contrast.

	Color Fill	Shadow
1	True Blue	
2	Everyday Blue	
3	Sky Blue	
4	Bentonville Blue	
5	White	

Pictogram Don'ts

✓ Place pictograms in solid white containers for use over colored backgrounds.

✓ Use our approved pictograms without altering or modifying color.

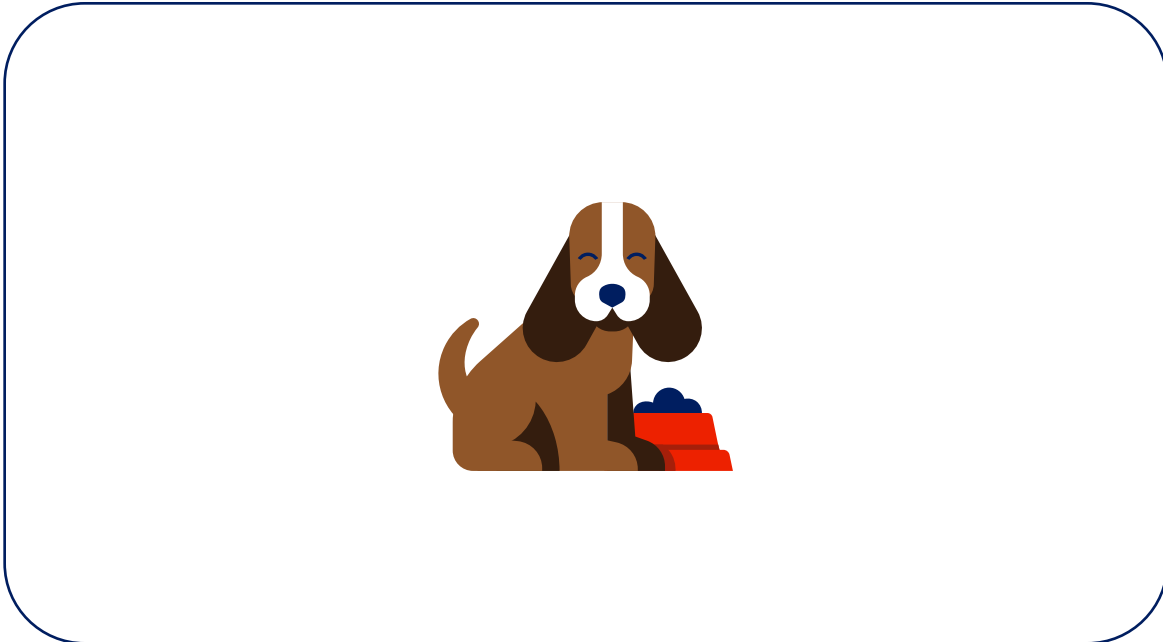

✓ Depict single objects or simple object clusters that are clear and easily legible.

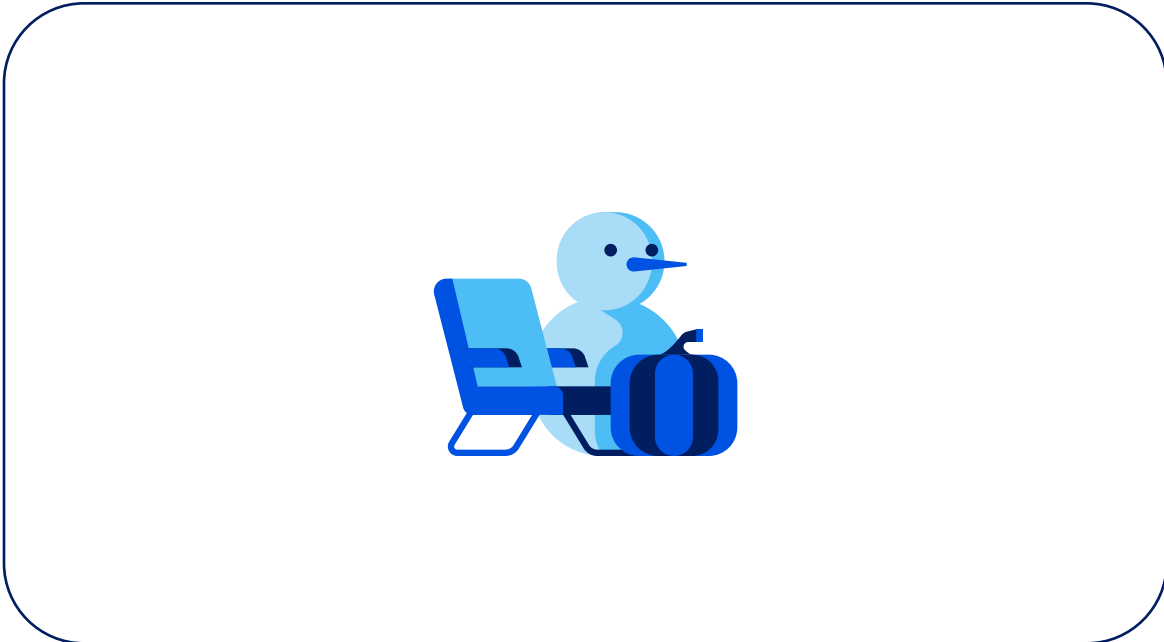

✓ Construct pictograms to rest on a consistent baseline.

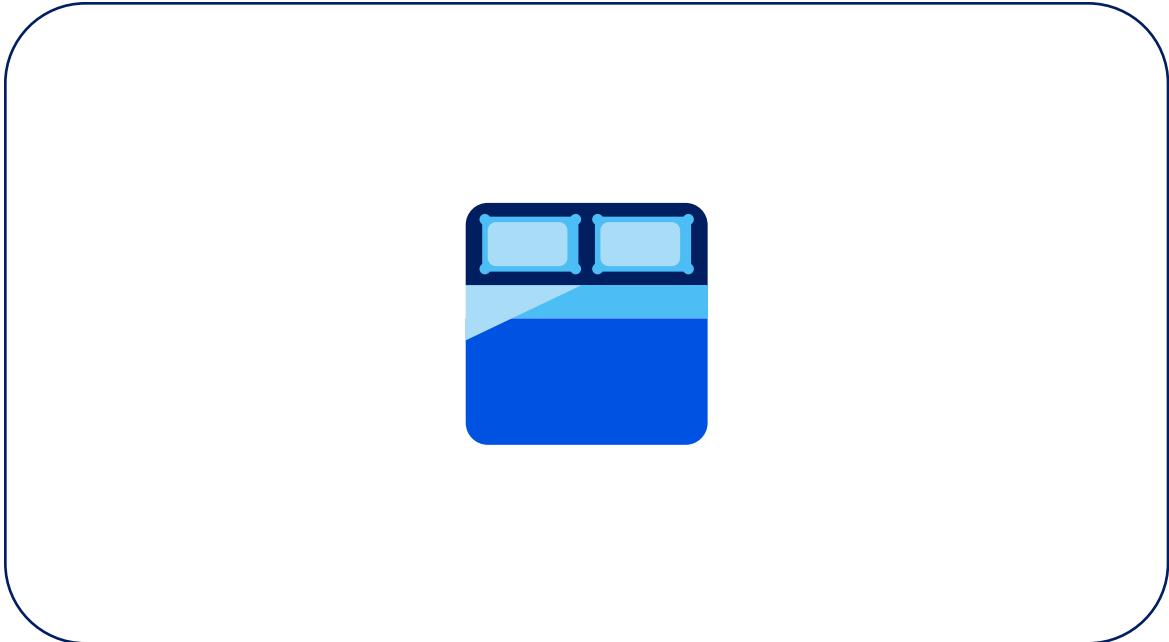

✗ Don't place pictograms directly over colored backgrounds.

✗ Don't recolor pictograms.

✗ Don't overcomplicate pictograms by including too many elements.

✗ Don't depict objects from inconsistent angles or perspectives.

Image

Image Idea

Vibrant Everyday

Walmart’s imagery captures the everyday moments that make life meaningful. We invite viewers to step into the scene not as observers, but as storytellers in their own right.

Our visual style embraces warmth, dynamism, and the beauty of the everyday, making the ordinary feel vibrant and alive.

Image Principles

These principles set the tone and vision for Walmart’s approach to film, photography, and illustration. They are derived from our overarching Brand Principles (noted on the left), but have been specifically tailored to help guide photographic execution.

Image Principles

01 Grassroots →

Relatable

02 Agile →

Dynamic

03 Pioneering →

Heroic

Execution

Our imagery depicts real emotion that feels believable and relatable. We don’t shy away from the unfiltered vibrancy of everyday life.

For both people and products, we showcase a full spectrum of colors, quirks, and imperfections that reflect the diversity of our communities.

We show people in spontaneous and serendipitous moments and depict products as part of people’s lives, rather than separate.

We keep up with culture and reflect it back to our customers, meaning our imagery feels fresh and never staid or boring.

We represent our customers as confident and empowered, and our products as enticing and larger than life.

We use dramatic crops and angles that feel big and bold, that are worthy of any billboard.

Image Overview

Image Idea

Vibrant Everyday

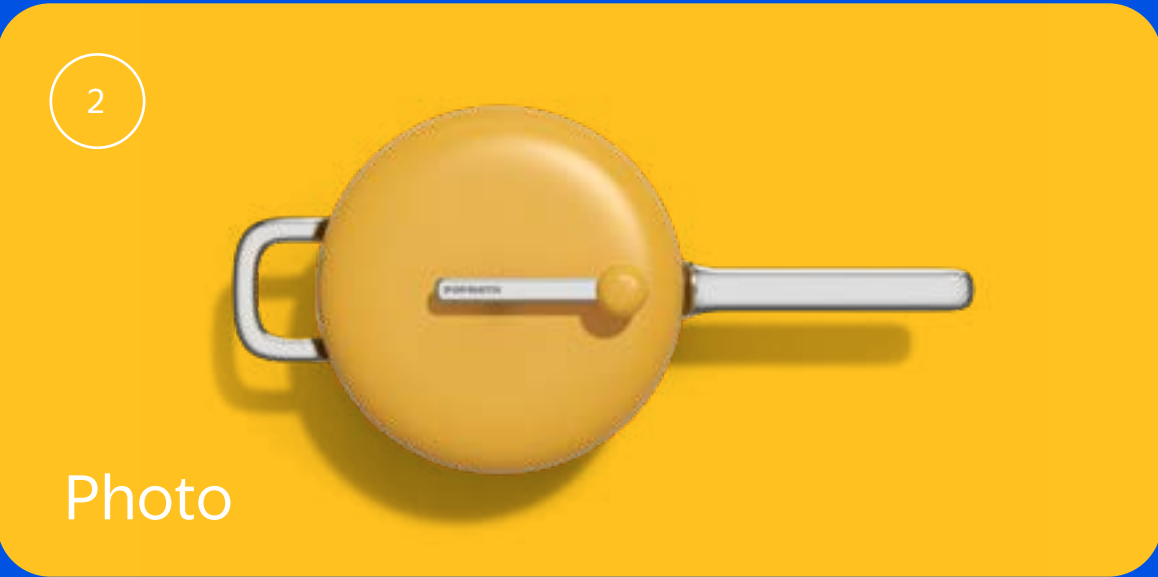

Across our portfolio, we use a simple framework to detail each of our choices:

Subject:
Identify the subject matter in our imagery and the benefits

Execution:
Identify the style guardrails

Placement:
Demonstrate where it exists out in the world

Image Type

Subject

People

Reflecting the diversity of our customers and associates

Products

Showcasing the breadth and depth of what we offer

People

Image Principles Cheat Sheet

Brand Purpose Guides the enterprise.	Save money. Live better.		
Brand Principles Guide our brand expression.	Grassroots We never forget our humble beginnings; we’re relatable, down-to-earth and part of the community.	Agile Agility is our x-factor. We are constantly improving, endlessly testing, always adapting.	Pioneering Since the beginning, we’ve blazed a path and never settled because that’s what it takes to make life better and easier.
Image Idea	Vibrant Everyday		
Image Principles Derived from our Brand Principles but specifically tailored for implementation through photo, film, and illustration.	Relatable Our imagery depicts real emotion that feels believable and relatable. We don’t shy away from the unfiltered vibrancy of everyday life. For both people and products, we showcase a full spectrum of colors, quirks, and imperfections that reflect the diversity of our communities.	Dynamic We show people in spontaneous and serendipitous moments and depict products as part of people’s lives, rather than separate. We keep up with culture and reflect it back to our customers, meaning our imagery feels fresh and never staid or boring.	Heroic We represent our customers as confident and empowered, and our products as enticing and larger than life. We use dramatic crops and angles that feel big and bold, that are worthy of any billboard.

Illustration

Illustration is our invitation into the World of Walmart. We capture the reality of the everyday—from the real, lived-in moments of everyday life to the bustling, diverse communities we serve. Scenes are full of dimension and texture, with a strong presence of True Blue and Spark Yellow. When fully composed, our illustrations embody a modern craft that's uniquely Walmart—in store, and on screen.

Illustration Style

- 1 Use realistic body proportions and skin tones.
- 2 Depict diverse subjects and situations.
- 3 Use shadows to create depth and dimension.
- 4 Incorporate subtle hints of pattern and texture.
- 5 Use our blues to consistent.

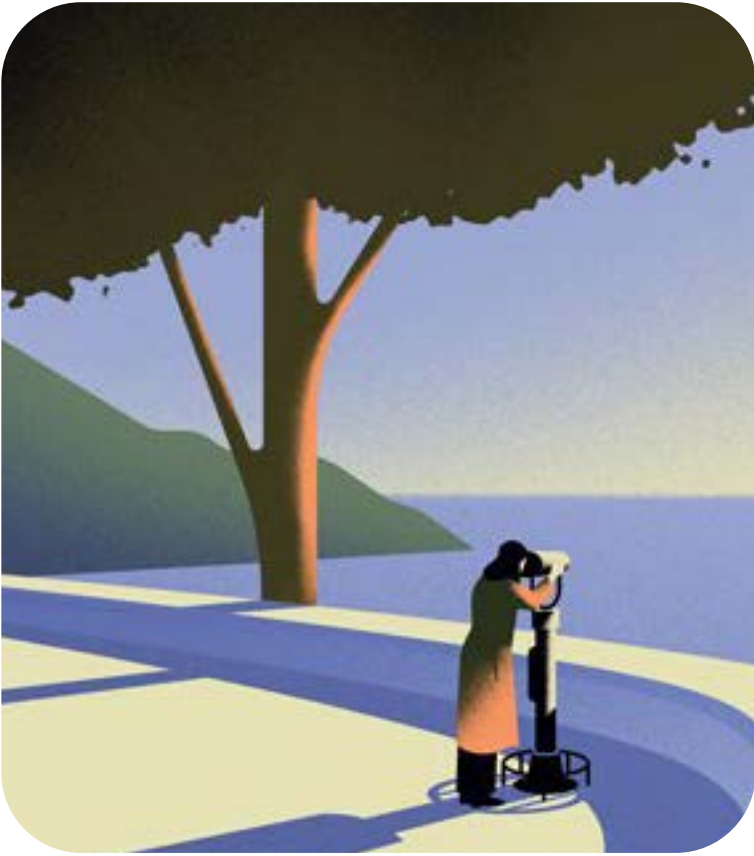

Illustration Tiers

Isolated (Hero)

Our simplest illustrations are isolated people or objects on flat colored backgrounds. They don't include any environmental or contextual clues and are easy to scale and crop across different application sizes and formats.

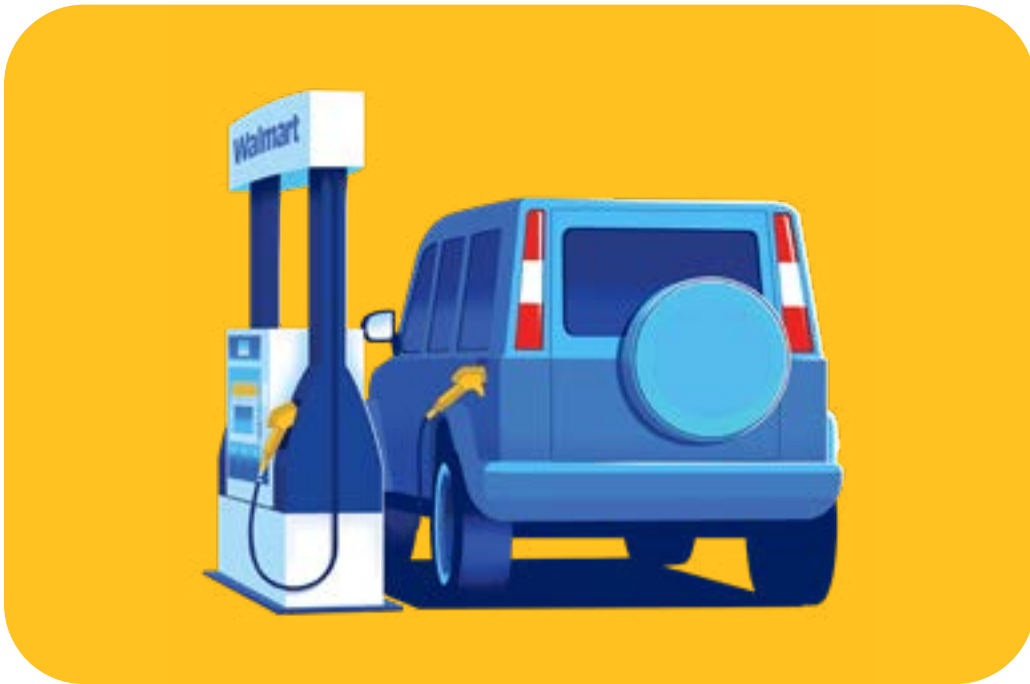

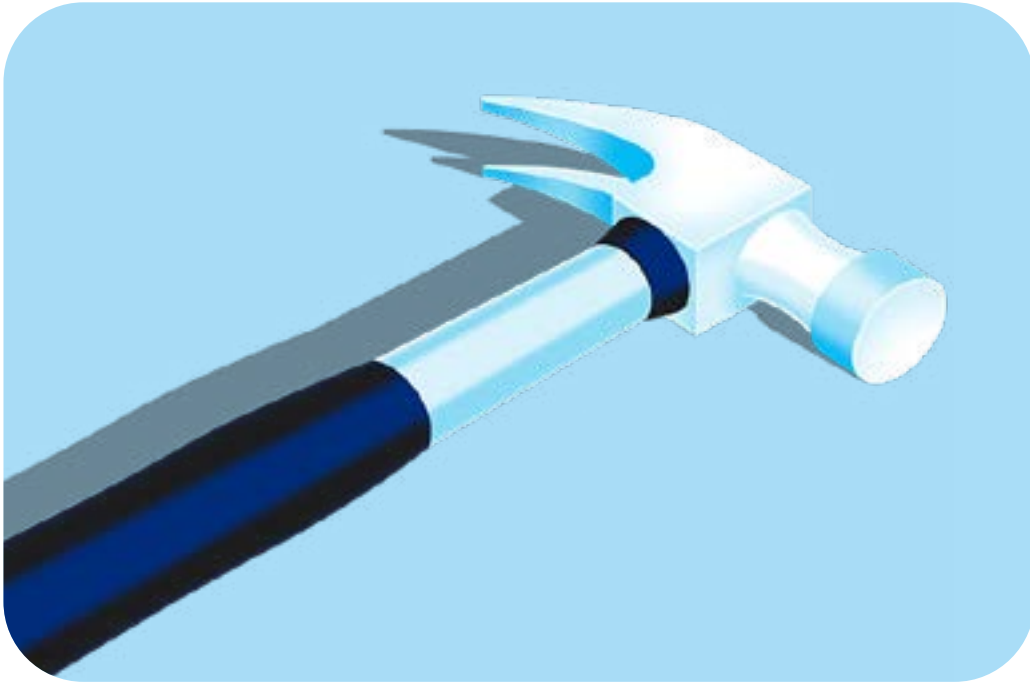

Isolated (Group)

Our vignettes are slightly more complex with small groupings of objects or people over solid backgrounds. Limited environmental cues may be present to hint at a greater context or setting.

Narrative Scene

Narrative scenes are powerful storytelling tools, depicting complete scenes with fully developed environments. They are best used in full-bleed format, particularly at large, impactful scales.

Less Complex

More Complex

Illustration Palette

When crafting illustrations, we utilize an expanded color palette that includes our core brand palette, plus a range of related tints, shades, and neutral tones.

Illustrations should lean into our core blues for consistency and recognition, with liberal amounts of supporting colors in both figures and backgrounds. This helps our illustrations feel warm and inviting—a vibrant pop of color in our blue and white world.

Note:

Please note that our palette does NOT include pure black. Instead, we use Bentonville Blue or a dark neutral. Pure white may be used sparingly, where appropriate.

Core Palette

#0053E2
#FFFFFF
#FFC220
#001E50
#4DBDF5
#A9DDF7

Supporting Palette

#FCE9F5	#FEF6DE	#EDF5D9
#F4BDD3	#FBE298	#D2E5A1
#FF765F	Spark Yellow #FFC220	#6ABF4B
F150 Red #ED2100	#F48A16	#00AE42
#A51F0A	#CC5605	#0B6830
#66241E	#933B00	#07421C

Skin Tones & Neutrals

#FFE1CC	#FBE8D2	#F7EED7	#EFE8D5
#F9BE93	#E8BE8F	#D7BE8A	#BEB286
#C96E3A	#C78242	#C49549	#937E35
#994D2C	#905629	#875F26	#6B601D
#67301C	#623A1B	#5D431A	#594E0E
#35130C	#341D0E	#33270F	#332E06

Color Usage

A balanced color approach is key in maintaining a warm and inviting illustration style.

Our core blues should always be present, but too much blue can overwhelm our illustrations and make them feel cold and corporate. Be sure to balance our blues with other warmer tones from our supporting palette.

We always use realistic colors for skin tones, food items, and natural elements like trees or grass. Blue skin tones flatten the diversity of our illustrations, while unnaturally blue foods may be unrecognizable (and unappetizing).

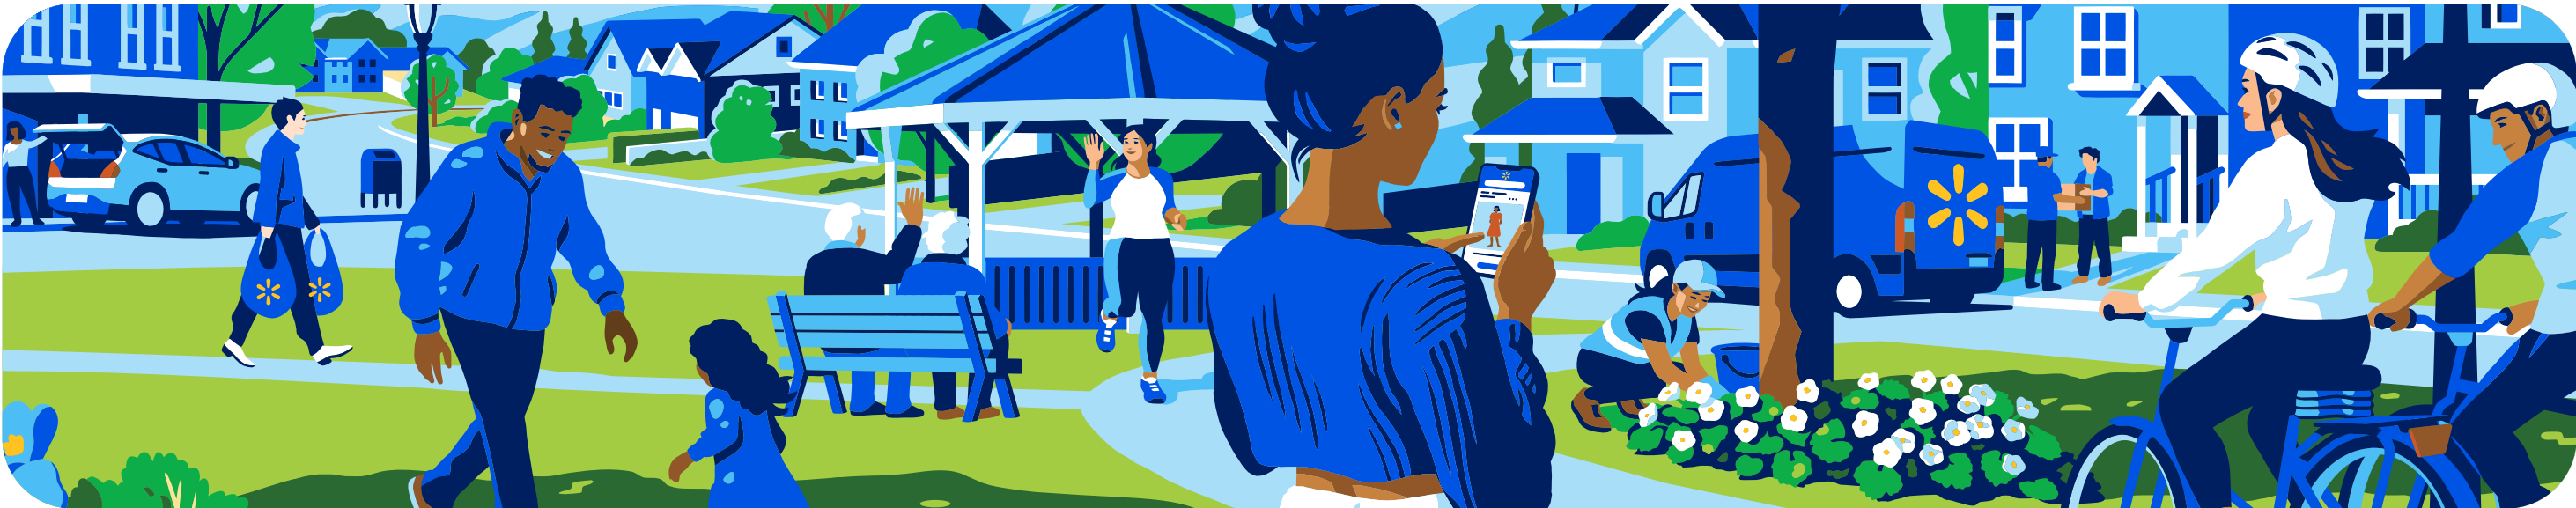

Not enough blue

Just right

Too much blue

Our illustrations are...

Representational

Subtly textured

Dimensional

Narrative

Our illustrations are not...

Production Considerations

Always keep these best practices in mind when producing illustrations for a project.

Timing	- The length of each product will vary based on the number of assets. Once a concept is approved and key deliverables are locked, the process from briefing to handoff will take an average of ~4 to 5 weeks to complete.
Budget	- The number of original assets and the size of each illustration will affect the budget. Before work is shared with Senior Leadership, please connect with a WCS IP to confirm costs. On average, a single asset costs around ~\$3 to 5k to produce.
Legal	- If a project is not trafficked through WCS Integrated Production, all final contracts should be approved by a WMT legal representative and include language around owning all worldwide rights to all Property, the Deliverables, and all components in perpetuity. - Legal should also confirm if any language must be present to secure rights of illustrations within AI tools (i.e. for future work.) - Finally, all deliverables are and shall be protected as a “work made for hire.”
Handoff	- Upon completion of final illustrations, all assets must be uploaded to Walmart’s DAM (AEM) along with proper metadata for tagging and tracking. From AEM, assets can then be shared out for wider use. - Please reach out to Tighe McGillivray, Sr. Manager, Creative Tools & Data Strategy for more information.
Watchouts	- There are various reps/vendors that have been cleared to work with Walmart. A WCS producer can provide if needed. - Many of the illustrators included within the “Illustrator Rolodex” are based outside the US. Please keep this in mind for any tight turnaround times (i.e. varying time zones.) - Avoid multiple one-off requests when requesting work. Provide all deliverables upfront and be detailed and specific to avoid confusion and excessive back-and-forth. Avoid vague descriptions of needed assets.

Production Schedule Guidance

Film & Photo

This section outlines our three tiers of film and photography, detailing each tier's unique style and purpose.

Clear guidance is provided to aid in execution no matter how we show up—whether bringing to life a storytelling-led TV spot, a product-focused still life, or anything in between.

Tier Overview

Tier 1

We engage viewers through compelling narratives and visually rich storytelling. Often through film, this brand-forward tier helps create an emotional connection with our audience, highlighting Walmart’s presence in our customers’ lives.

Primary Medium
Film

Sample Placements
TV / Broadband
OLV
Paid Social
OOH / DOOH

Tier 2

By balancing storytelling and functionality, this tier helps our customers see the products we offer—and their unique benefits—in their own lives. Often presented in-context, we create relatable, yet aspirational imagery that entice our customers to fill up their cart.

Primary Medium
Photography

Sample Placements
OLV
Paid Social
Site
Store

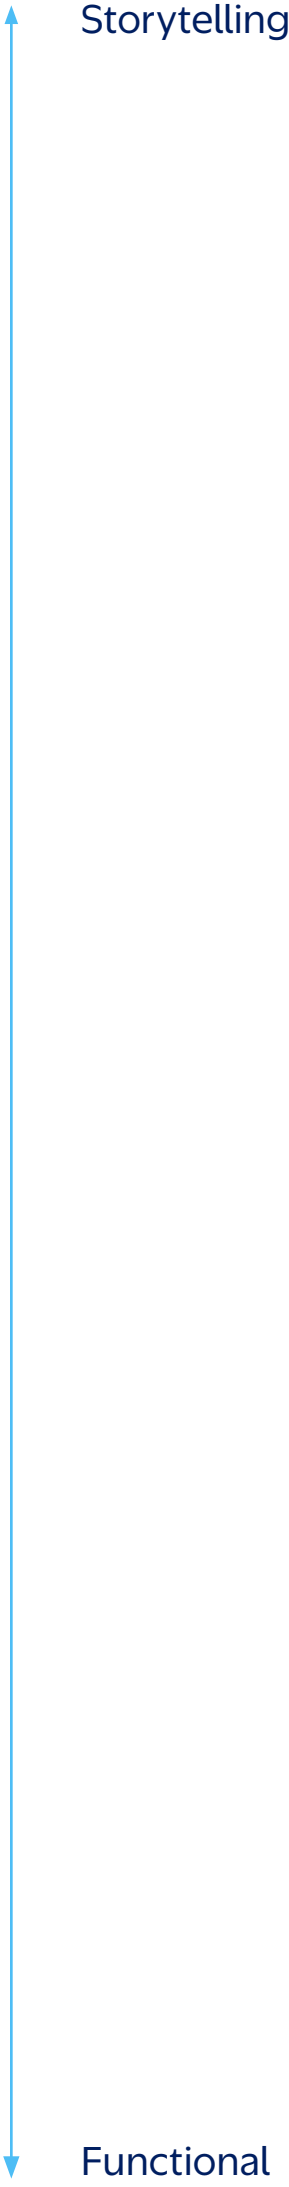

Tier 3

Our most functional tier presents products in a bold and straightforward way. Set against simple colored backdrops, each image highlights products with clarity, allowing it to take center stage in an uncluttered space—emphasizing product details and quality.

Tier 1 Approach

Tier 1 Style Overview

Our approach to film brings a real-world warmth to our customers and viewers. We tell authentic stories in a vibrant and cinematic way, inviting our viewers to see themselves in our brand. By carefully considering color & lighting, framing & composition, and environments & styling, we aim to create a visual style that’s unique to Walmart and sets us apart from our competitors.

Tier 1 Execution

1 Lighting & Color

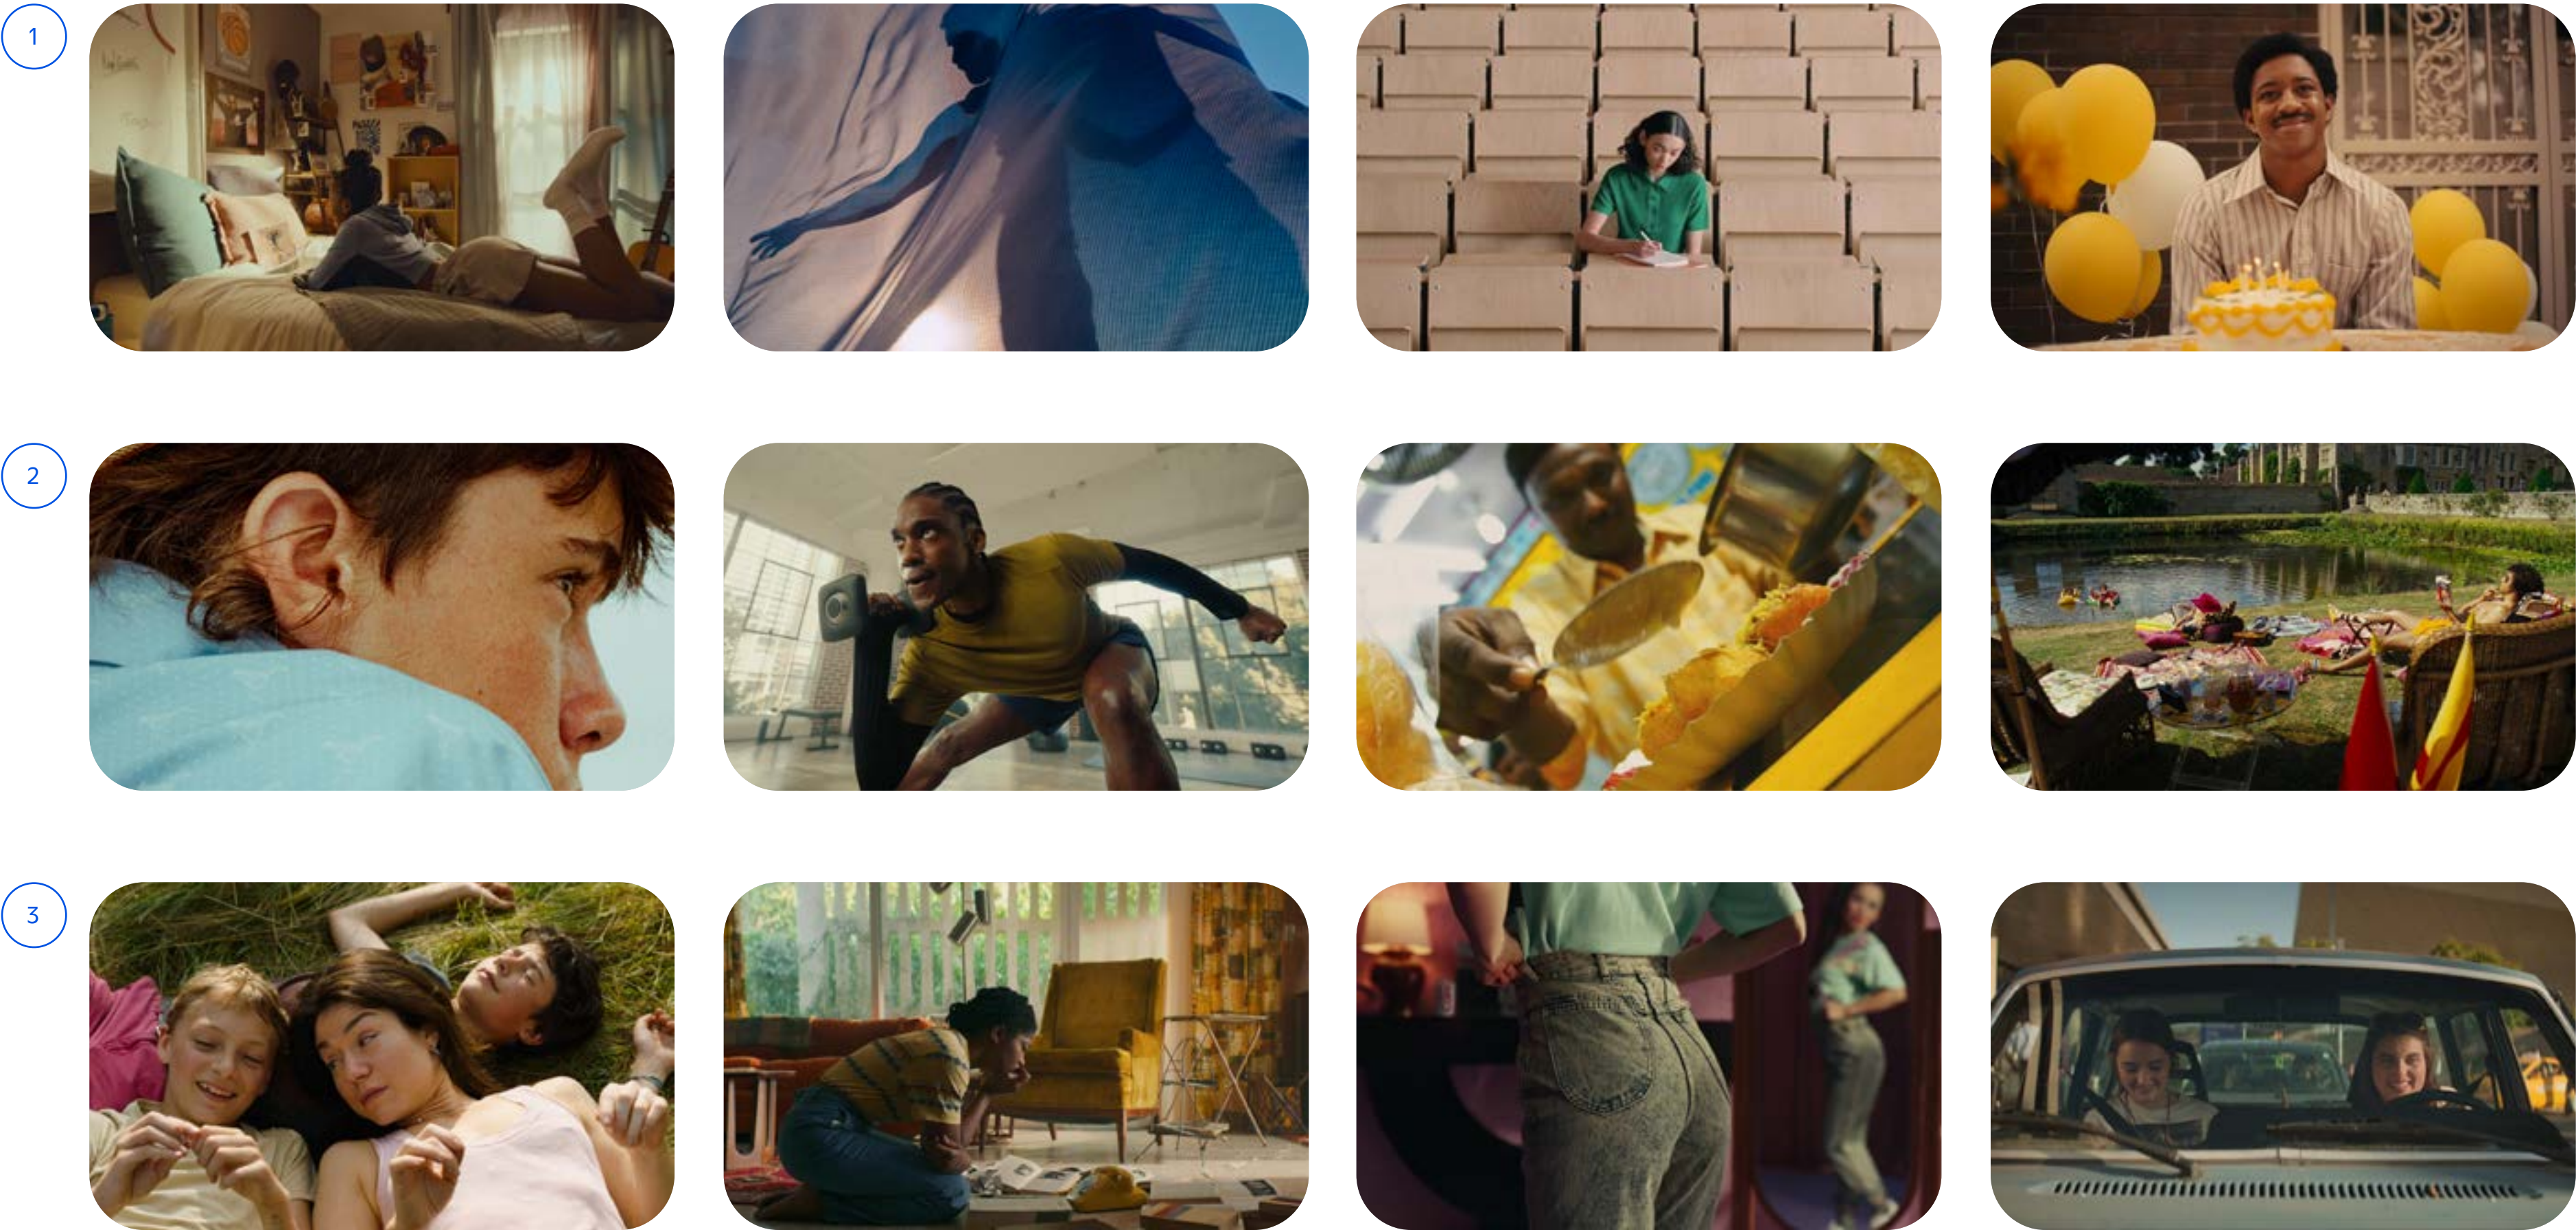

Lighting is reminiscent of natural daylight, giving a warmth that feels intimate and real. Look to maintain a balance in shadows and highlights to avoid stark contrasts. A gentle interplay of light and dark gives images depth, making them feel grounded and tactile, just like everyday experiences.

2 Composition & Framing

Whether we are zooming in on genuine expressions or framing wide shots that set a subject in their environment, each frame is dynamic from the next, keeping viewers engaged in the story.

3 Environment & Styling

Choose locations and props that mirror the real world of our customers. Spaces should feel lived-in and relaxed, with a natural arrangement that conveys authenticity rather than an overtly stylized look, while the use of props helps create visual storytelling layers that feel intimate and personal.

Our imagery is...

✓ Reflective of real world moments

✓ Expressive of a diverse spectrum of emotions

✓ Illuminated with warm and natural light

✓ Representative of all walks of life

Our imagery is not...

✗ Overly stylized

✗ Heavily color-graded

✗ Surreal

✗ Desaturated or black & white

Director Rolodex

If you’re creating Tier 1 imagery, we encourage you to strongly consider one of these creative partners. Their work answers our principles perfectly—and their style, expertise and approach help us ensure high-quality, authentic imagery that will resonate with our audience.

Tier 2 Approach

Tier 2 Style Overview

Our photographic style is a balance of authenticity and aspiration, portraying products seamlessly woven into the lives of real customers. Each shot is captured as a candid moment, brimming with a sense of movement and spontaneity that feels unstaged and alive.

Tier 2 Shotlist

Below is a visual shortlist of the categories in Tier 2. All imagery captured is intended to depict real life settings and environments, however, it can be achieved in studio (in context) or on location depending on the production of your shoot.

STUDIO

Product
Shot in context, products are staged in environments that emulate the product's setting or usage.

People
Even in studio, the goal is to capture real-life moments and everyday experiences between people and products.

ON LOCATION

Product
Capture products in ways that visually enhance the authenticity of our photographic library, through real life environments and settings.

People
Capture people directly engaged with products or completely immersed in scenes set to mimic real life.

Tier 2 Execution

1 Lighting & Color

Lighting is reminiscent of natural daylight, giving a warmth that feels intimate and real. Look to maintain a balance in shadows and highlights to avoid stark contrasts. A gentle interplay of light and dark gives images depth, making them feel grounded and tactile, just like everyday experiences.

2 Composition & Framing

Whether we are zooming in on genuine expressions or framing wide shots that set a subject in their environment, each frame is dynamic from the next, keeping viewers engaged in the story.

3 Environment & Styling

Embrace a little mess! Incorporating a little mess into styling and props helps create a sense of authenticity and candidness in our photography, giving each scene a lived-in, real-world feel.

Tier 2 Cropping

When cropping photography, we aim to create visually engaging compositions that feel natural and allow the viewer’s eye to explore. By leveraging the rule of thirds, we achieve a dynamic variety that brings personality to each image and avoids overly predictable, centered crops. Here’s how we approach cropping for a visually rich, authentic experience:

1 Create Balance and Interest

Embrace asymmetry, by positioning key focal points along one of the intersecting lines. This Secondly, be intentional with negative space, as it can tell as much about the story as the subject or prop itself.

2 Vary the Placement of Subjects

Avoid placing the subject in the same position for every shot. As variation makes the sequence of images feel natural and unique, keeping viewers interested without the images appearing formulaic.

3 Depth and Layering

Embrace natural elements in the background or foreground to frame your subject without necessarily centering them. By aligning these additional elements along the grid’s thirds, you create visual depth and layers that enhance the sense of a real, lived-in moment.

1

2

3

Tier 2 Heroing Product

Compositions are bold and visually engaging, crafted to draw the eye instantly to a single focal point—the product.

- 1
- Consider backgrounds and props**

Backgrounds and props are used to provide context, but should be unobtrusive, enhancing the product’s presence without drawing attention away from it.

- 2
- Be intentional when cropping**

Use cropping to create a strong focal point on the product, enhancing its overall prominence within the composition while preserving enough context to tell its story.

- 3
- Be dynamic in composition**

Use dynamic angles and layered foreground and background elements to naturally guide the viewer’s eye, creating a clear and compelling focal point within the frame.

Our imagery is...

✓ Reflective of real world moments

✓ Expressive of a diverse spectrum of emotions

✓ Illuminated with warm and natural light

✓ Representative of all walks of life

Our imagery is not...

✗ Overly stylized

✗ Busy and complex

✗ Illuminated with artificial light

✗ Drenched in shadows

Photographer Rolodex

If you’re creating Tier 2 imagery, we encourage you to strongly consider one of these creative partners. Their work answers our principles perfectly—and their style, expertise and approach help us ensure high-quality, authentic imagery that will resonate with our audience.

Tier 3 Approach

Tier 3 Style Overview

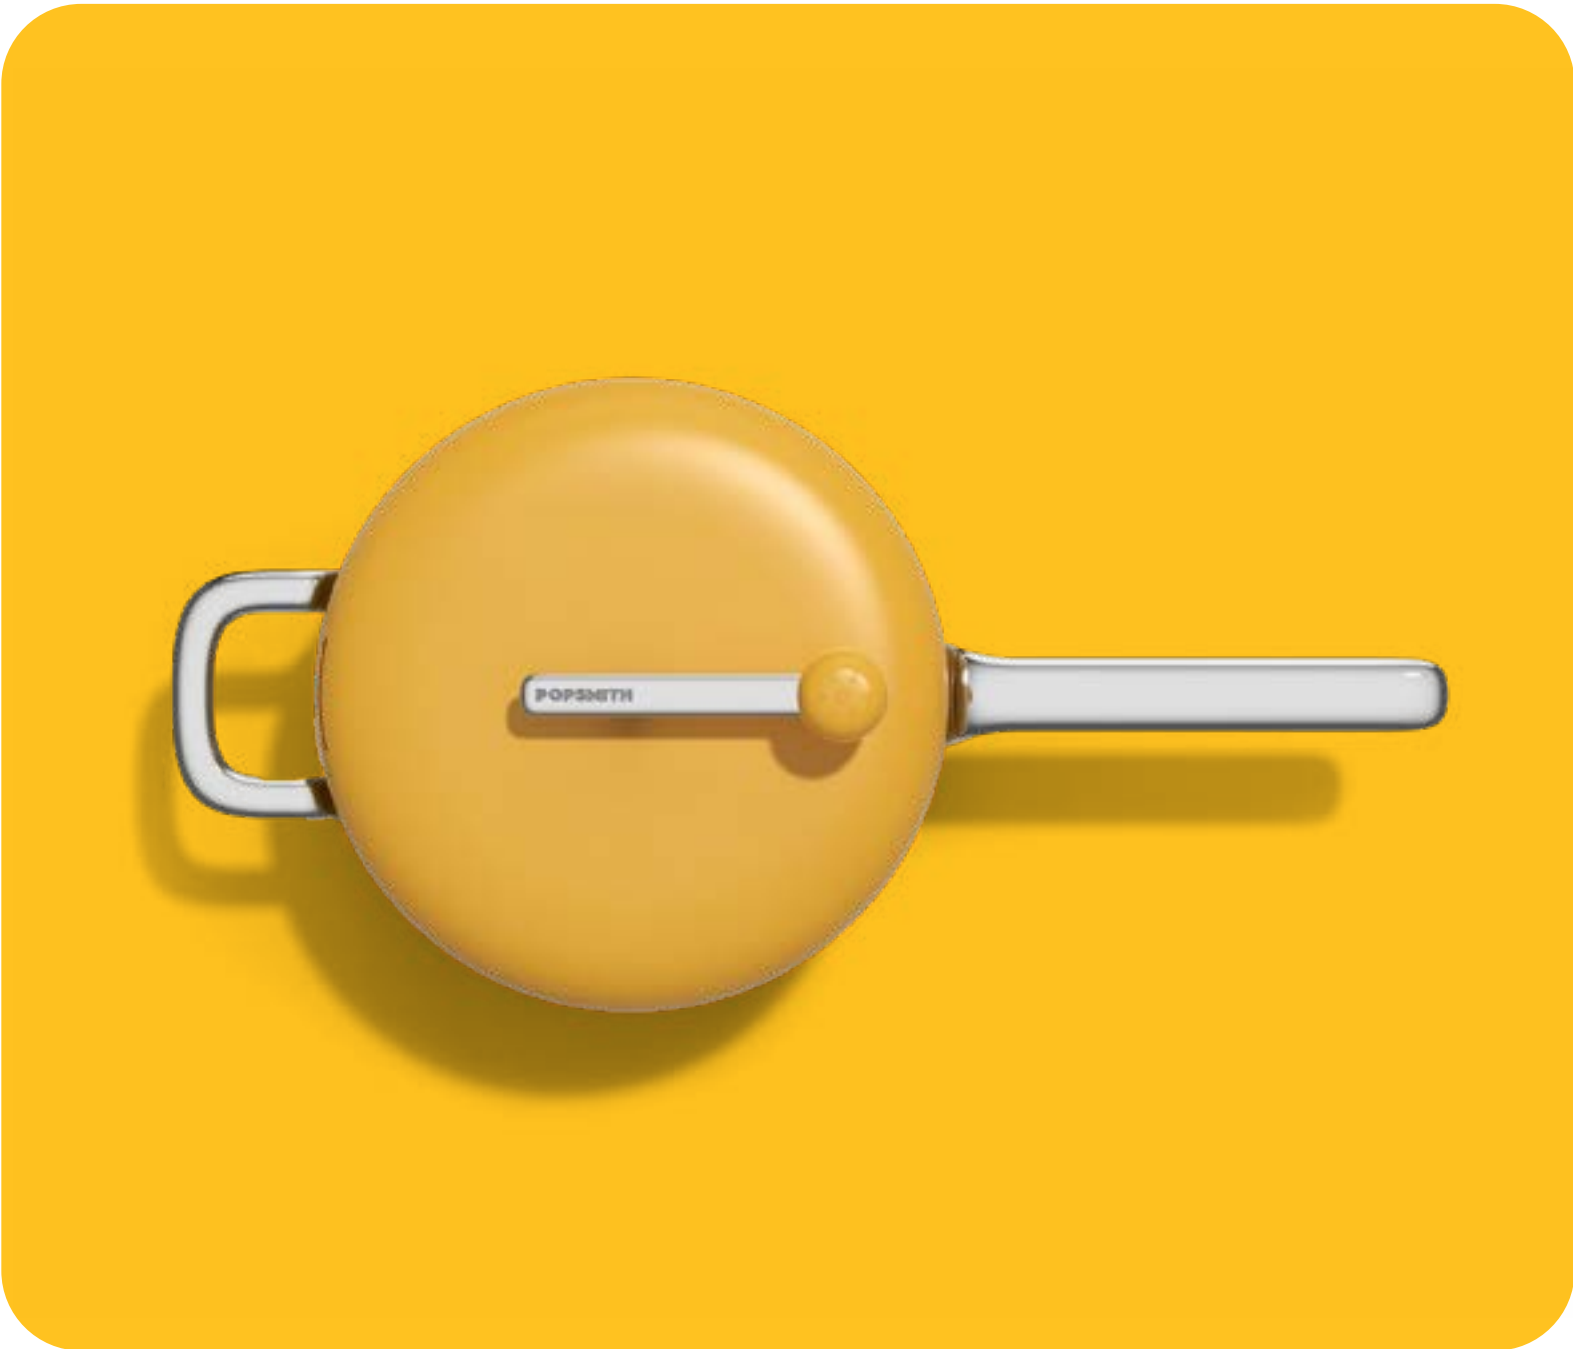

Our photography style elevates each product through refined, bold imagery shot against clean studio backdrops. Every shot is crafted to emphasize the craftsmanship and intrinsic value of our products, showcasing them as hero pieces within an uncluttered, visually striking space.

Tier 3 Shotlist

Below is a visual shortlist of the categories in Tier 3. All imagery captured is intended to highlight product features and usage.

STUDIO

Product (PDP)
Stand alone product, grounded on a simple bold graphic color,

Product (Heroic)
Heroic product(s) captured from an angle on a seamless backdrop with no additional props.

People
Product styled on a model, shot against a seamless studio backdrop.

Tier 3 Execution

1 Lighting & Color

We sculpt light to perfection, with bright highlights and deep shadows to bring out every detail and ground it effortlessly against our vibrant seamless backdrops. This interplay of light allows for the product to stand boldly in focus.

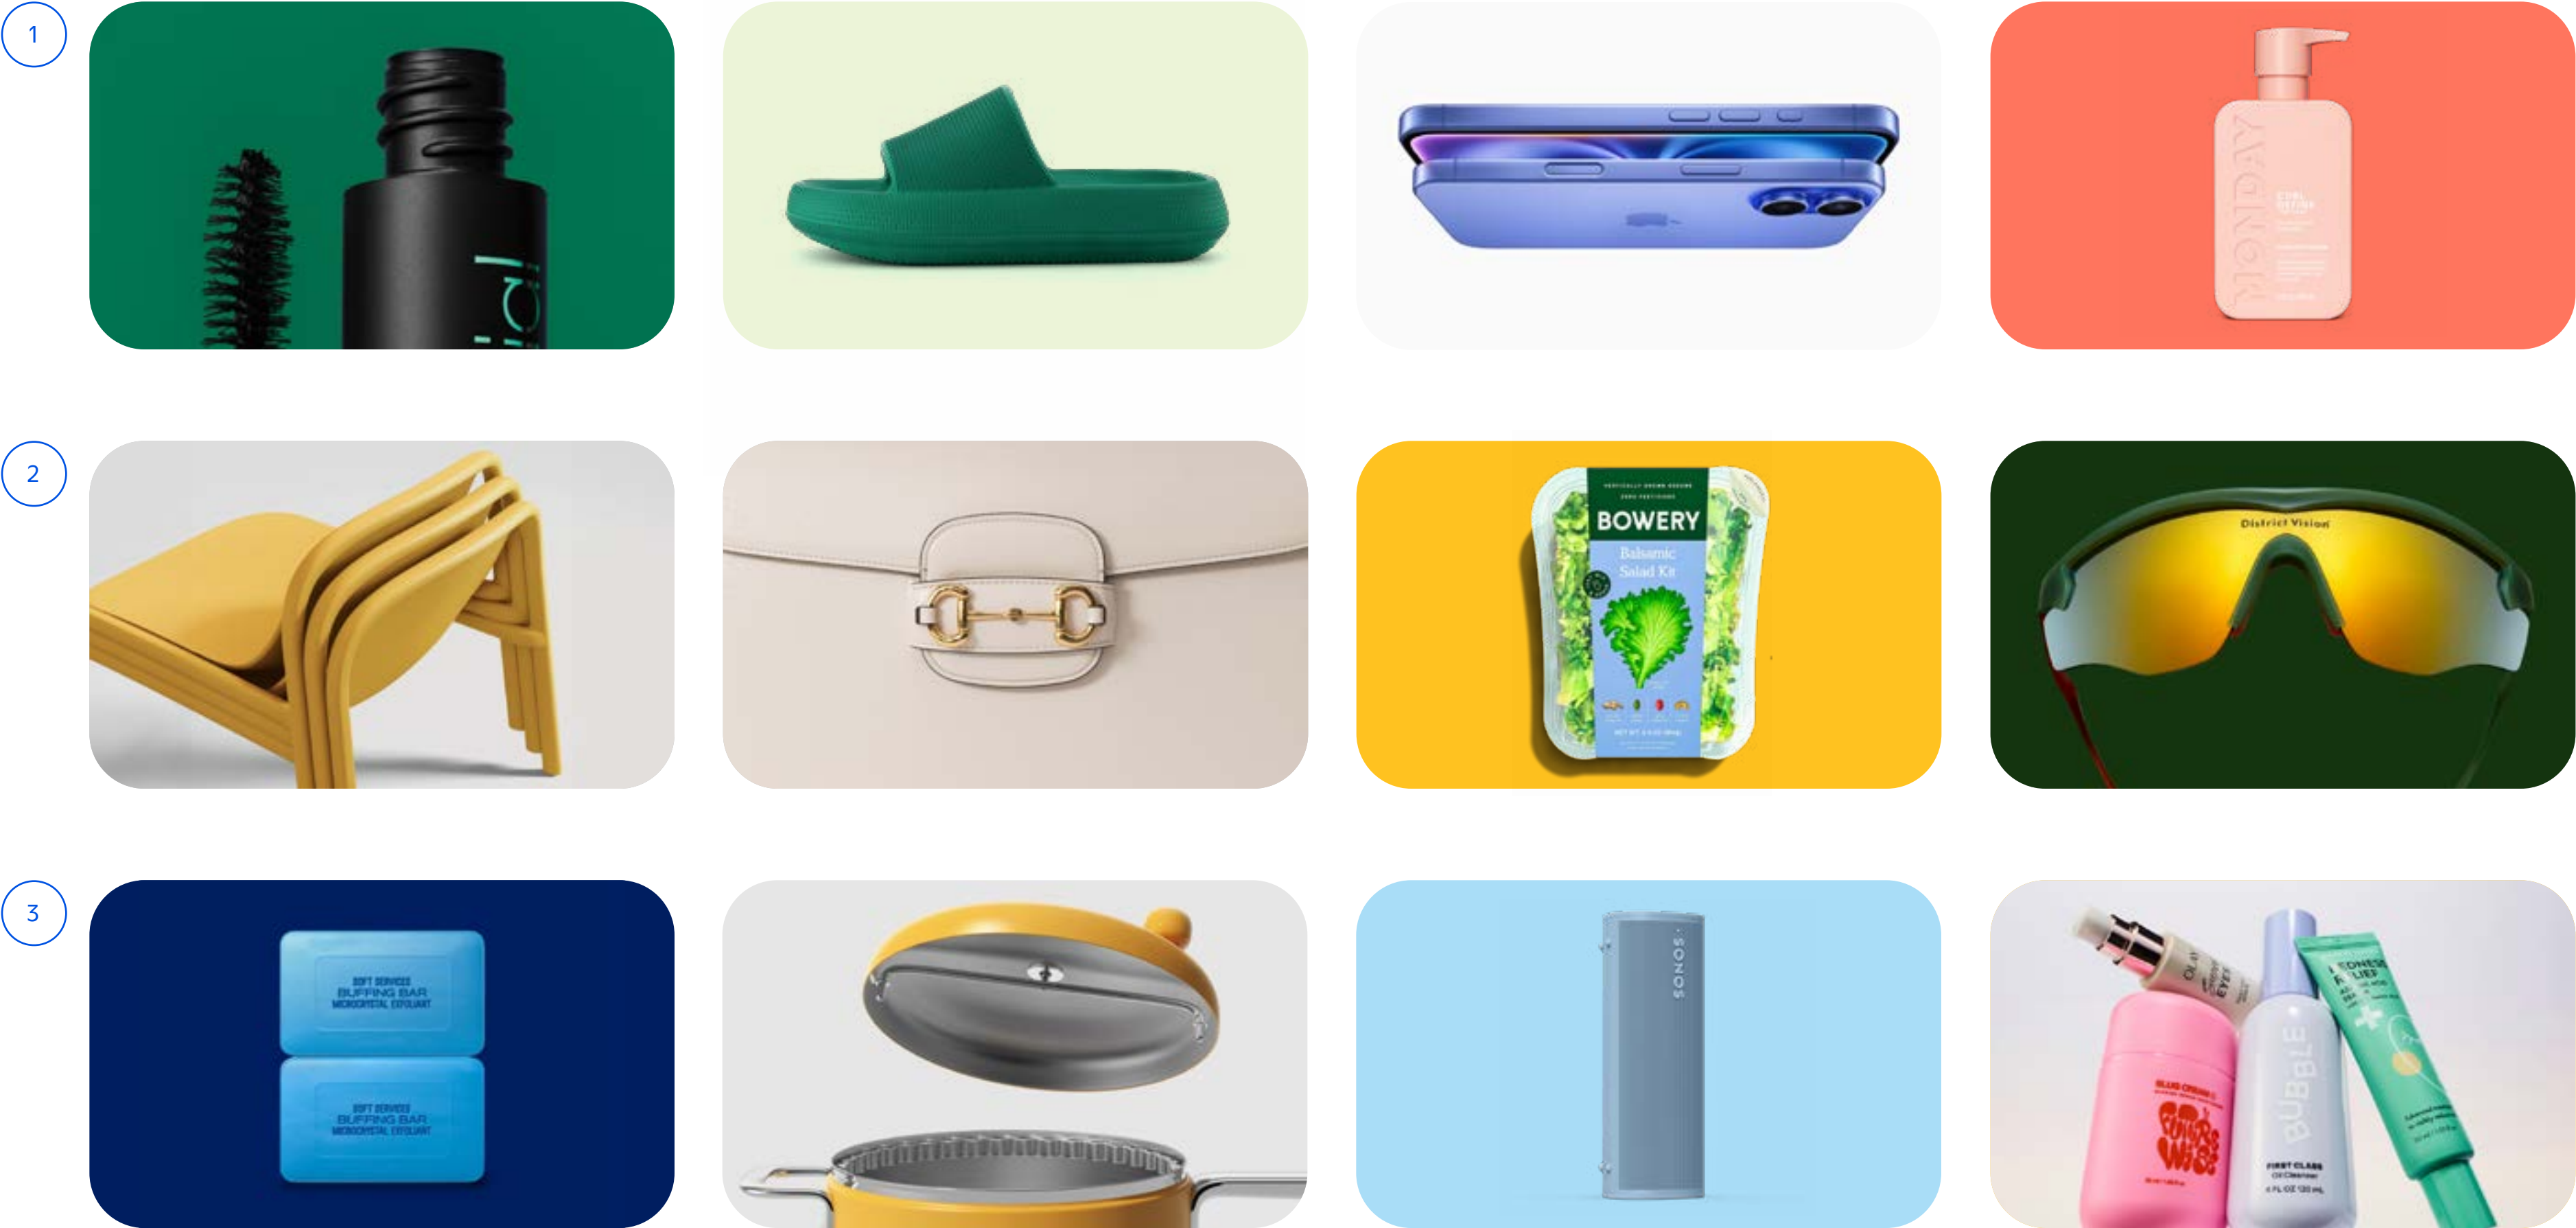

2 Composition & Framing

Each frame serves a distinct purpose: straight-on shots present the product in its entirety, providing a clear, honest view, while macro crops are used to draw attention to intricate details and craftsmanship, celebrating the finer elements that define our products.

This variety in composition ensures that each product is showcased comprehensively, from its full form to its most delicate nuances.

3 Environment & Styling

We keep the backdrop simple and clean, using a single color to ensure that the focus remains entirely on the product itself. This minimalist approach helps to maintain visual clarity and avoids distraction,

Tier 3 Cropping

When cropping photography, we aim to create visually engaging compositions that feel natural and allow the viewer’s eye to explore. By leveraging the rule of thirds, we achieve a dynamic variety that brings personality to each image and avoids overly predictable, centered crops. Here’s how we approach cropping for a visually rich, authentic experience:

1 Create Balance and Interest

Place the product along key focal points at intersecting lines to draw the eye naturally. Be mindful of negative space, allowing it to enrich the story as much as the product or any supporting props.

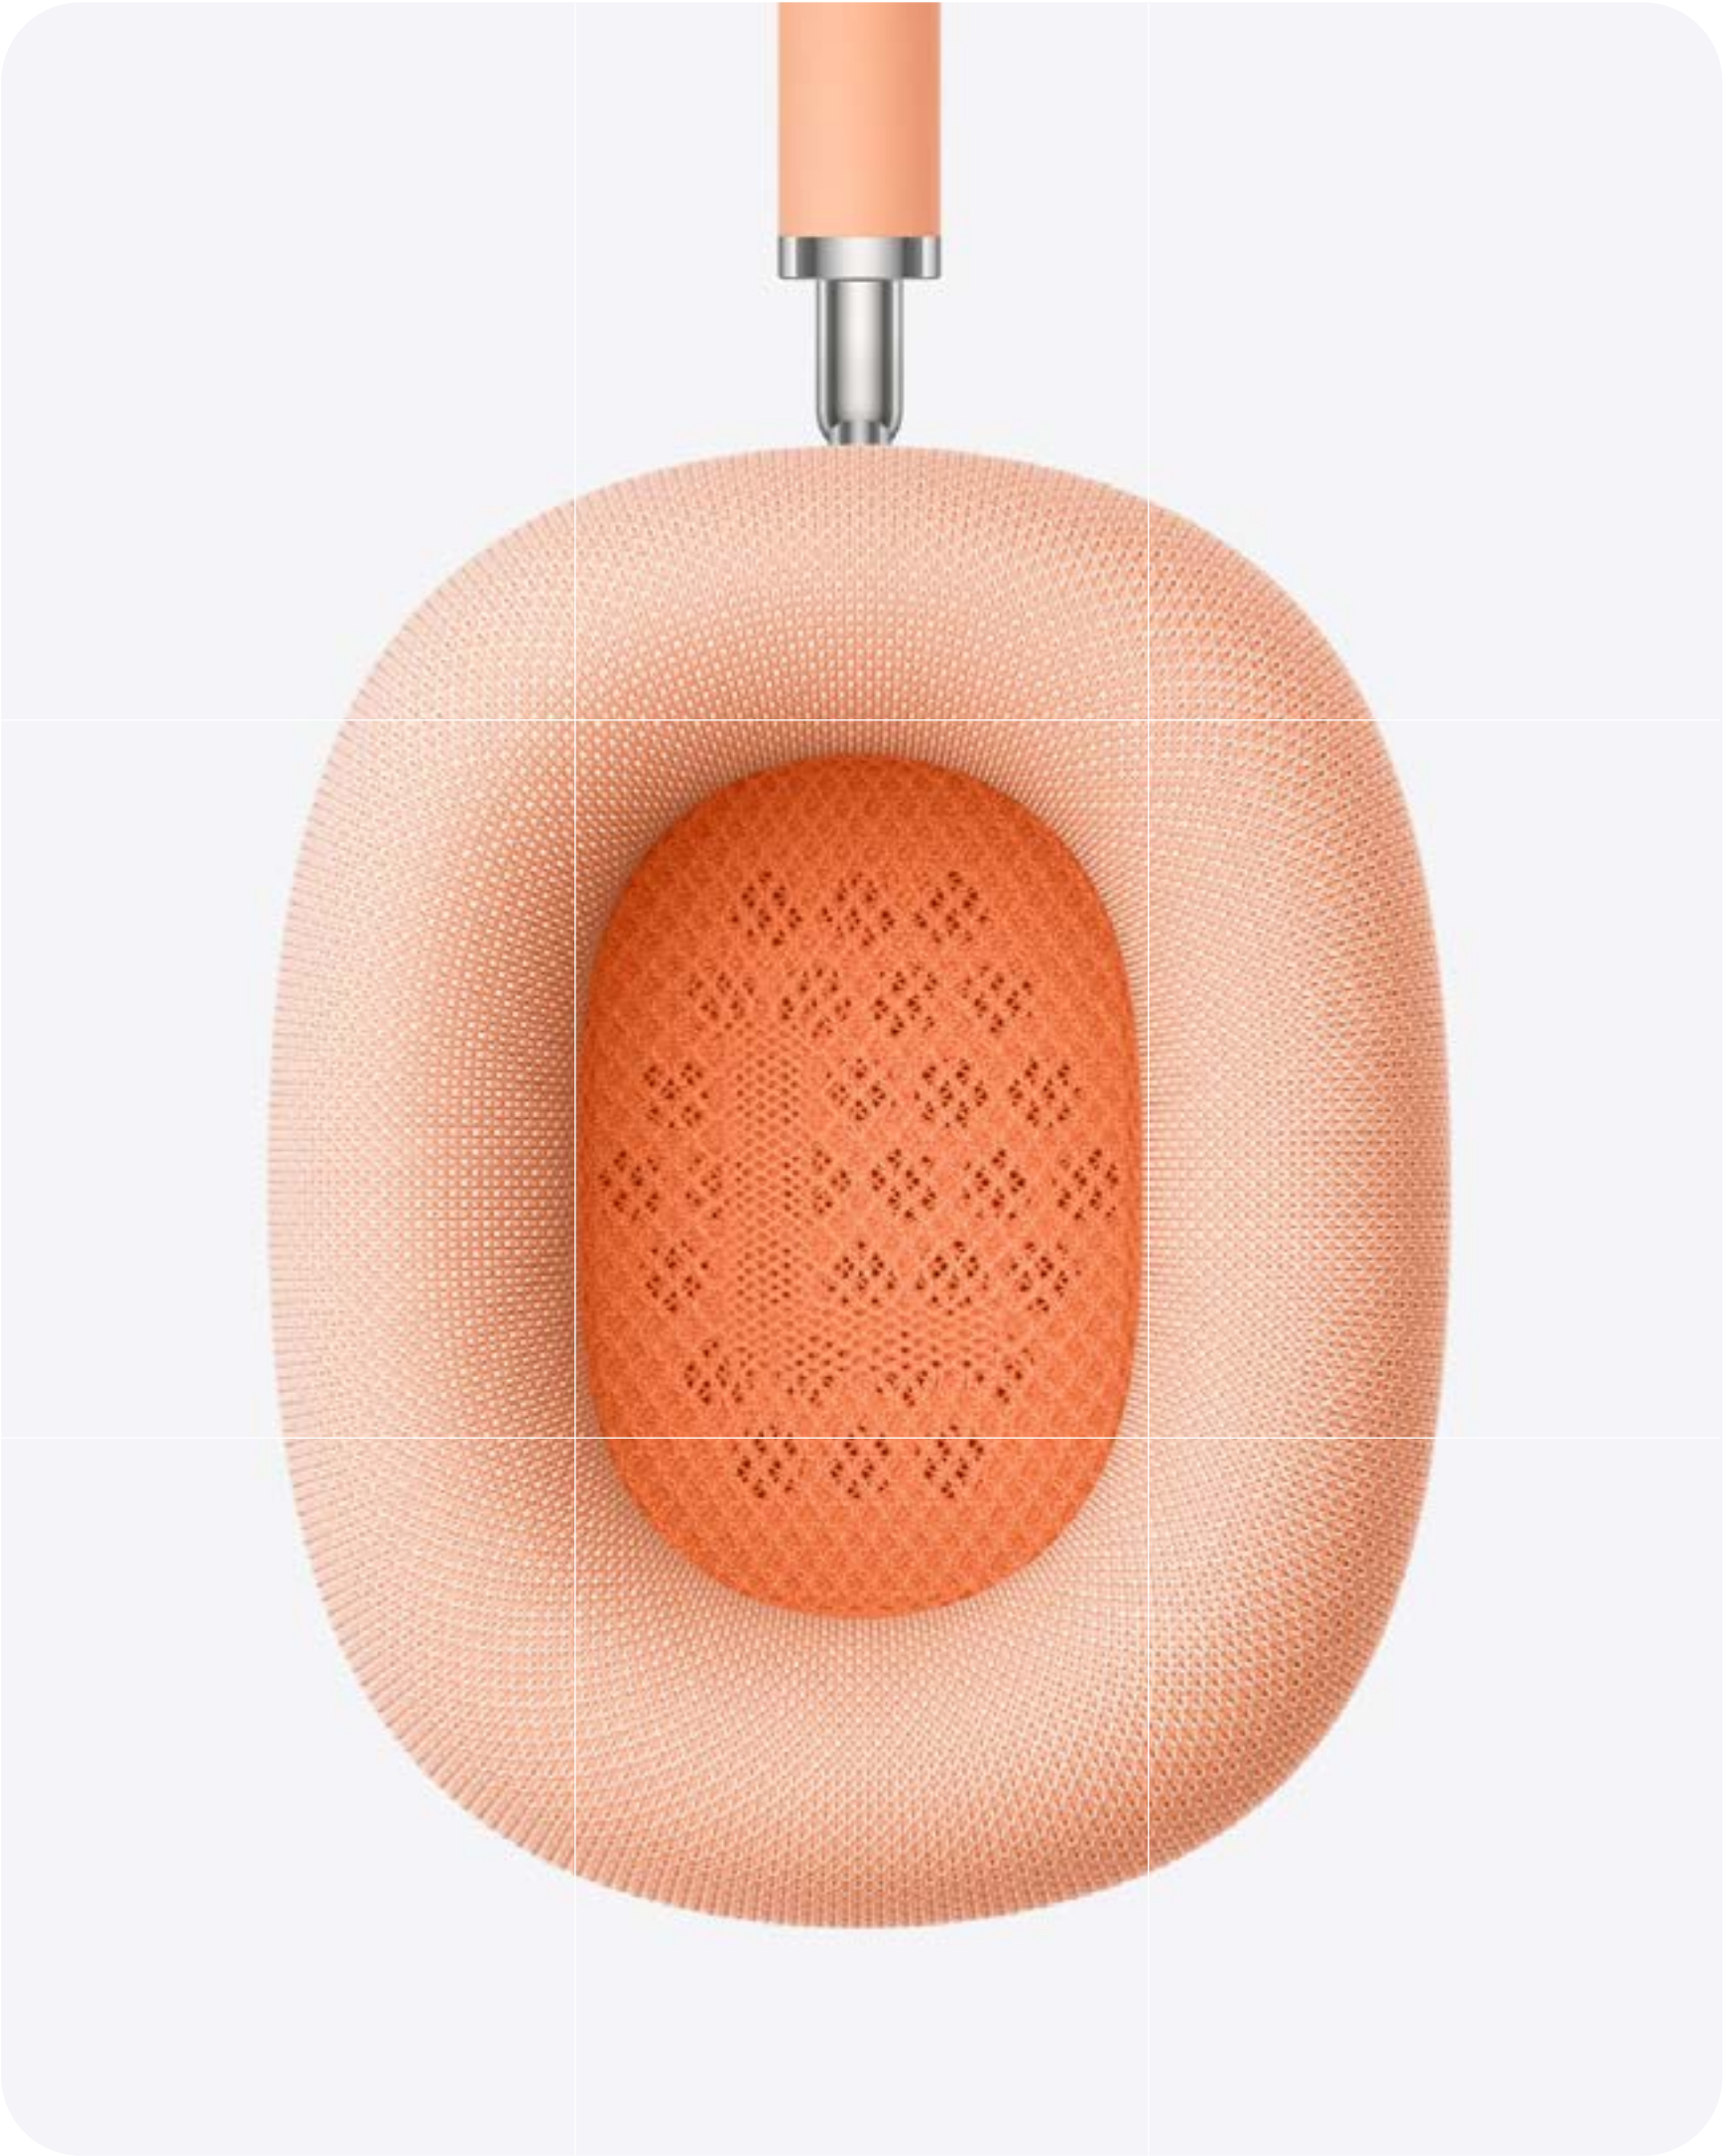

2 Vary the Placement of Products

Avoid placing the subject in the same position for every shot. As variation makes the sequence of images feel natural and unique, keeping viewers interested without the images appearing formulaic.

3 Consider Eye-Line or Horizon Placement

Whether capturing people or products, use the top third or bottom third of the composition to help create visual stability.

1

2

3

Tier 3 Dimension

In studio photography, creating a sense of dimension is essential to making products feel real and tangible. By thoughtfully using shadows and depth of field, we can achieve a balanced, dynamic composition that highlights each product’s craftsmanship, materials, form and texture.

Together, these elements give imagery a three-dimensional quality that enhances the visual appeal and presence of the product.

1 **Leverage shadows**
Shadows should subtly anchor the product, adding depth and dimension against a clean, simple background color.

2 **Use depth-of-field**
Use depth of field to add dimension, softly blurring foreground elements to draw focus to the product and create a sense of layered depth in the imagery.

Our imagery is...

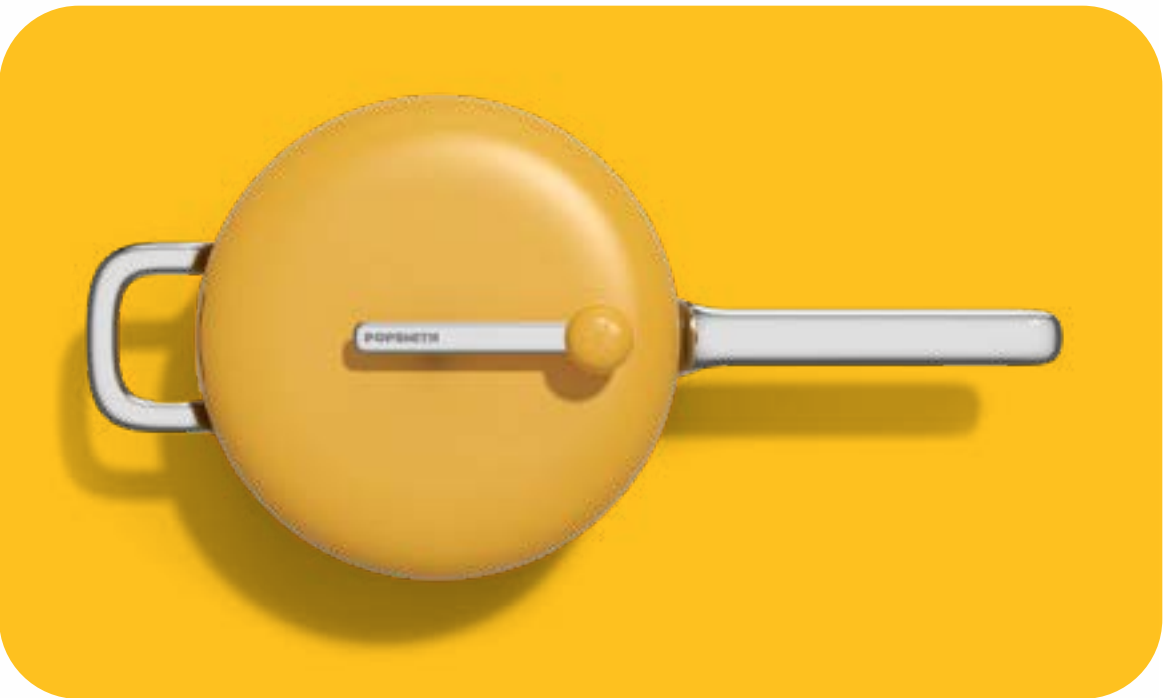

✓ Sharp and contrasted

✓ Saturated

✓ Dimensional

✓ Bold and simple

Our imagery is not...

✗ Stylized with props

✗ Busy and complex

✗ Intended to replace on-location

✗ Captured with natural light

Photographer Rolodex

If you’re creating Tier 3 imagery, we encourage you to strongly consider one of these creative partners. Their work answers our principles perfectly—and their style, expertise and approach help us ensure high-quality, authentic imagery that will resonate with our audience.

4.8

- Grids
- Applying Logos
- Applying Type
- Layout Quick Guide

Layouts

Grids

Our grid is how we assemble our brand elements into a whole.

Whether we're making a detailed multi-page presentation or a simple email, we always use the grid as our starting point.

Margins

Margins establish a consistent foundation, ensuring content remains legible, uniform, and tidy. Our standard margin width is determined by dividing the document’s longest side into 24 equal segments, with the width of one segment becoming our margin. See the table below for some sample document sizes and margins.

Note:
The margins listed here for Leaderboard Display and Skyscraper Display have been reduced for optical correctness.*

Document Type	Dimensions	Margins
16:9 Powerpoint or Video	1920 X 1080 PX	80 PX
Square Social Post	1080 X 1080 PX	45 PX
Printed/PDF Report	8.5 X 11 IN	.5 IN
Leaderboard Display*	728 X 90 PX	16 PX
Skyscraper Display*	120 X 600 PX	12 PX

X

Our margin is equal to the longest side of a document divided by 24.

In the case of very wide or very tall layouts, your margins may need to be reduced slightly to maintain appropriate space for content.

X

24X

Columns

We divide the interior space into vertical columns to help organize our content. Columns are drawn in increments of two, based on the document’s width. Wider applications will need more columns, while narrow applications will need fewer.

Also consider the type of content that will occupy the space—complex information will require more columns to establish a clear hierarchy. See the table here for some common document sizes and sample column counts.

Document Type	Dimensions	Columns
16:9 Powerpoint or Video	1920 X 1080 PX	12
Square Social Post	1080 X 1080 PX	4
Printed/PDF Report	8.5 X 11 IN	6
Leaderboard Display	728 X 90 PX	8
Skyscraper Display	120 X 600 PX	2

Columns are drawn
in increments of 2, up
to a maximum of 12.

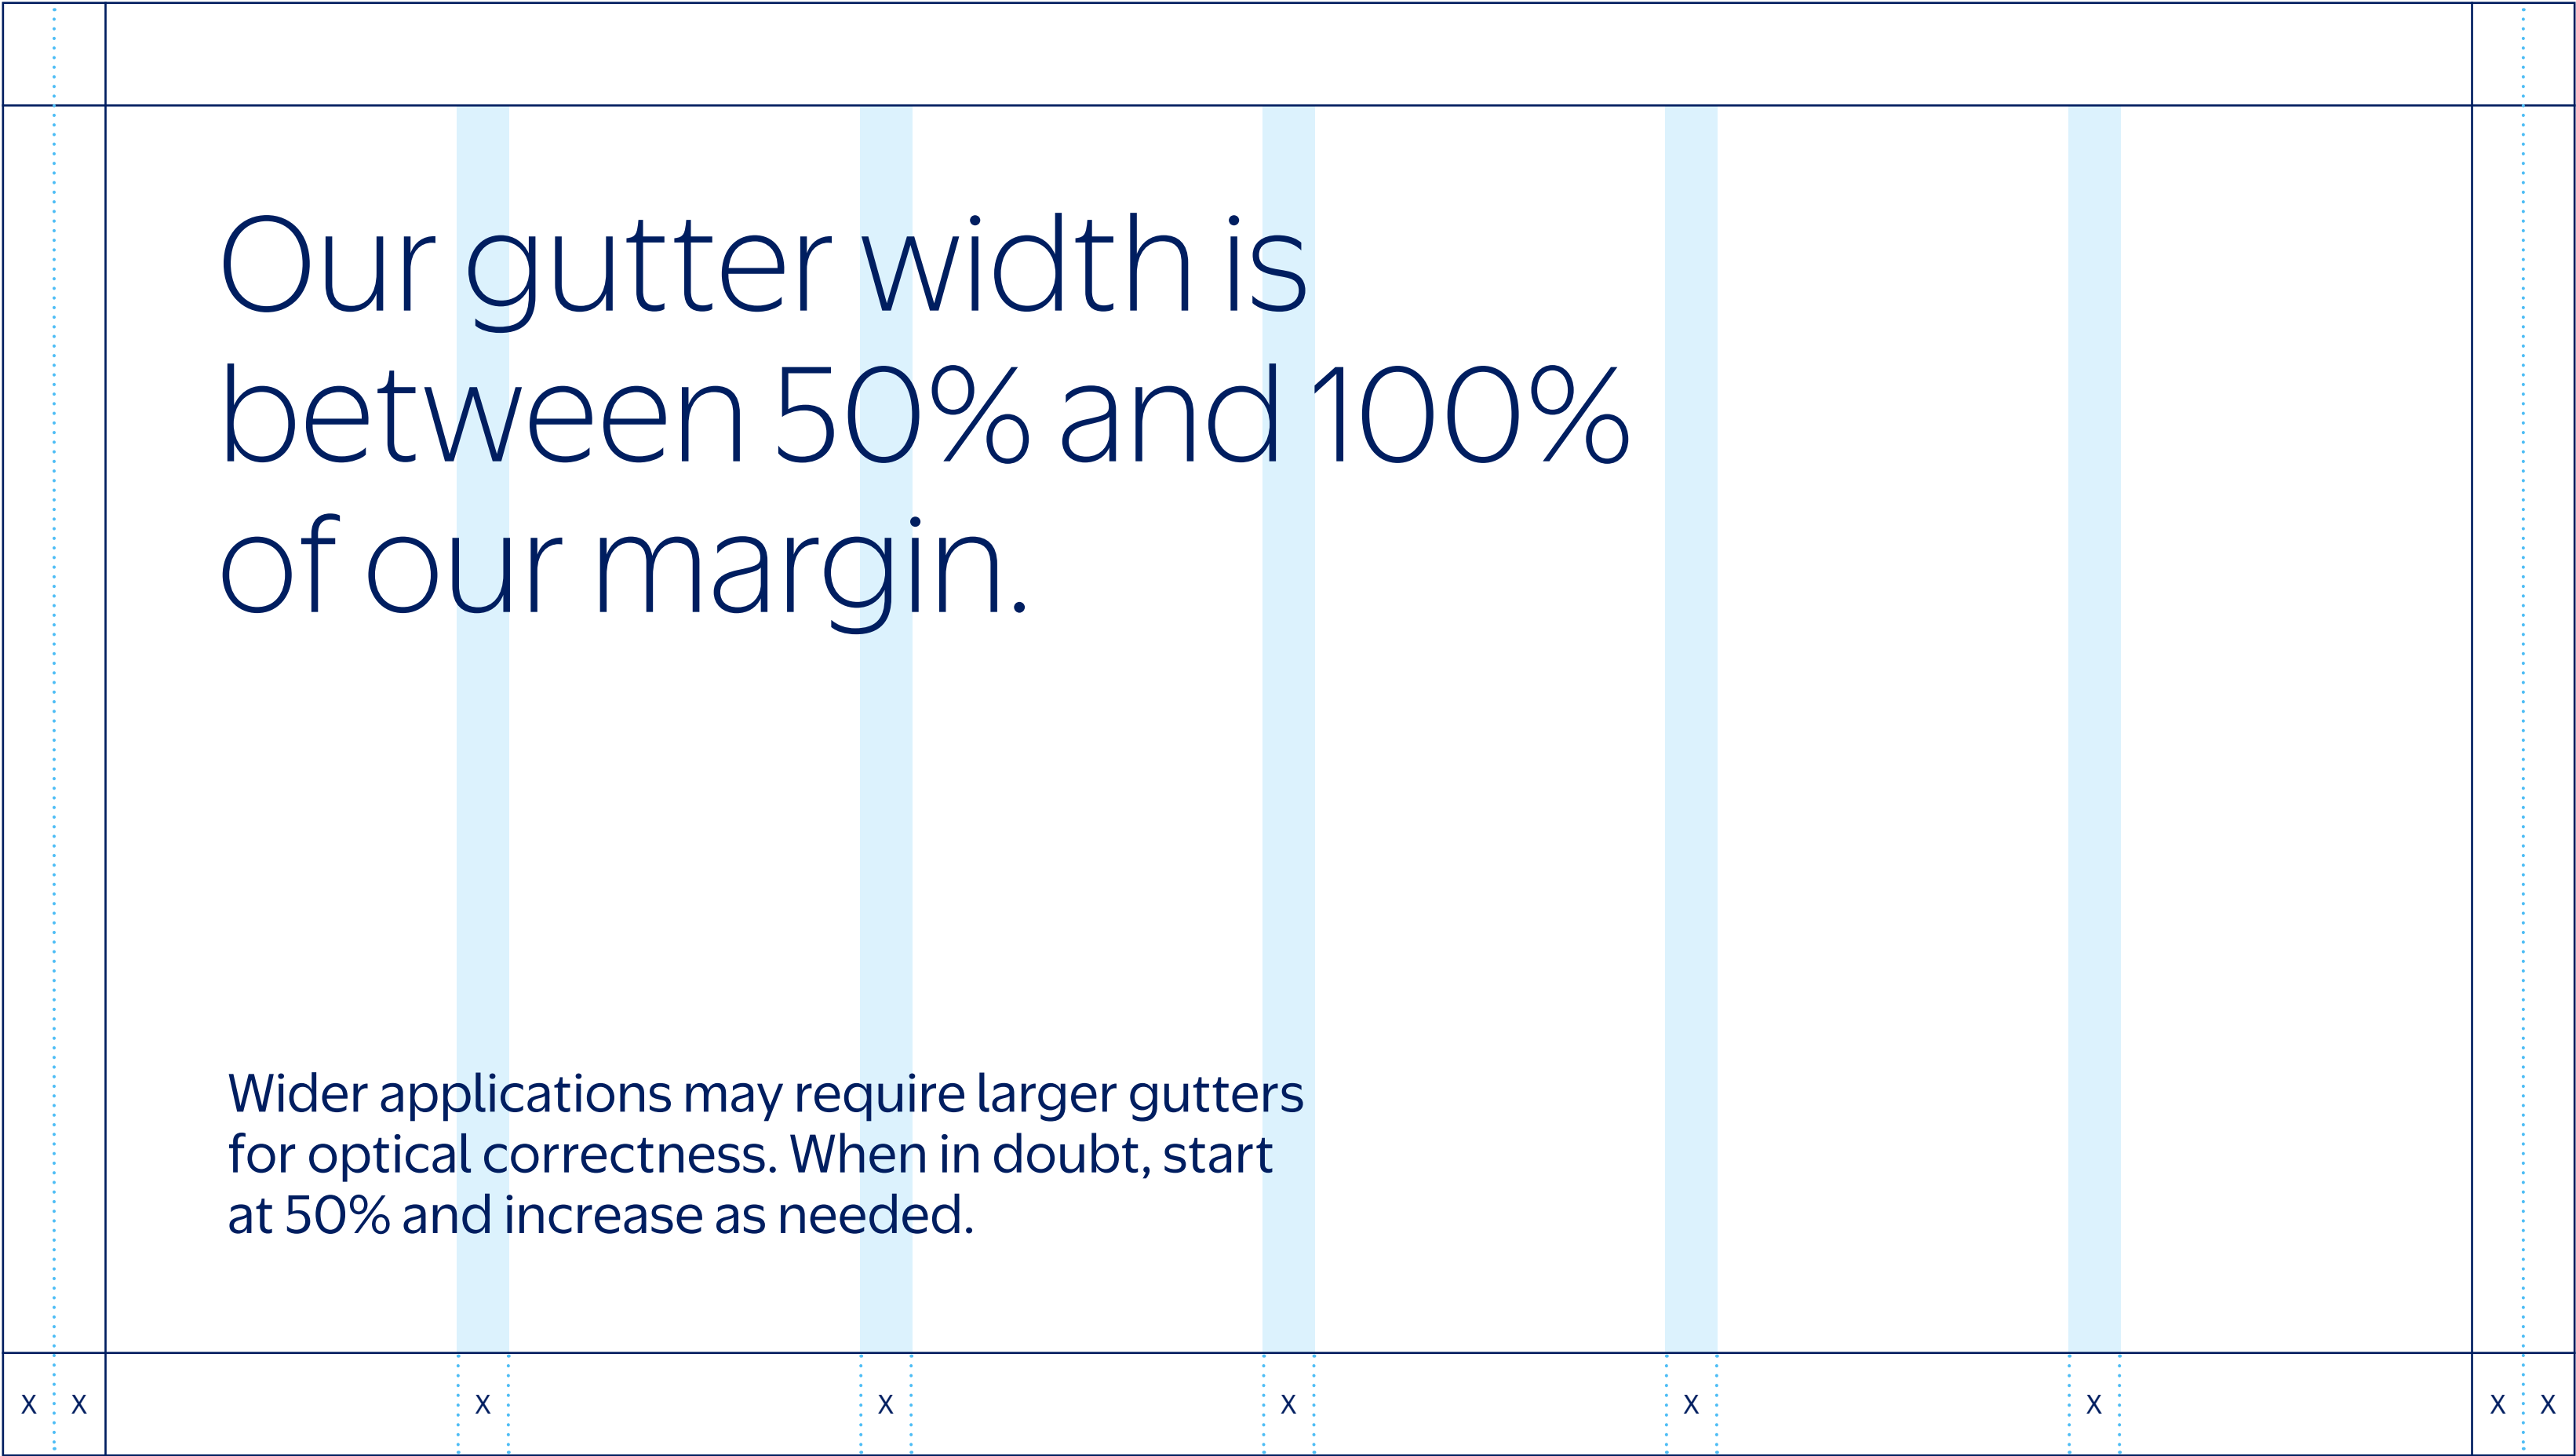

Narrow applications will typically use
2 to 4 columns, while wide layouts will
use between 6 and 12.

6 COLUMNS

Gutters

Gutters are the clear spaces between columns that separate text, images, and graphics. They make our communications tidy, organized, and legible.

The width of our gutters is determined in relation to our margin. Gutters should be between 50% and 100% of our margin width, depending on the size of the application. A 50% gutter is sufficient for most needs, but may be too thin for very wide layouts. Use your best judgment for spacing.

Optical Guide

Thin Margins

Wide Margins

 Too Narrow

 Just Right

 Too Wide

Thin Gutters

Wide Gutters

 Too Narrow

 Just Right

 Too Wide

Applying Logos

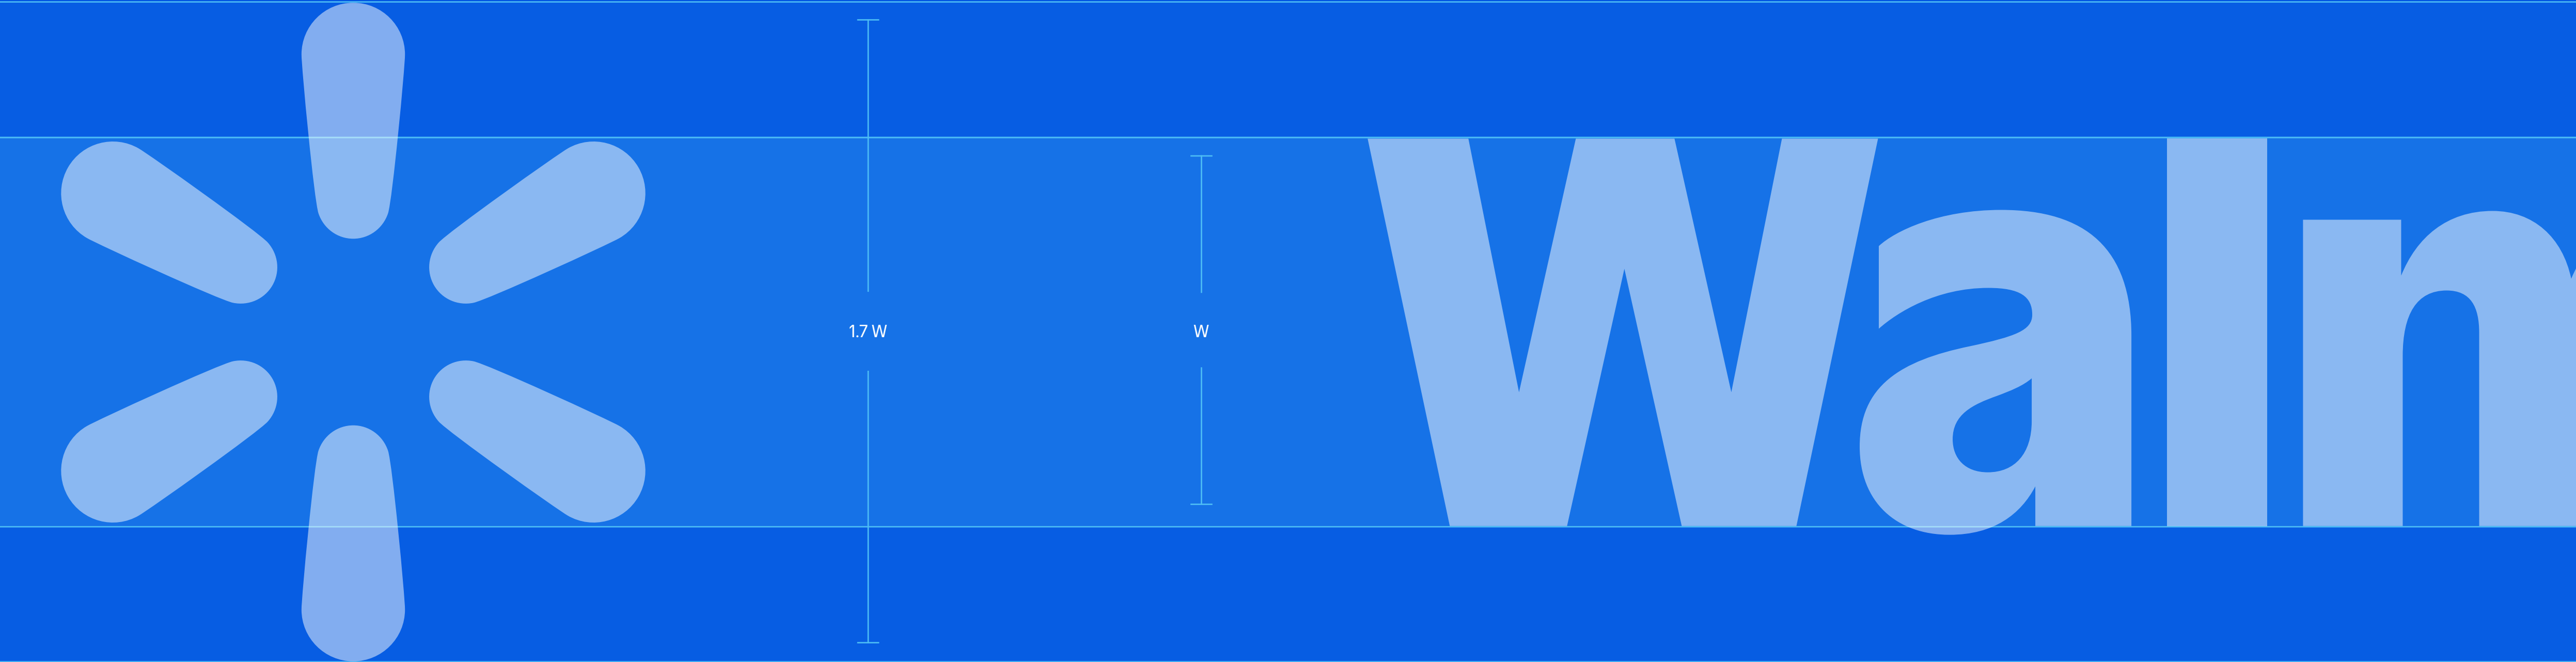

After establishing a grid, our logos may be used.

Our wordmark and Spark are now decoupled from one another for more design flexibility. This section outlines the rules that govern their sizing and placement.

Proportions

When our wordmark and Spark are used together in a layout, they always maintain the size relationship shown here. The four inner segments of our Spark should match the height of our wordmark, making the Spark approximately 1.7x our wordmark’s height.

This size relationship is fixed: the wordmark and Spark must always scale up or down as a set—never independently. Remember—our Spark and wordmark are separate logos. We don’t lock them up together.

Scale

The height for our wordmark in layout is equal to the width of our margin. The height for our Spark is then 1.7x the margin height, according to the proportions above.

Use this as a baseline measurement—logo sizes can require optical adjustment, particularly on very wide or very tall layouts.

Remember:
When resizing the wordmark, our Spark must also increase or decrease accordingly to maintain correct proportions.

X		X
1.7X		1.7X
	Our standard wordmark height is equal to our margin. Our Spark height is 1.7x this measurement.	
X		X
X		X

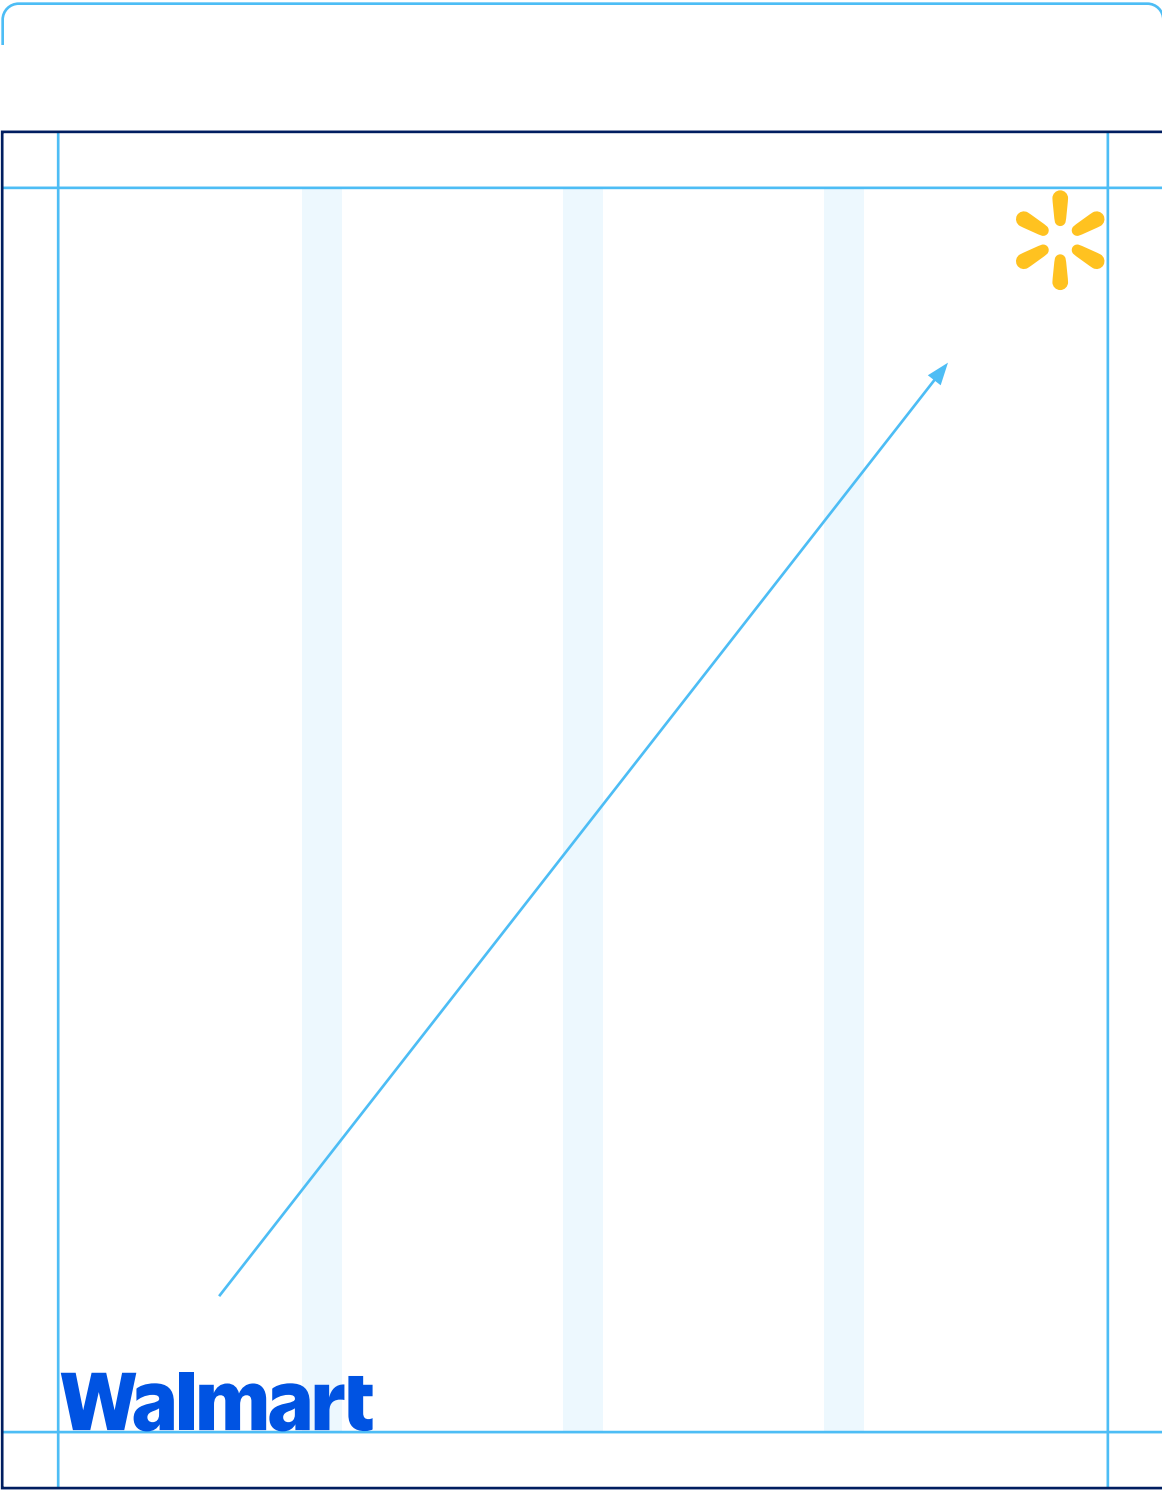

Placement

Our wordmark and Spark are always located on opposite sides of a layout. Where possible, we place the wordmark in the lower left corner and the Spark in the upper right. If this isn't possible, you can use one of our secondary placements. To help you remember these placements, keep in mind two simple rules:

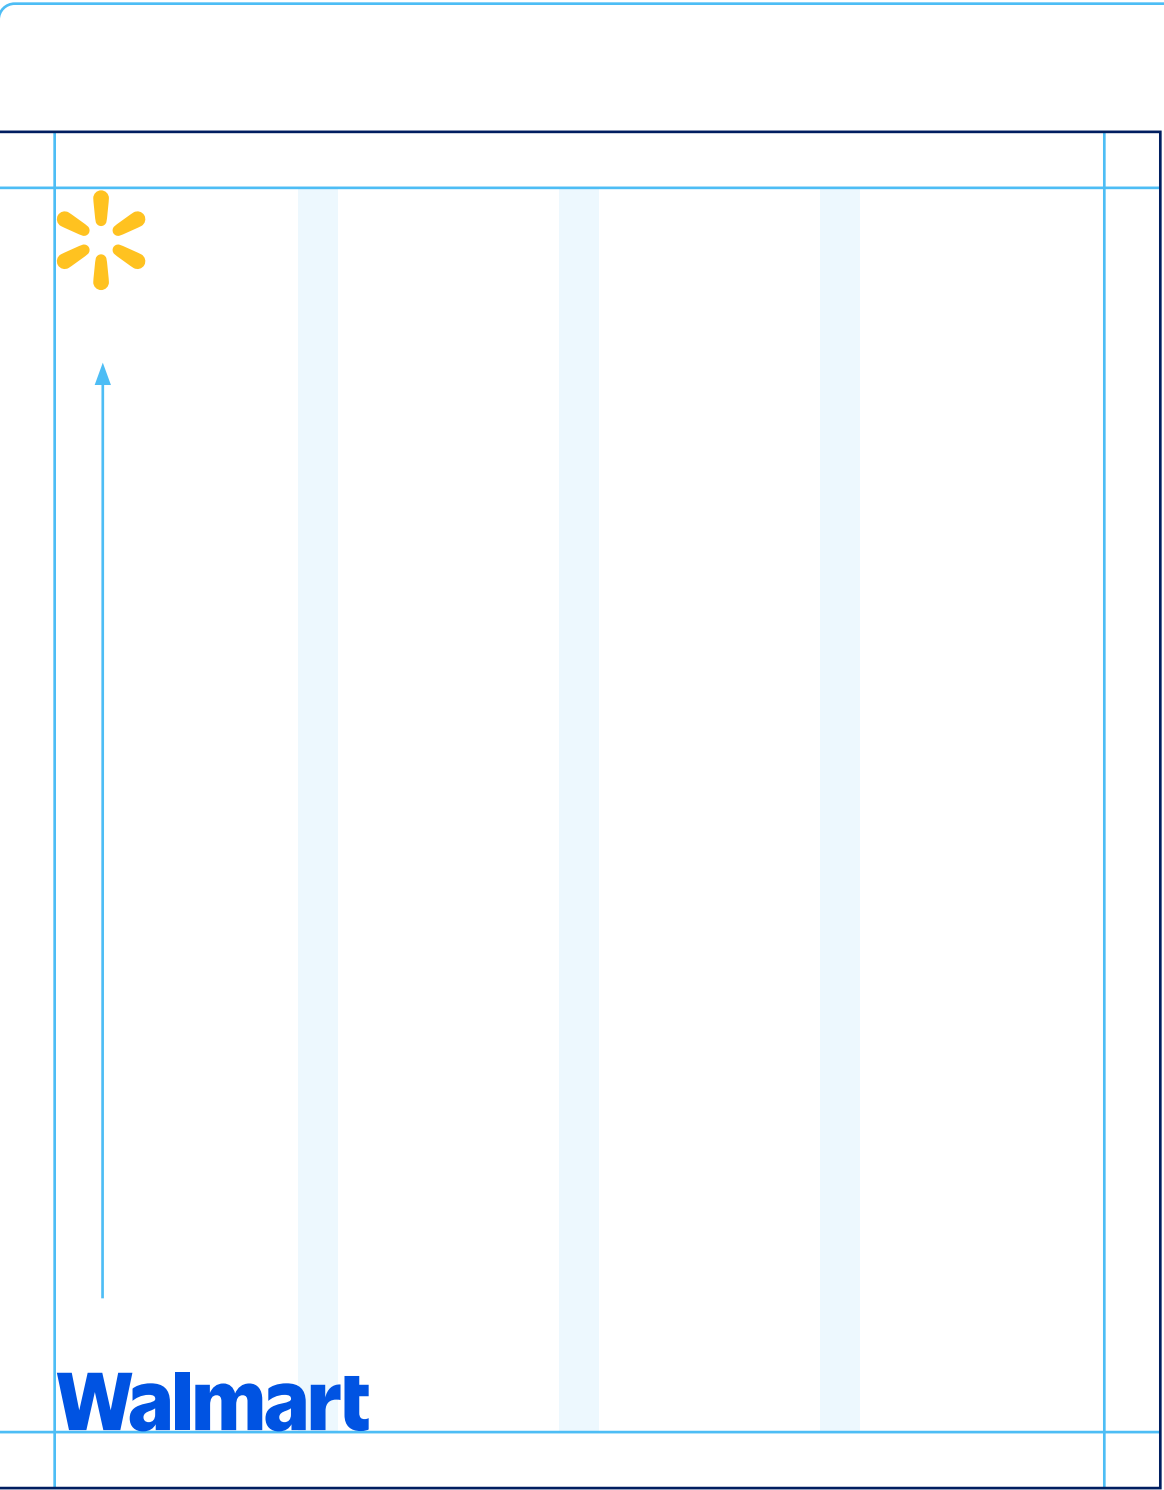

- 1 Wordmark **can't** be at the top.
- 2 Wordmark **can't** be right-aligned.

Primary

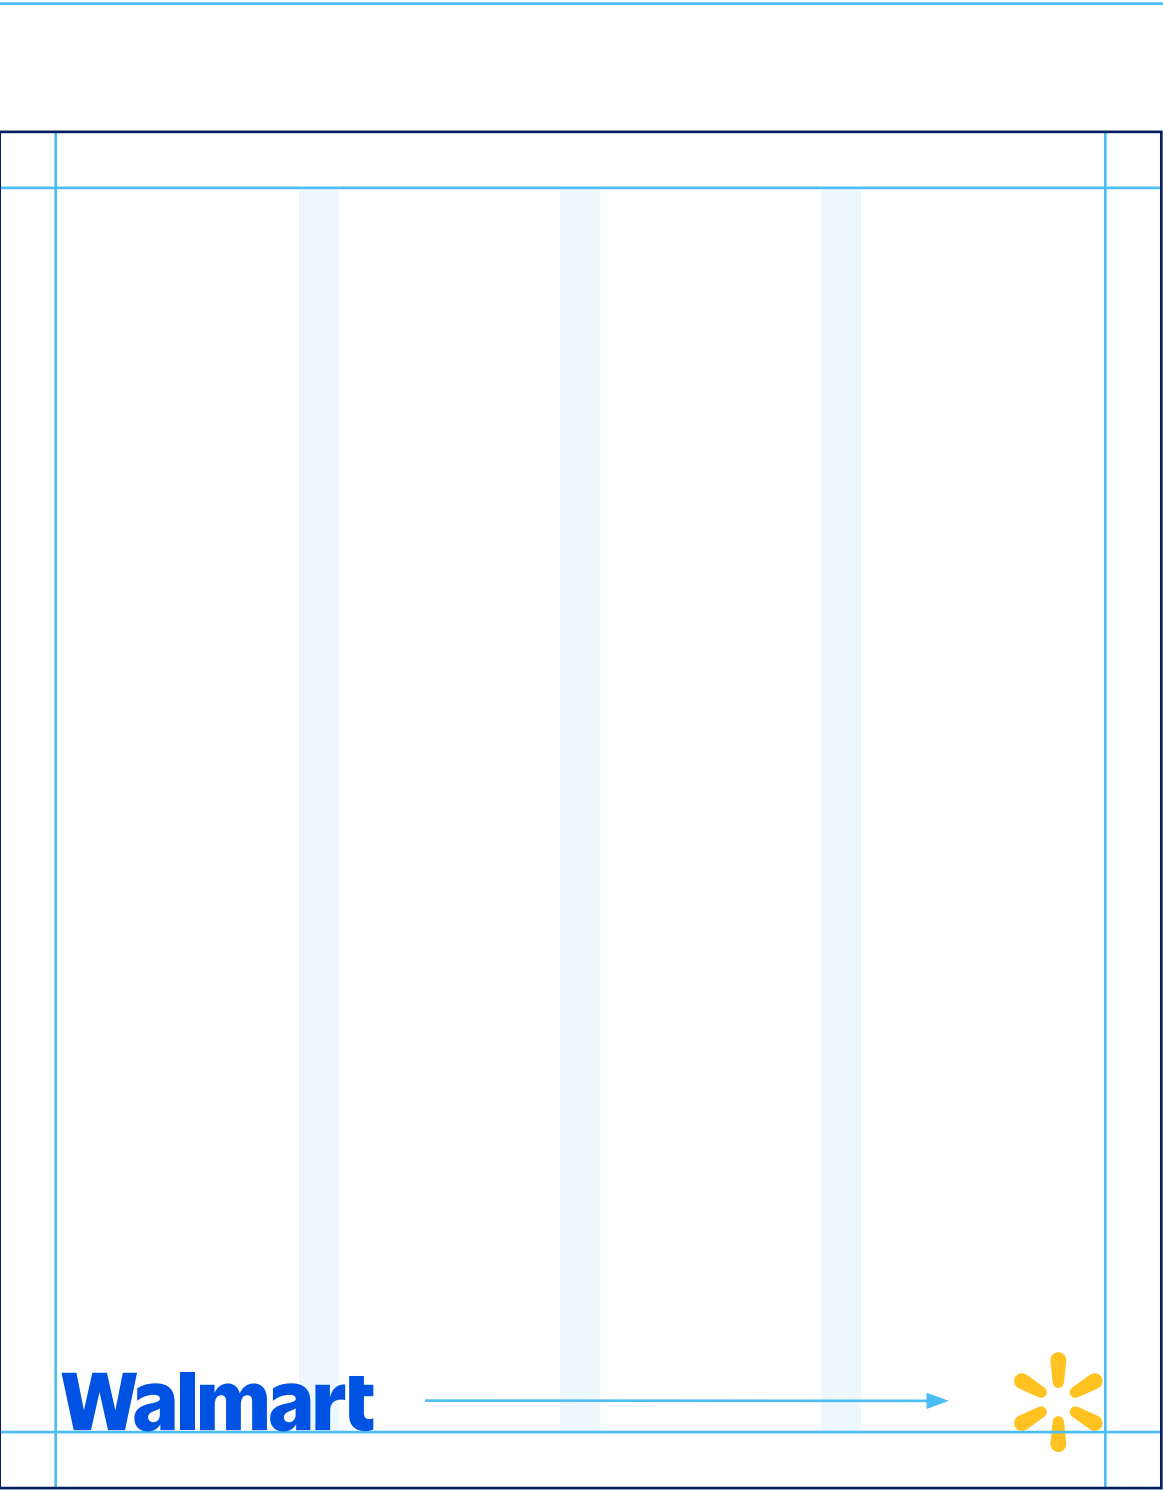

Secondary

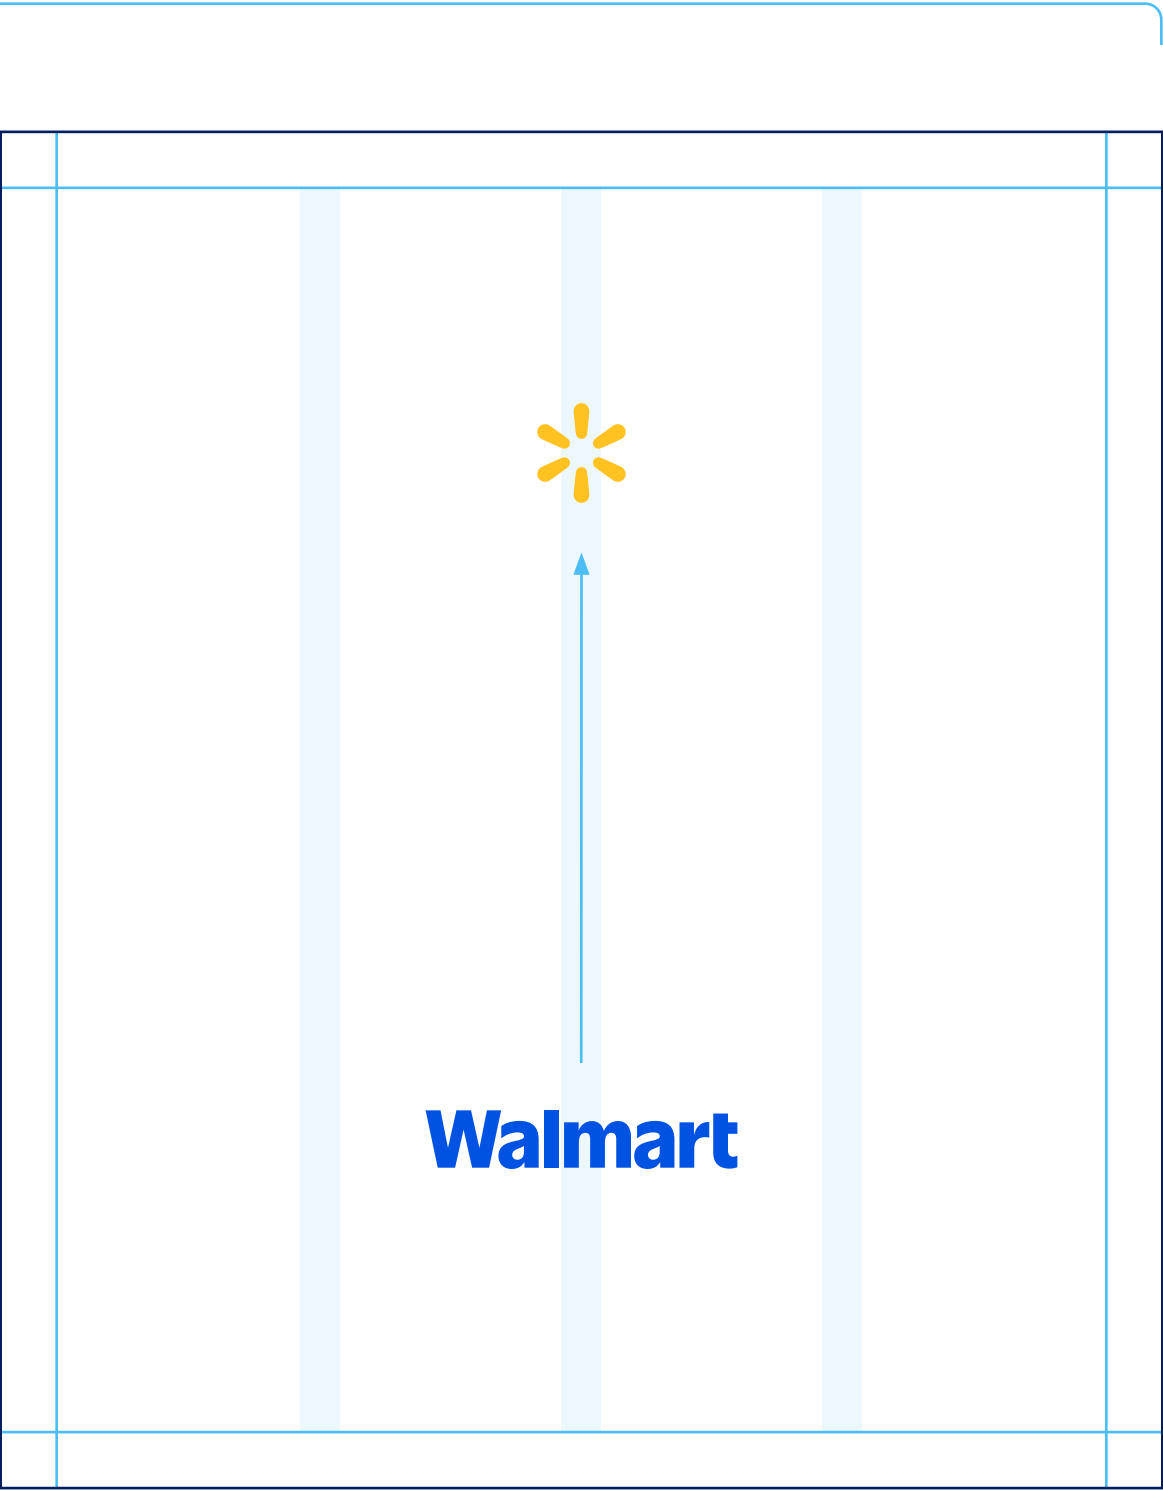

1 Diagonal

2 Left-aligned vertical

3 Baseline horizontal

4 Centered vertical

Alignment

Our wordmark always aligns precisely with the margins of our application. Our Spark can utilize one of two different alignment methods, depending on its relationship to our wordmark:

1 Flush

Our standard alignment, used in the majority of layouts, aligns the edge of the Spark flush with the edge of our margin (top).

2 Centered

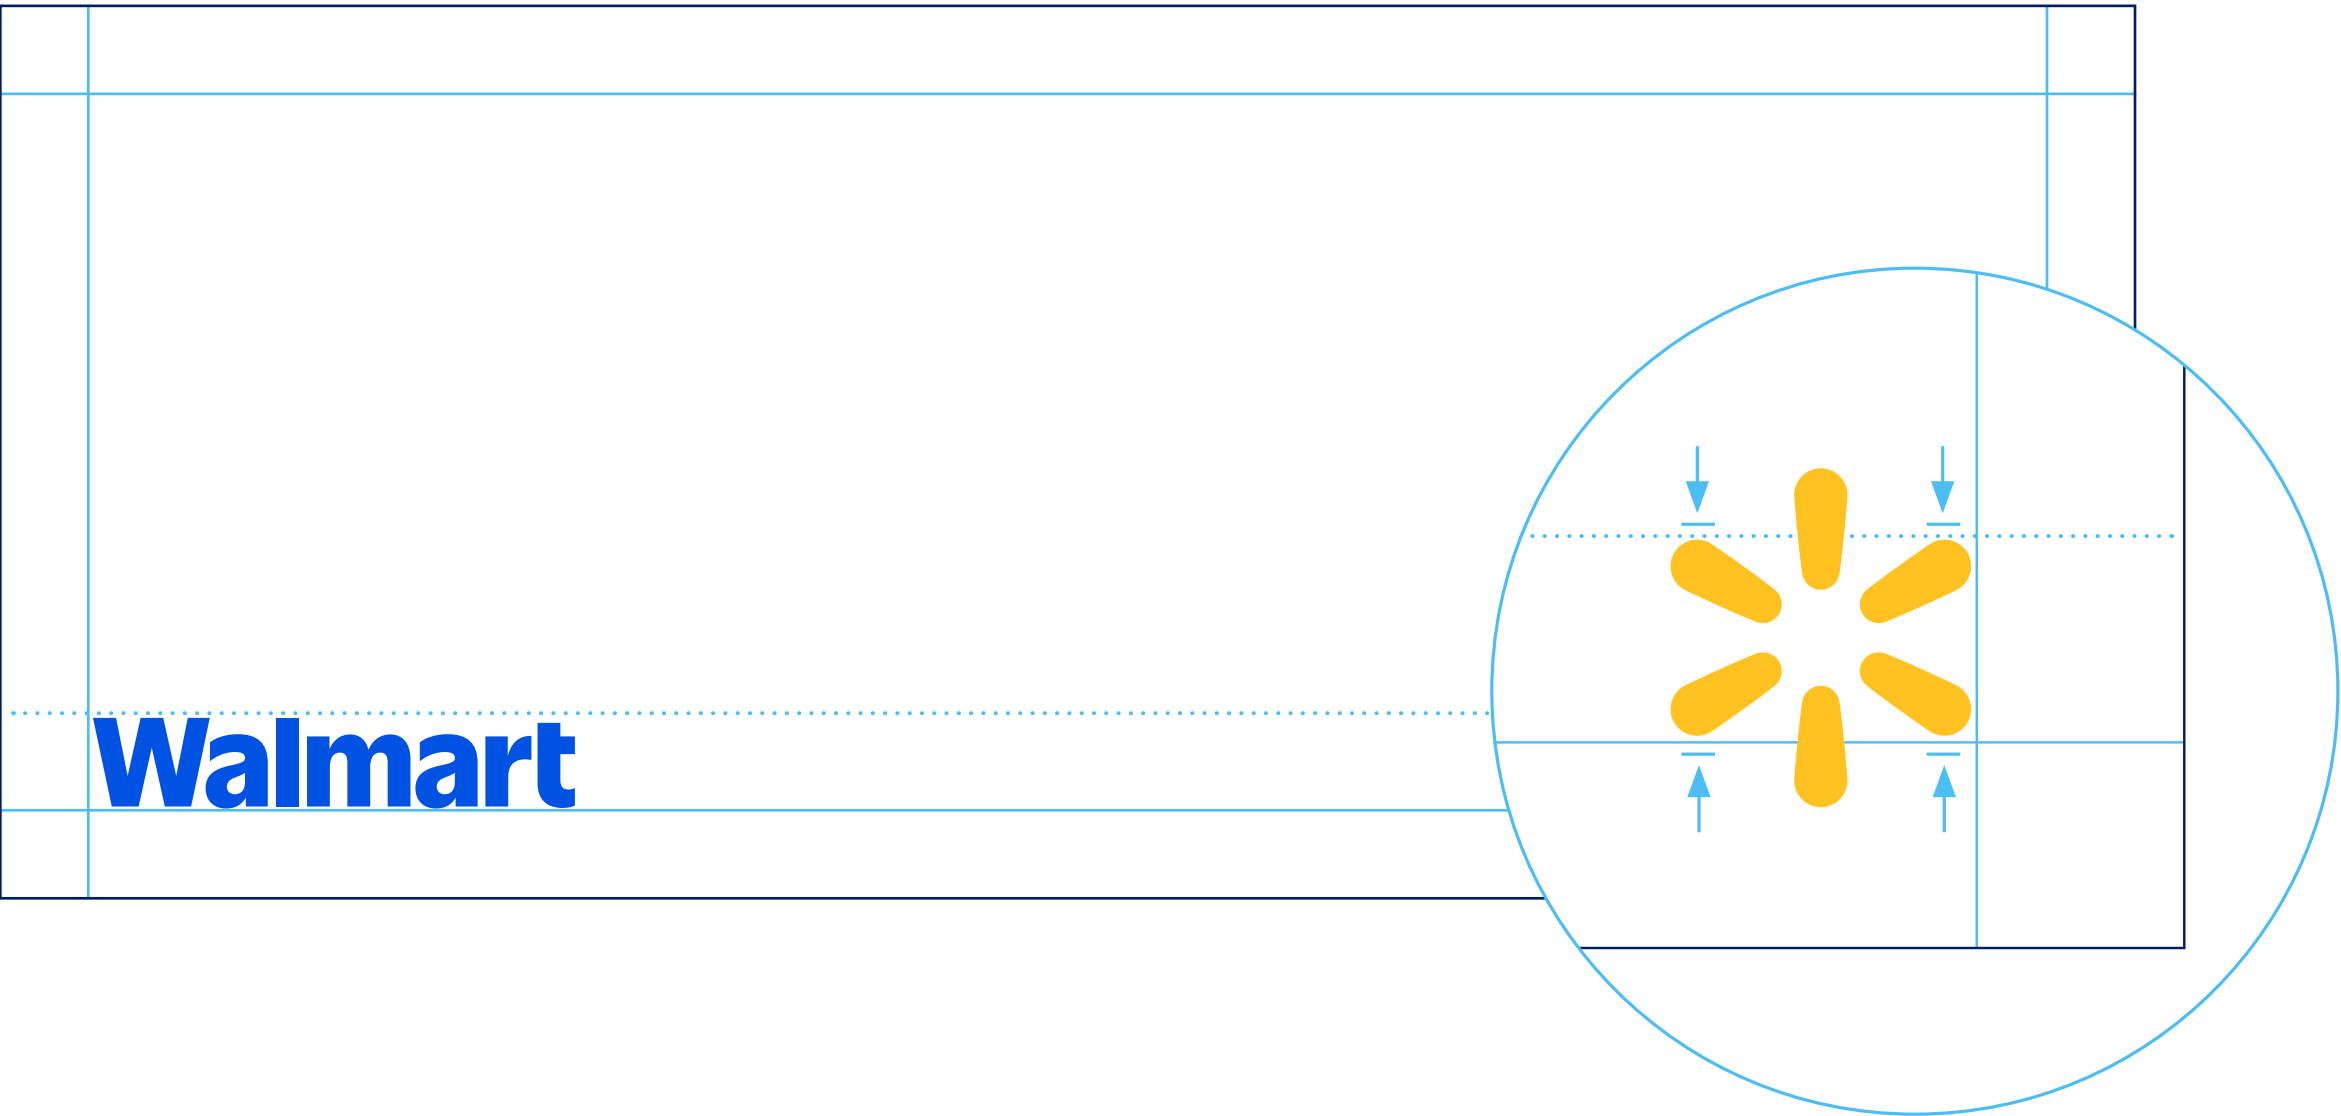

When our Spark and wordmark have a horizontal relationship, we vertically center our logos so that the wordmark aligns with the Spark's four inner sparklets. This means that the Spark will protrude into the margin (bottom).

1

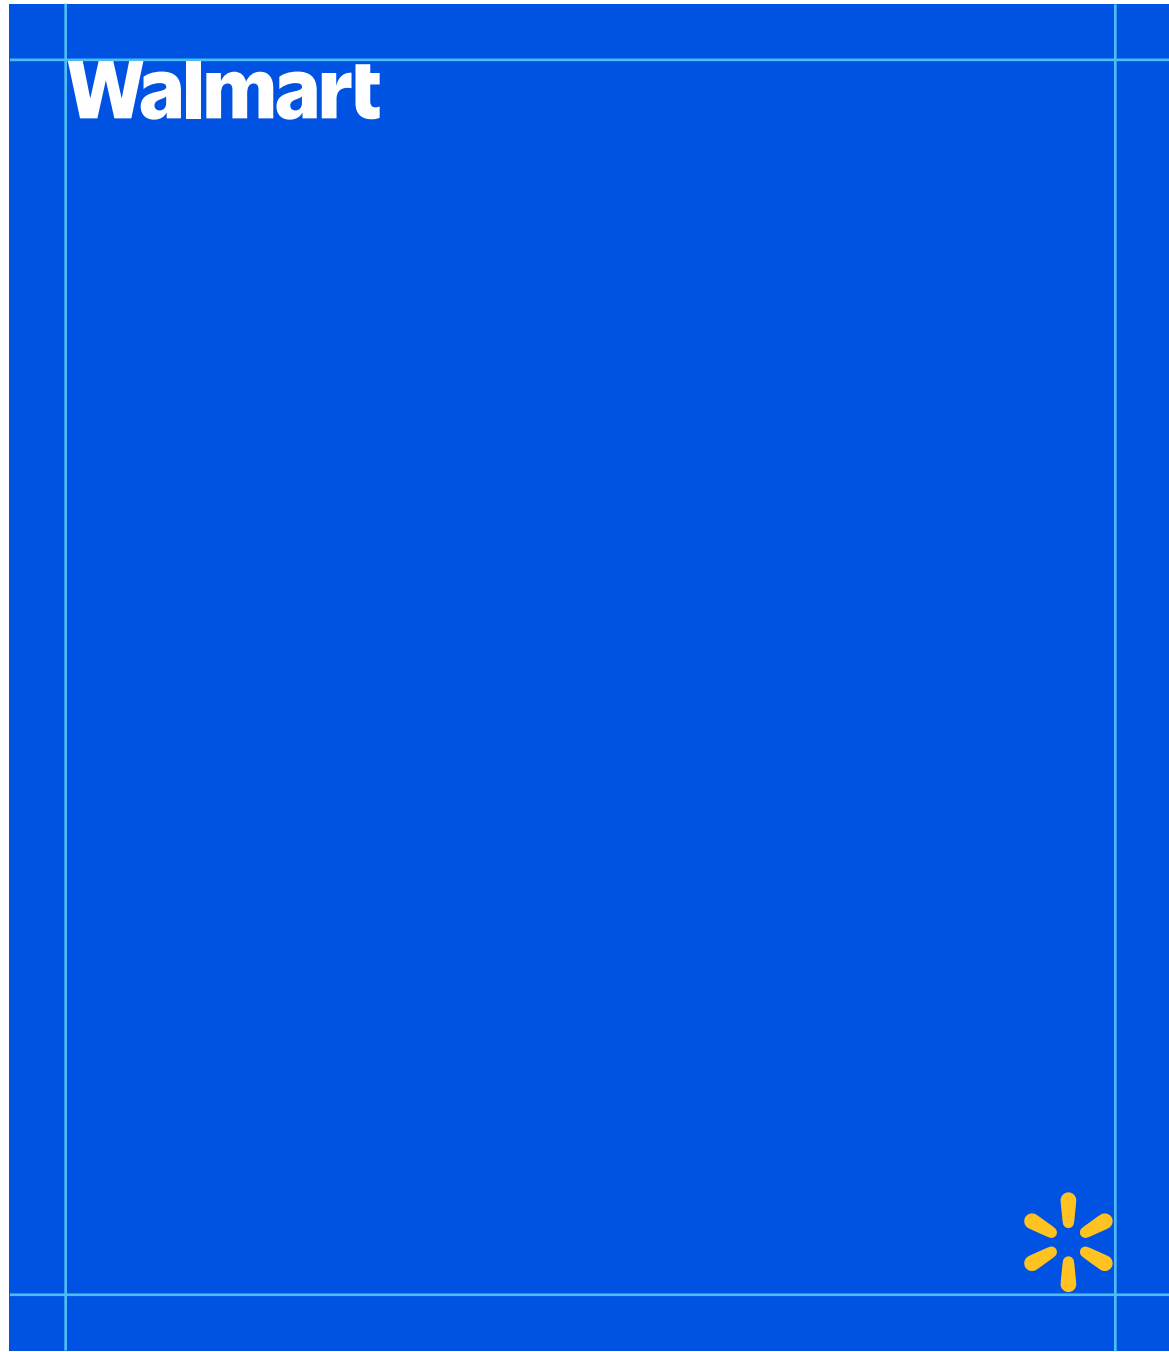

2

Don'ts

When applying our logos, please avoid the following misuses.

-  **Don't** align our wordmark to the right edge of a layout.
-  **Don't** align our wordmark to the top margin.
-  **Don't** alter the size relationship between our wordmark and Spark.
-  **Don't** create a lockup with our wordmark and Spark.

Applying Type

This section outlines our rules for consistent type layout to enhance brand recognition and clarity.

Placement

Our preferred headline placement is always in the upper left corner. If this placement doesn't work, you can use one of the flexible secondary placements shown below (in order of preference).

Be mindful of leaving ample white space for our Spark. When the Spark is located in the upper right corner, we aim to keep the right column free from any headlines or subheads. If text must be placed in the same column, give a generous vertical buffer (roughly 1/3 of our document height).

Primary

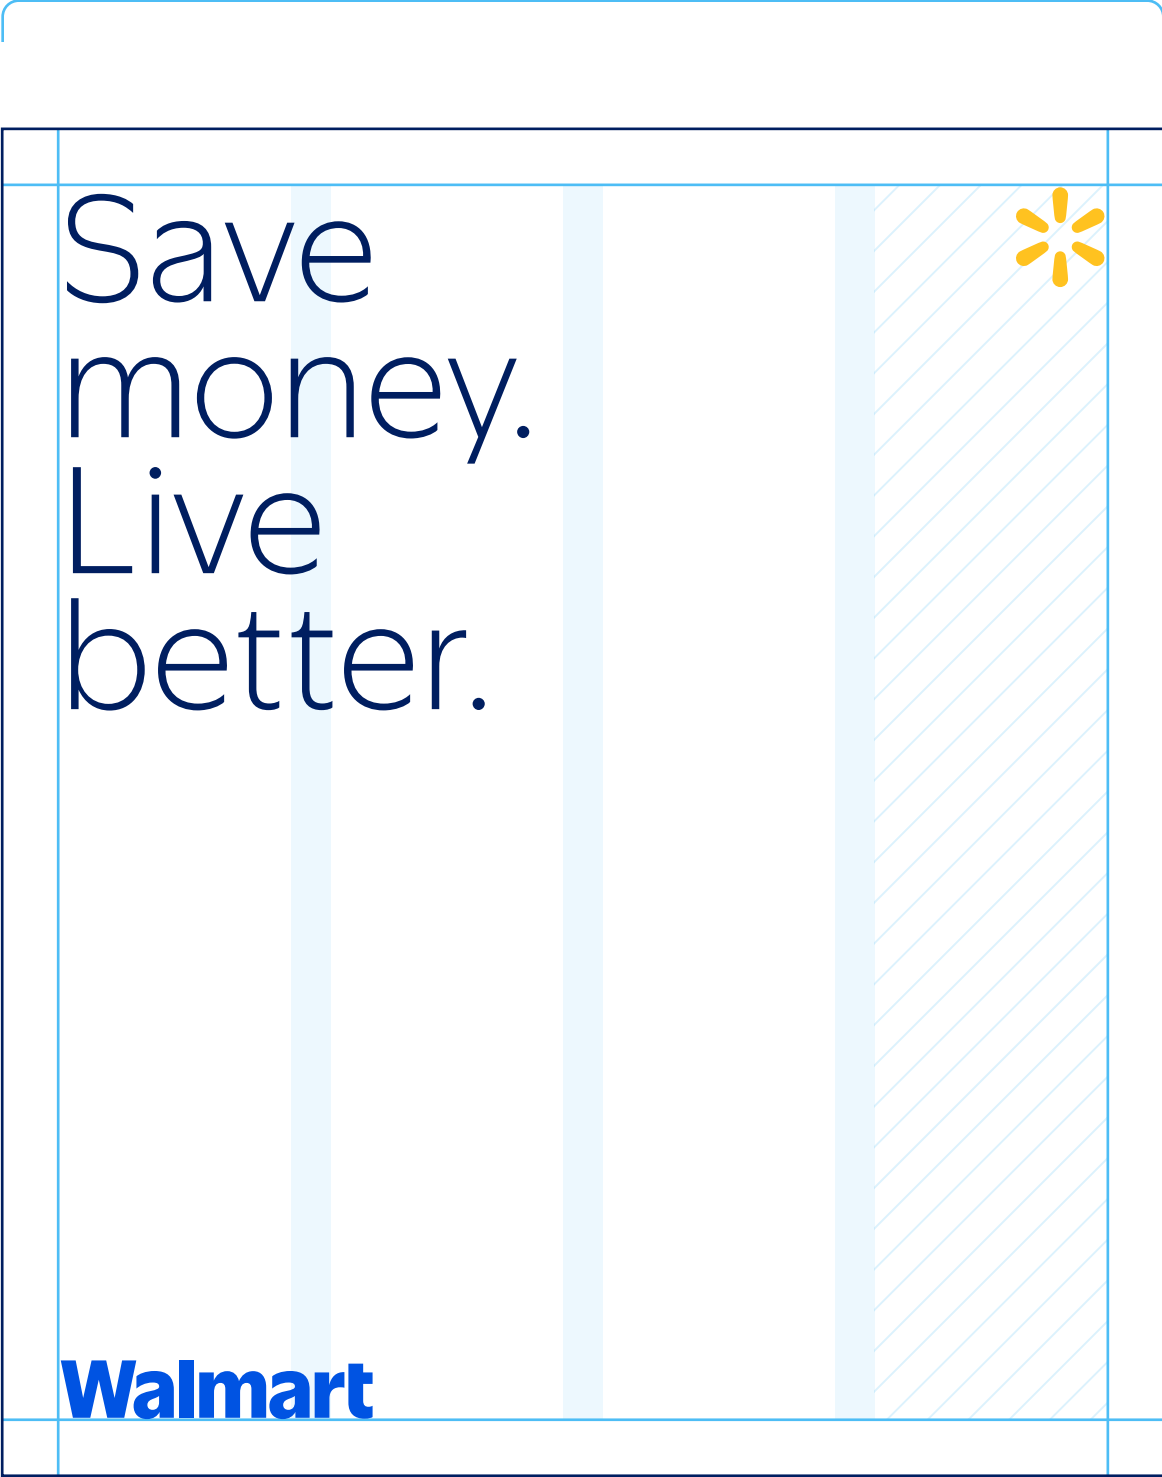

Diagram 1: Primary placement. The headline "Save money. Live better." is in the upper left corner. The Walmart logo is in the bottom left corner. The Spark is in the upper right corner.

Secondary

Diagram 2: Secondary placement. The headline "Save money. Live better." is left-aligned to the margin. The Walmart logo is in the bottom left corner. The Spark is in the upper right corner.

Diagram 3: Secondary placement. The headline "Save money. Live better." is left-aligned to the gutter. The Walmart logo is in the bottom left corner. The Spark is in the upper right corner.

Diagram 4: Secondary placement. The headline "Save money. Live better." is centered. The Walmart logo is in the bottom center. The Spark is in the upper right corner.

219

Scale

To maintain hierarchy, headlines should always be set larger than our wordmark. Aim for a **contrast ratio of at least 3:2**; in other words, our wordmark should be no larger than 2/3 of the headline size. We encourage using larger headlines for greater contrast when possible.

Not Enough Contrast

 3:2 Contrast Ratio

Too small

Walmart

Good

Walmart

Better

Walmart

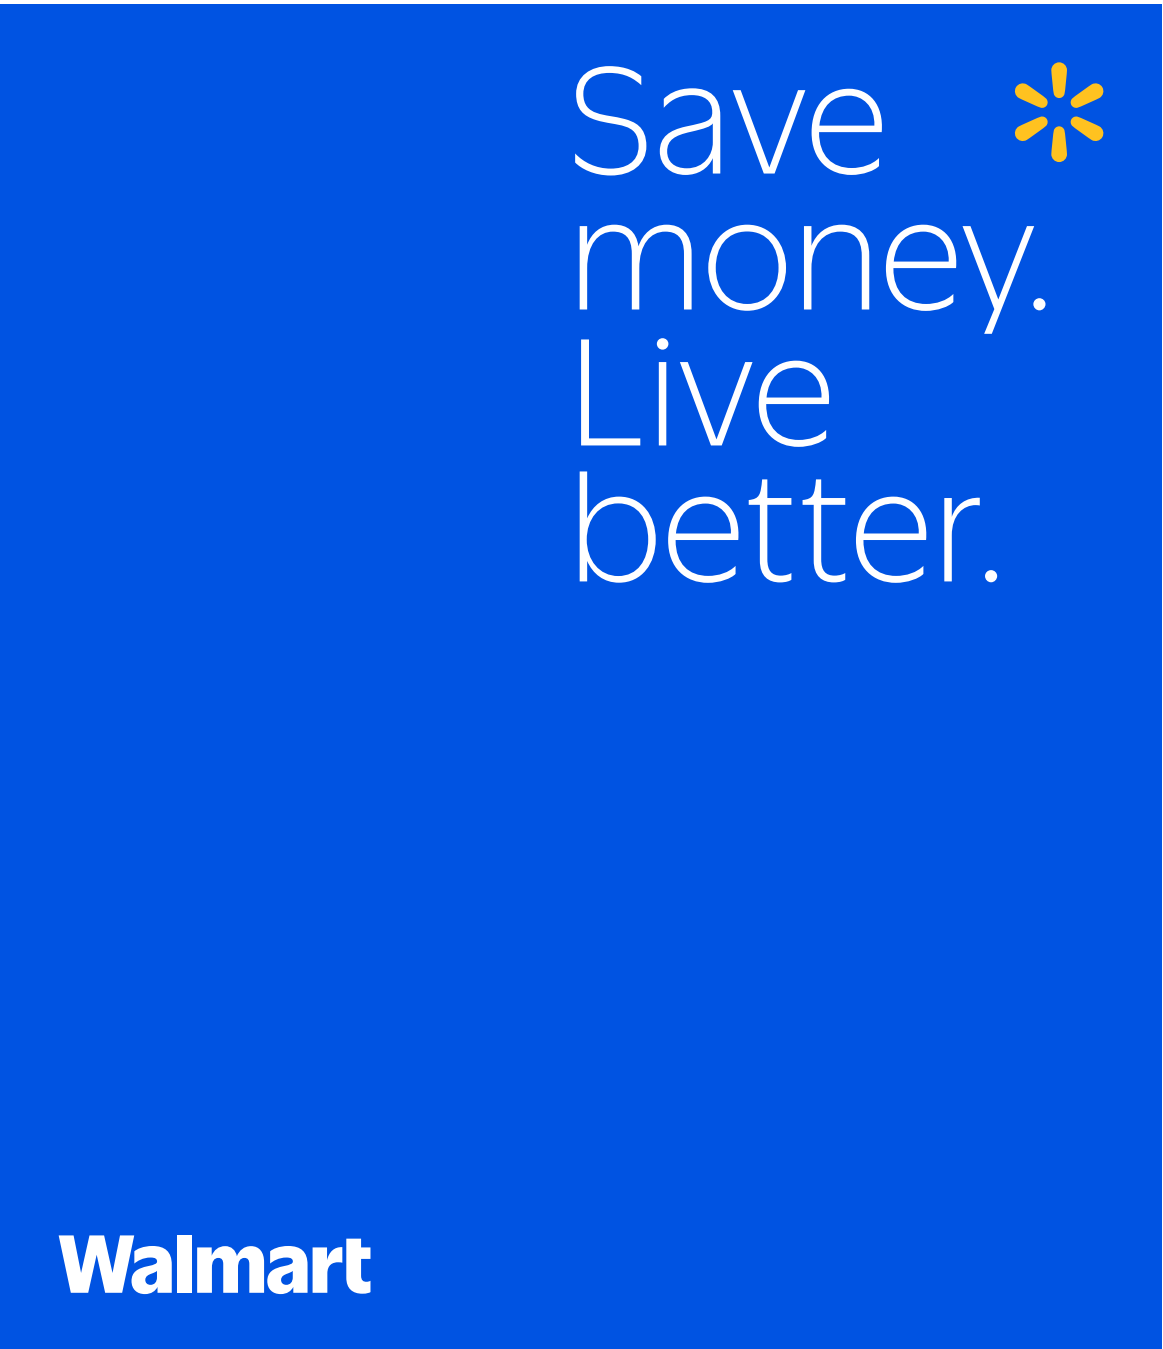

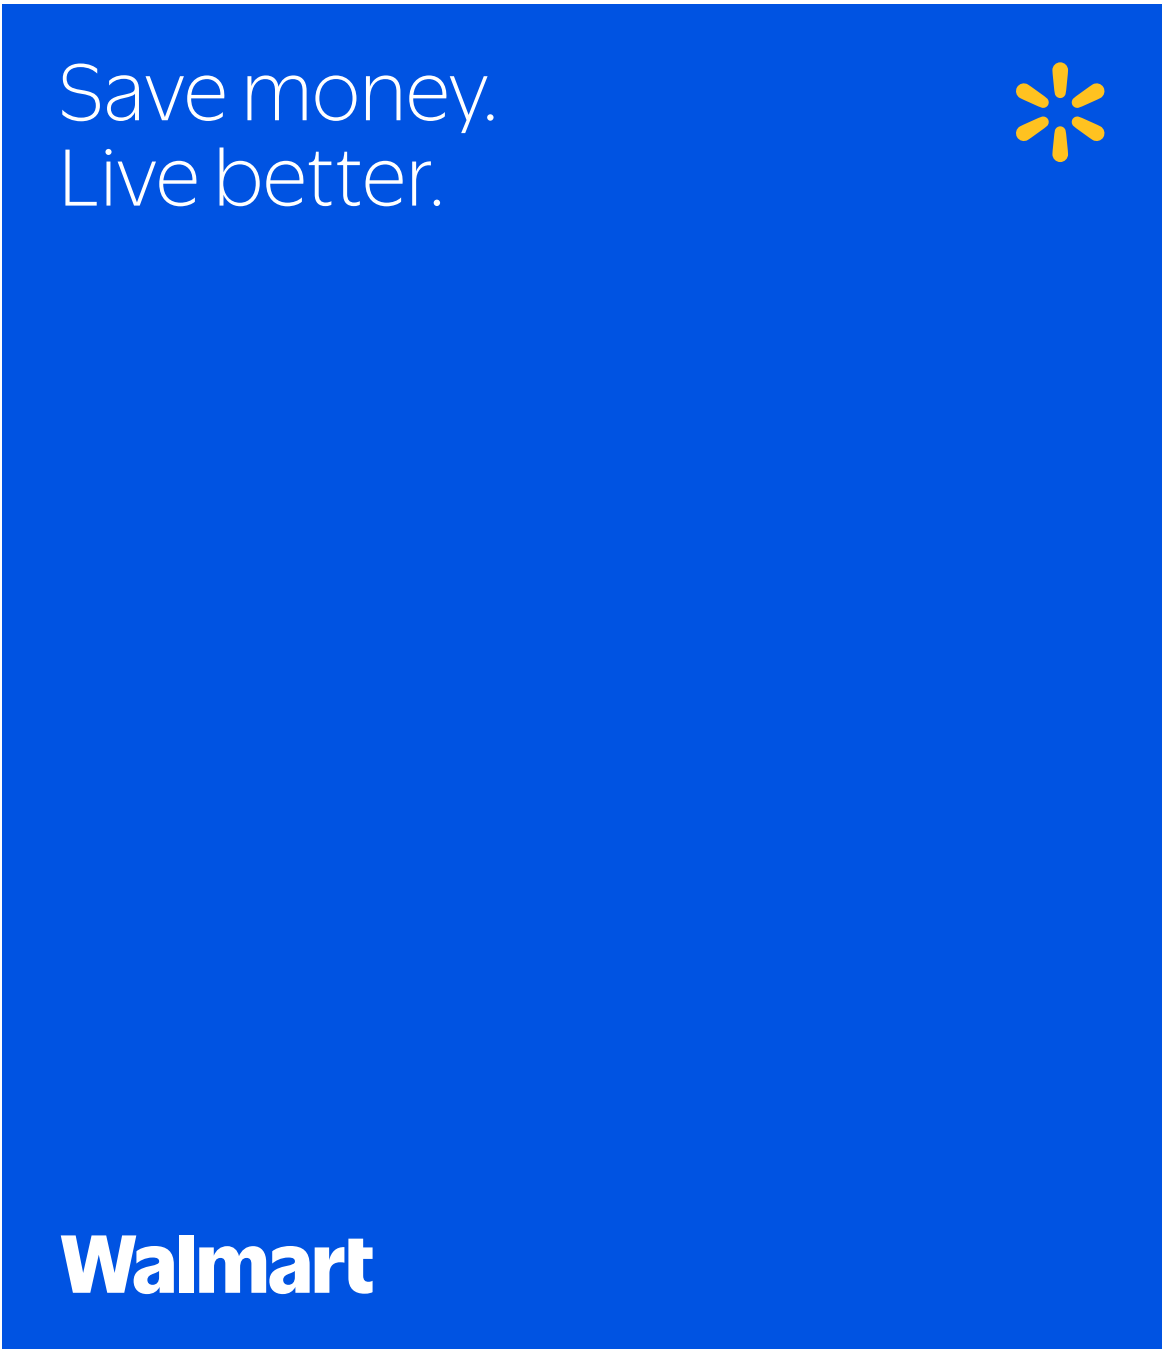

Best

Walmart

-  Headlines may not be equal to or smaller than our wordmark.
-  Headlines should always maintain a contrast ratio of at least 3:2 with our wordmark.
-  Setting a headline 2x the size of our wordmark provides an even better contrast ratio.
-  We encourage even larger headlines, where possible.

Don'ts

When setting headlines, we're always mindful of the way our text interacts with our wordmark and Spark. Avoid the following misuses.

 **Don't** set headline too small.

 **Don't** let headline encroach on the Spark.

 **Don't** right-align headline.

 **Don't** let headline encroach on the Spark.

Layout Quick Guide

This section is our layout design cheat sheet. It's a quick summary that walks through the step-by-step process of building a layout, from our initial grid to adding frames and photography.

Our quick guide only includes the most essential layout information. For more details on each element, see the previous sections.

Applying Margins

When designing a layout, our first step is to establish margins using the formula outlined on page 189.

Long Side ÷ 24 = Margin

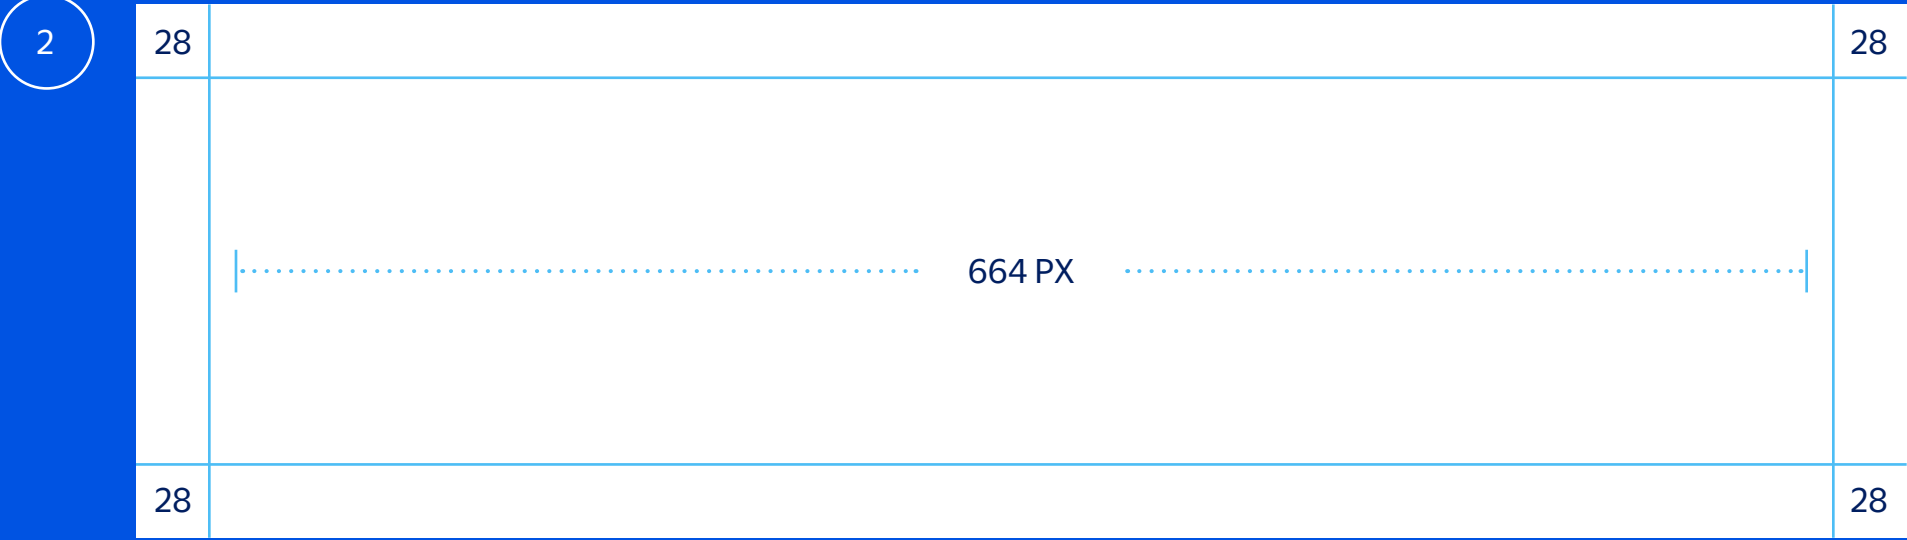

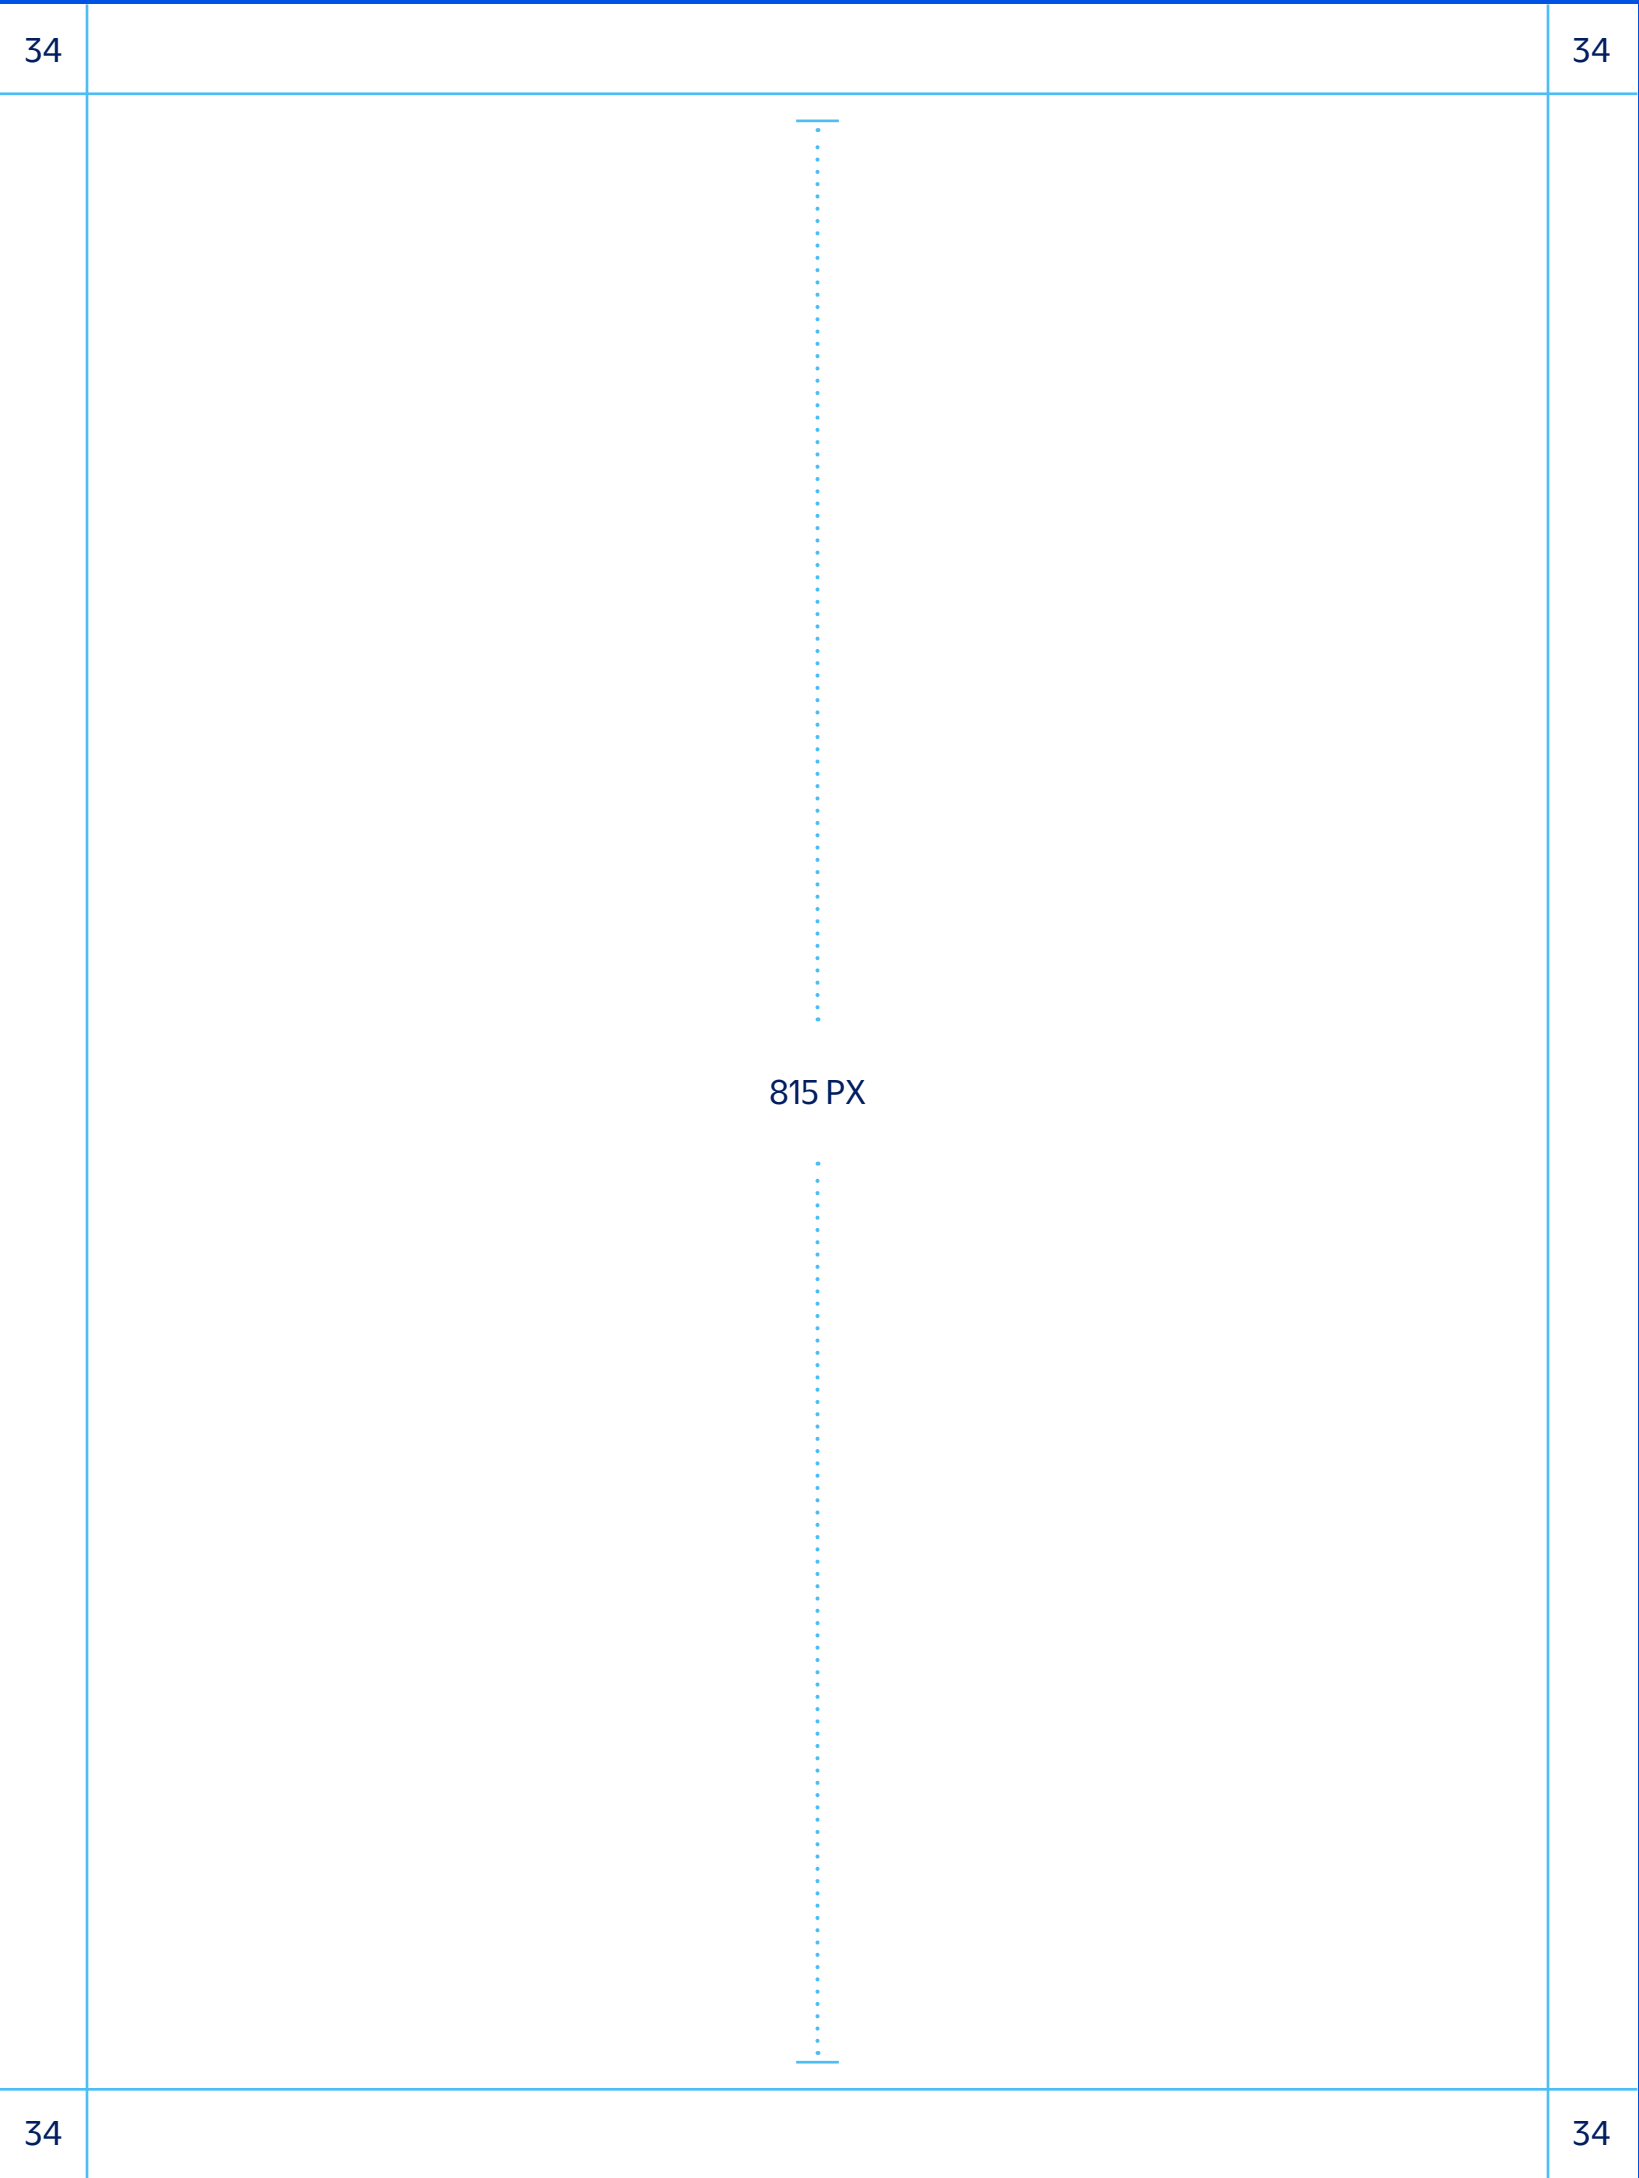

Note:
In the case of very wide or very tall layouts, margins may need to be slightly reduced for optical correctness.

- 1

815px H ÷ 24 = 34px Margin
- 2

664px W ÷ 24 = 28px Margin
- 3

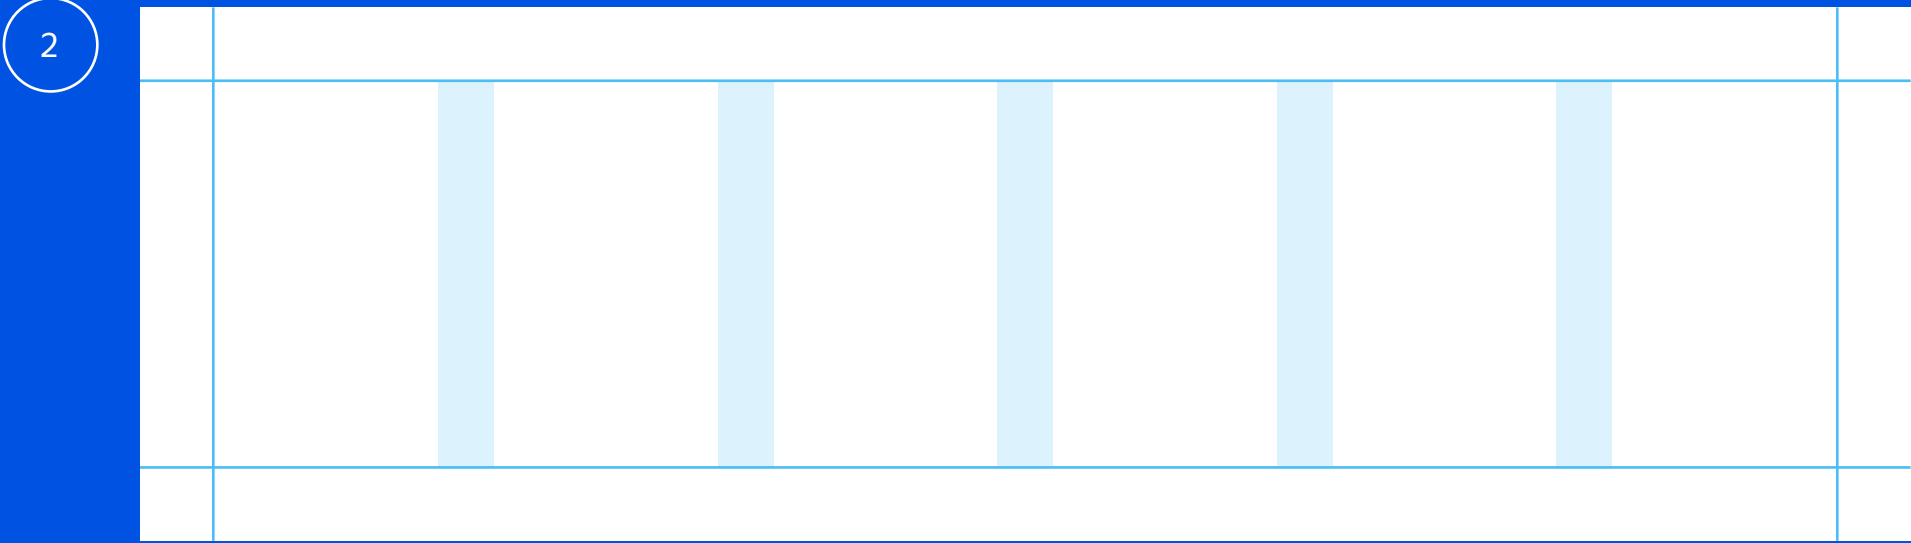

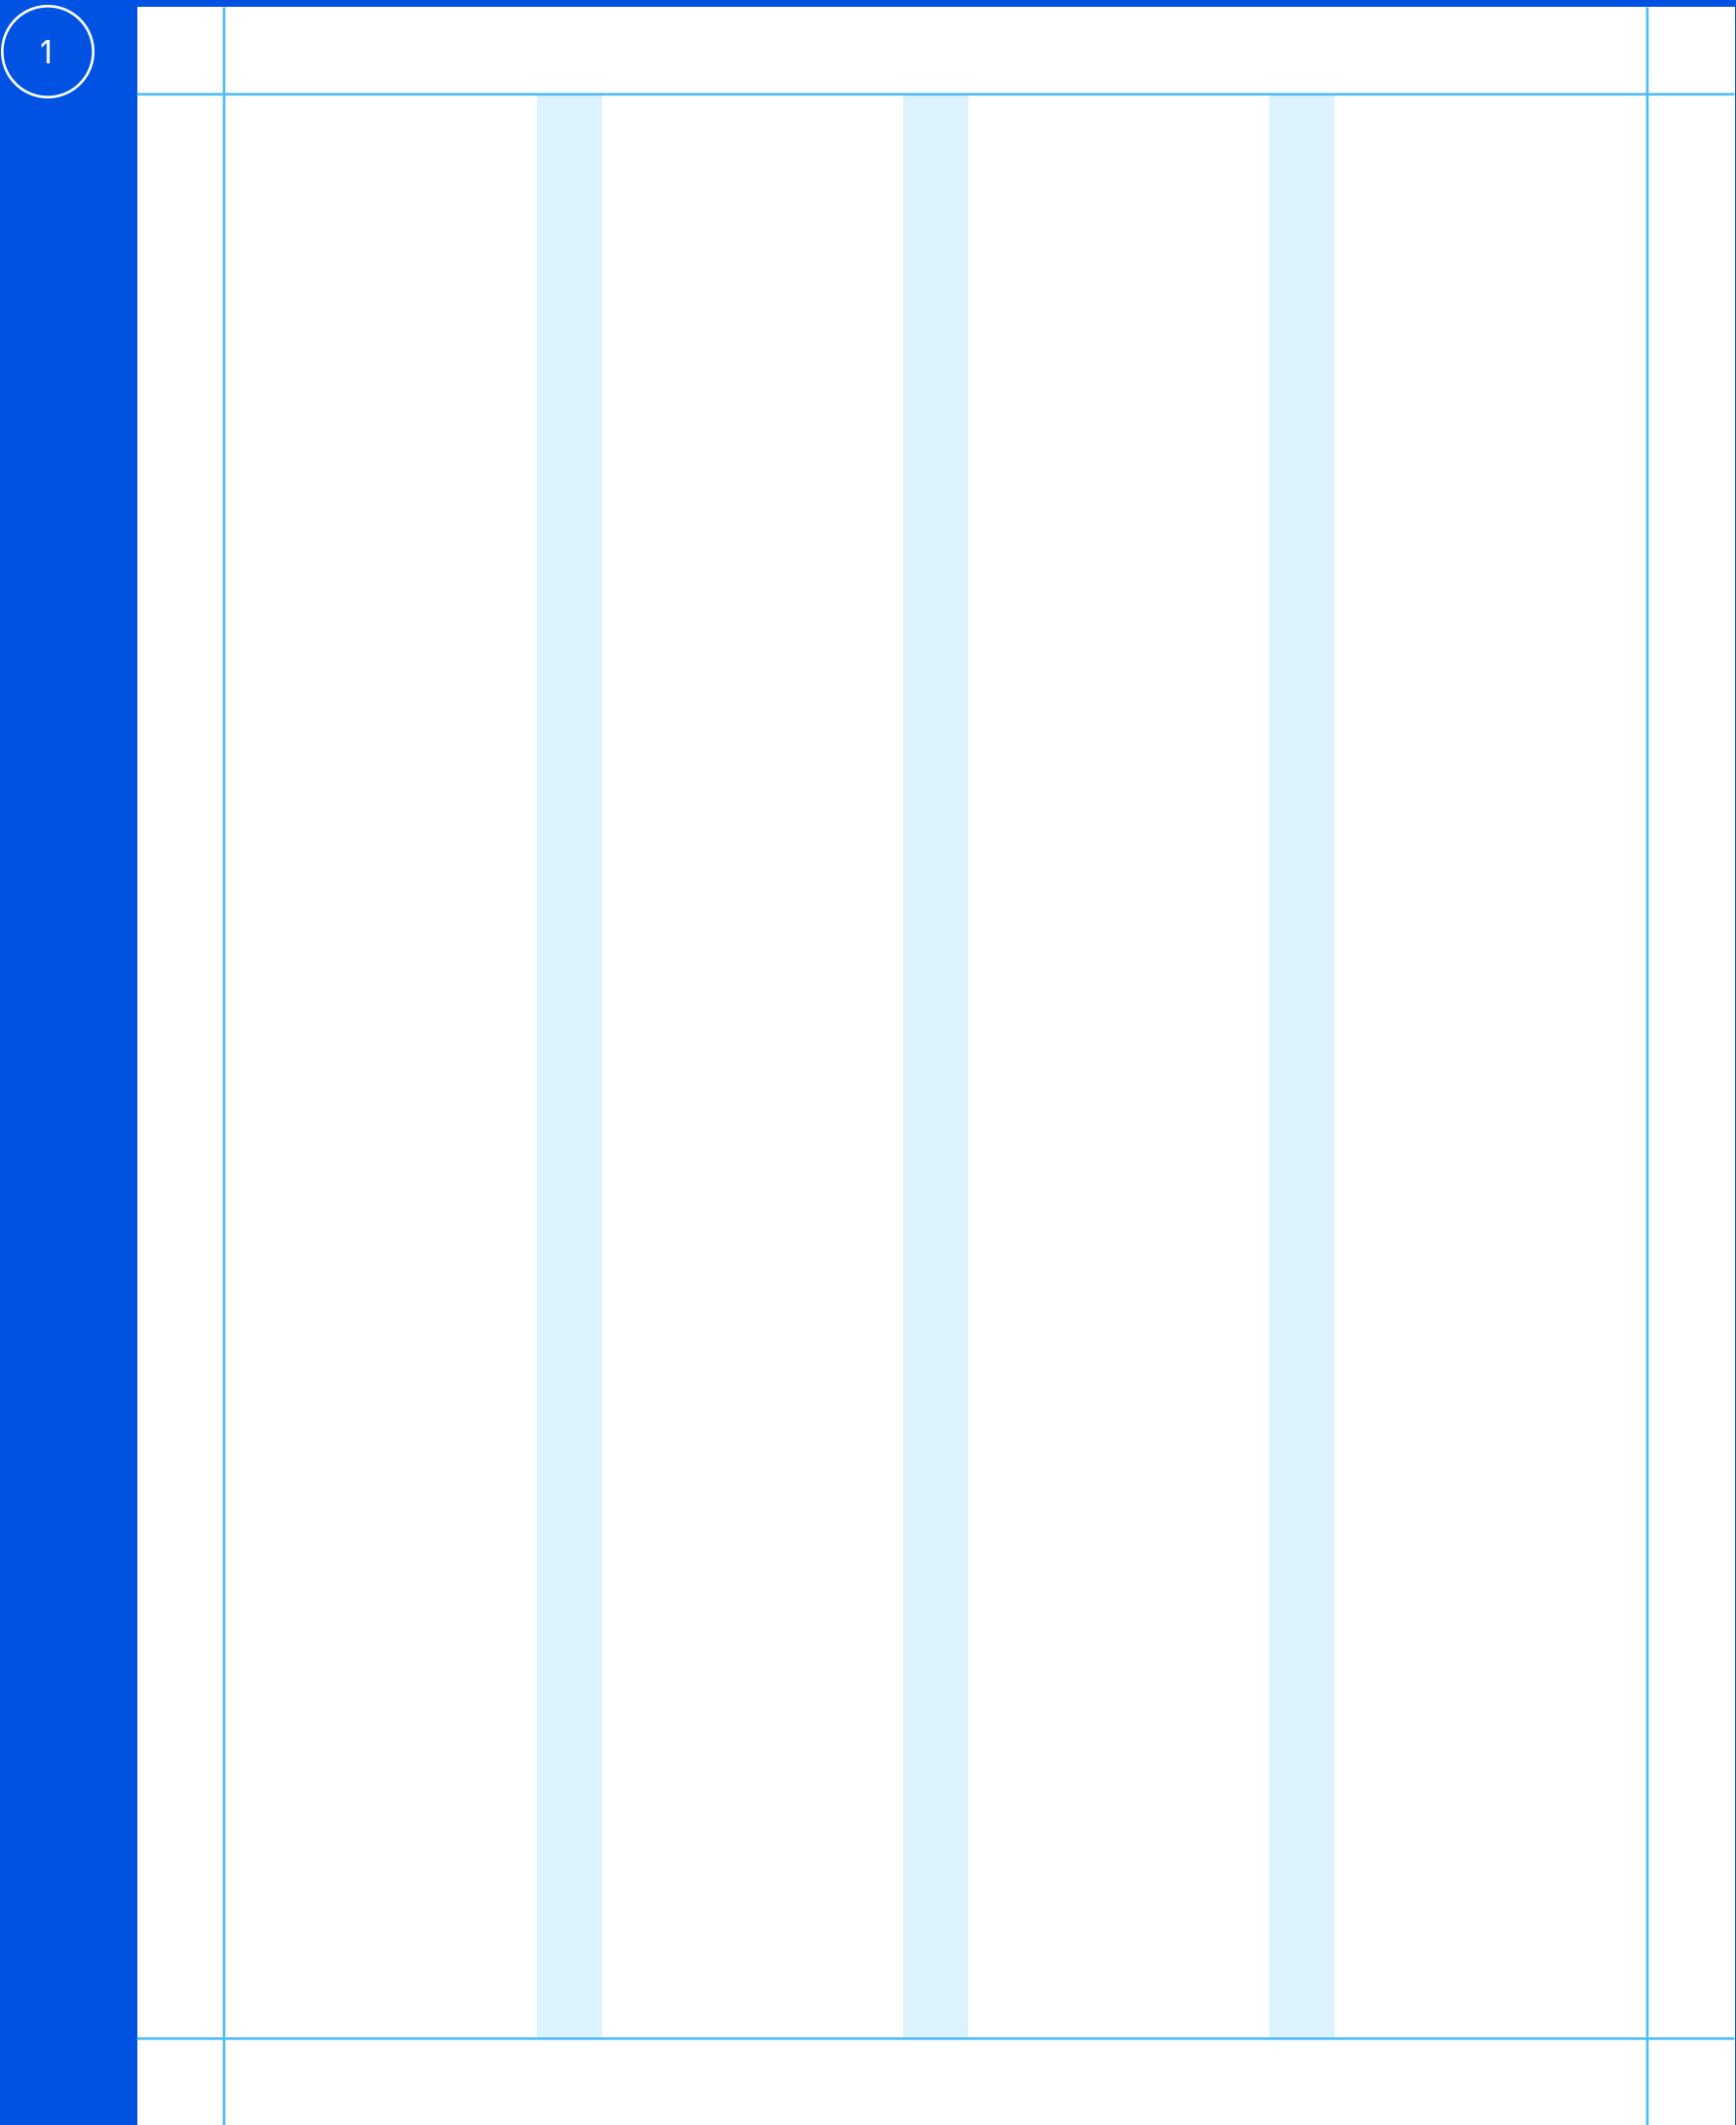

664px W ÷ 24 = 28px Margin

Applying Columns and Gutters

After setting our margins, we divide the page into columns and gutters to organize our content according to pages [190-192](#).

Columns are drawn in increments of 2, up to a maximum of 12 columns for our widest and most complex layouts. The width of our gutters may range from 50% to 100% of our margin, depending on your application.

Applying Headlines

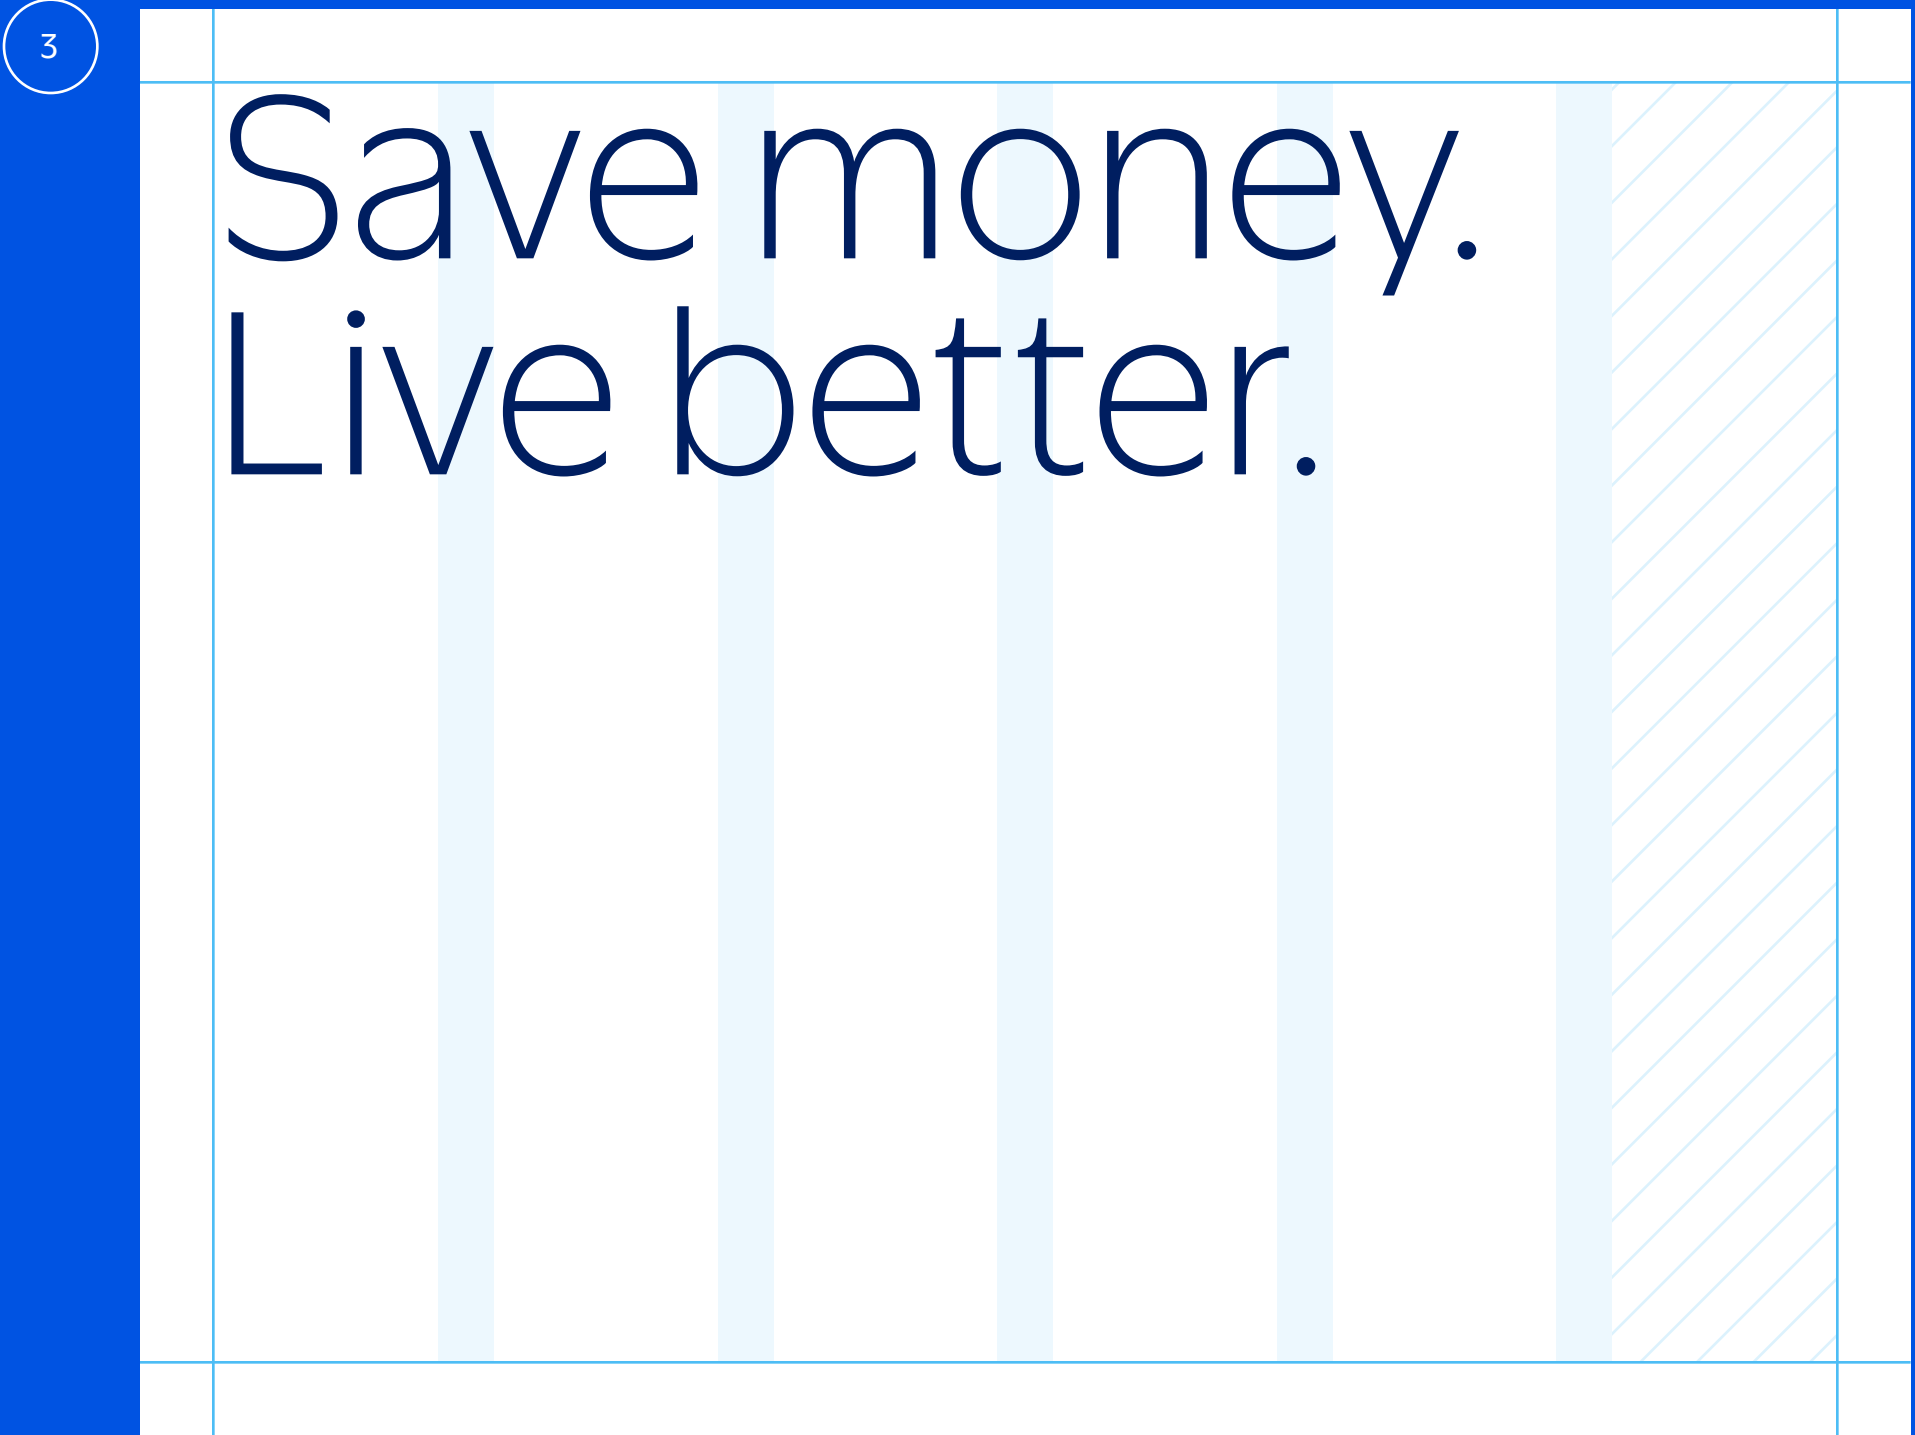

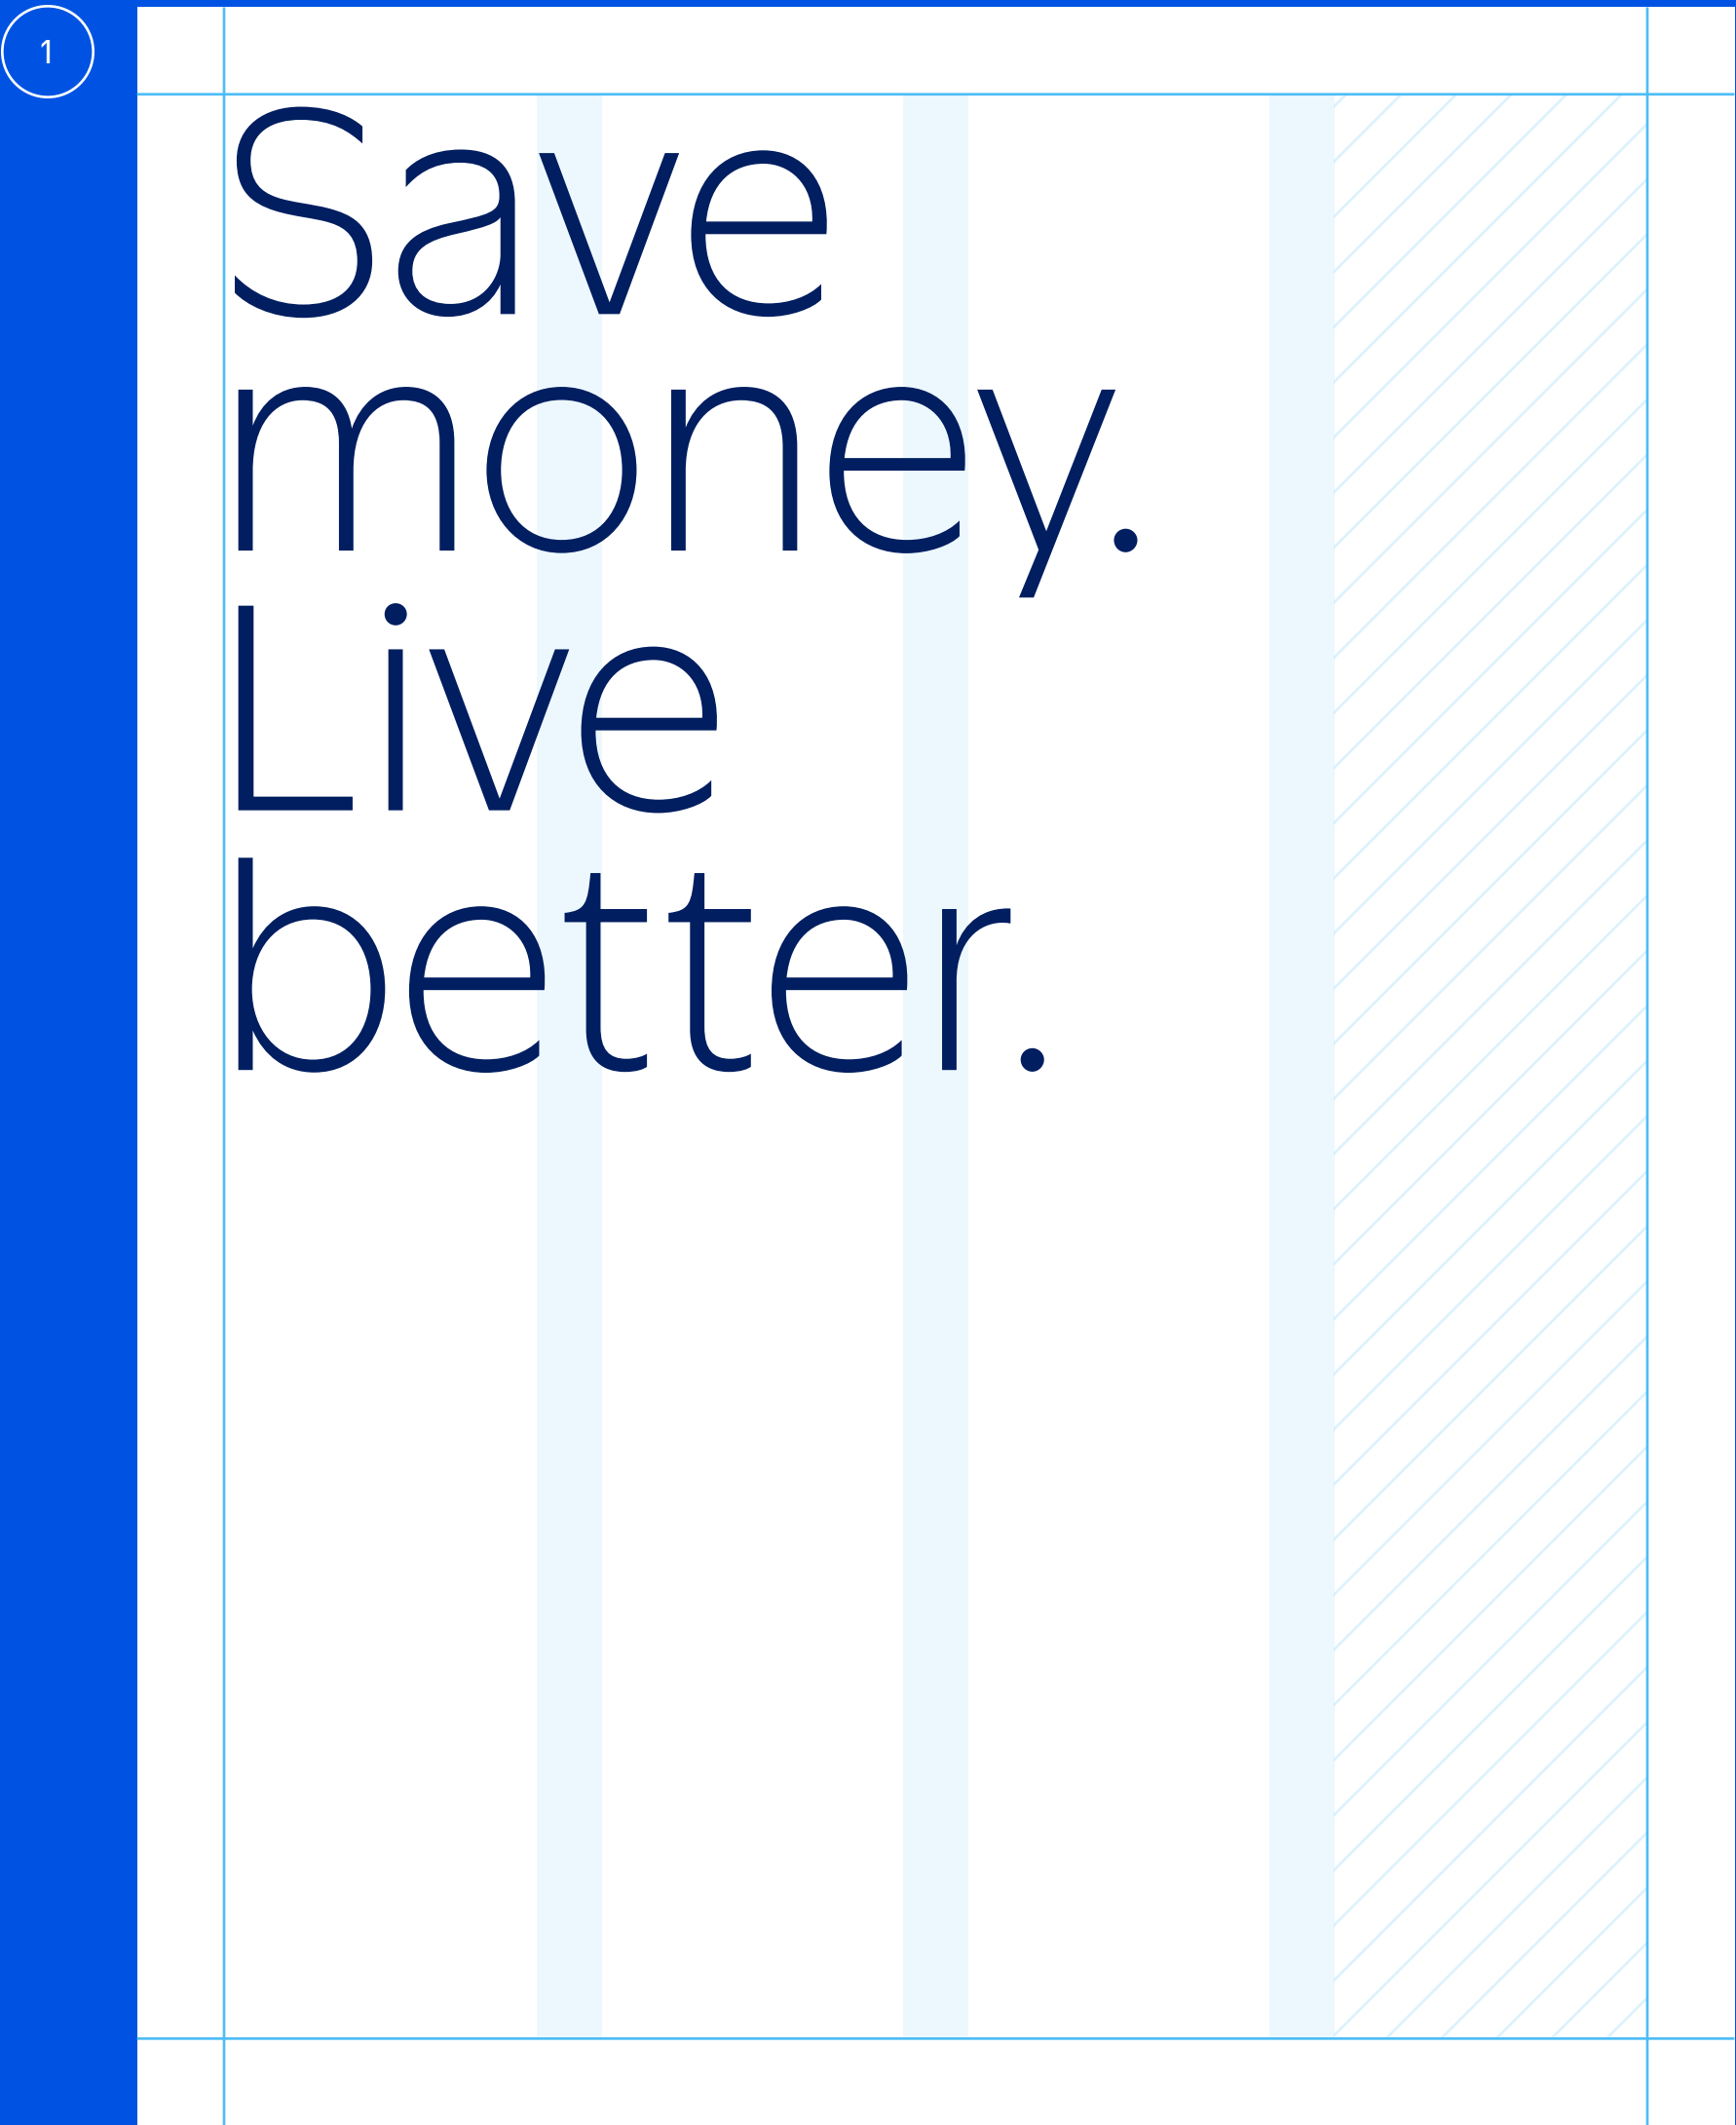

Our preferred headline placement is in the upper left corner. Headlines should be large and impactful, but they shouldn't occupy the full width of an application—we aim to keep the last column free from text to reserve space for our Spark.

- 1

Short line lengths help keep our headlines large and impactful.
- 2

Longer line lengths can be used on wide horizontal layouts.
- 3

Leave the last column free from text to reserve space for our Spark.

Applying Subheads

Subheads can be no larger than 50% of our headline's cap height to ensure proper hierarchy. We always encourage larger size differentiation for maximum contrast between levels of text.

- 1

We prefer to stack our subheads left-aligned beneath our headline.
- 2

In extra wide layouts, the subhead can rest along the bottom margin.
- 3

Minimum padding between the headline and subhead is 3/4 of the headline's height.

Applying Logos

Our preferred Spark placement is in the upper right corner, opposite to our wordmark in the lower left corner. This keeps all text (including our wordmark) left-aligned in a clean block for maximum clarity and simplicity.

The height of our wordmark is roughly equal to our margin. The Spark is 1.7x our wordmark height to maintain their size relationship (page 194).

- 1

Where possible, all text (including our wordmark) should be left-aligned.
- 2

In small layouts, our Spark can be used without our wordmark to conserve space.
- 3

Our Spark is always 1.7x the height of our wordmark.

Adding Frames

When adding frames to a layout, our text and logos shift to accommodate this extra content. Our standard rules for sizing and placement still apply, but confined to a smaller page area.

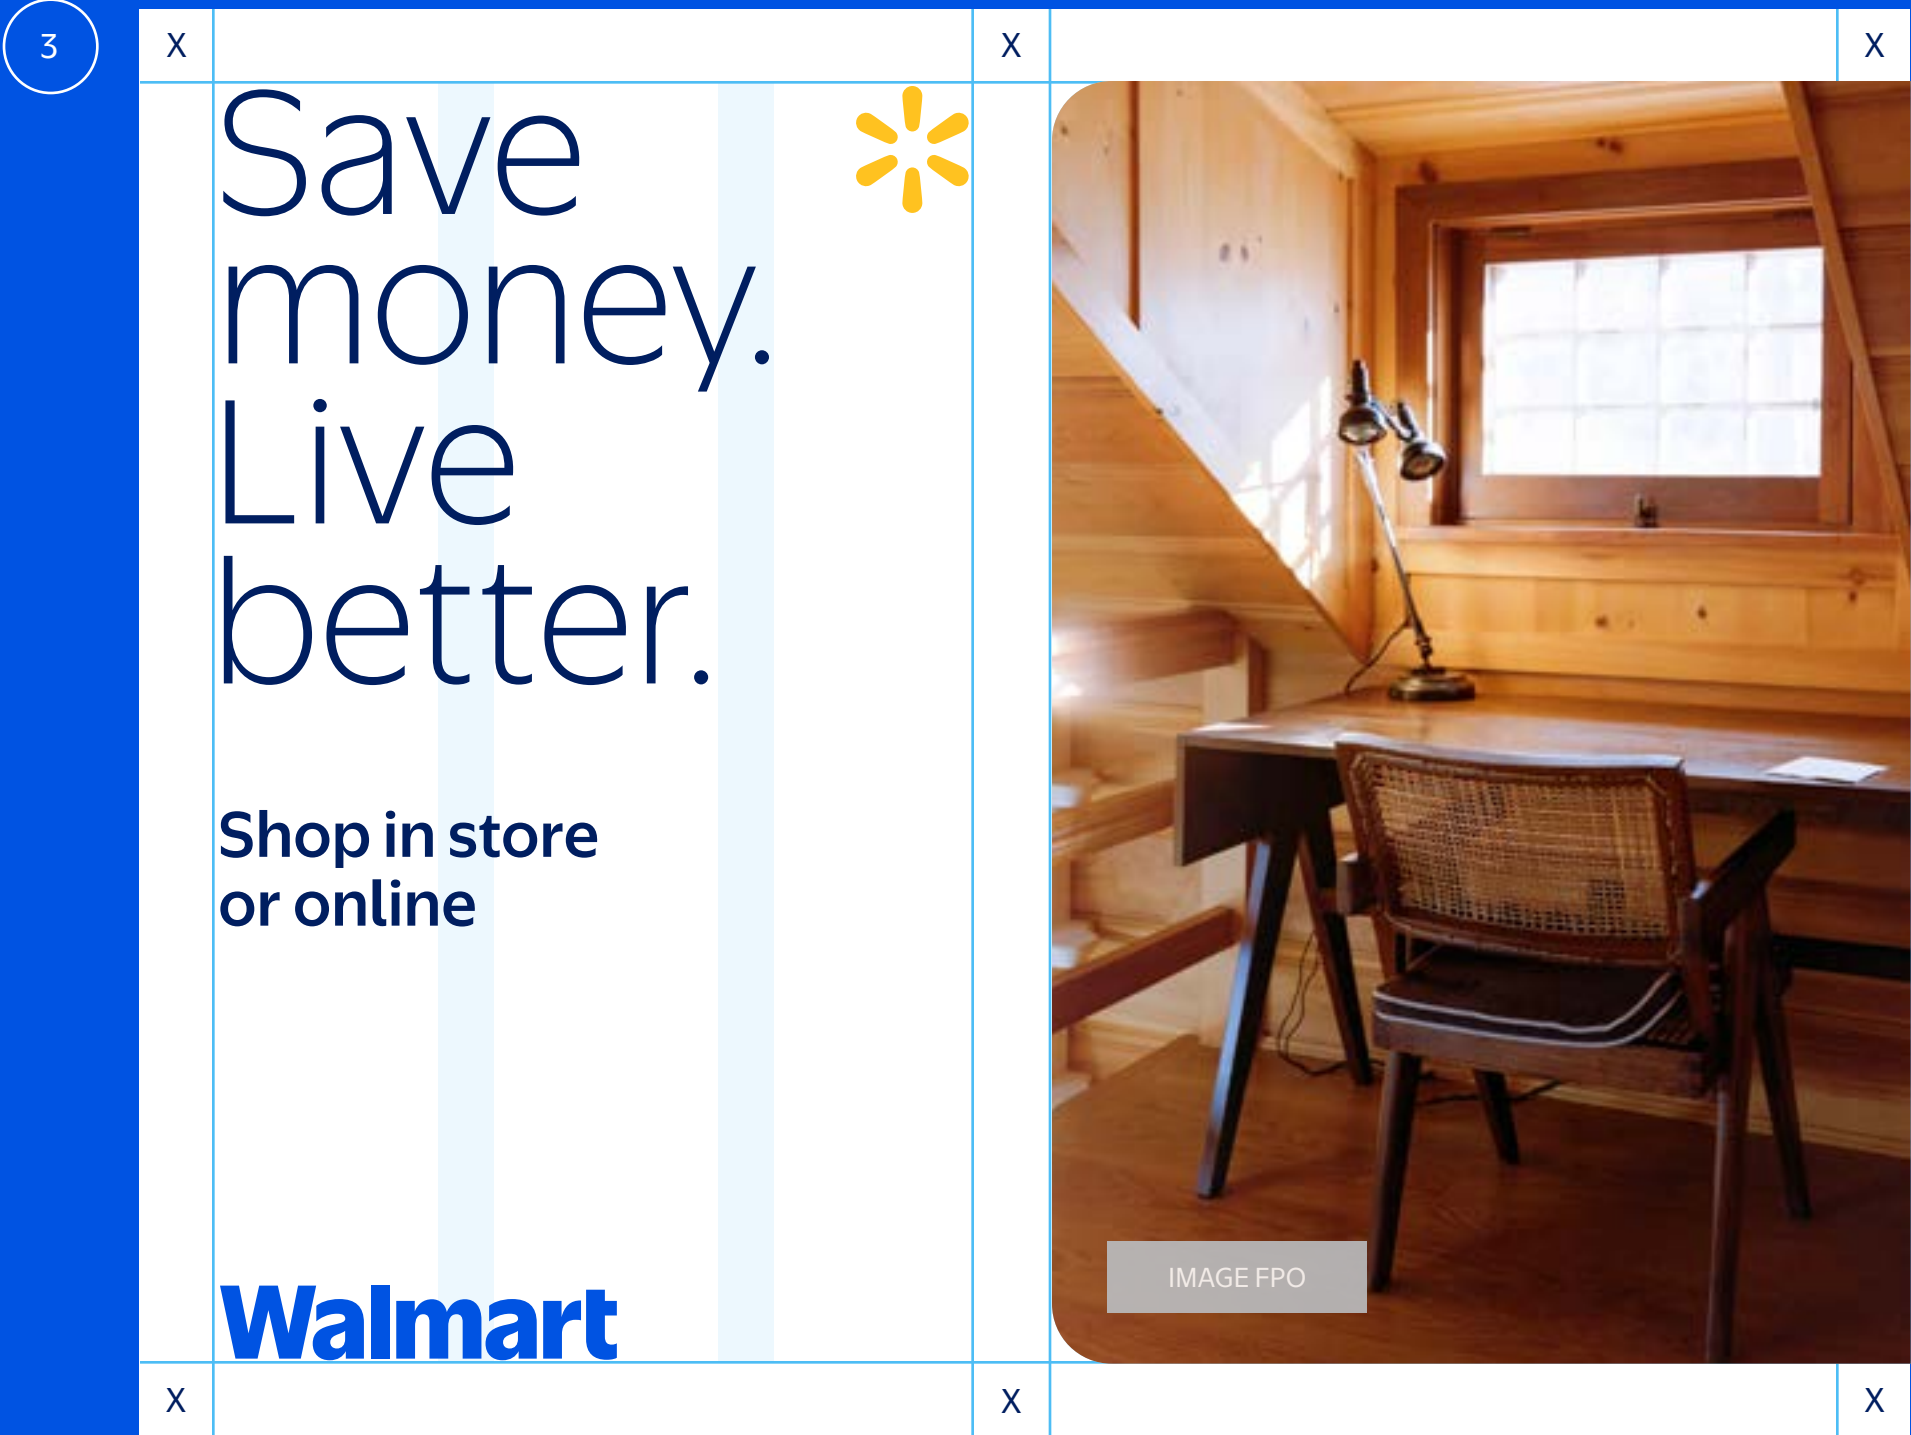

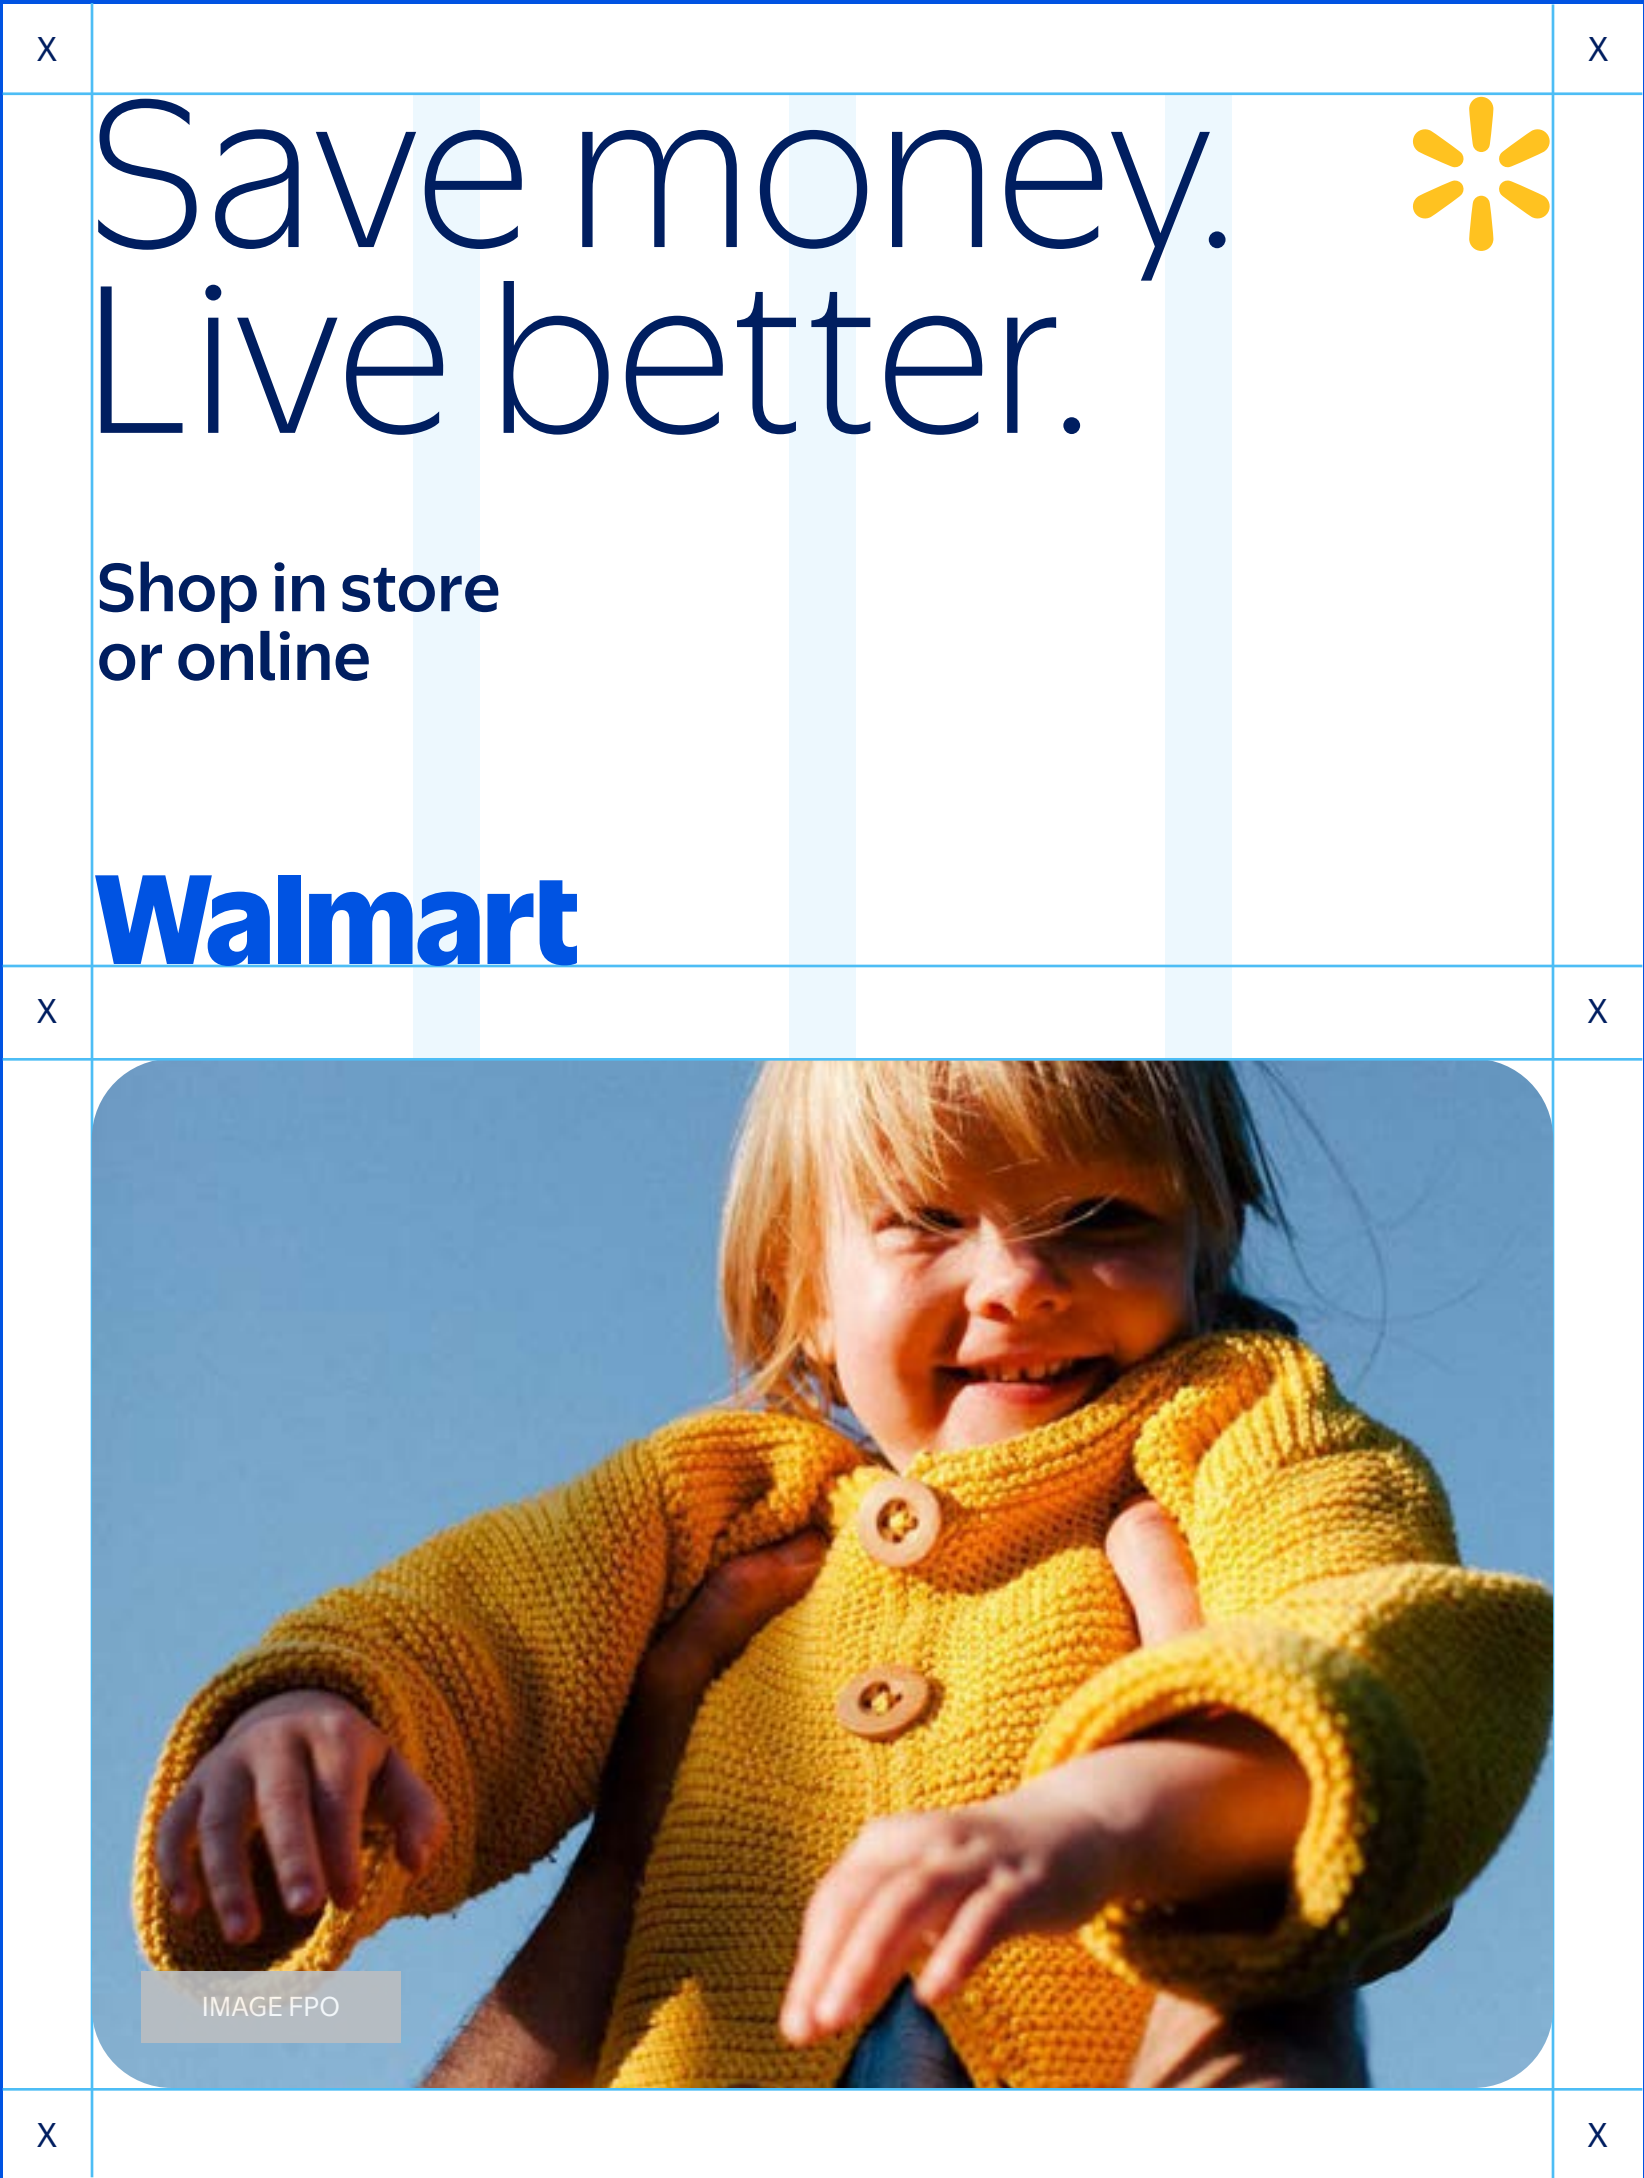

For information on frames, see pages [212-225](#).

- 1

Leave clear space equal to our margin between frames and other content.
- 2

Logos may shift away from document edge to make space for frames.
- 3

Headlines and subheads scale as a unit to maintain their size relationship.

Applying Full-Bleed Imagery

When using full-bleed imagery, headlines and subheads can be moved around our grid to best fit the available negative space. Exact placement is flexible, just be sure all text is left-aligned to a column. Size and placement rules for our logos don't change.

- 1

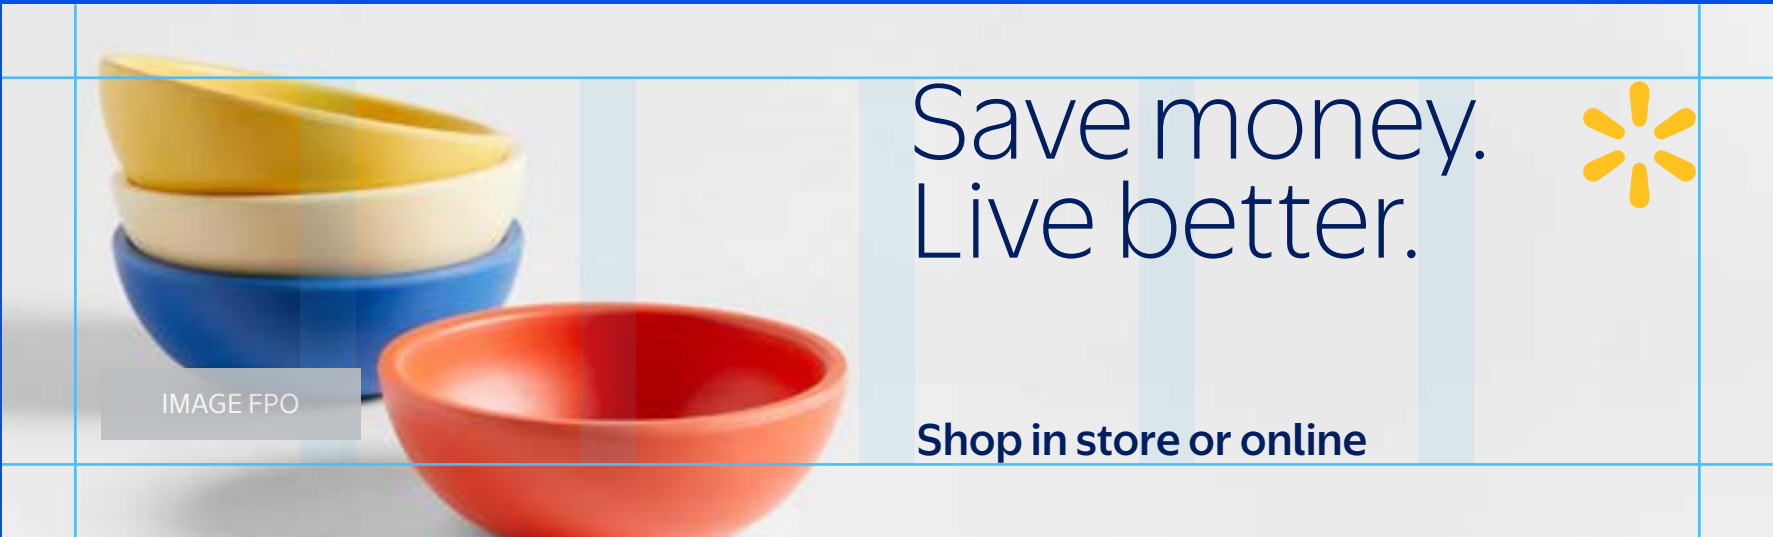

Text should be placed over a natural clear space in the image.
- 2

Text may be left-aligned to any column while leaving room for our Spark.
- 3

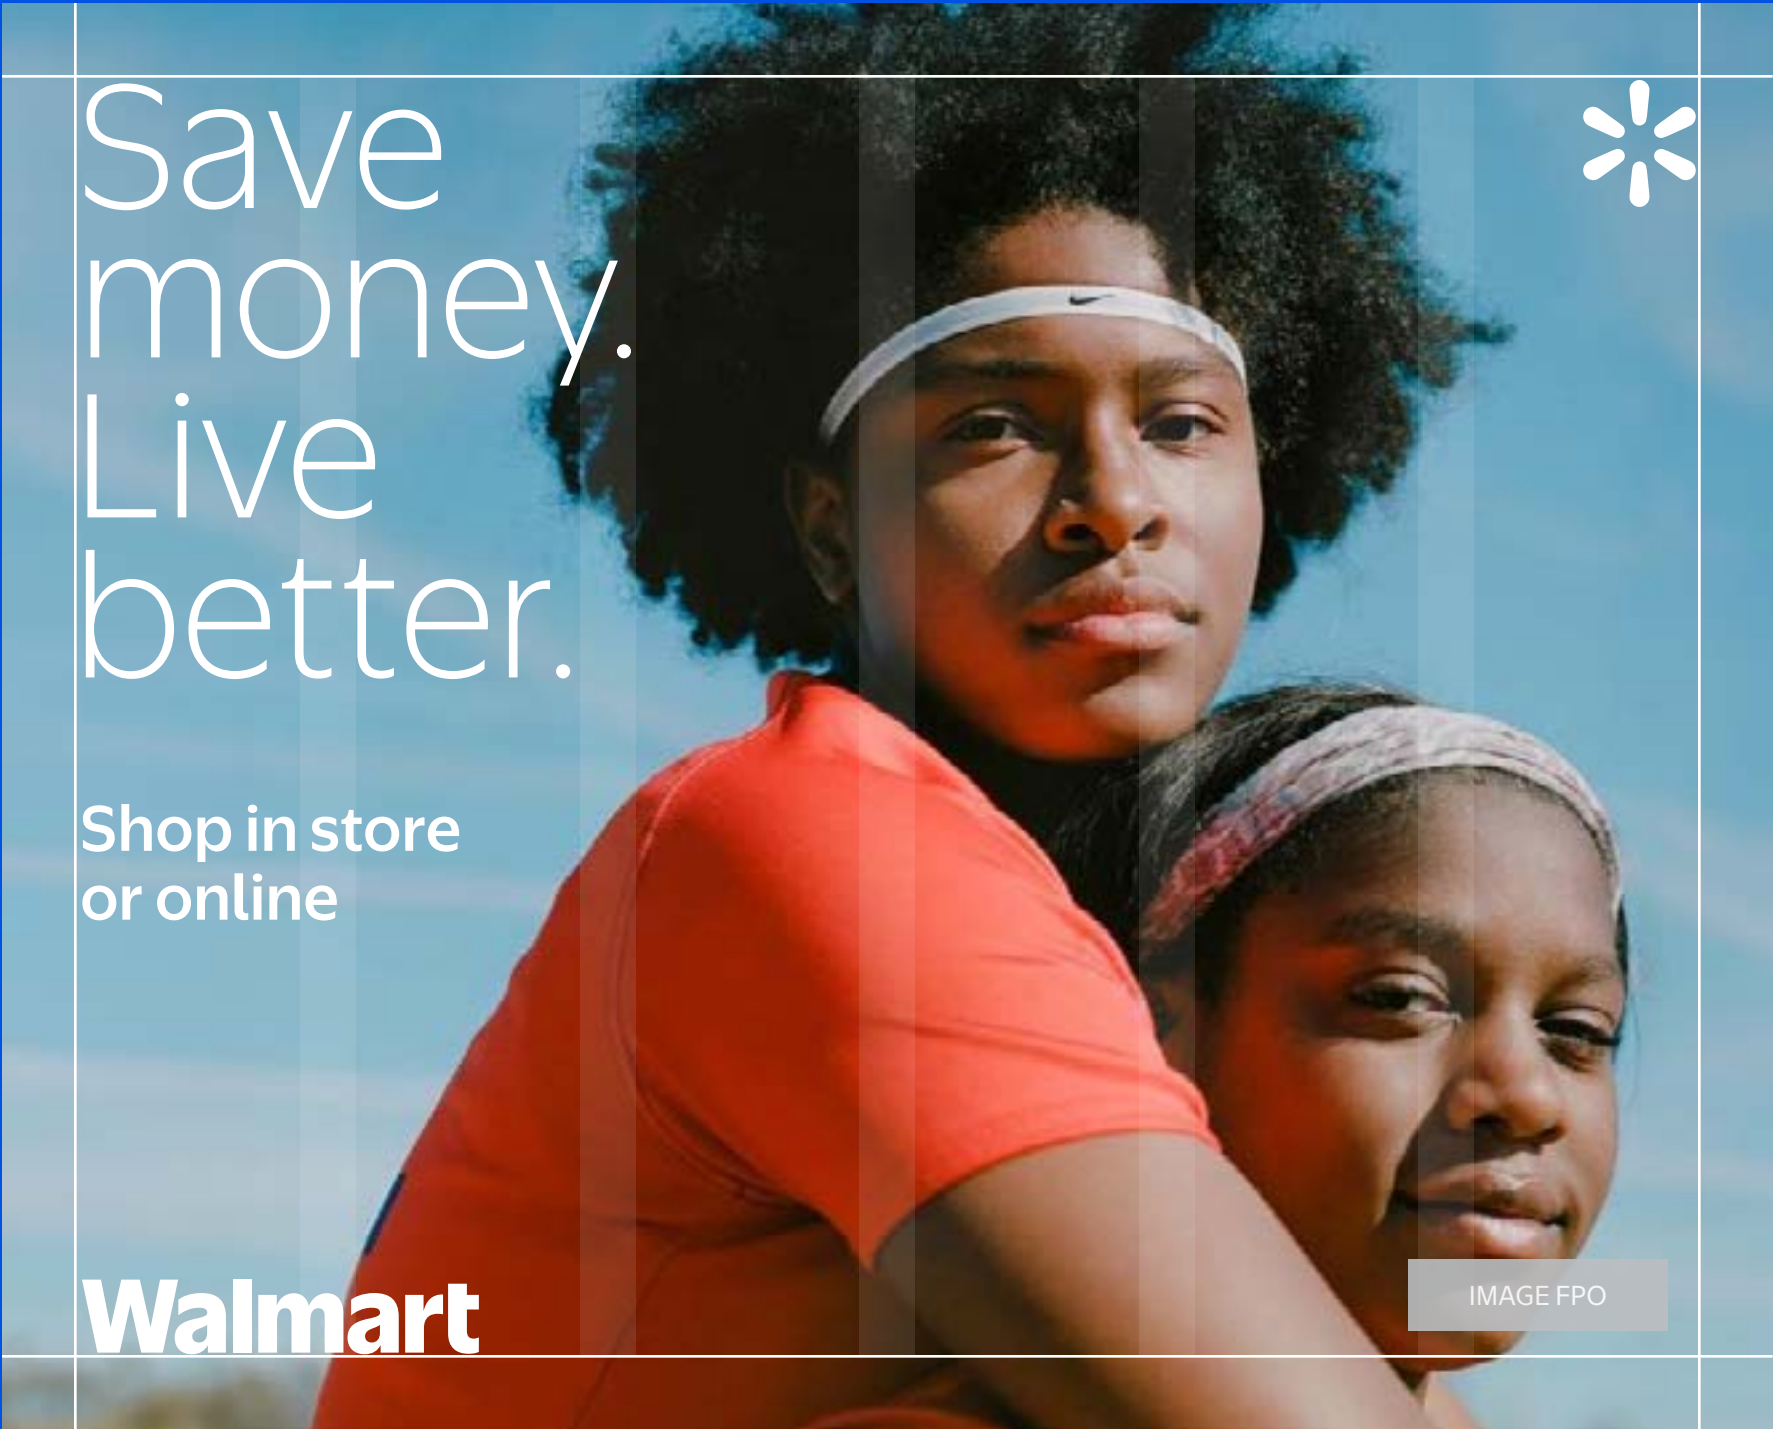

Our preferred headline placement is still the upper left corner, if possible.

Frames
Buttons

Brand OS

Frames

Our frames are flexible and versatile containers that mimic the look and behavior of digital tiles in a user interface.

They help focus attention on a key product or headline, or to organize multiple images into a single layout.

Ground Rules

Our frames are powerful, flexible tools that can easily be overused and abused. With great power comes great responsibility! Whenever you're working with frames, please remember three key points:

1

Less is more.

Avoid the impulse to overuse frames. Keep the number of frames per layout to a minimum. One skillfully executed frame is more powerful than three competing ones.

2

Do not decorate.

Frames are functional tools that exist to direct the viewers' eye to a particular focal area or to thoughtfully tell a visual story. Don't add unnecessary frames as aesthetic fillers.

3

Keep it clean.

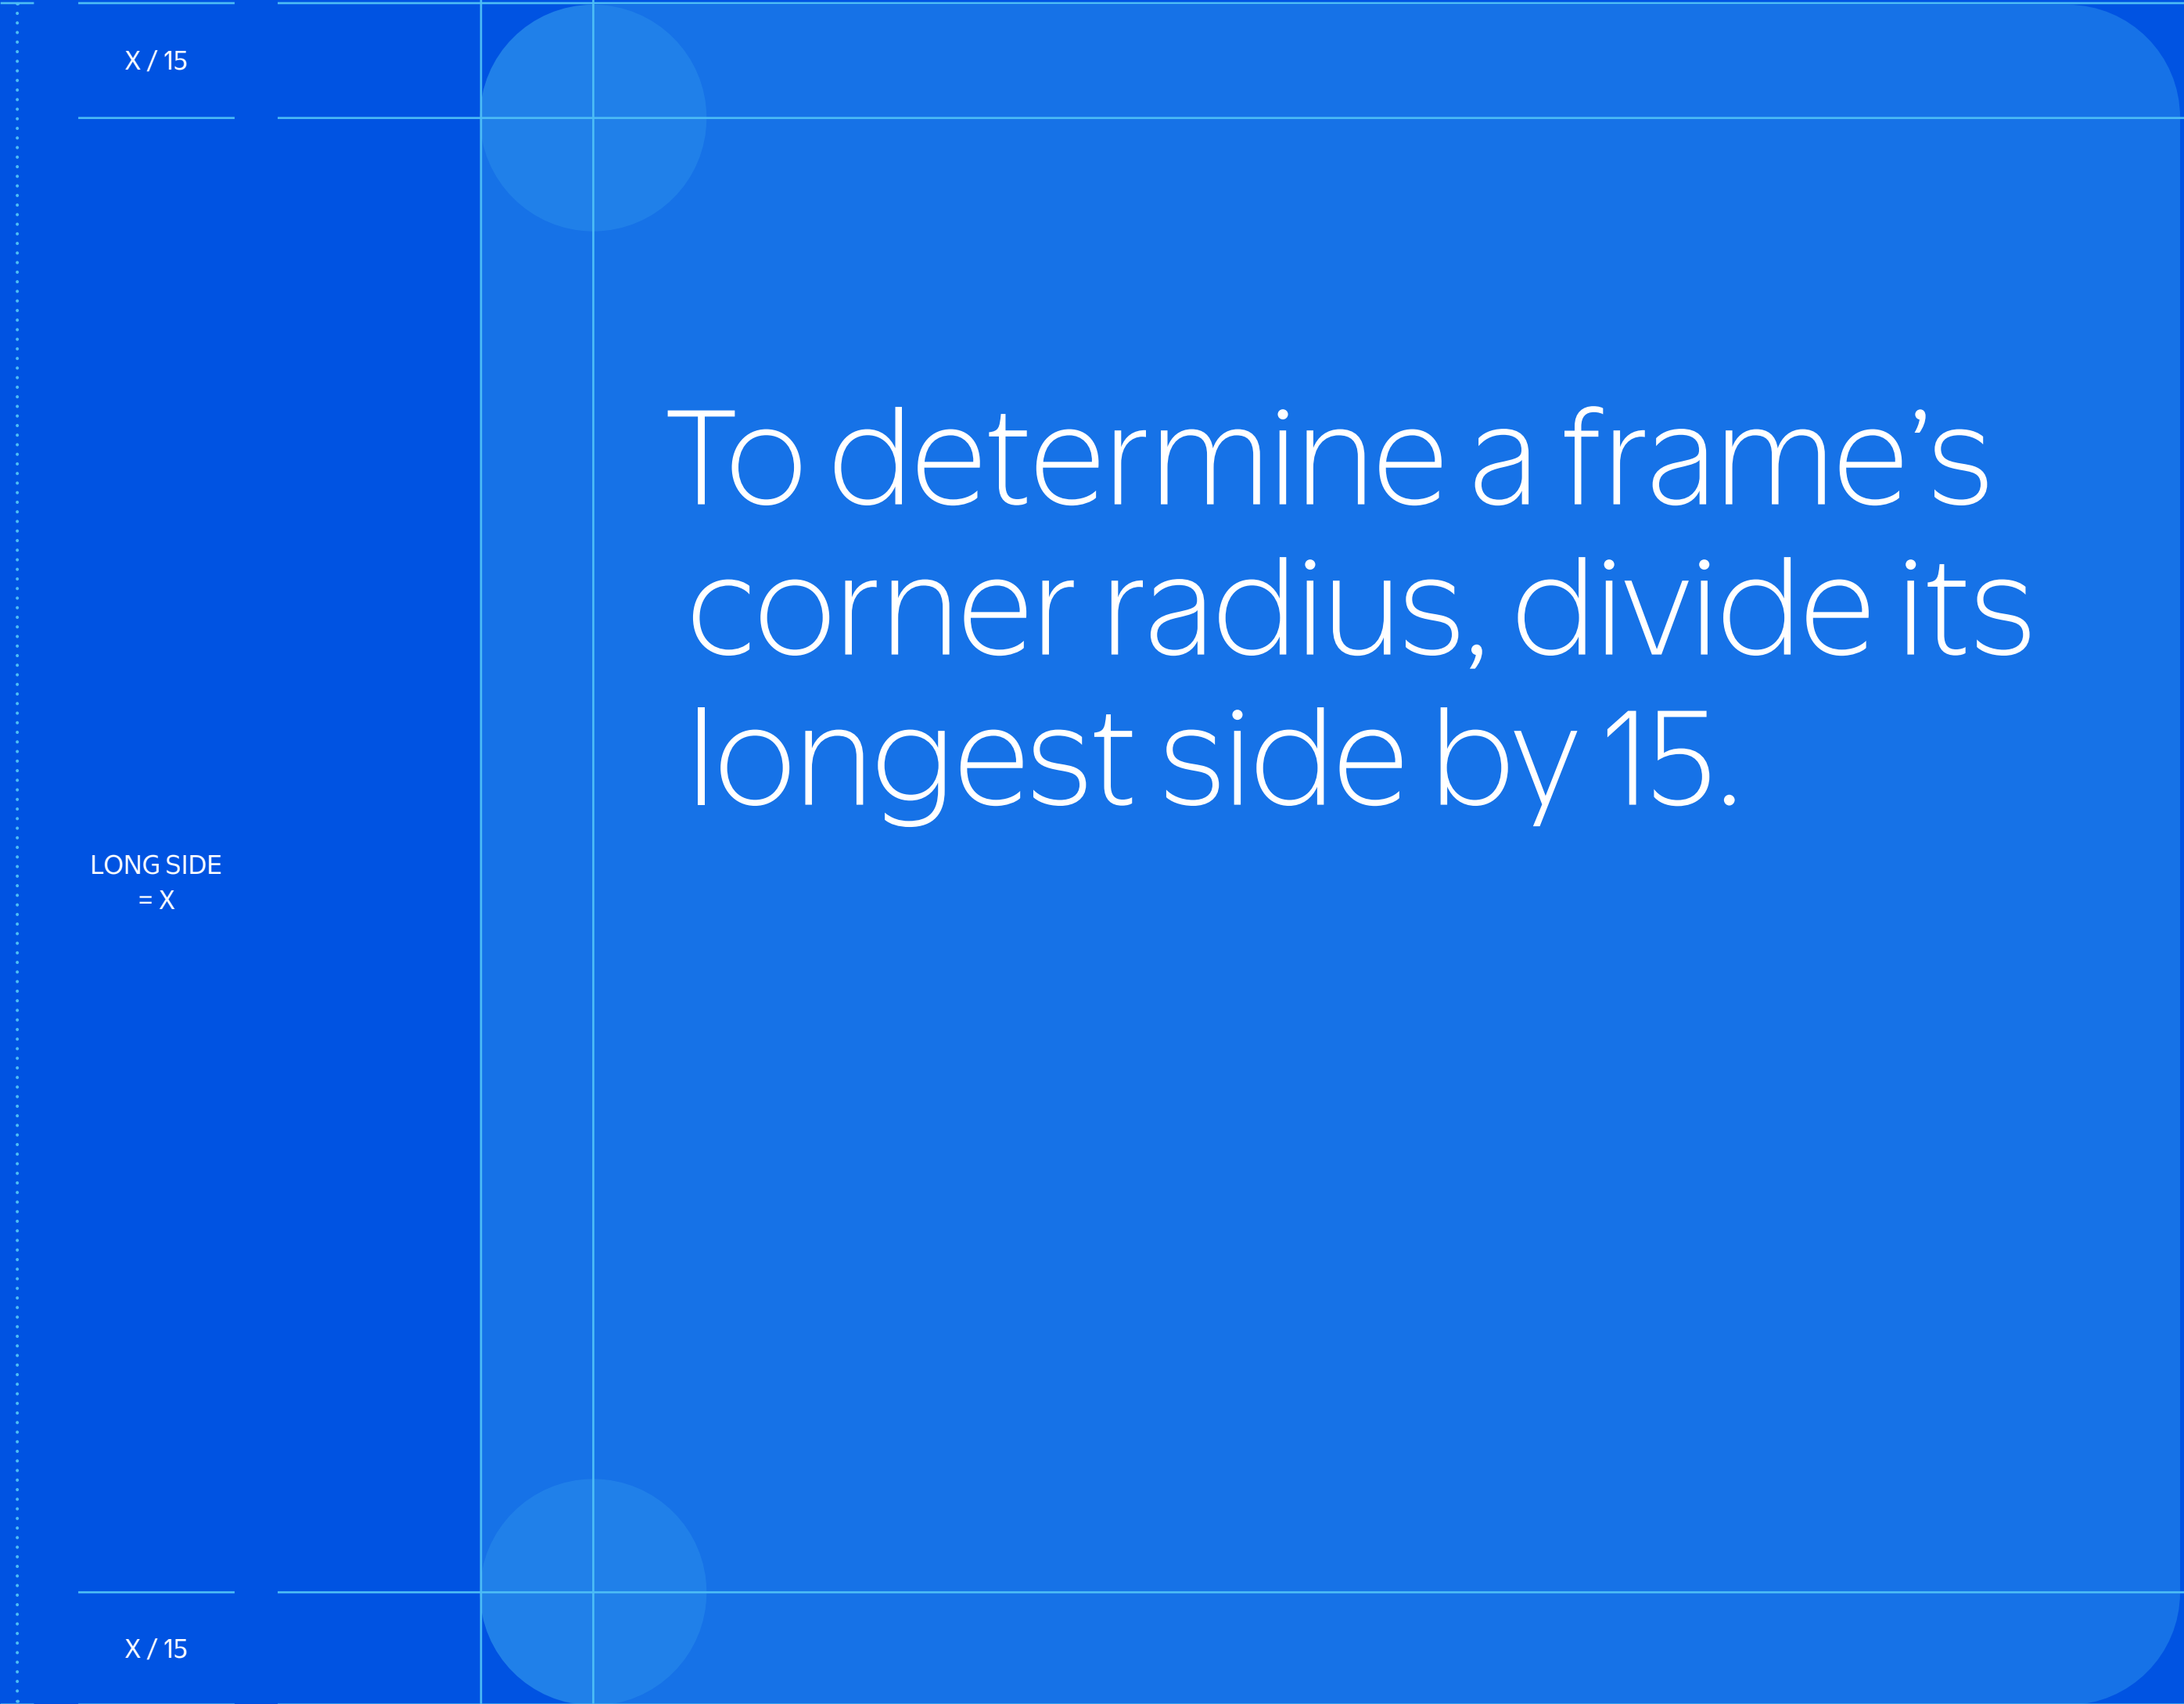

Alignment and spacing between frames should be neat, uniform, and intentional. Do not approach frames with a collage mentality.

Corner Radius

To determine the corner radius of a frame, **divide its longest side by 15**. This allows corners to scale proportionately across applications. Depending on the size and dimensions of your frame, this initial measurement may need to be adjusted for optical correctness (see page [216](#)).

When using multiple frames in a single layout, all corner radii should match the average radius measurement—not the smallest, not the largest.

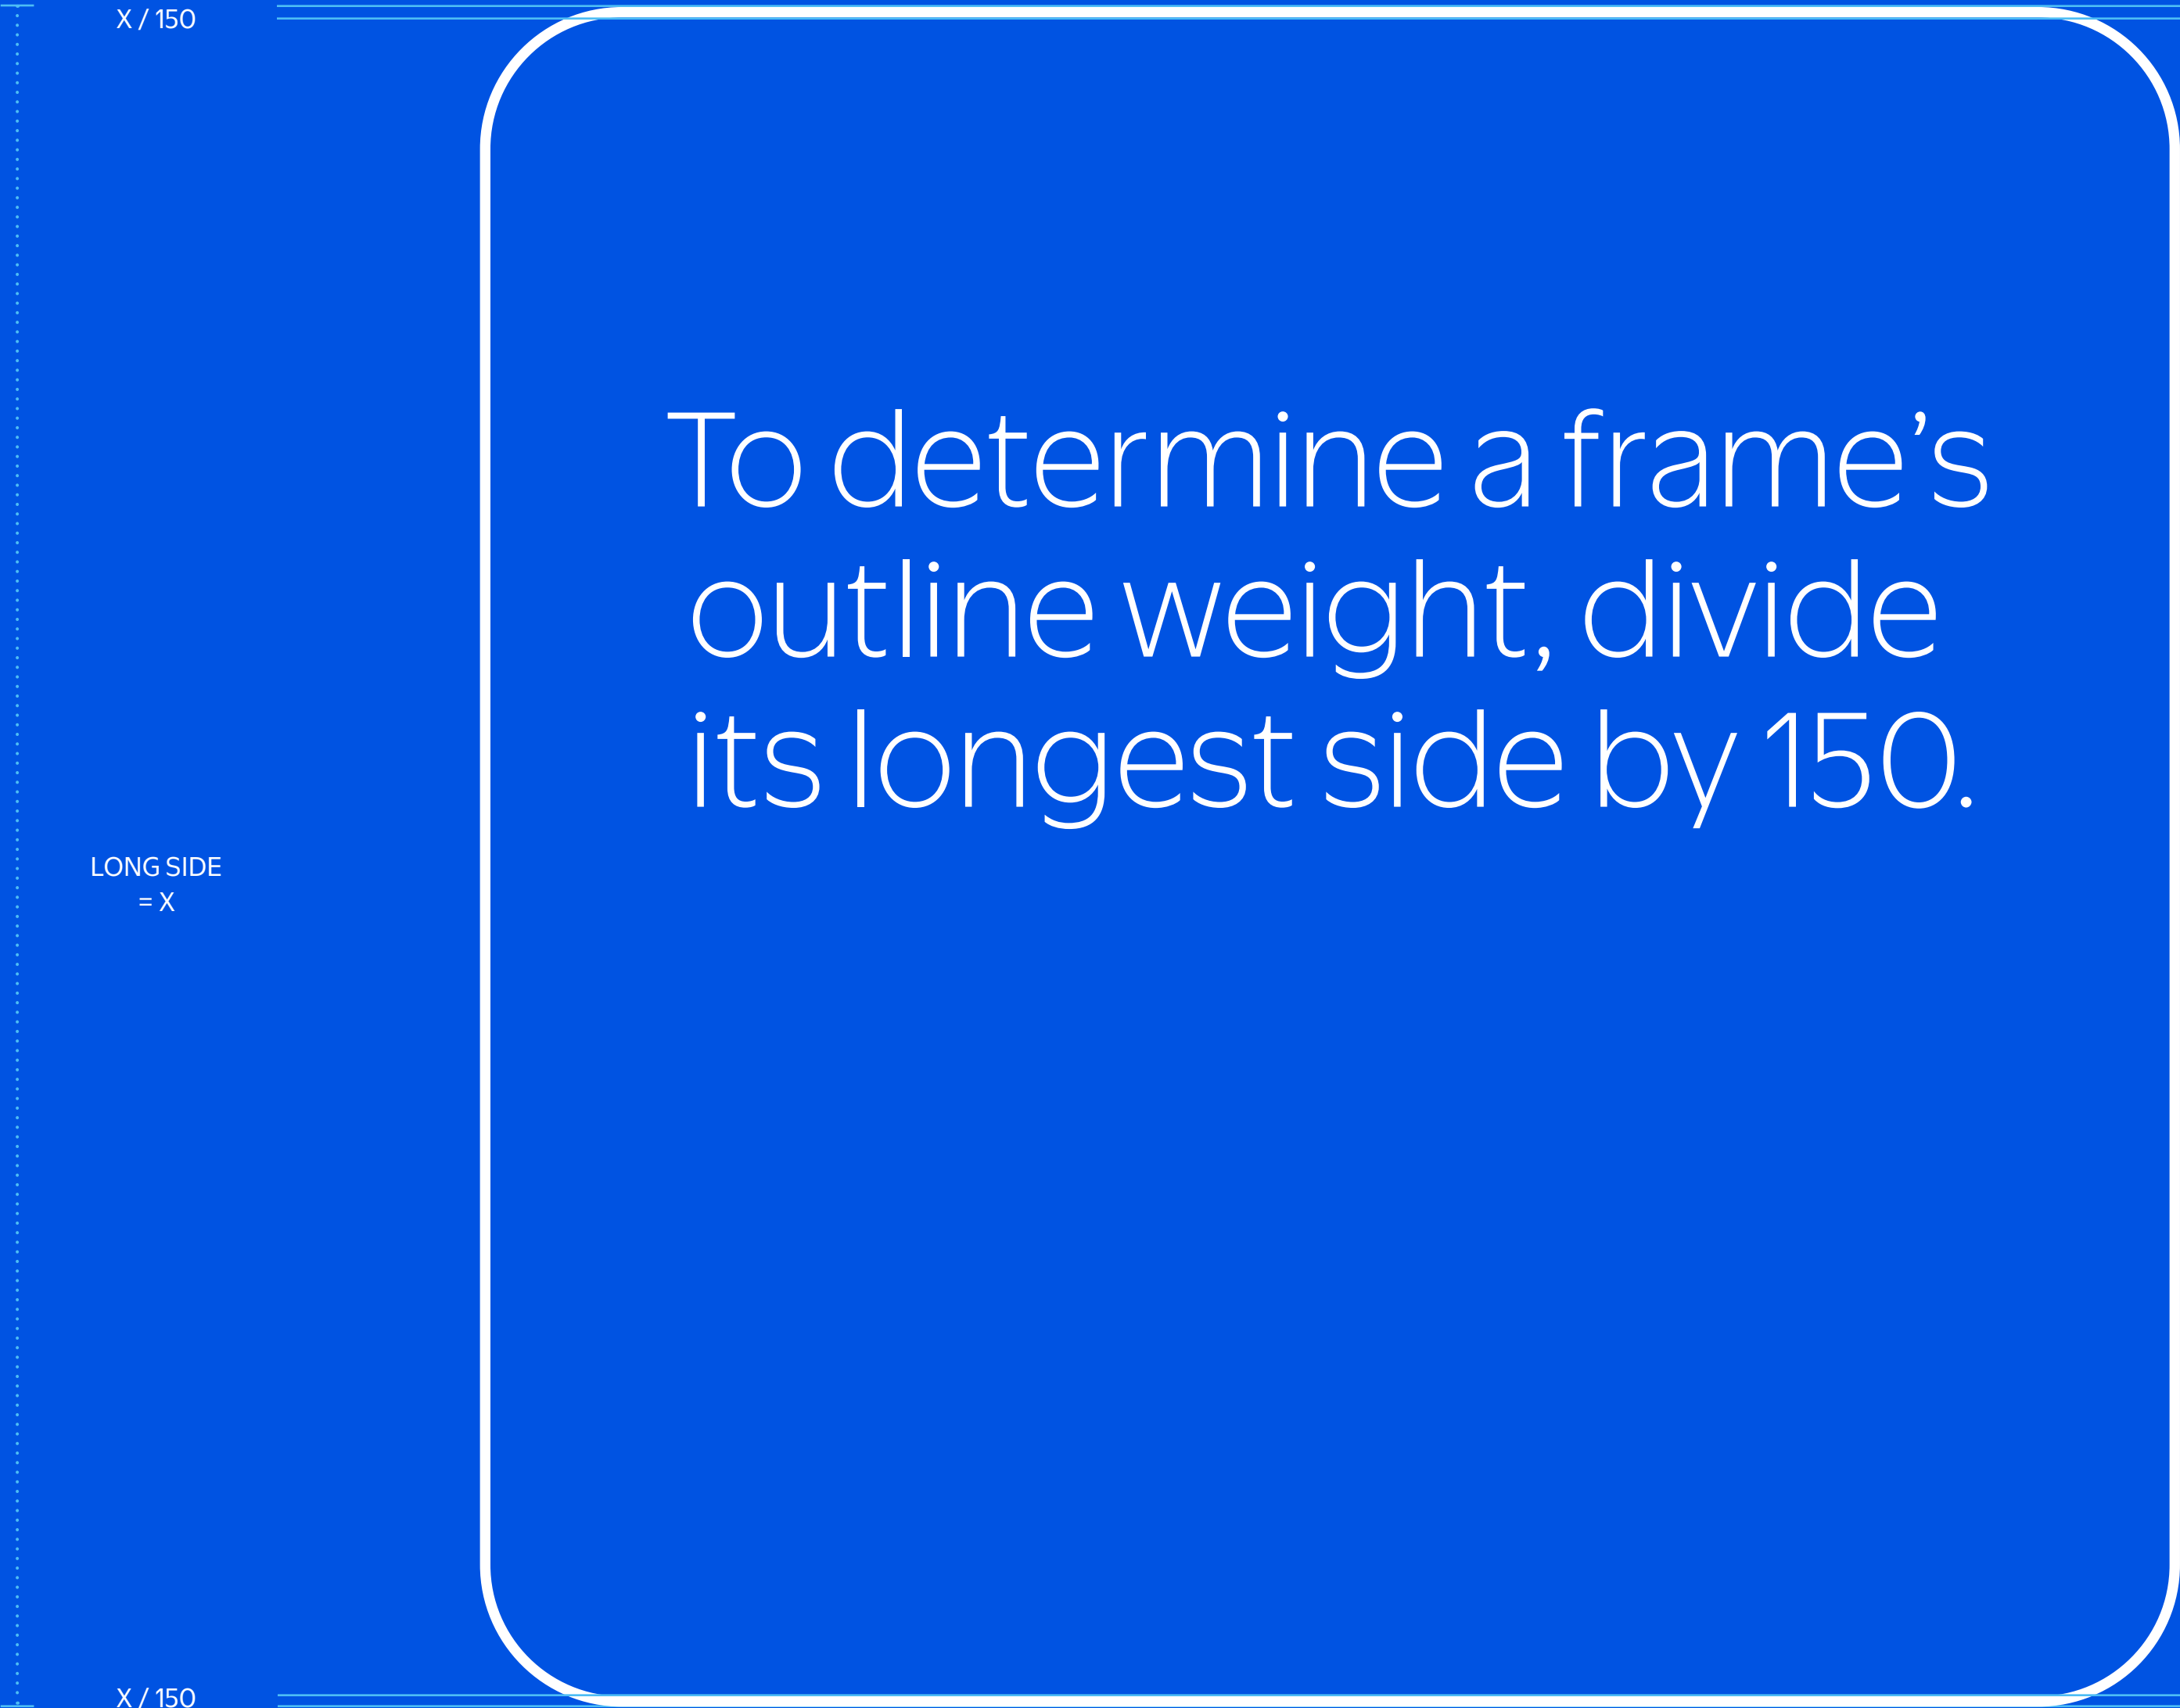

For standard 1920x1080 presentations, we always use a predetermined corner radius of 30px.

Outline Weight

To determine the correct outline weight for a frame, **divide its longest side by 150**. Depending on the size and proportion of your frame, this number may need to be adjusted for optical correctness (see page [217](#)).

For standard 1920x1080 presentations, we always use a predetermined stroke weight of 1pt.

Optical Radius Guide

After establishing a corner radius using our formula, check for optical correctness using the examples shown here. If your radius is too large or too small, adjust accordingly.

Too Small

Just Right

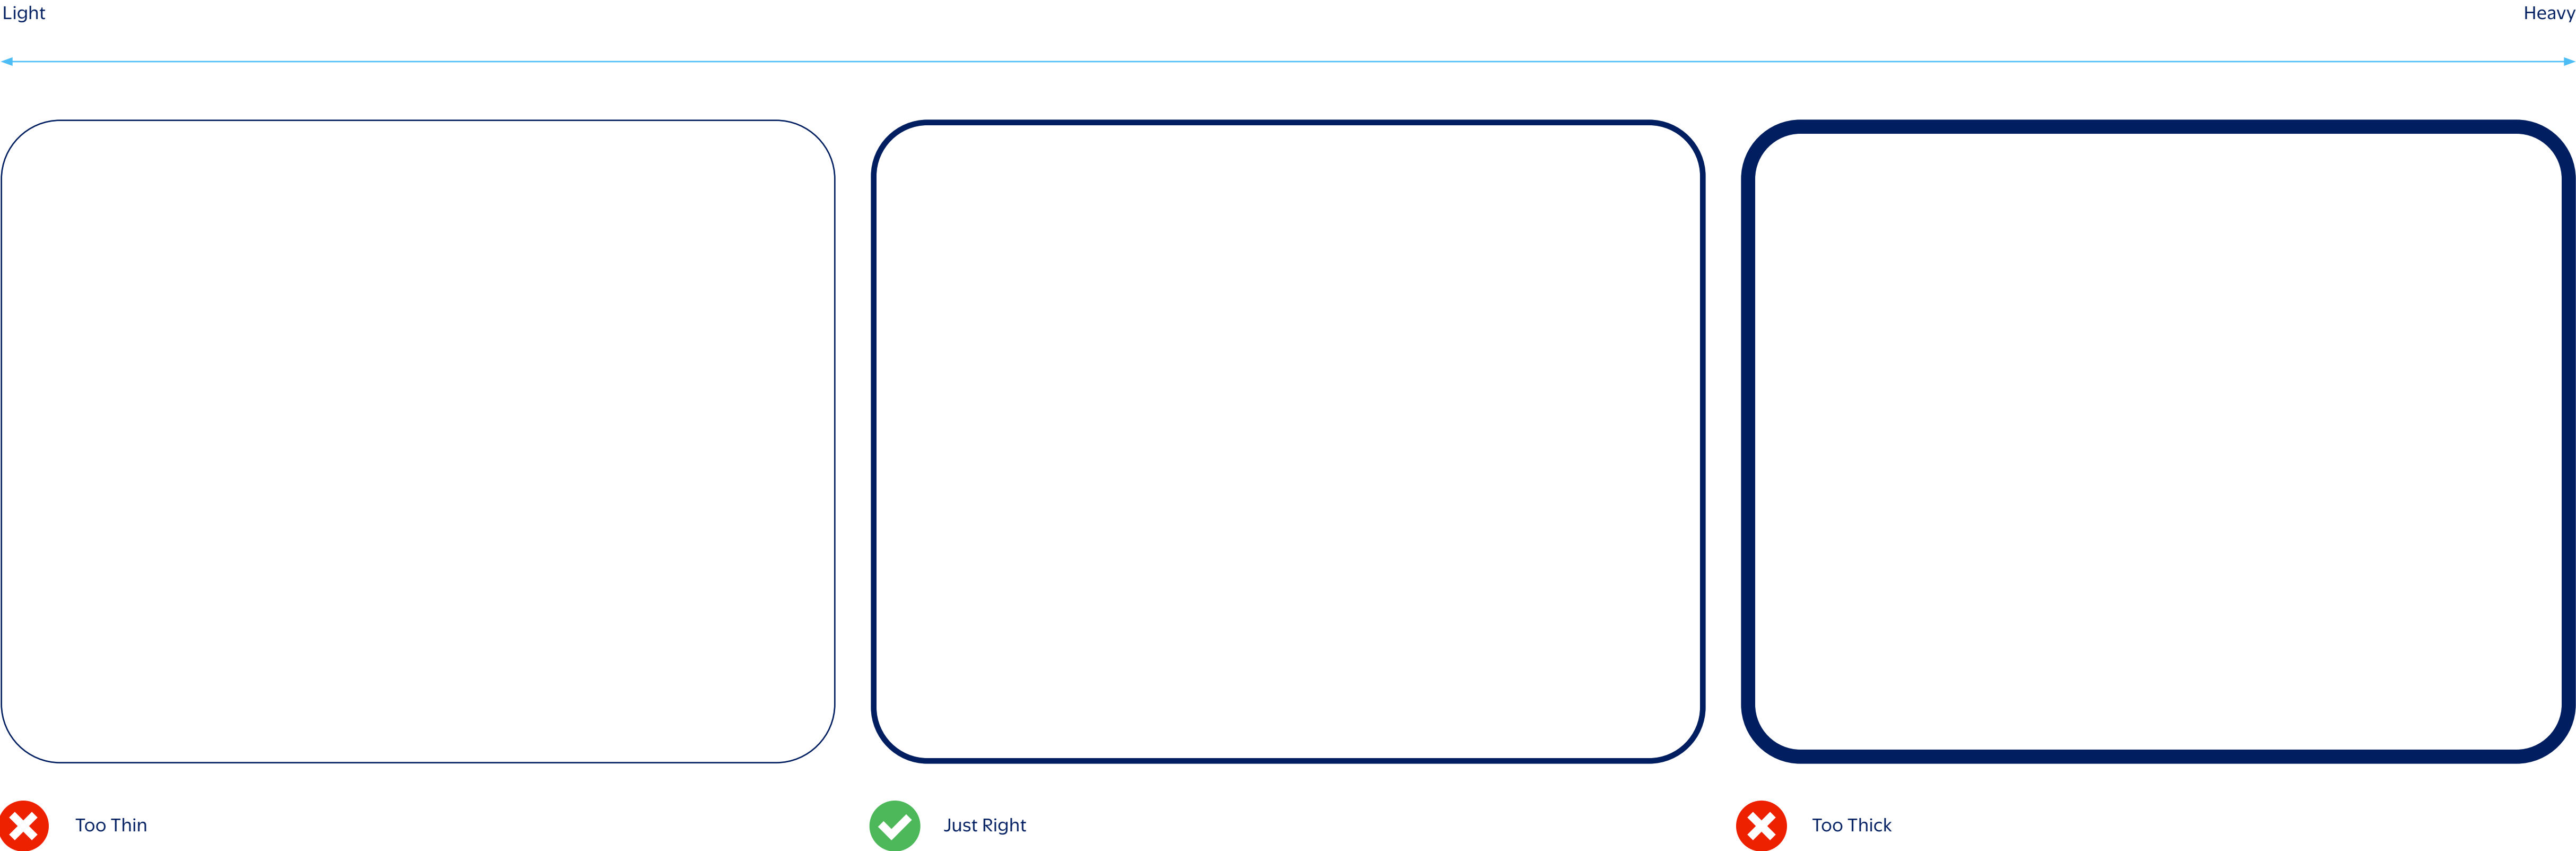

Too Large

Optical Outline Guide

After establishing outline weight using our formula, check for optical correctness using the examples shown here. If your weight is too light or too heavy, adjust accordingly.

Frame Behaviors

Our frames are designed to interact with photography and footage by embodying three distinct behaviors:

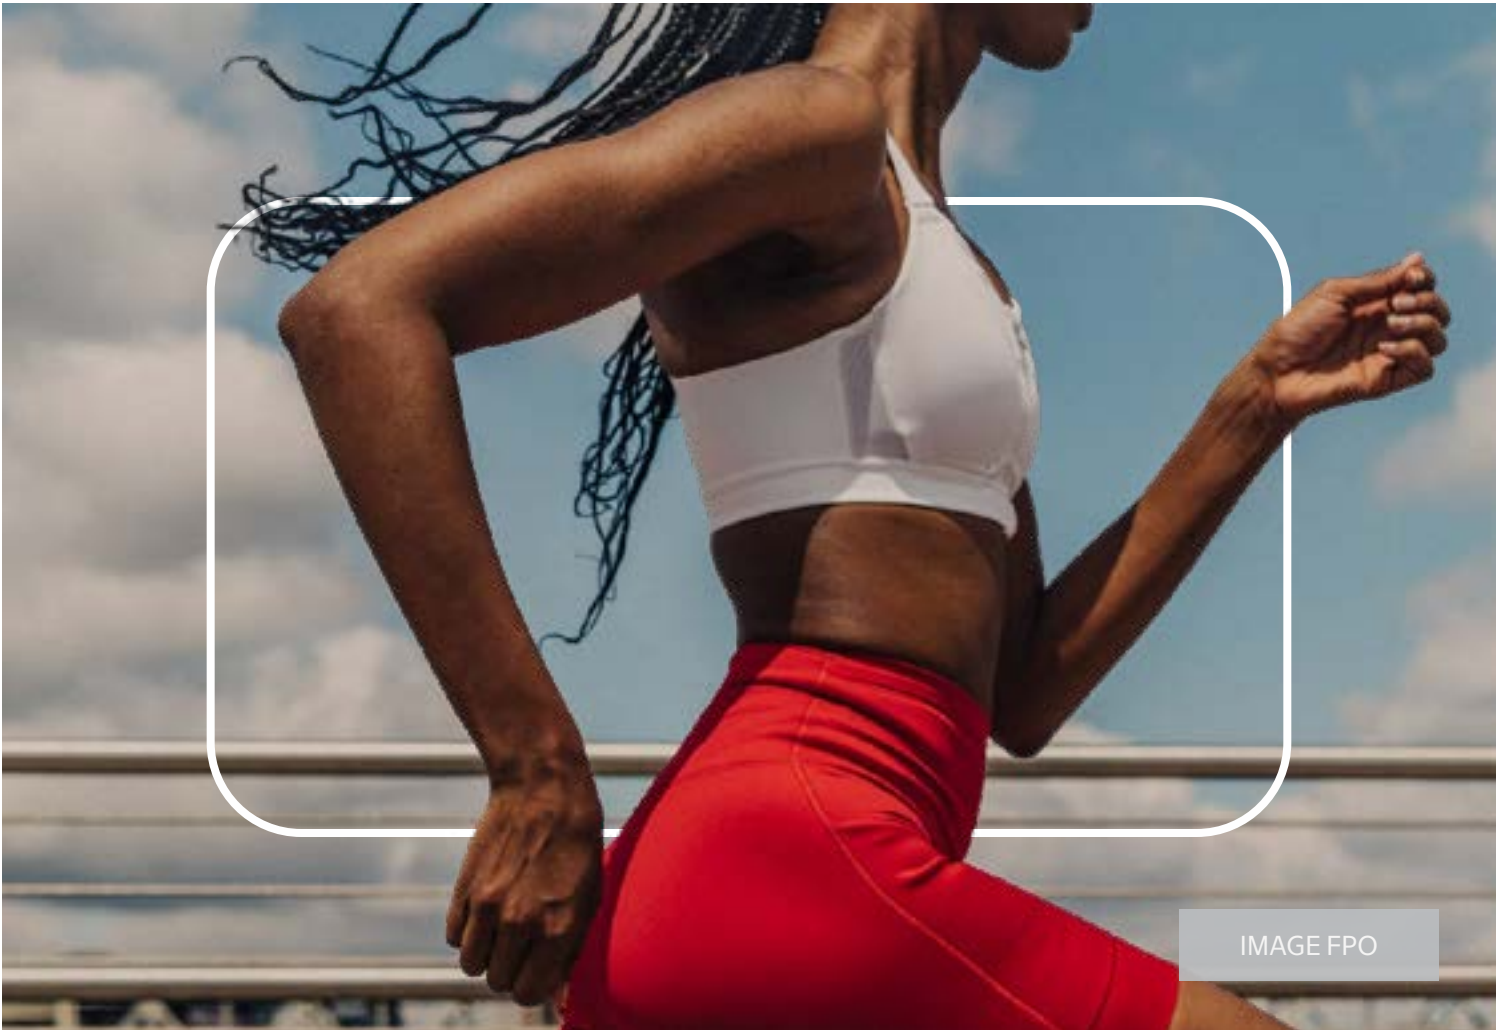

1

Windows hold photography or footage.

2

Tiles help ground isolated products.

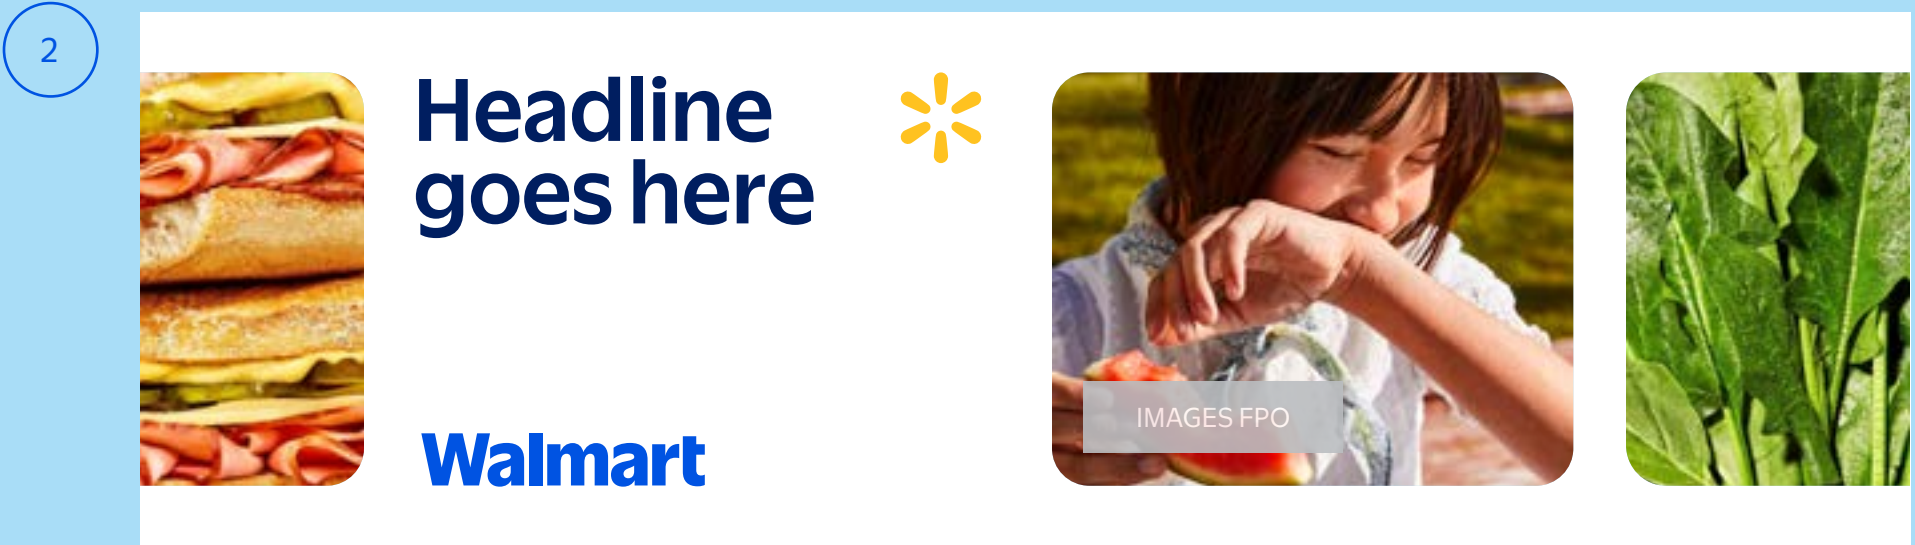

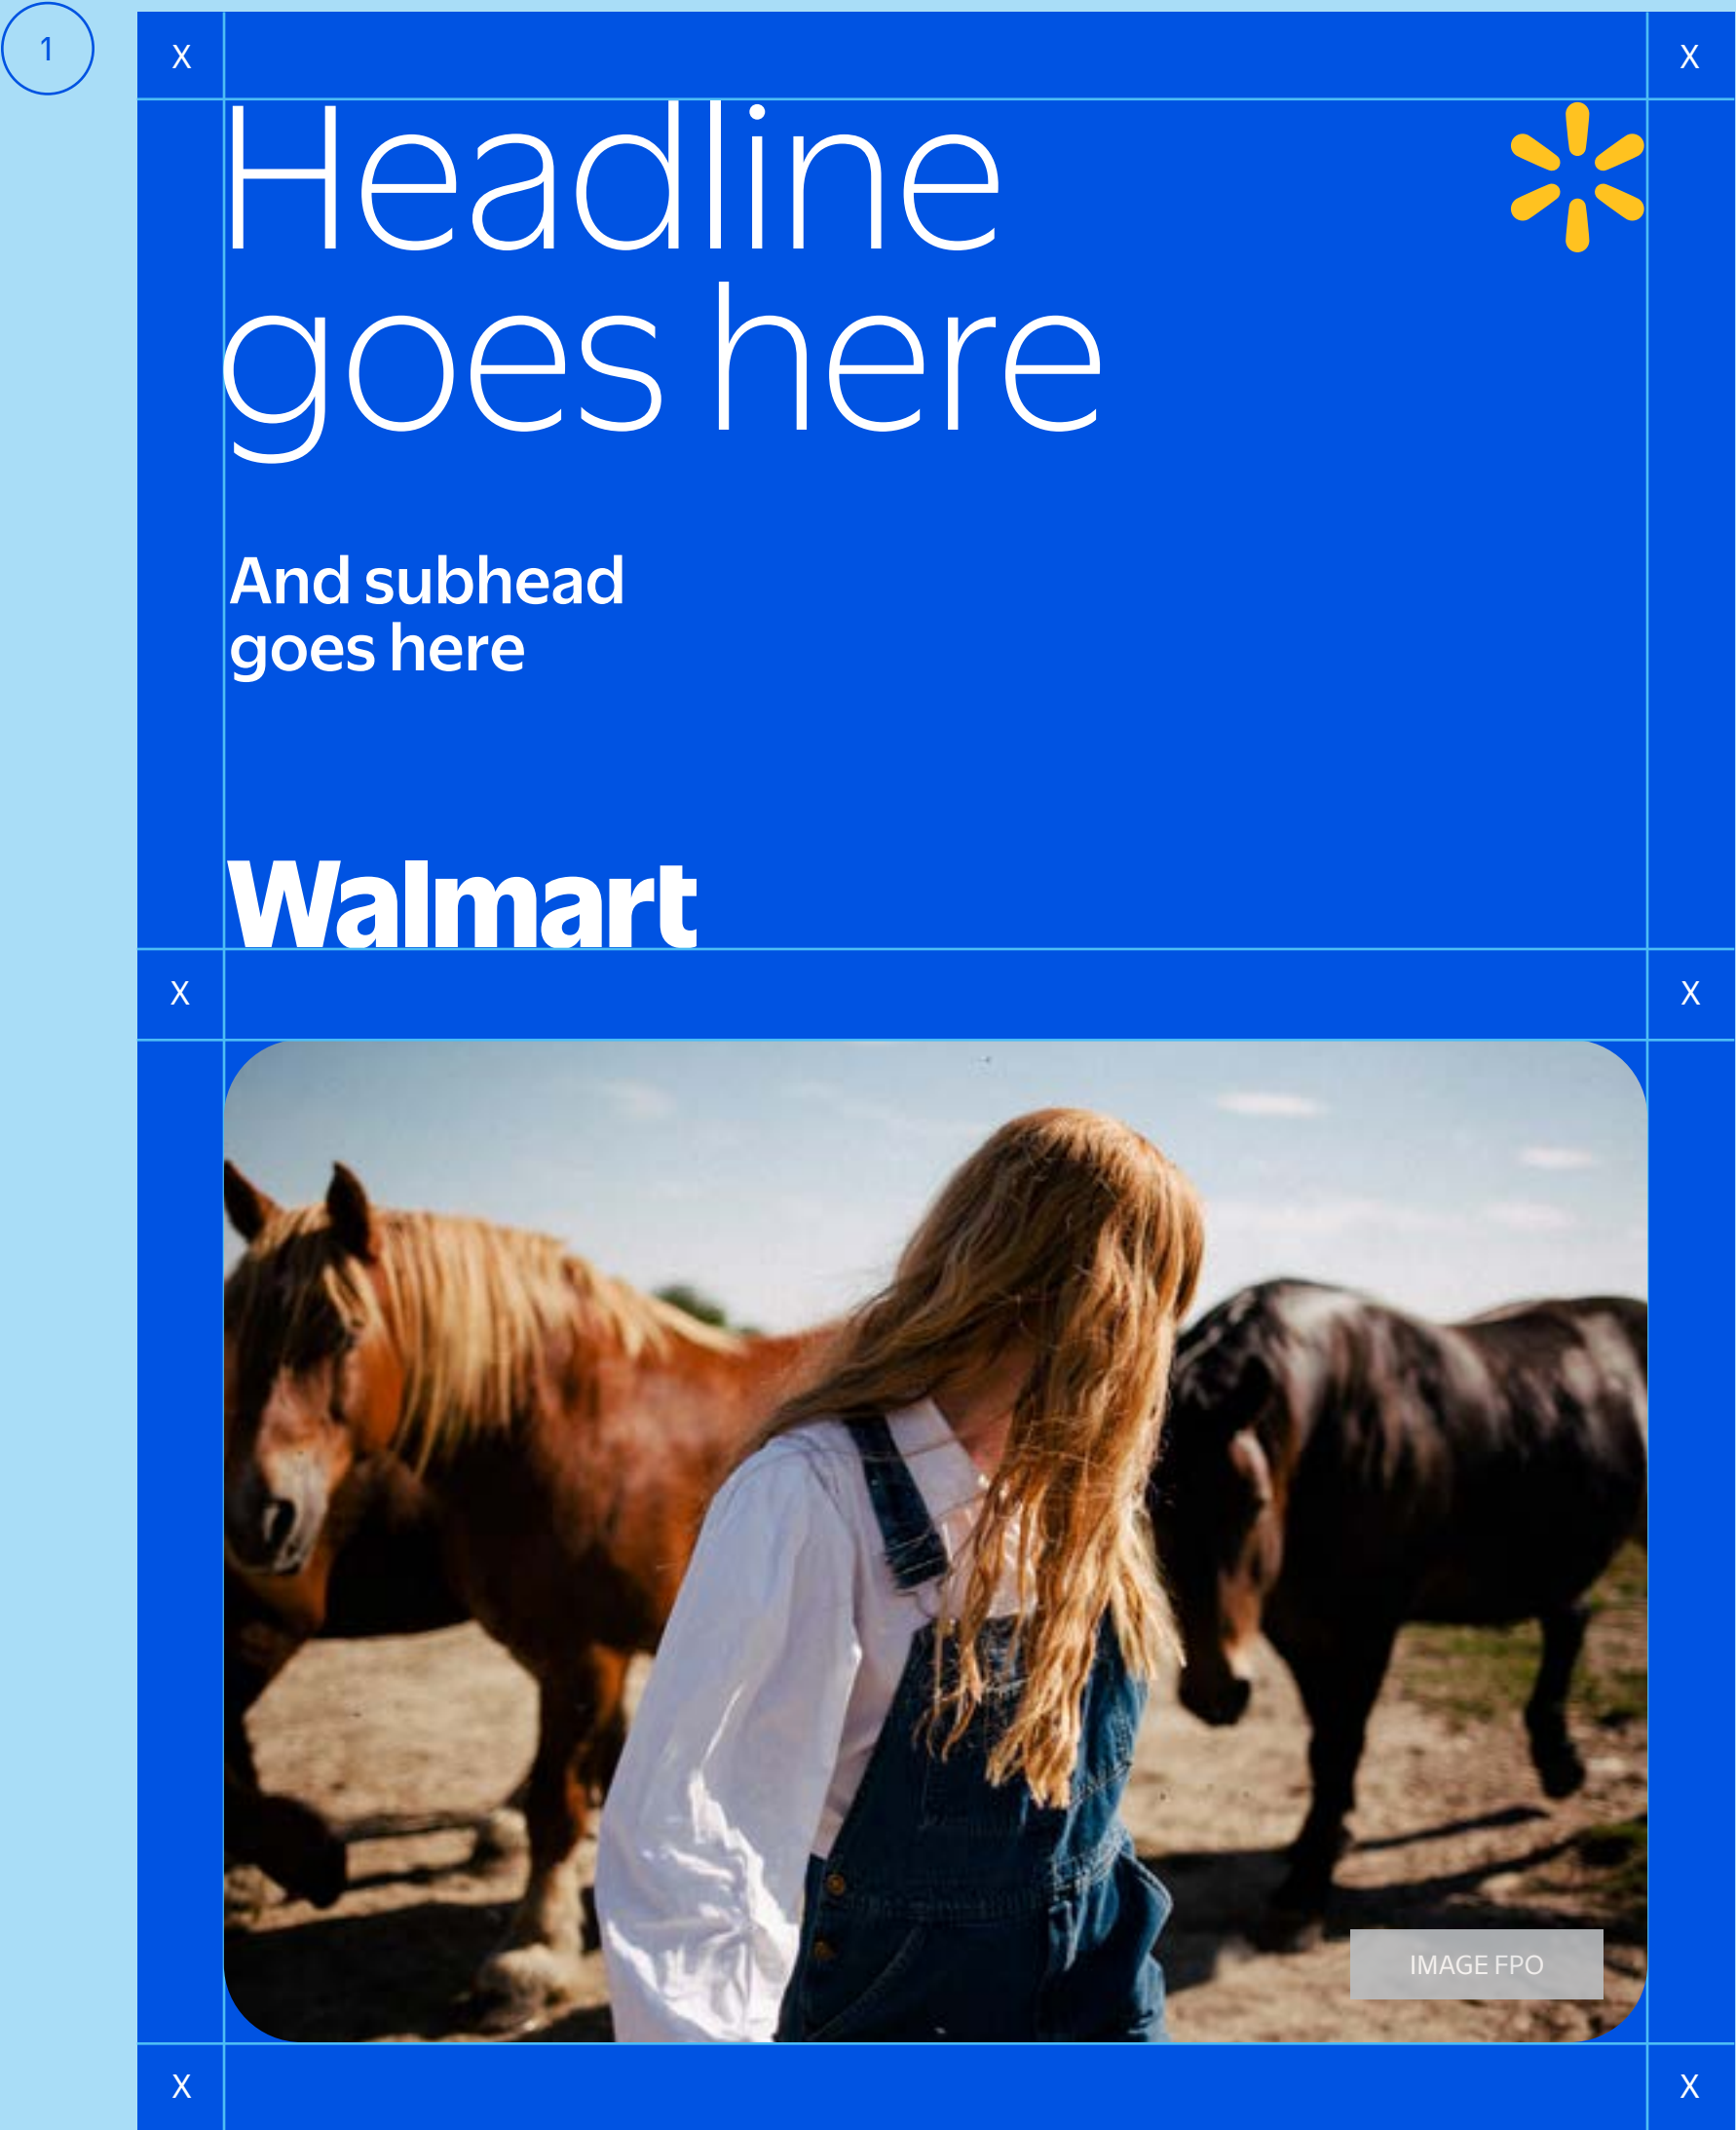

3

Outlines emphasize a focal point.

Windows

We use windows to hold photography and footage. A max of **three windows** can be used per static layout to keep our message concise and avoid overcrowding. Images should be assembled with a common theme or message. Align our windows neatly to our grid. Wherever possible, they should stretch the full height or width between margins.

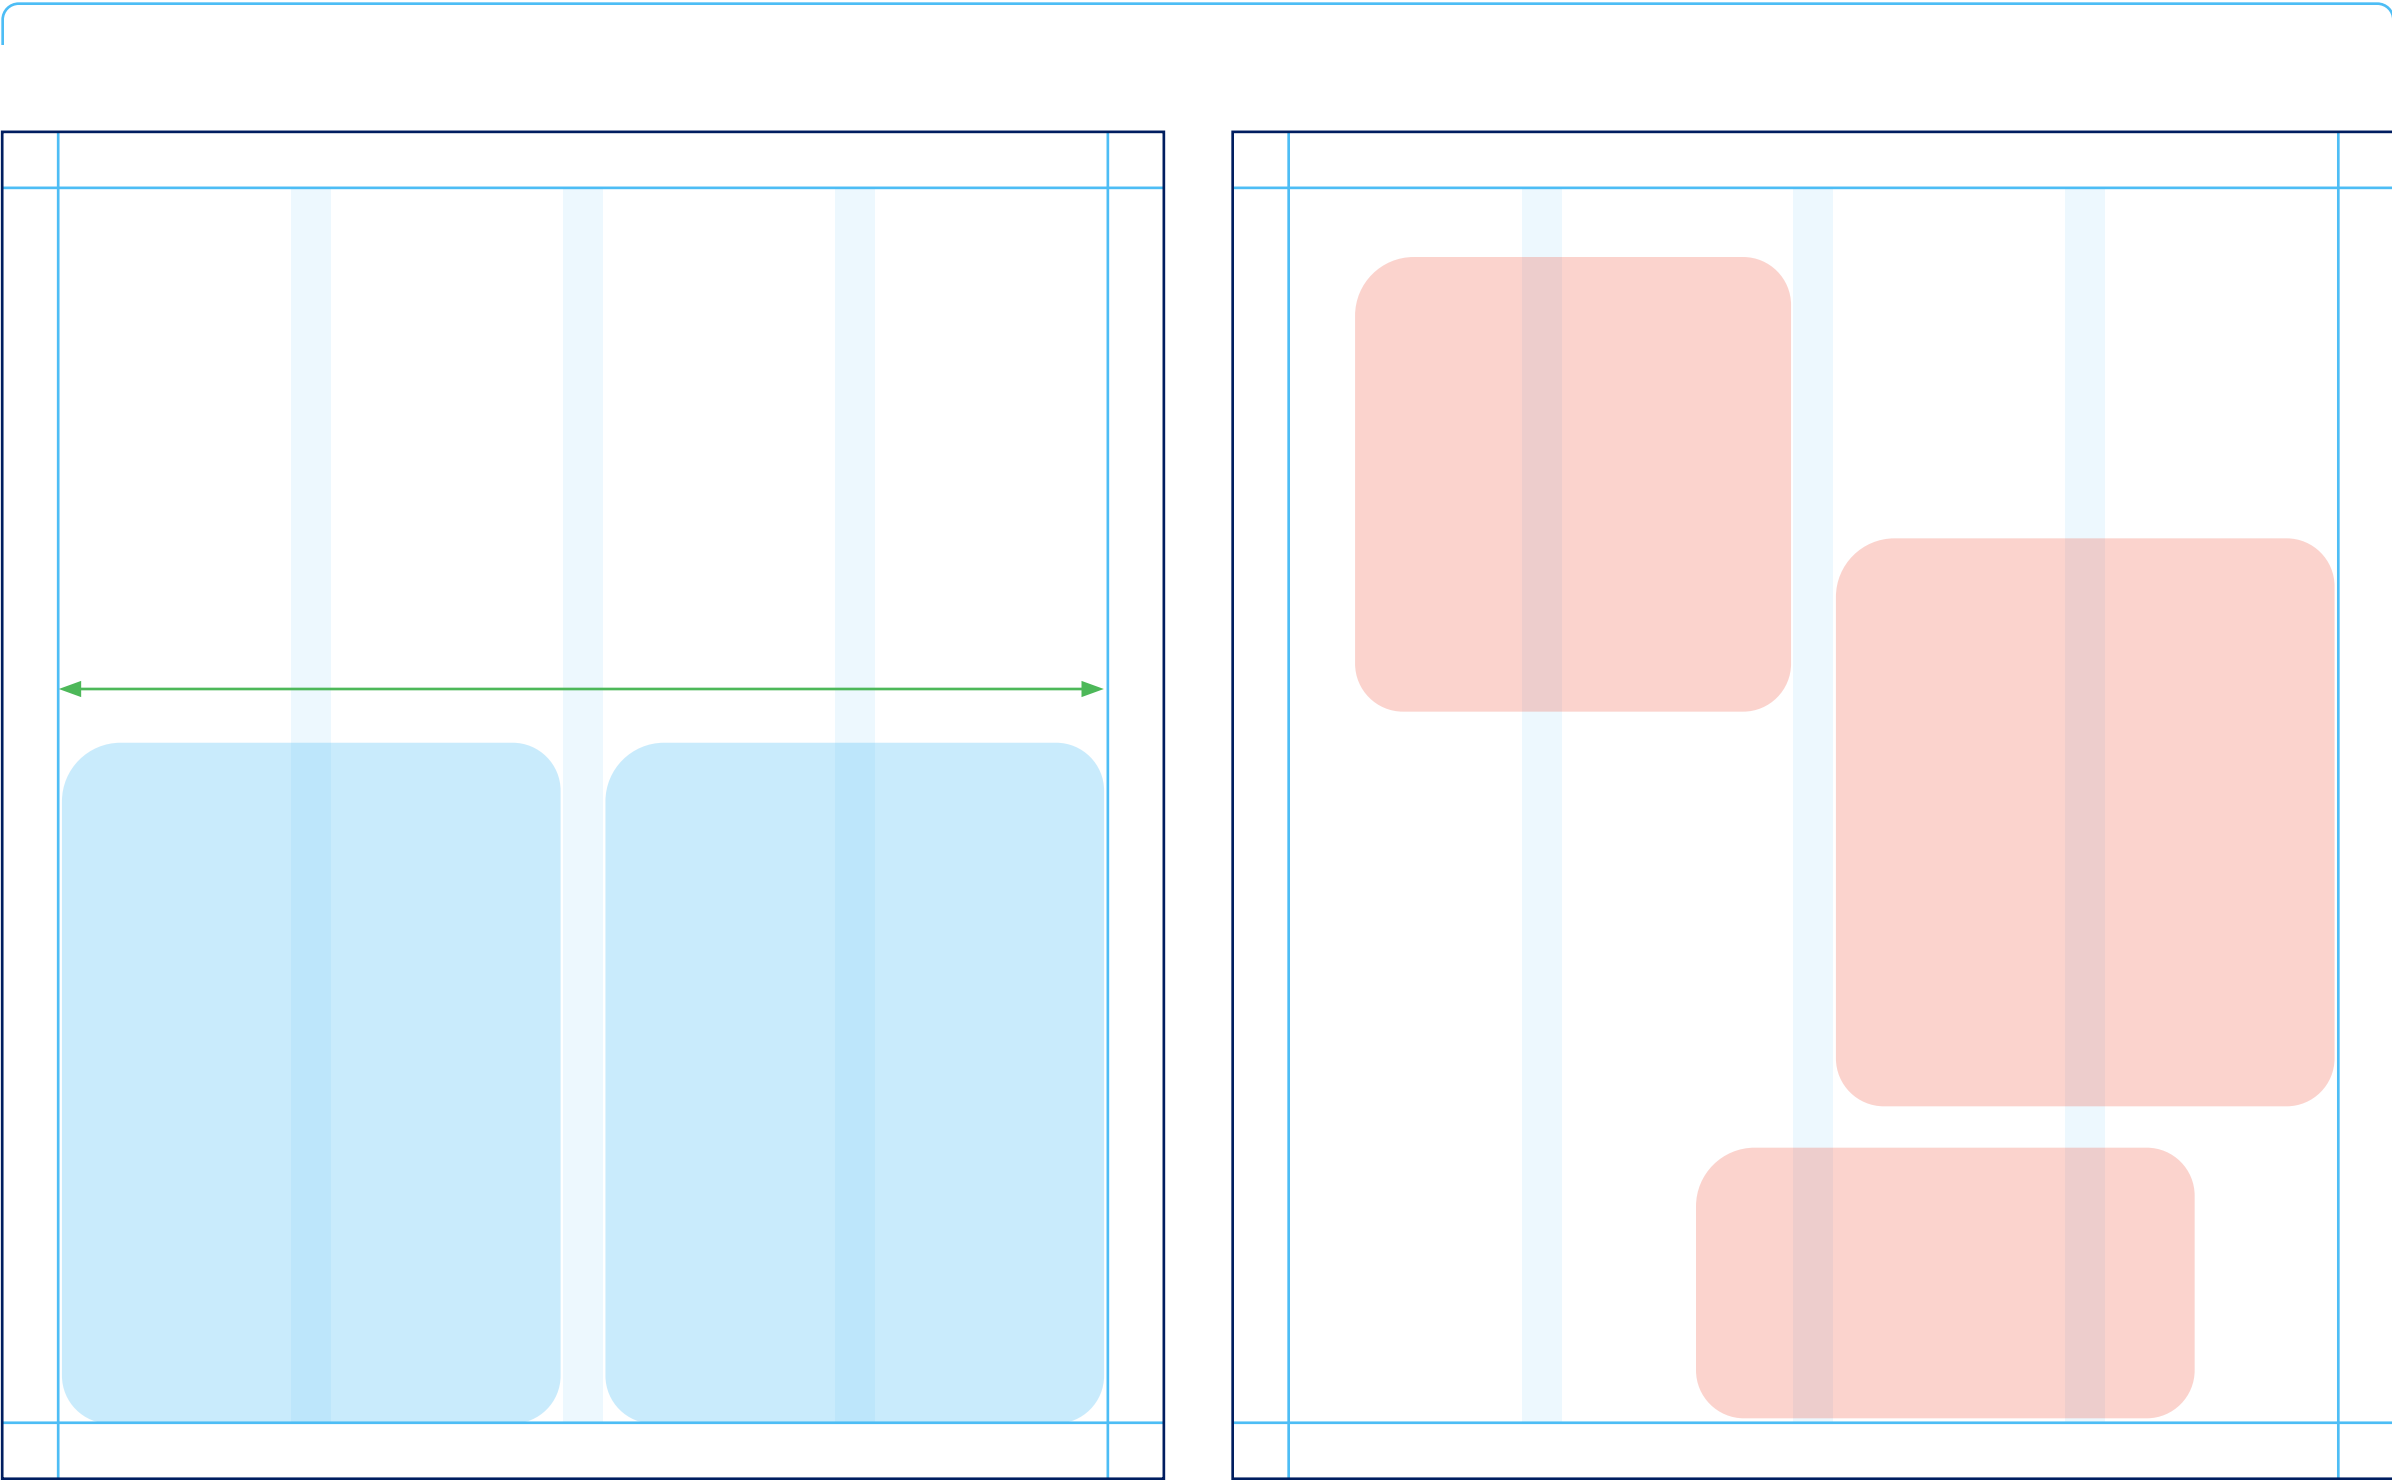

- 1 Always leave clear space equal to our margin between frames and surrounding content.
- 2 Windows can bleed off one or two edges to mimic a scrolling motion. Edges must opposite sides.
- 3 Up to **three windows** can be used in a single static layout—no more.

Window Tips

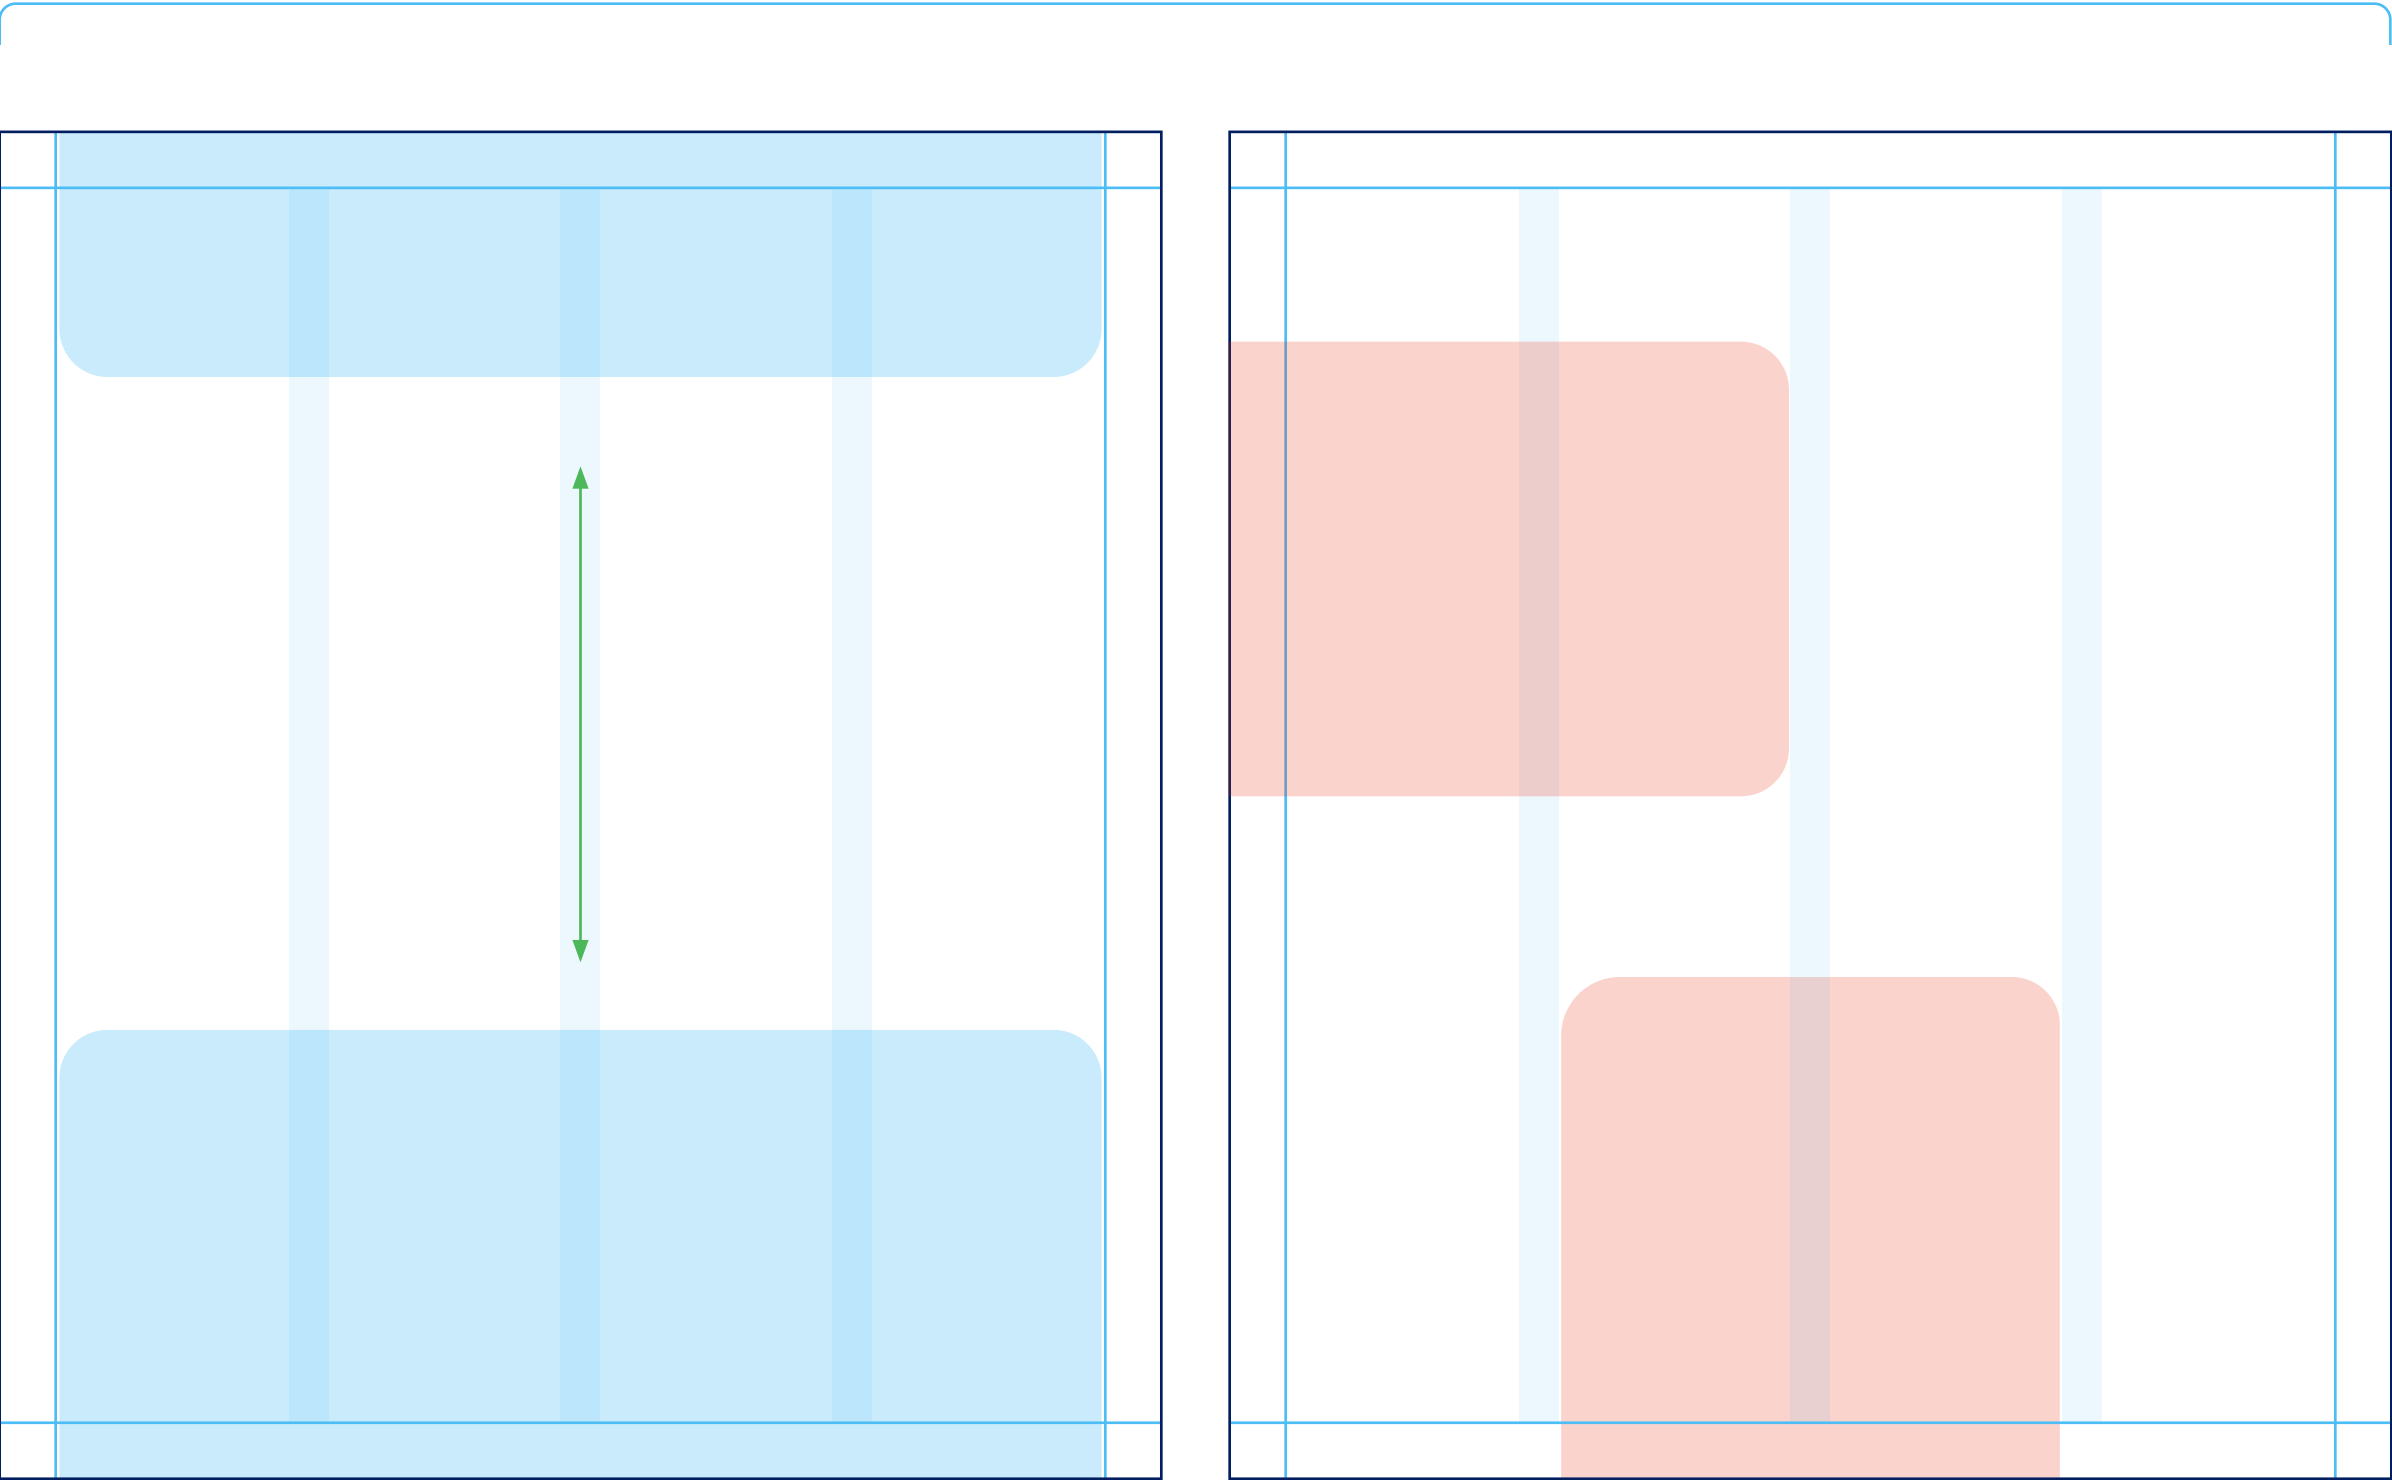

When using outlines in layout, always follow these tips for consistent application:

Alignment

-  **Do** align windows into neat, tidy blocks that occupy the full width or height of a layout.
-  **Don't** apply frames in a way that feels haphazard, scattered, or misaligned.

Cropping

-  **Don't** crop windows off opposite edges of a layout to mimic scrolling or swiping.
-  **Don't** crop windows off adjacent layout edges.

Tiles

Tiles mimic the aesthetic and behavior of a digital shopping experience. Up to **five tiles** can be used per static asset if they are neatly aligned and uniform in size.

More tiles can be used in motion. Tiles are applied over White backgrounds, to feel more digitally-native while allowing for wide variety of tile colors.

- 1 Tiles can float in the center of a layout when featuring a single product.
- 2 Up to five tiles can be used in a single static layout—keep them tidy and uniform in size.
- 3 A single tile can be combined with a single window, where appropriate.

IMAGE FPO

Tile Tips

- 1

A product name or price can be set inside a tile, aligned to an interior corner. Leave generous padding, roughly equal to the margin of the layout. Text must be in Bentonville Blue or White.
- 2

Products are shot straight-on or overhead, resting on (or floating above) a surface. Always include natural shadows for grounding and depth.
- 3

A product may extend past the edge of its tile, where appropriate. Products should occupy the same visual space, regardless of actual size.
- 4

Choose tile colors to complement products or to represent specific seasonal moments. Maintain sufficient contrast between a product and its background.

Evergreen Colors

These are our preferred tile colors, used regardless of season or category.

Seasonal Colors

Example Only

For a moment like “Mother’s Day”, choose tile colors from that occasion’s specified seasonal palette.

Outlines

Outlines are used over lifestyle photography or footage to focus attention on a key product or moment. **Only one outline can be used per layout** They can't be applied with other frames or frame behaviors.

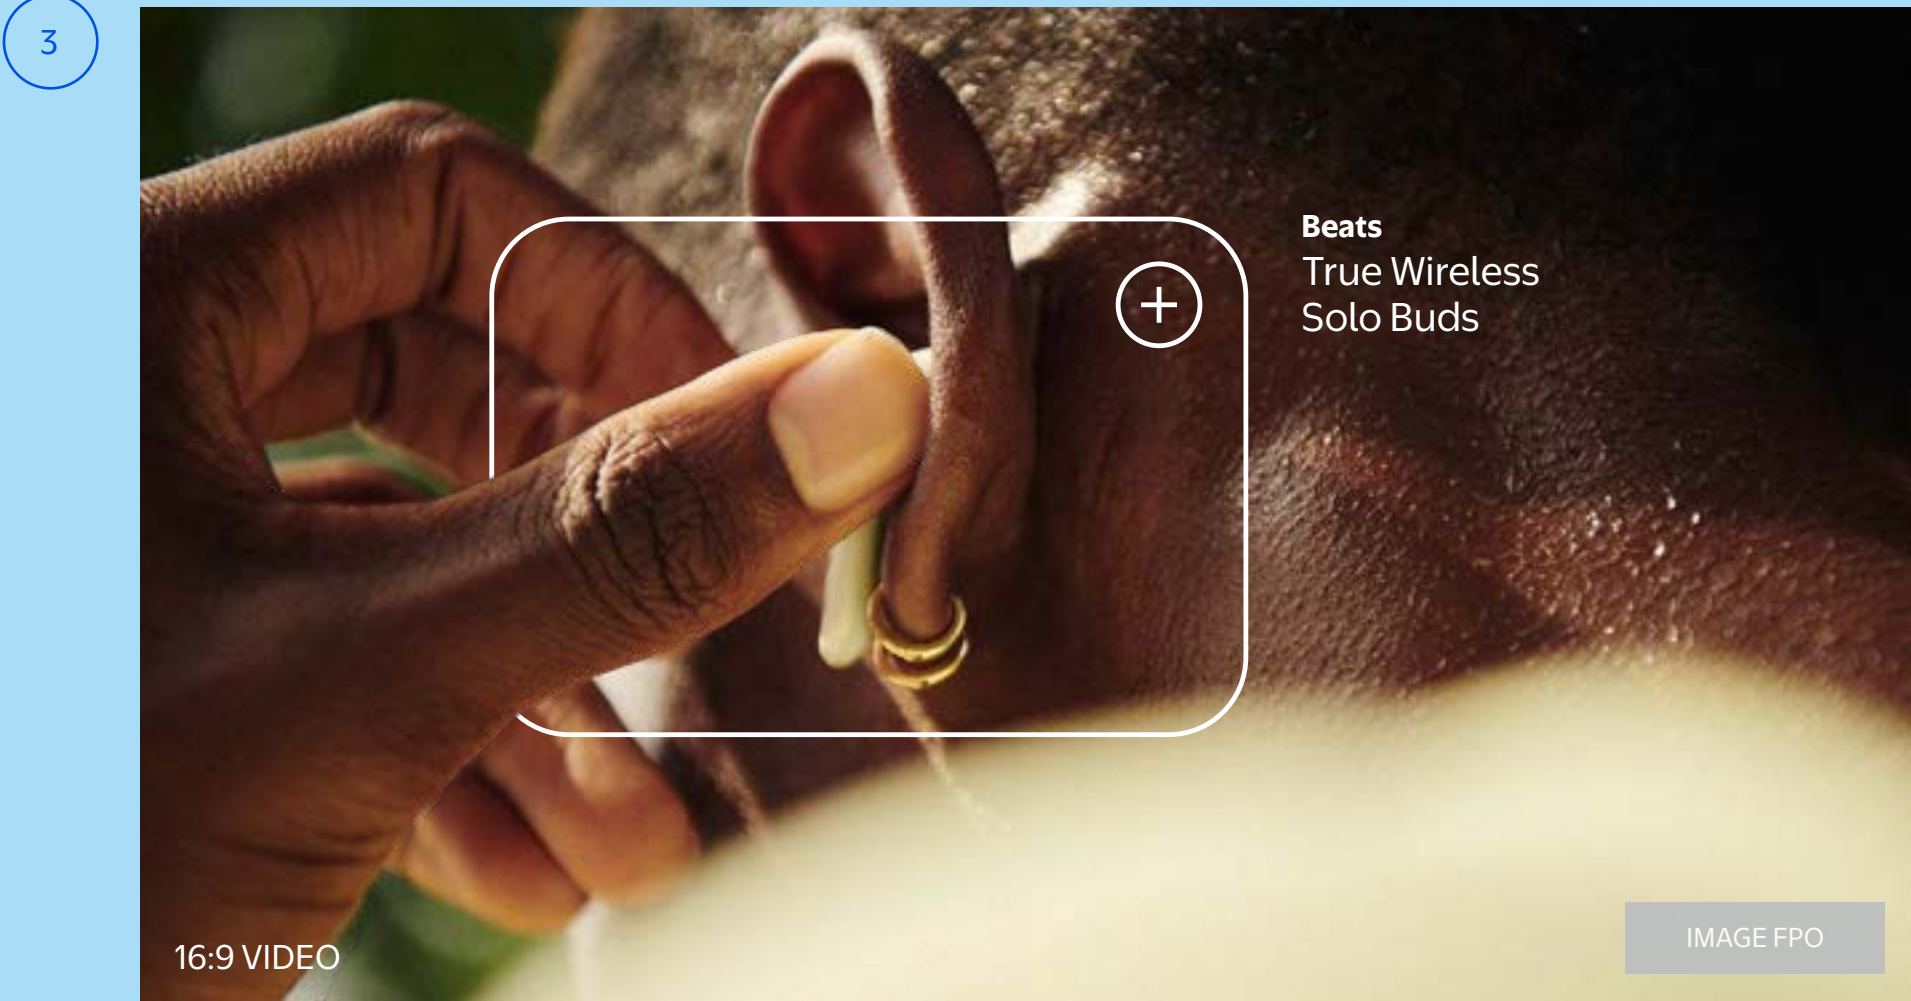

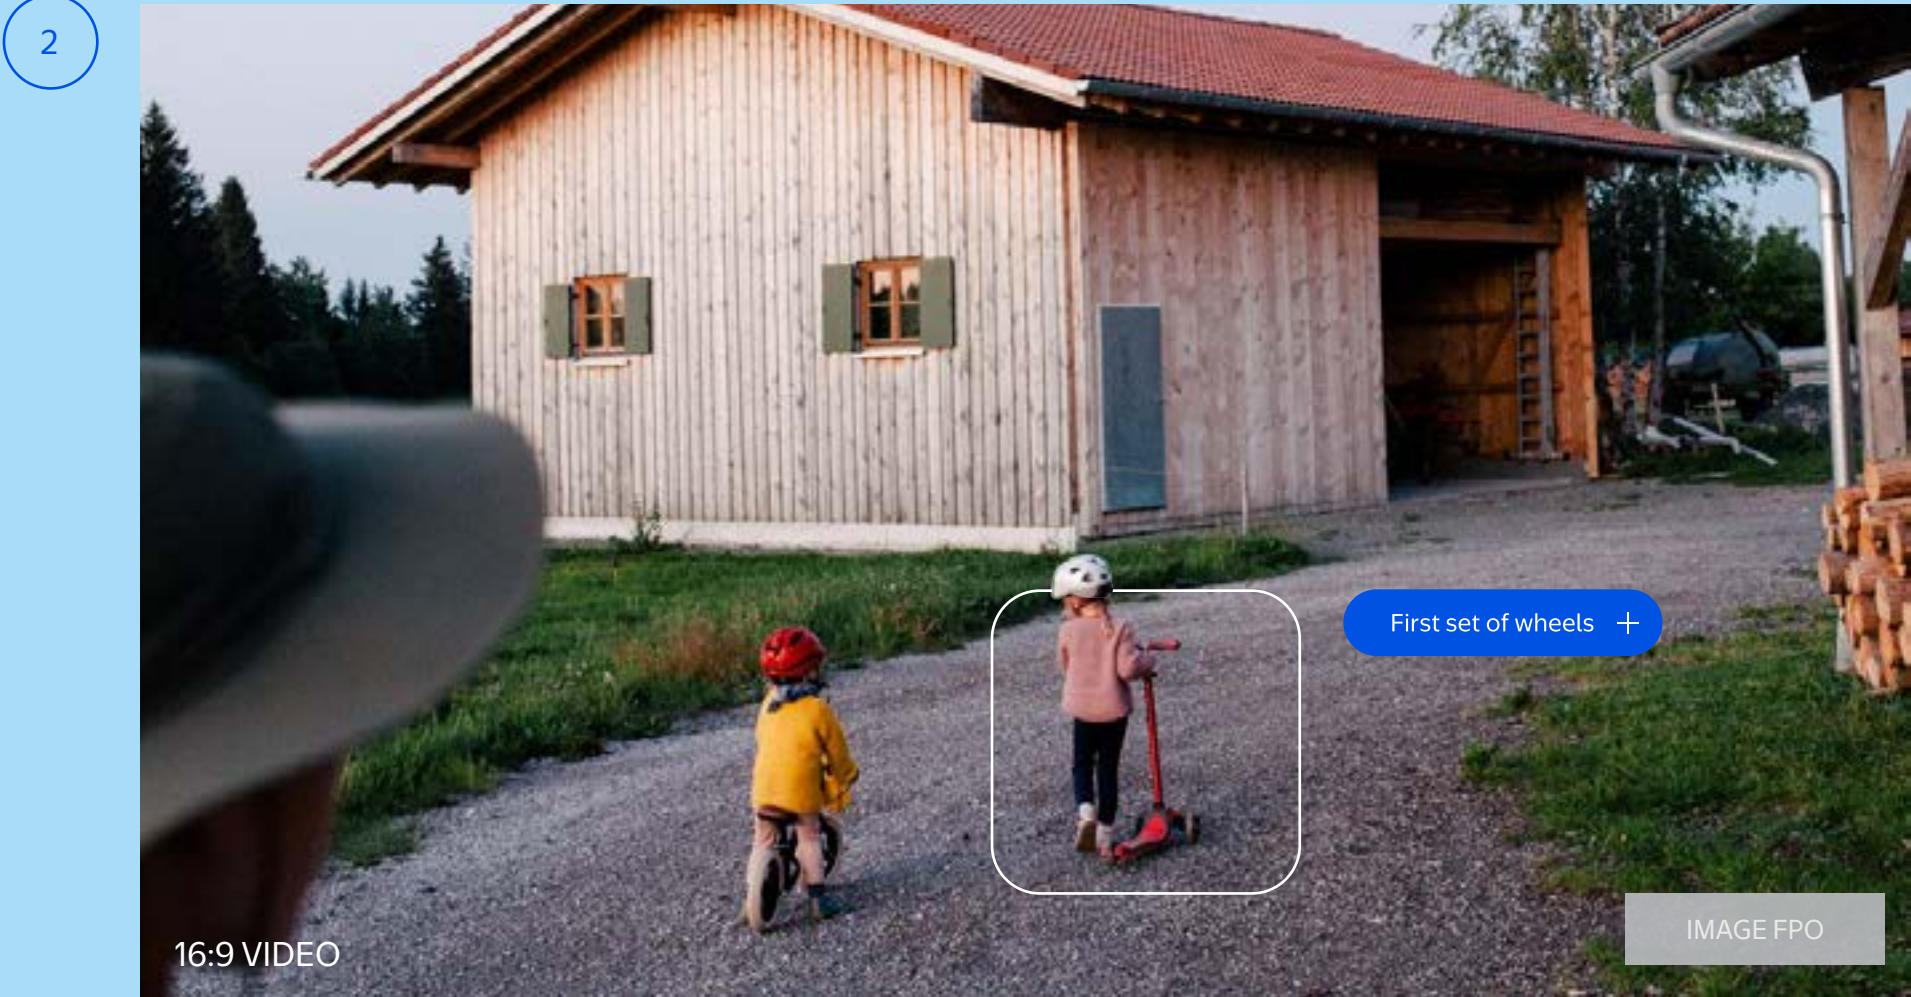

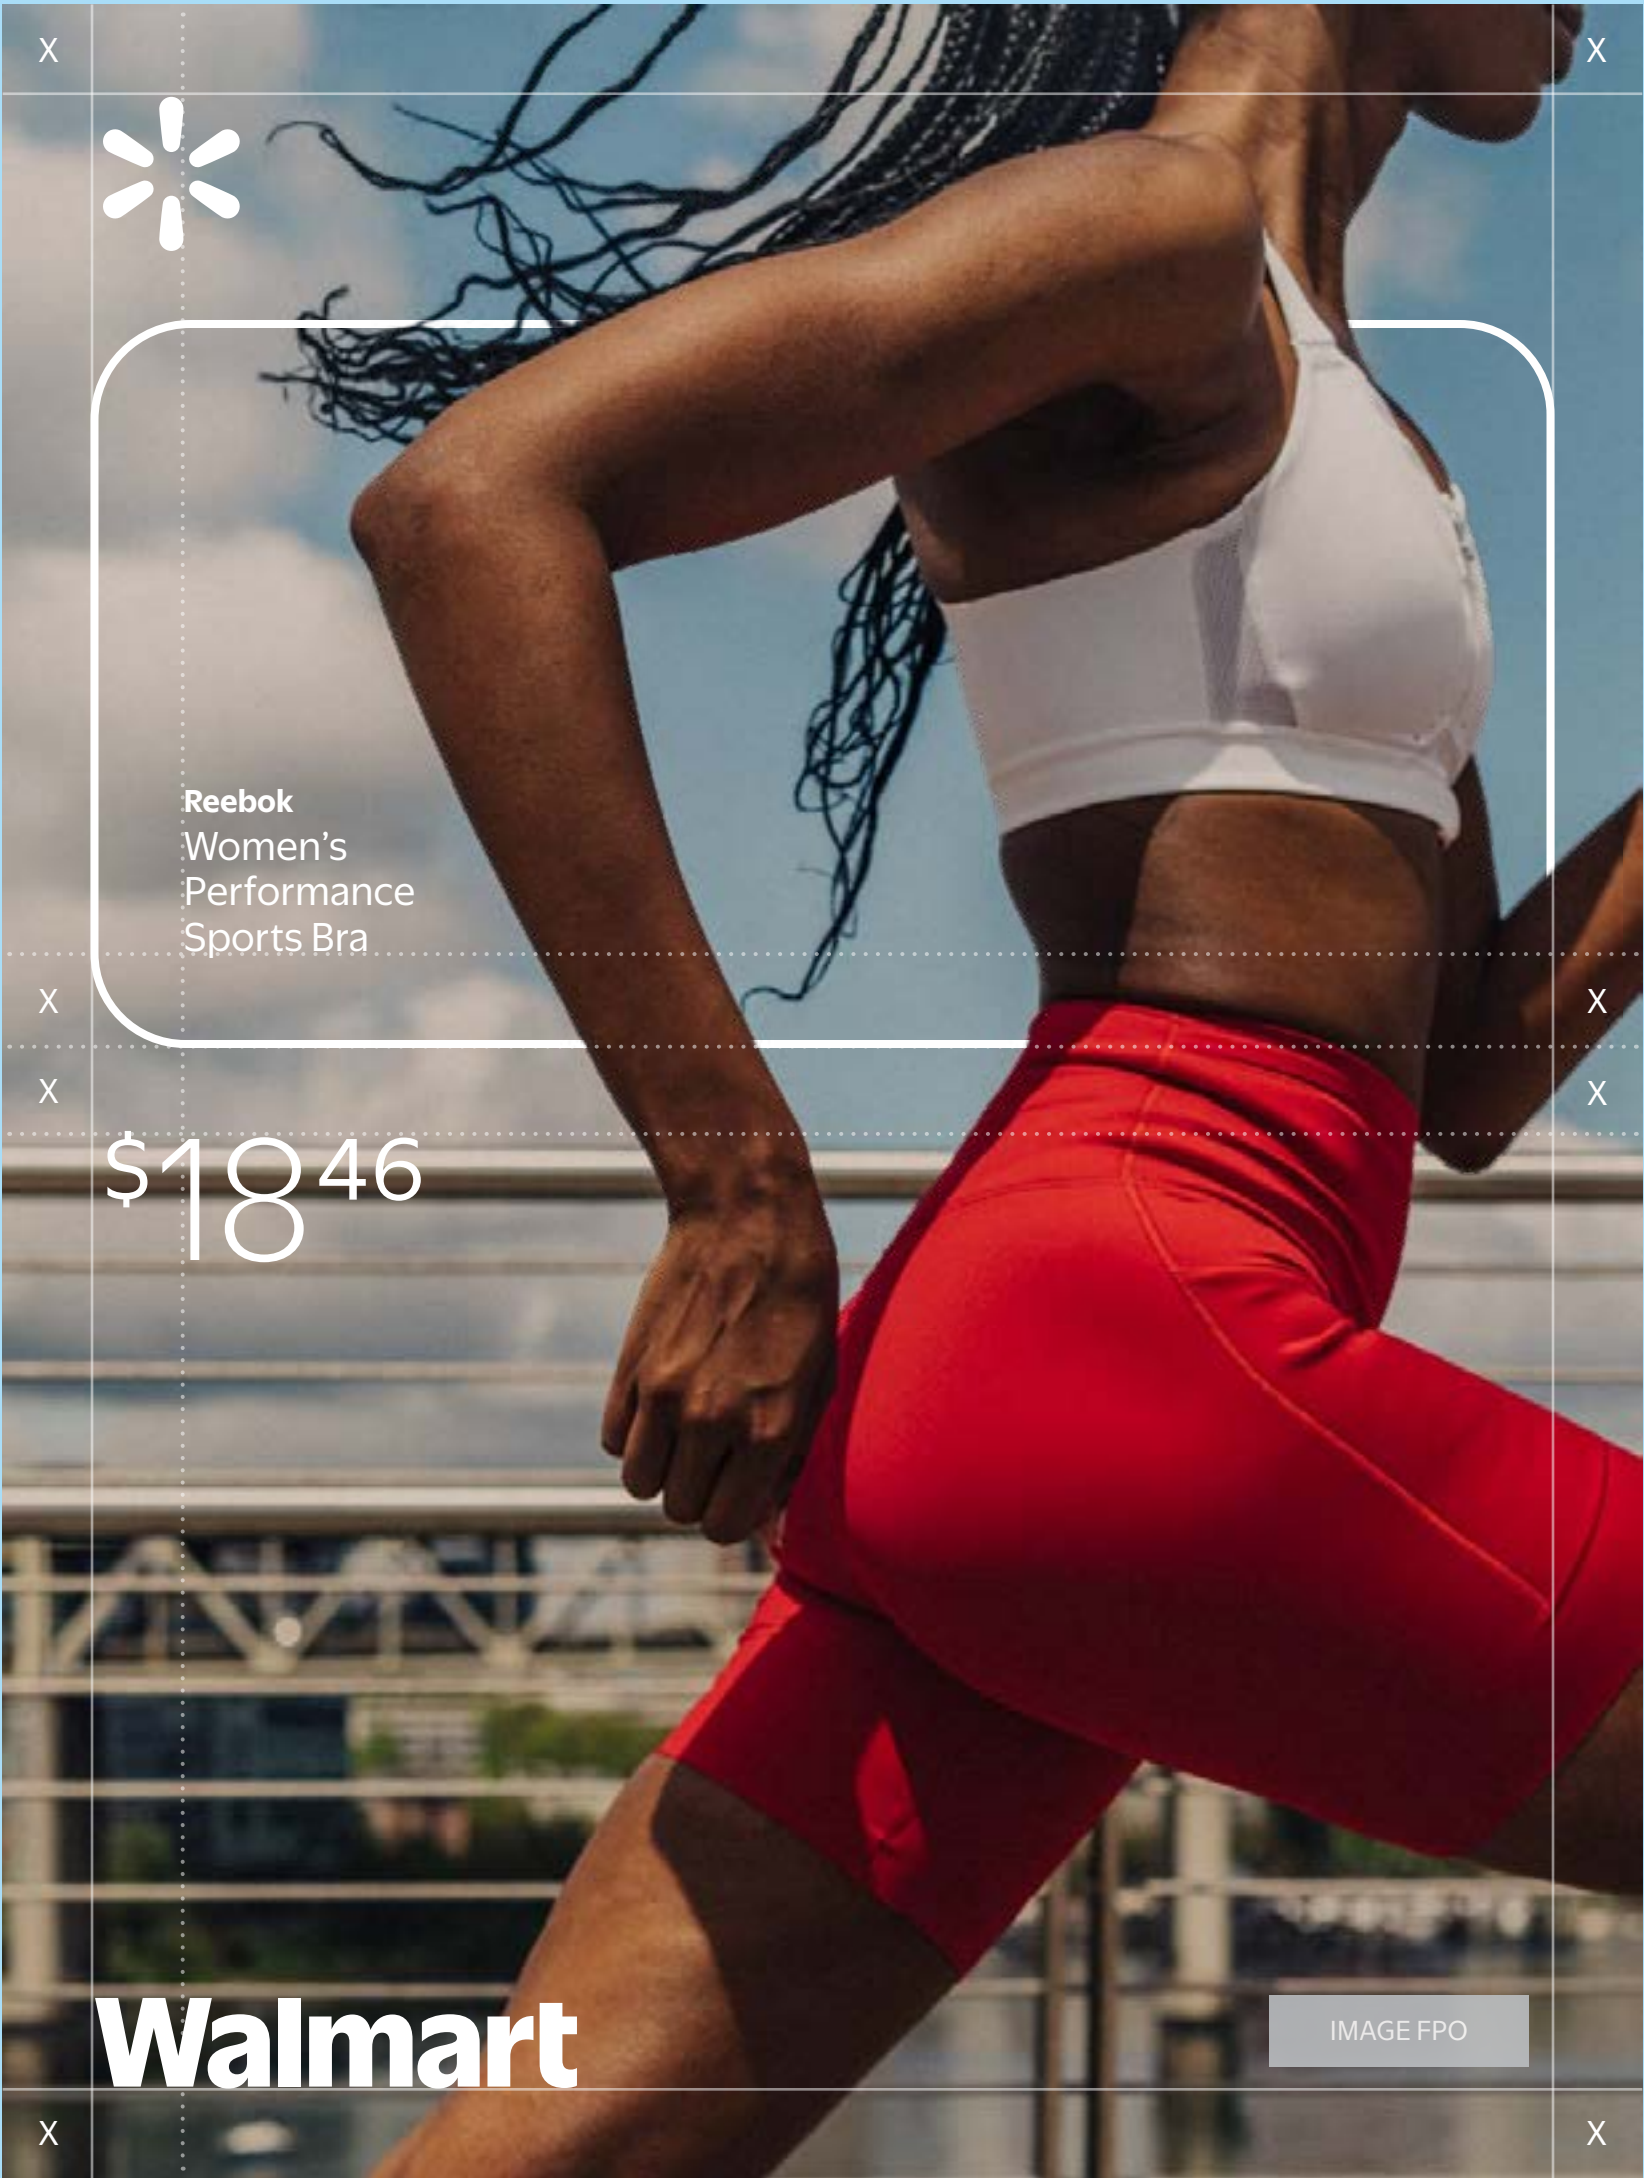

Outlines are particularly effective in motion, as shown in examples 2 and 3. They are often used with price lockups, product names, or buttons.

- 1

When aligning text to an outline, always leave clear space equal to our margin.
- 2

Outlines may be flexibly positioned to best highlight product within a scene.
- 3

An outline may interact with the subject of its focus, for added depth and dynamism.

Outline Tips

When using outlines in layout, always follow these tips for consistent application:

Color

 **Do** apply frames in White or Bentonville Blue to match text.

 **Don't** apply frames in any other colors.

Interaction

 **Do** allow frames to interact with subjects or products.

 **Don't** awkwardly overlap subjects or products, especially faces.

Don'ts

- 1
- Don't apply frames within other frames.
- 2
- Don't collage or overlap frames.
- 3
- Don't use multiple outlines per layout.
- 4
- Don't mix all our frame styles together.
- 5
- Don't use solid frames as decorative elements behind text or headlines.
- 6
- Don't use solid frames behind product in lifestyle imagery or footage.
- 7
- Don't use outlines as decorative elements around text or headlines.
- 8
- Don't use outlines in any color other than Bentonville Blue or White.

Buttons

Our “Brand OS” buttons are graphic elements that mimic the look of a digital shopping experience in non-digital comms.

By using buttons in static or motion assets, our design reflects a digital-first shopping experience and reinforces our tech-forward positioning.

Styling

Our buttons are pill-shaped with fully rounded ends, appearing in both outlined and solid formats. Outline weight should optically match the weight of our type (set in Everyday Sans Regular) and any symbols included (magnifying glass, plus sign, etc).

These are our default colorways, which prioritize True Blue for solid buttons. Over True Blue backgrounds, Everyday Blue buttons can be used. Our search bar is the only button that can appear in solid white to reflect familiar UI cues.

CTA

Ex. Shop Now

Text-only buttons used for short statements or signoffs. Text is set in title case.

Action

Ex. Add to Cart

Buttons that combine text and symbols to aid in product storytelling. Set in sentence-case, unless using a specific product or brand name.

Search

Ex. Home Decor

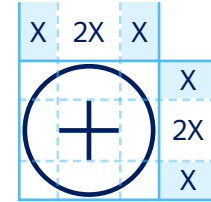

Buttons that mimic a digital search bar. Text is lowercase to simulate a user typing, unless using a specific product or brand name.

Accent

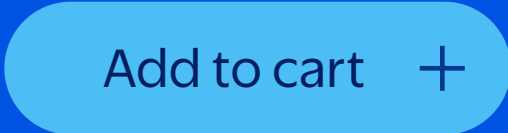

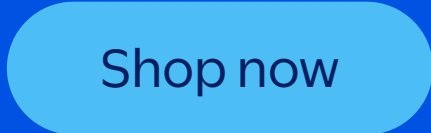

Ex. Add to Cart

Symbol-only buttons used to enhance the digital appearance of our frames.

Note:

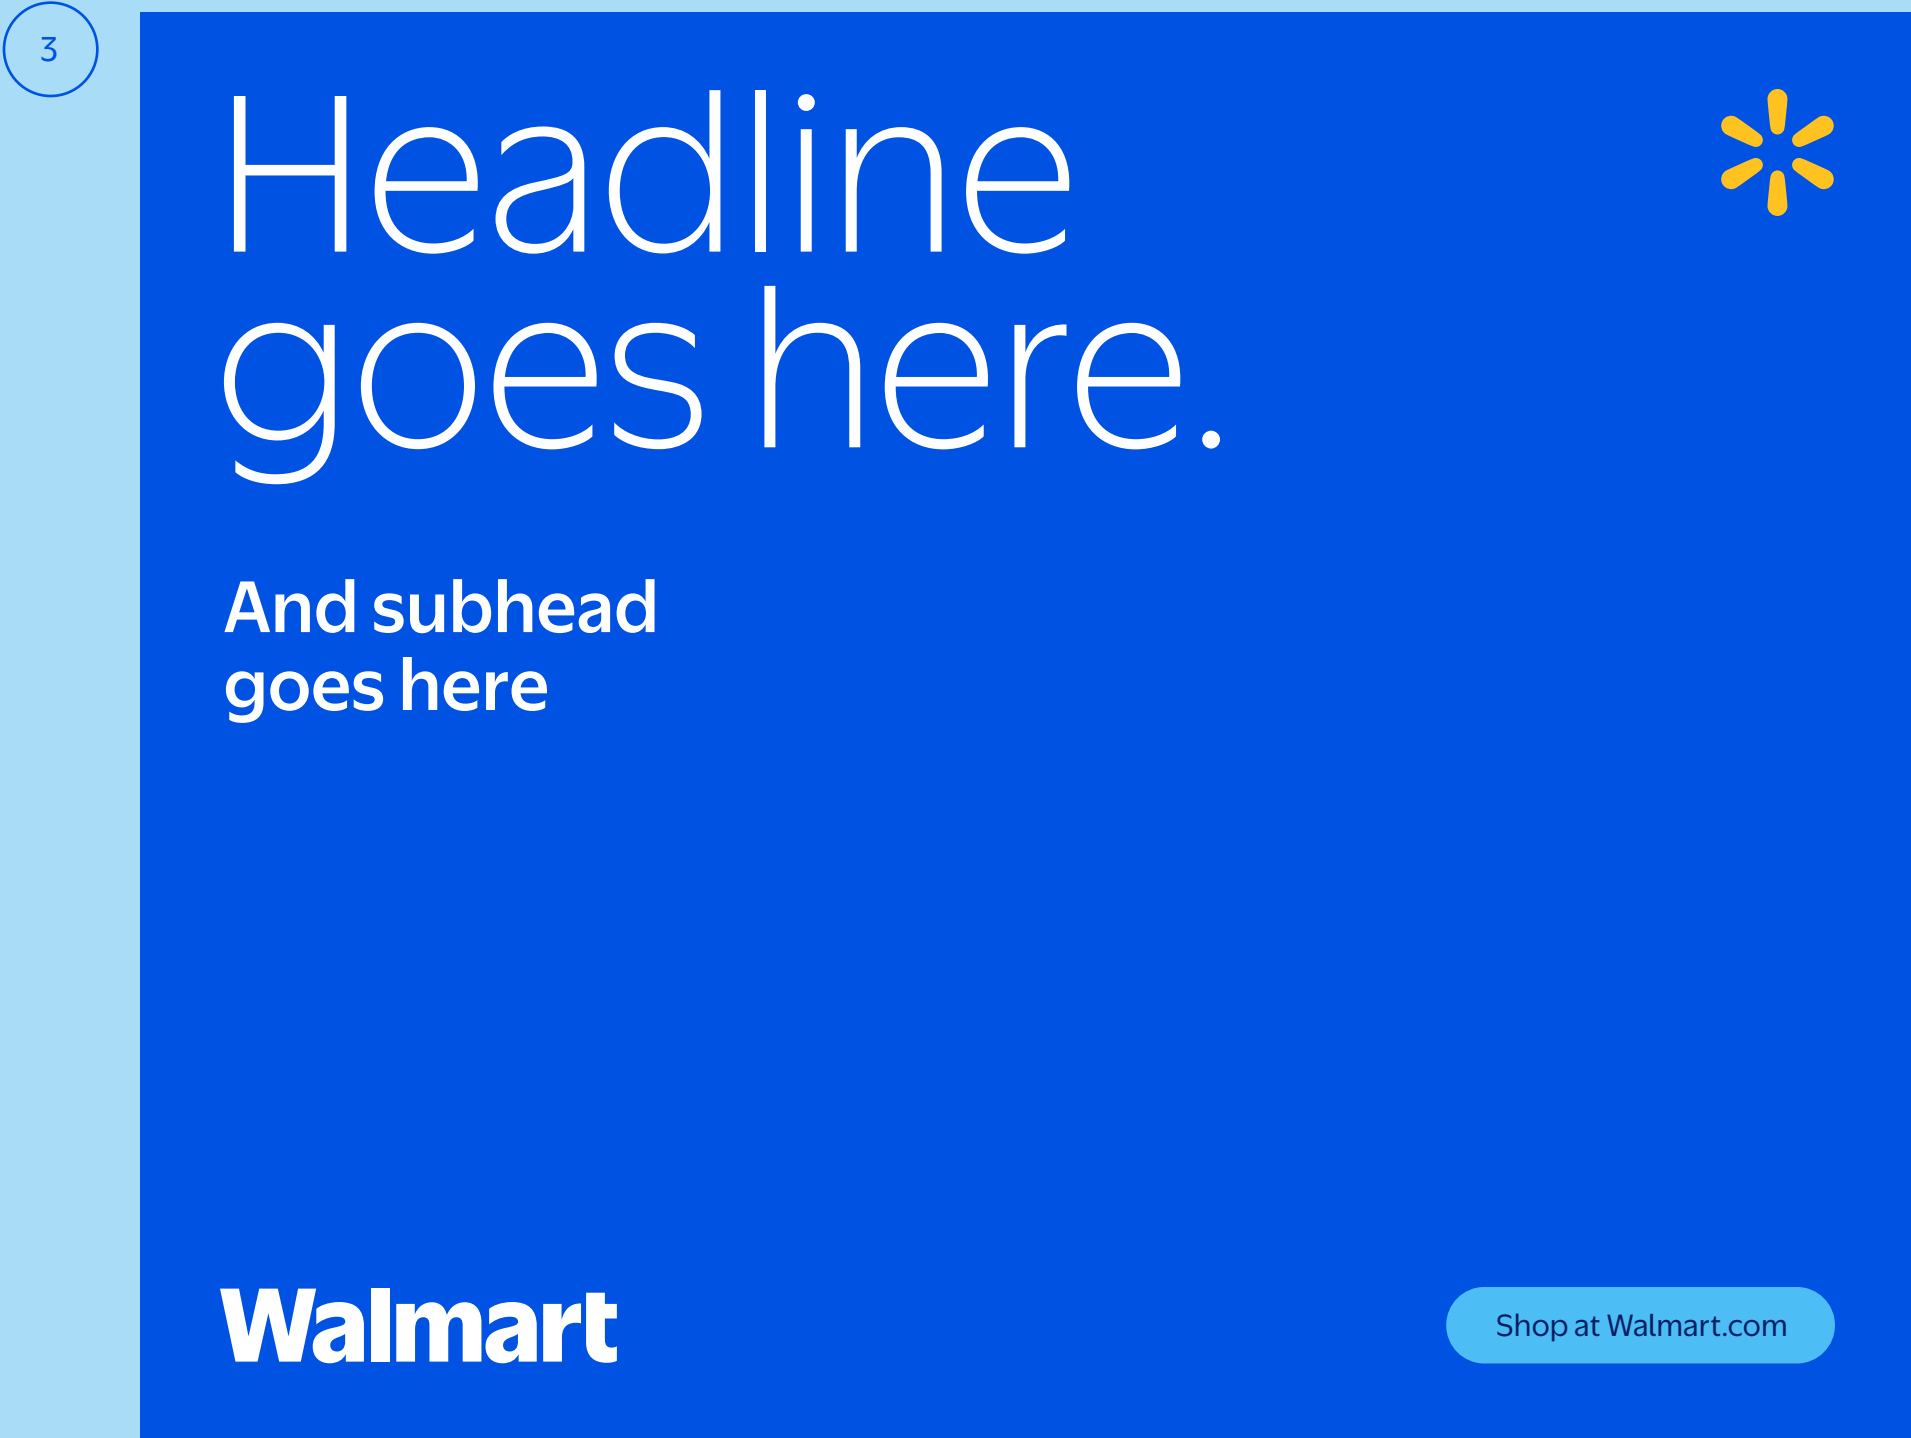

This is not an exhaustive list of all possible buttons. Additional buttons may be created within each category, provided they follow these styling rules.

CTA Buttons

CTA Buttons CTA buttons can be used in place of standard typeset CTAs when a more digital aesthetic or when our goal is to drive viewers our website. CTA buttons always use sentence case capitalization.

- 1 CTA button can be placed in the lower right corner, sized to match the height of our wordmark.
- 2 CTA button can be placed in the lower left corner beneath our headline.
- 3 When using True Blue backgrounds, our solid CTA button color switches to Everyday Blue.

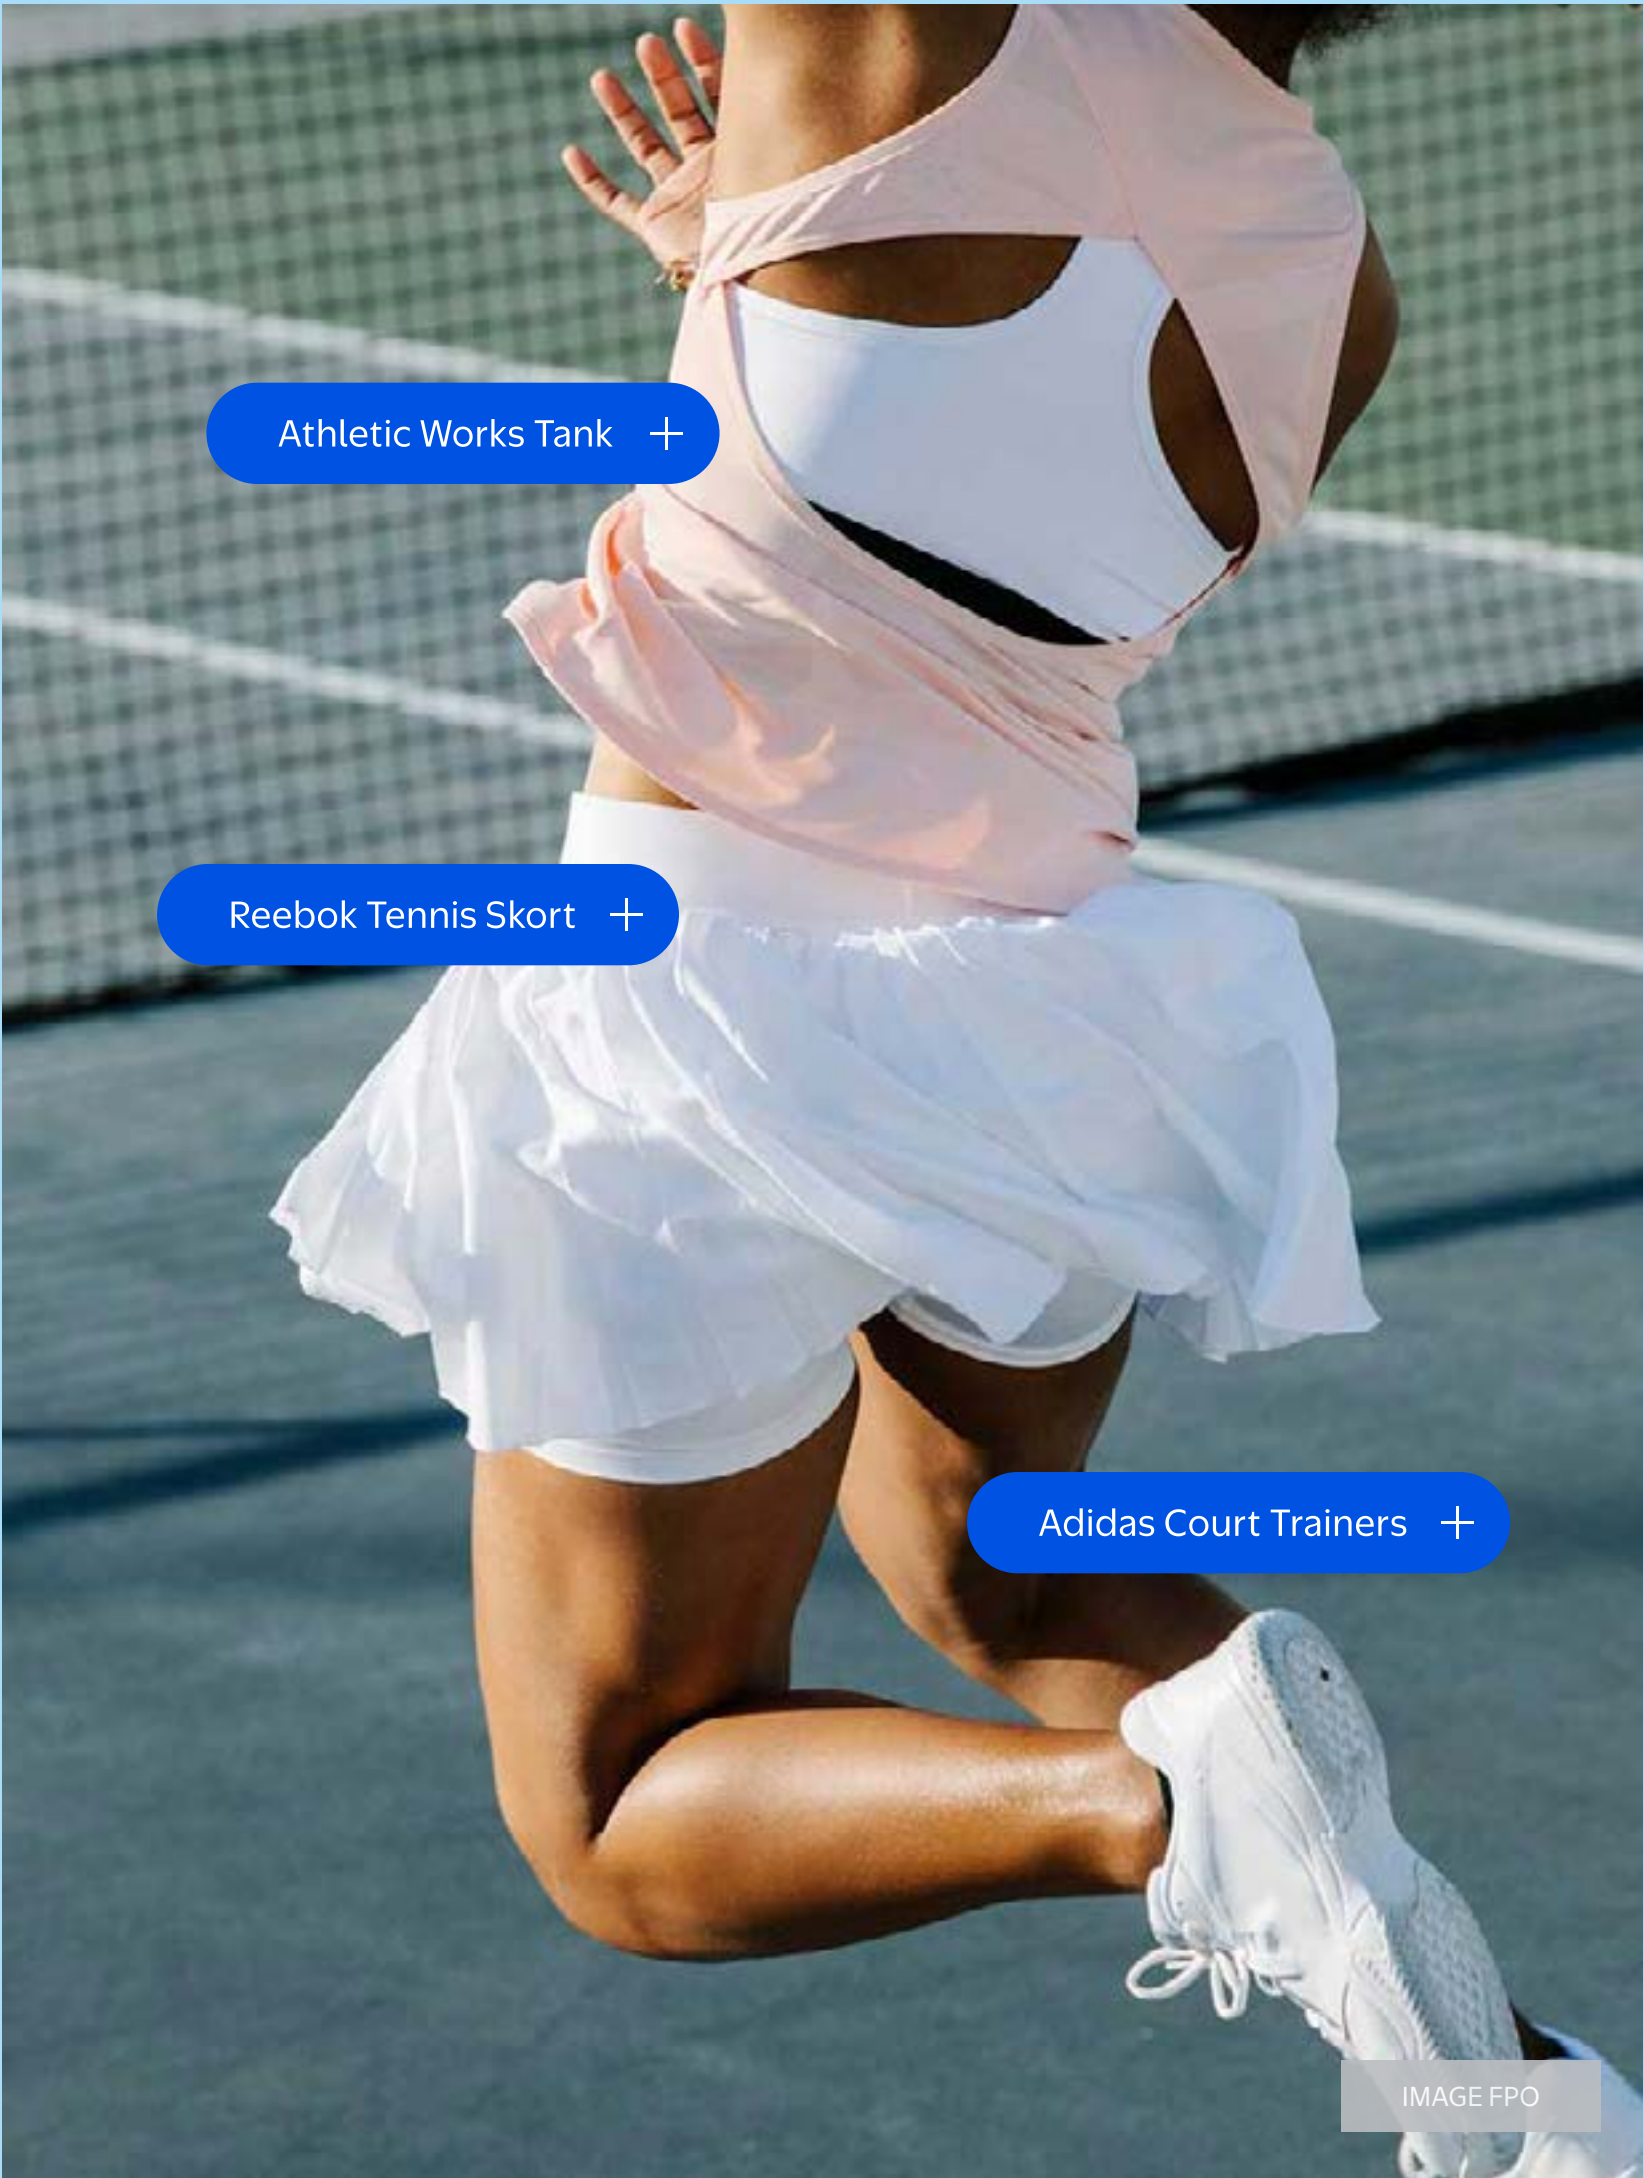

Action Buttons

Action buttons pair with photos to tell product stories. They can list the names of individual products or speak to more emotional product benefits. A well-written action button may stand alone as a headline.

Use sentence case capitalization, unless naming a specific product or brand.

- 1 A max of three action buttons can be used per layout to highlight different products or brands.
- 2 Use creative or clever copy to speak to emotional or functional product benefits.
- 3 A single action button may be centered within a layout, especially over a white background.
- 4 When placed over a photo, action buttons can be arranged organically to best suit the image.

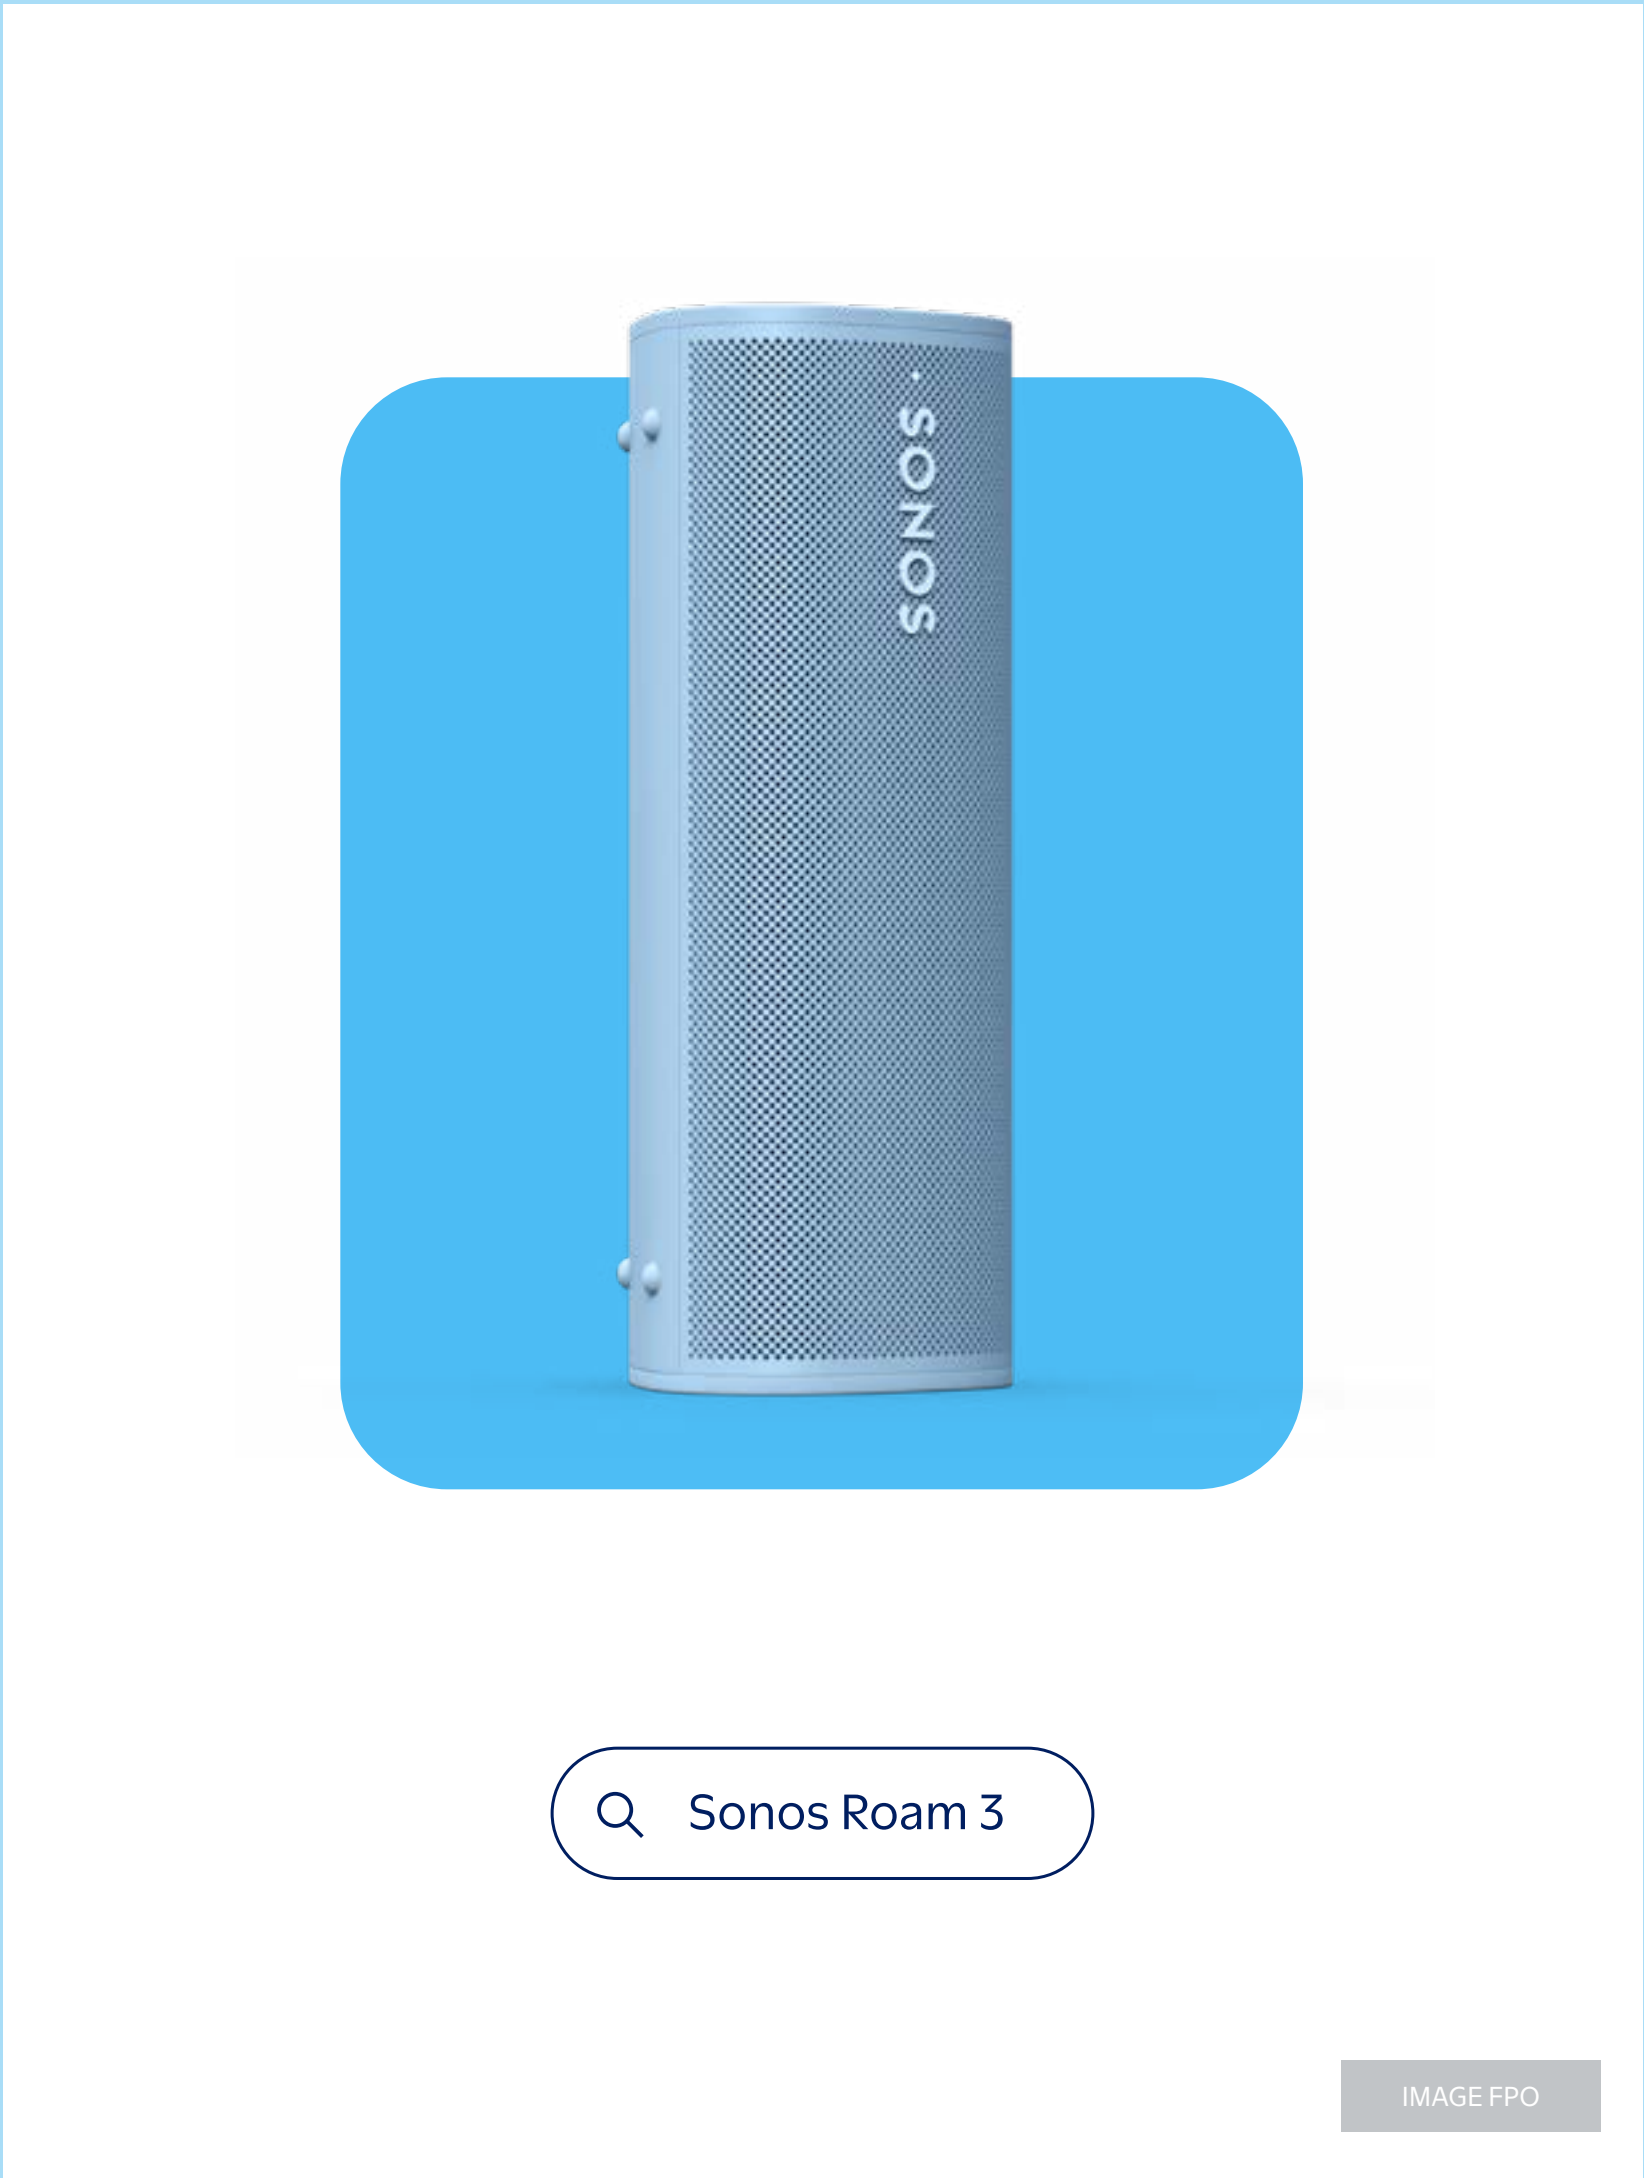

Search Buttons

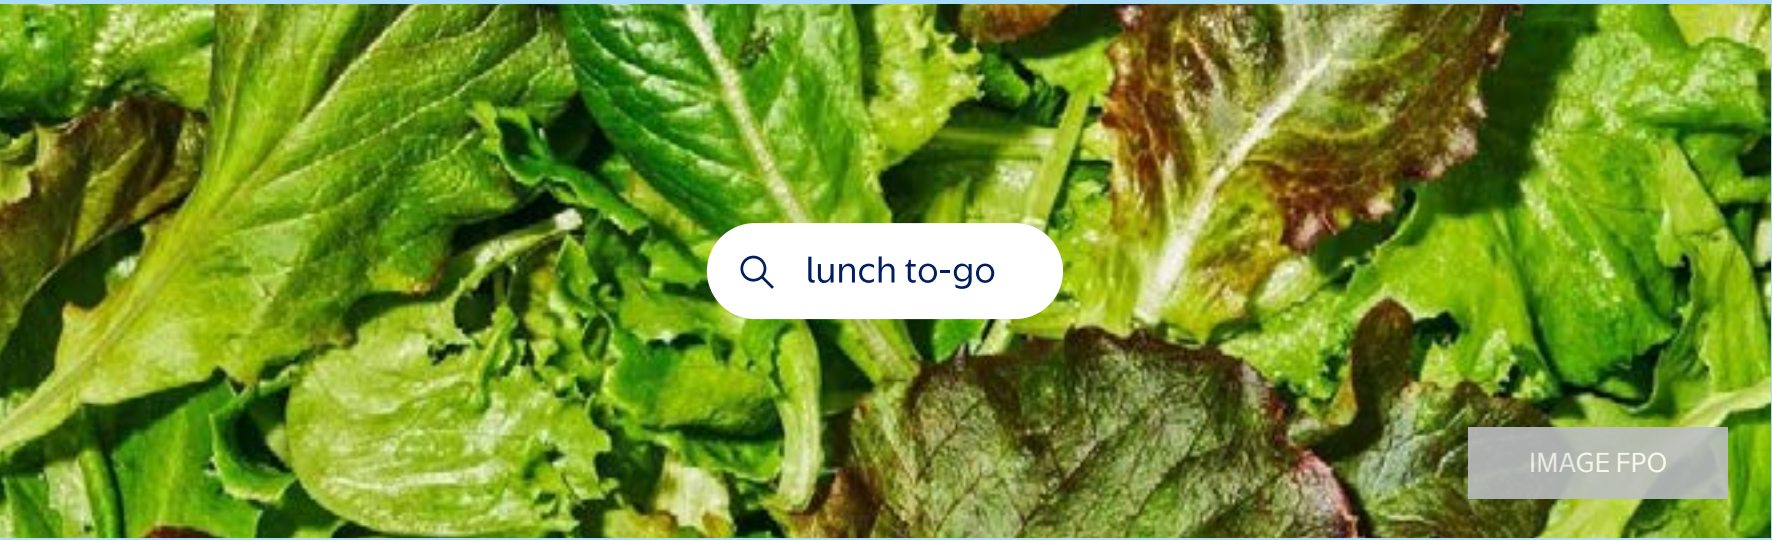

Search buttons mimic the action of searching for a product on Walmart.com. They use lowercase capitalization to simulate a user typing, unless naming a specific product or brand. Only one search button can be used per layout.

- 1 Search buttons only appear in solid white or outlined formats to mimic familiar UI cues.
- 2 Only use one search bar per layout.
- 3 Search buttons may be organically placed over an image or centered within layout.
- 4 Search buttons can be used in combination with action buttons. Limit yourself to one of each.

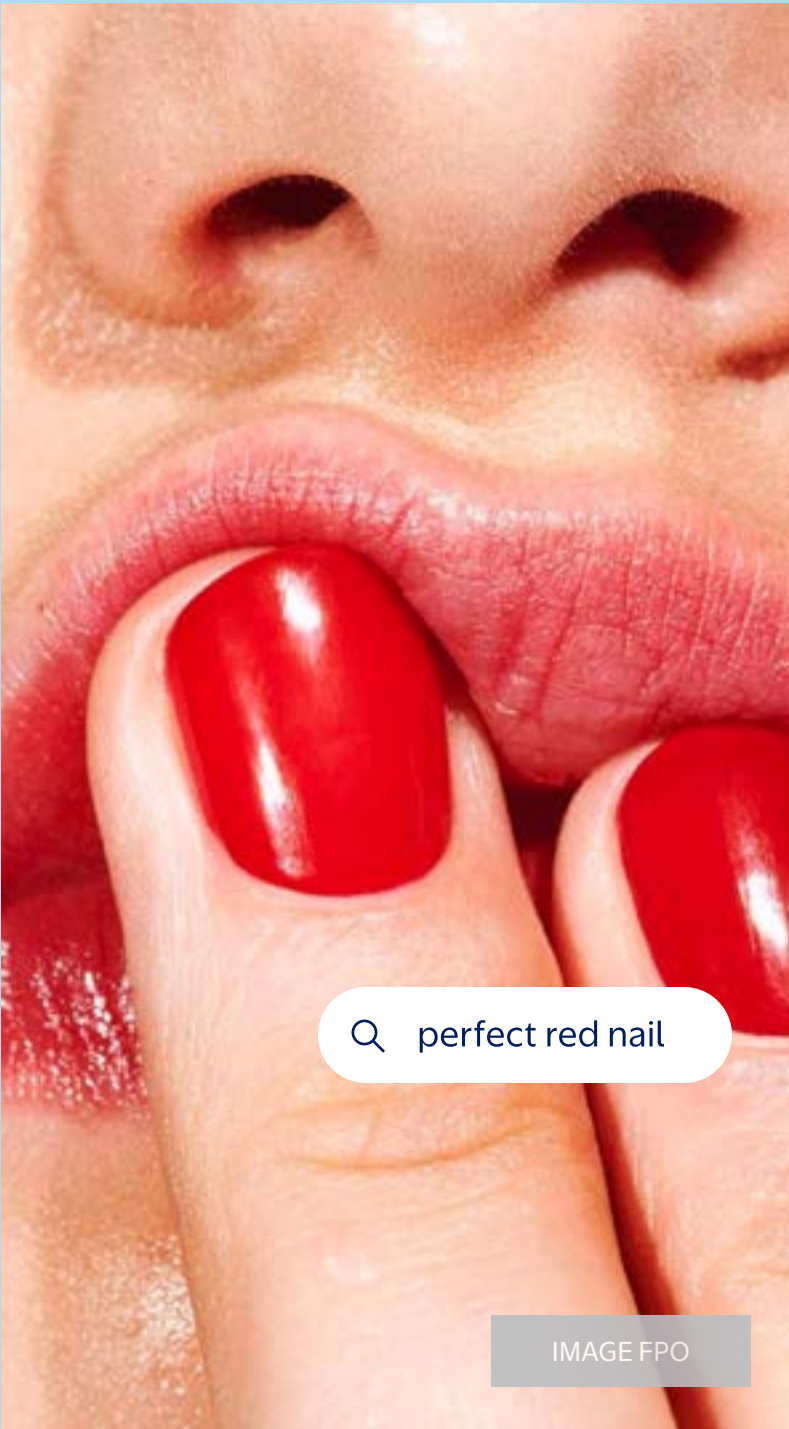

1

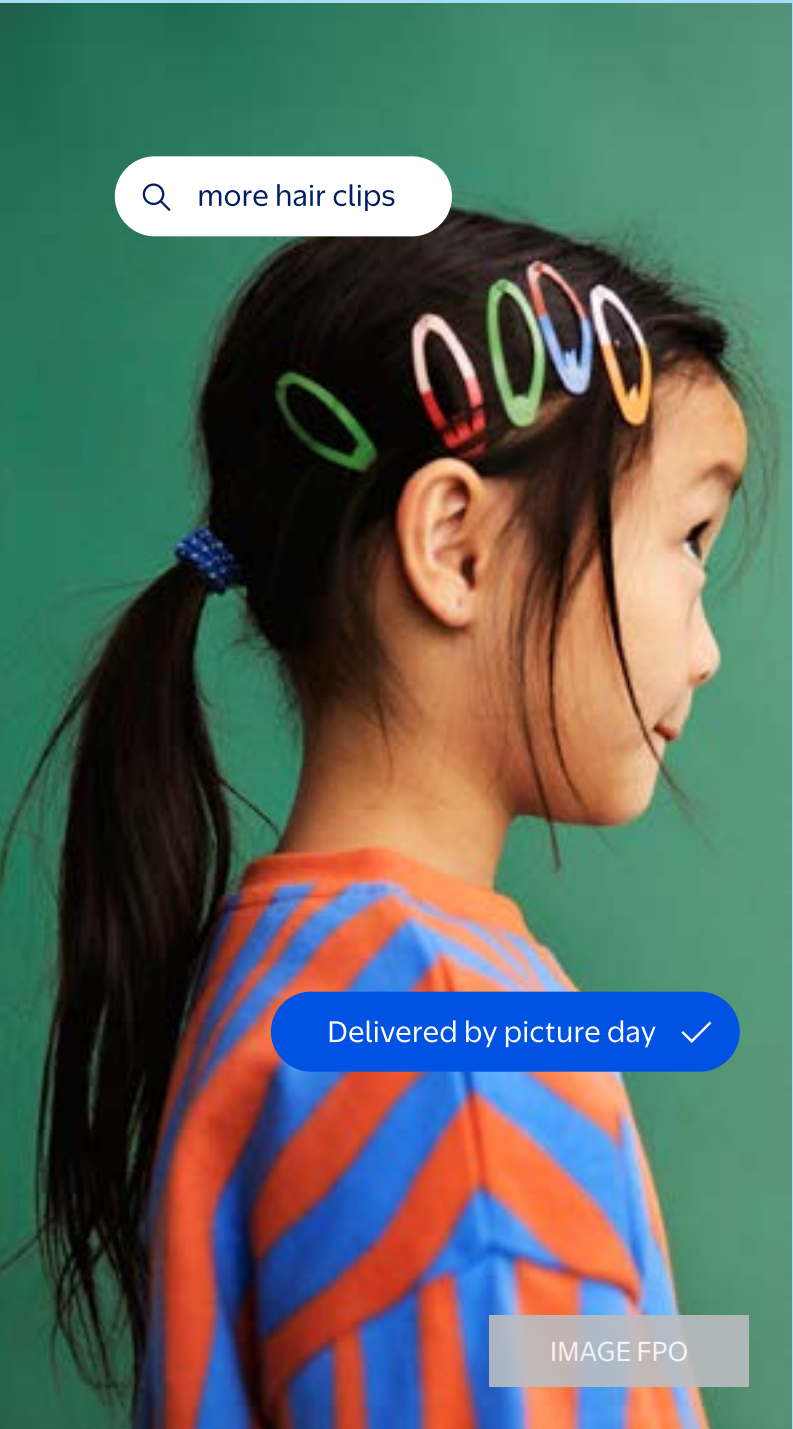

2

3

4

Accent Buttons

Accent Buttons Accent buttons are added to frames to enhance the feeling of a digital shopping experience. They're sized according to the radius of their frames, nestling into the corner with a smooth margin. The examples here indicate an "Add to Cart" action.

- 1 Accent buttons are designed to sit in the corner of product tiles or outlined frames.
- 2 Only one accent button can be used per frame.
- 3 When used in an outlined frame, the weight of an accent button should match the weight of its frame.

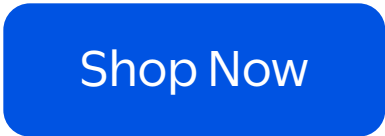

Don'ts

- 1
- Don't** use rectangular or square buttons.
- 2
- Don't** recolor solid search buttons to any colors other than White.
- 3
- Don't** recolor outlined buttons to any colors other than Bentonville Blue or White.
- 4
- Don't** set button text in bold or all-caps.
- 5
- Don't** use buttons in solid white aside from our search buttons.
- 6
- Don't** change the weight of button symbols.
- 7
- Don't** make an accent button larger than its frame's corner radius.
- 8
- Don't** make an accent button smaller than its frame's corner radius.
- 9
- Don't** recolor outlined accent buttons.

Motion

Motion

Motion enhances the impact of Walmart's content and unifies our new identity through digitally-native motion behaviors that help position us as a digital-first brand.

Use this section as a quick reference for motion principles. Refer to the full motion guides for further guidance.

Motion Idea

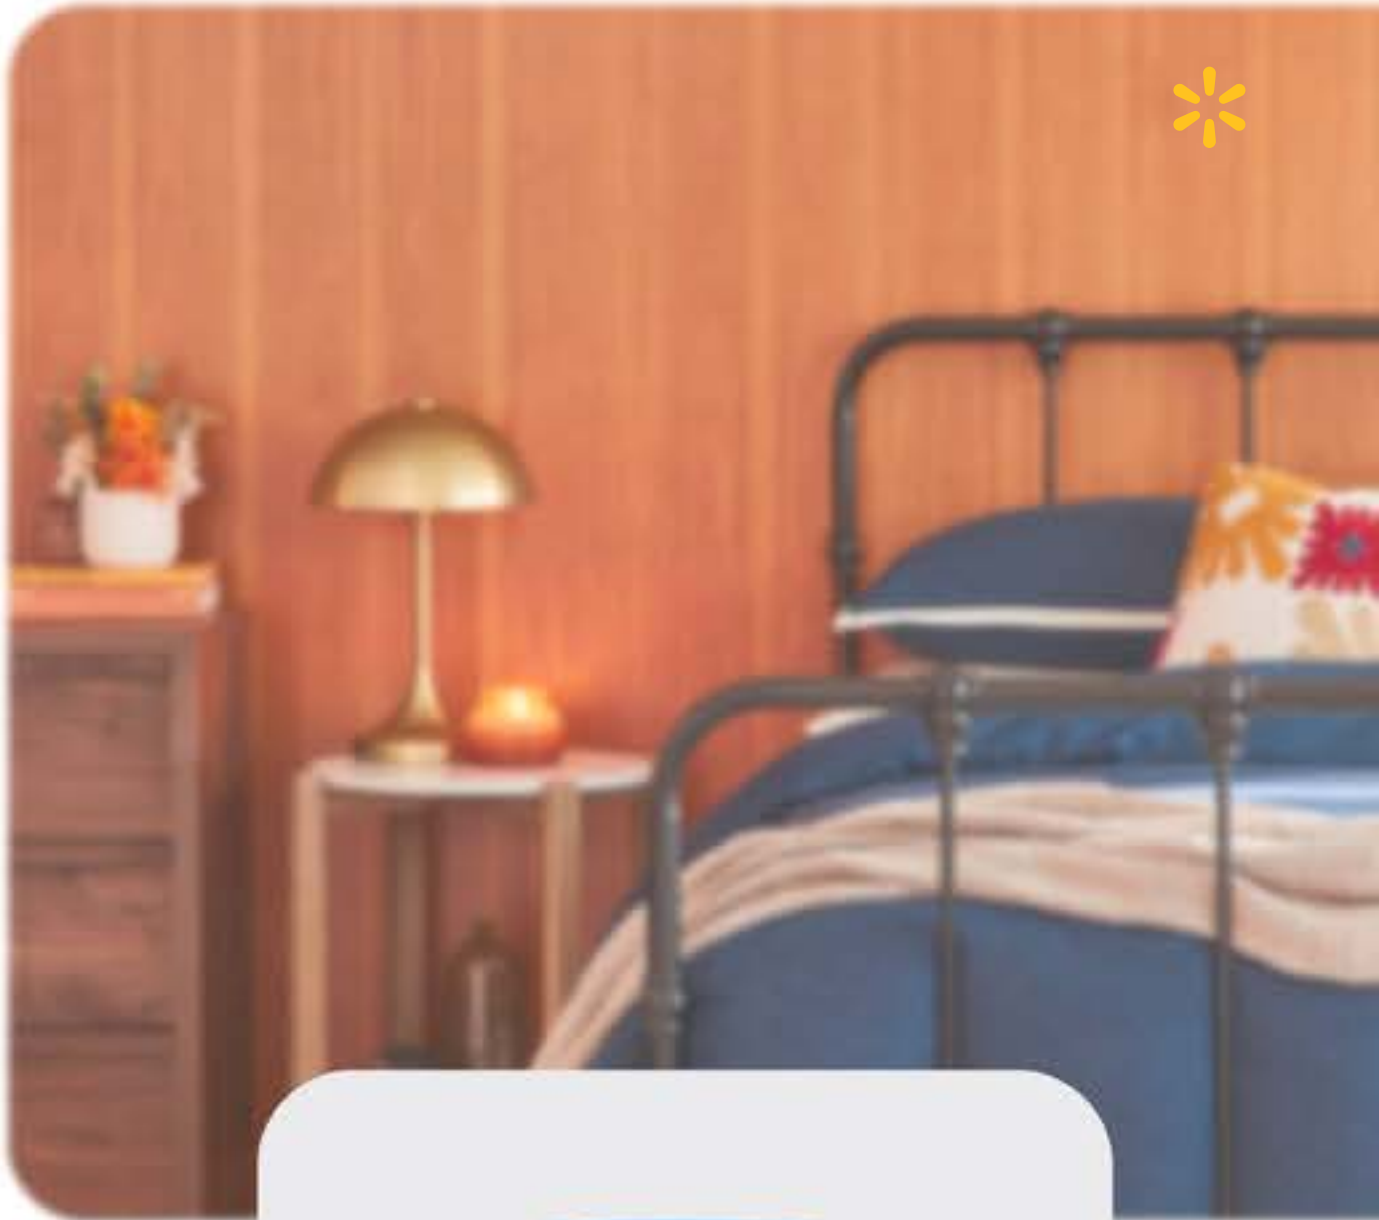

Our visual identity was made to move. Our brand comes to life in ways that feel inherently human, intuitive, and digitally-native—making our motion feel familiar, inviting, and exciting.

This document is private and confidential

Motion Principles

These principles set the tone and vision for Walmart’s approach to motion. They are derived from our overarching Brand Principles (noted on the left), but have been specifically tailored for expression through motion.

Motion Principles

01 Grassroots →

Energetic

Execution

Our motion design is vibrant and full of energy. Inspired by innately human user interactions, we create lively and engaging experiences by easing our audience in and out of energetic moments. Our brand comes alive when we make it move.

02 Agile →

Dynamic

Our motion design is dynamic in two ways. It responds seamlessly to any screen, and our four motion behaviors inspire a wide variety of exciting movement. Things like snappy eases, variety in speed, and purposeful moves bring the dynamism to our brand.

03 Pioneering →

Immersive

Our motion design draws you into the World of Walmart. We create moving experiences that feel endless — whether scrolling left and right, up or down, or exploring content that moves towards you, the spaces we create feel infinite and ready for exploration.

Motion Principles Cheat Sheet

Brand Purpose Guides the enterprise.	Save money. Live better.		
Brand Principles Guide our brand expression.	Grassroots We never forget our humble beginnings; we’re relatable, down-to-earth and part of the community.	Agile Agility is our x-factor. We are constantly improving, endlessly testing, always adapting.	Pioneering Since the beginning, we’ve blazed a path and never settled because that’s what it takes to make life better and easier.
Motion Idea	Responsive in every way		
Motion Principles Derived from our Brand Principles but specifically tailored for implementation through photo, film, and illustration.	Inviting Our motion design is vibrant and full of energy. Inspired by innately human user interactions, we create lively and engaging experiences by easing our audience in and out of energetic moments. Our brand comes alive when we make it move.	Intuitive Our motion design is dynamic in two ways. It responds seamlessly to any screen, and our four motion behaviors inspire a wide variety of exciting movement. Things like snappy eases, variety in speed, and purposeful moves bring the dynamism to our brand.	Immersive Our motion design draws you into the World of Walmart. We create moving experiences that feel endless—whether scrolling left and right, up or down, or exploring content that moves towards you, the spaces we create feel infinite and ready for exploration.

Behaviors

We have four motion behaviors that guide everything we do.

For motion reference, click [here](#).
Password: XX

Tap

Mimics a digital user tapping on a piece of content. Content shrinks slightly before bouncing back to its original size.

Swipe

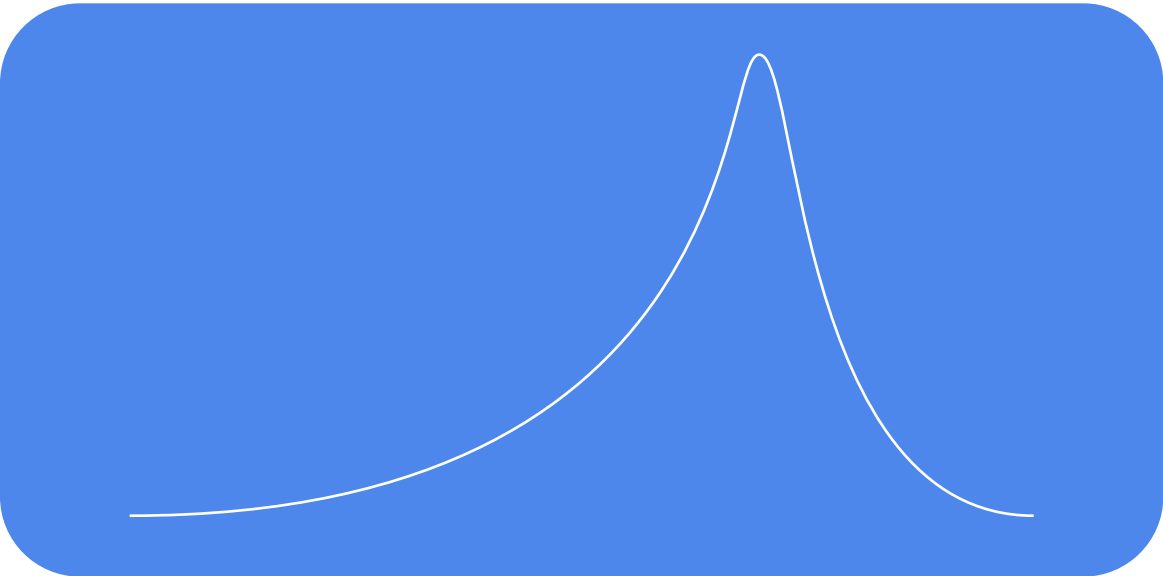

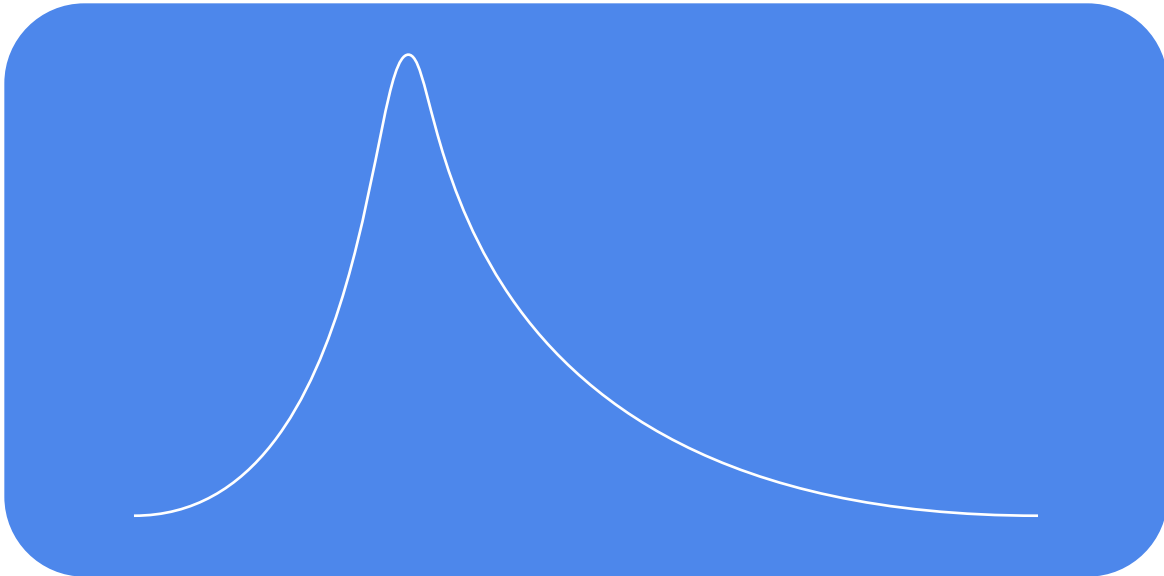

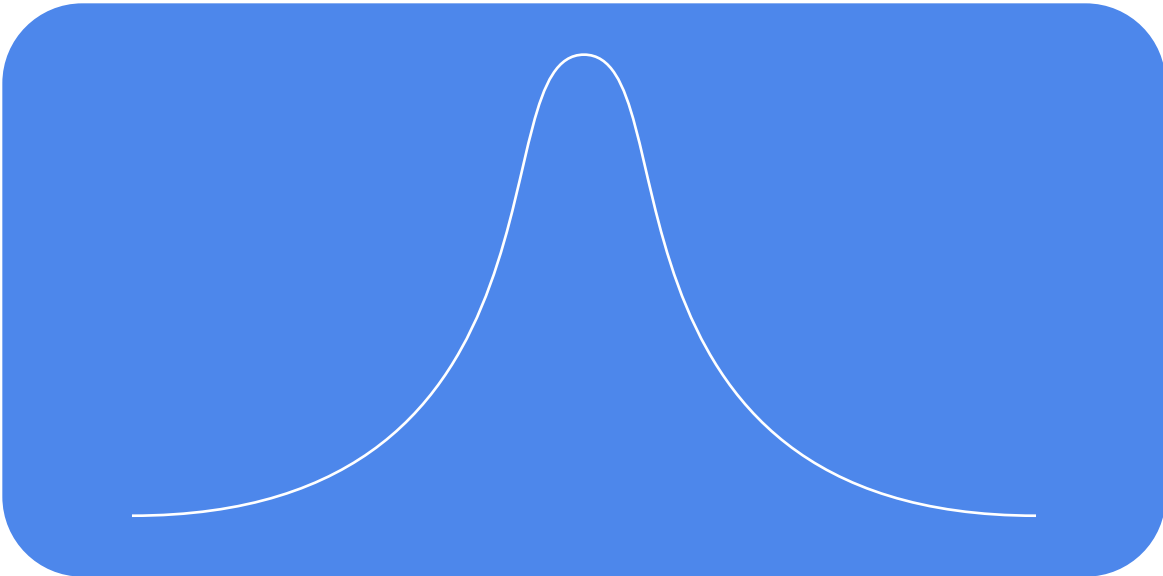

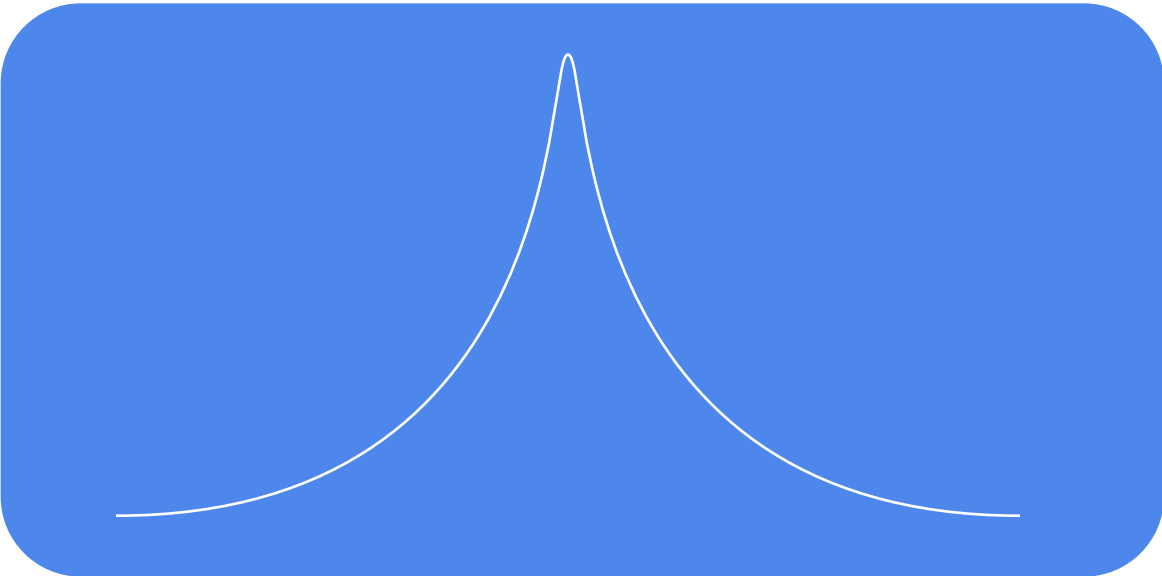

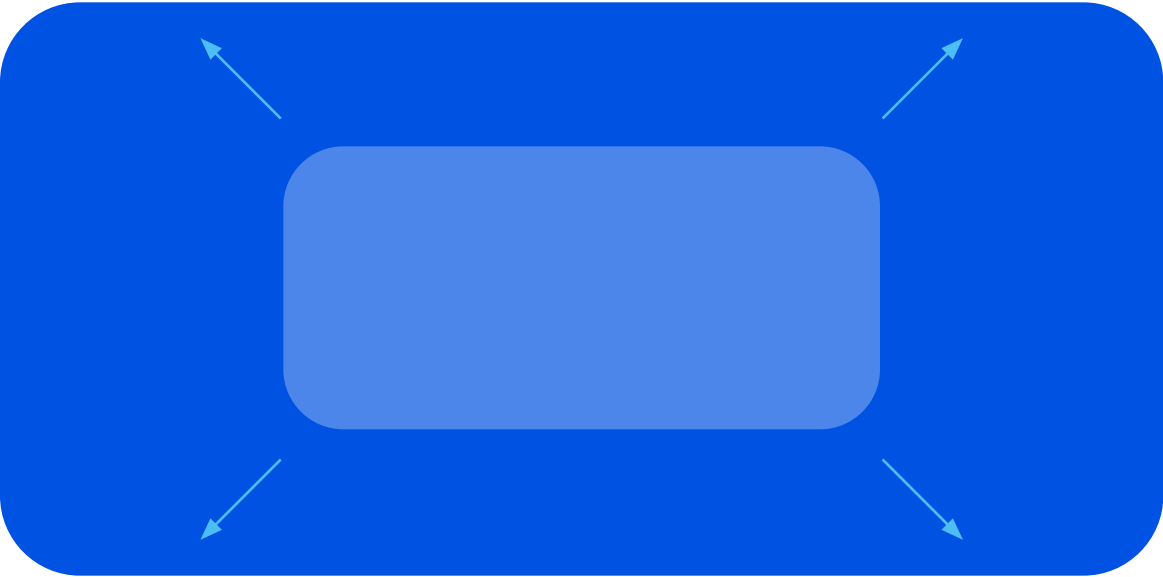

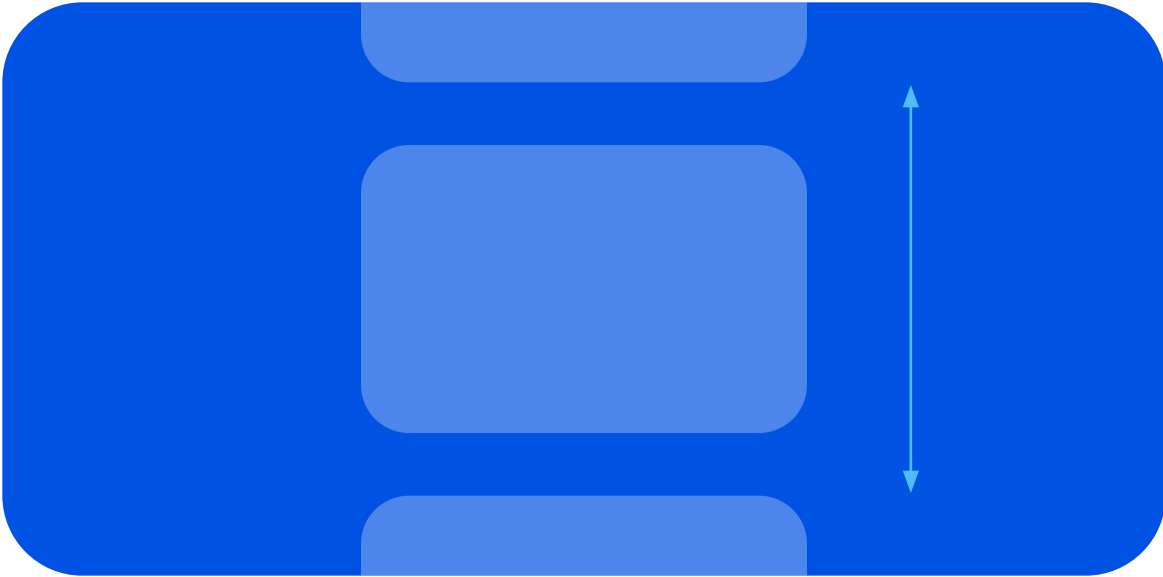

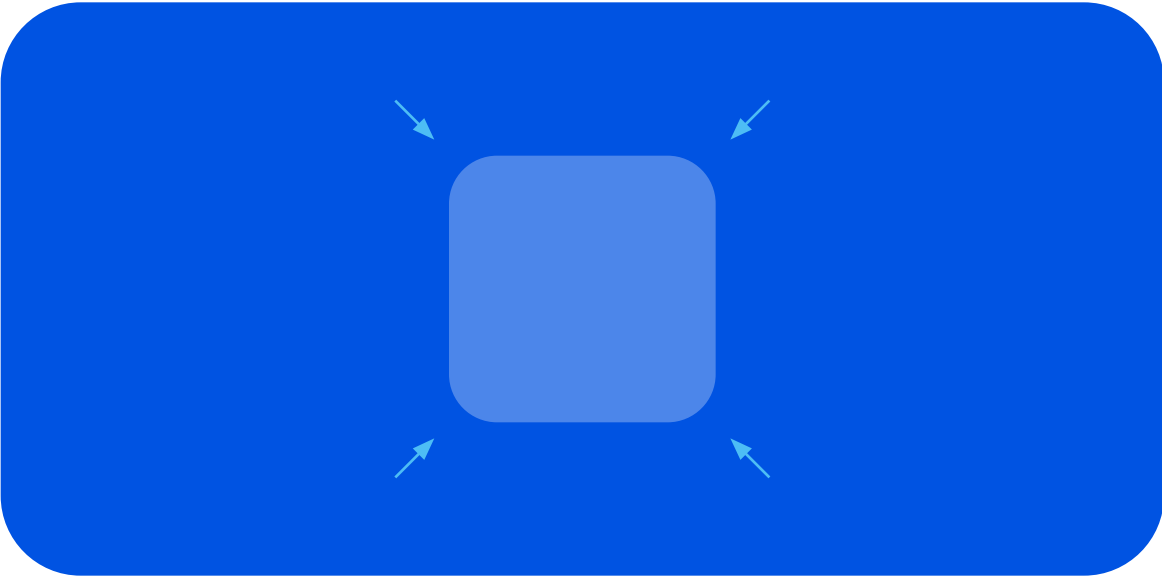

Implies a digital user scrolling or swiping through content, either vertically or horizontally.

Load

A 360 degree rotation inspired by common loading phases of an OS.

Zoom

Content expands from its original size to fill the entire screen, creating a sense of depth and immersion.

Asset List

Our motion behaviors apply to all brand elements including our Spark, app icon, wordmark, typography, frames, and buttons.

Trademarks

Trademarks

Walmart's trademarks are invaluable assets that represent customer trust and goodwill in the brand.

Walmart has the exclusive right to use—and authorize the use of—these names, logos, and other signifiers that distinguish its goods, services, and business activities.

These guidelines clarify proper usage of Walmart’s trademarks. Walmart reserves the right to take any action (including changing these guidelines) to protect its intellectual property if doing so becomes necessary. Some of Walmart’s trademarks, including Walmart’s logos, may only be used with Walmart’s prior written permission.

DO NOT display Walmart’s trademarks in any context that falsely suggests a relationship between:

- (a) Walmart and another entity;
- (b) Another entity and Walmart’s goods, services, or commercial activities; or
- (c) Walmart and the goods, services, commercial activities, views, or opinions of another entity.

DO NOT use Walmart’s trademarks in a way that implies an affiliation, connection, association, sponsorship, approval, certification, or endorsement, where there is no such relationship.

DO NOT use Walmart’s trademarks except in a manner that is less prominent than your own trade name or trademarks.

DO NOT use any Walmart trademarks in modified forms, including uses that:

- (a) Translate or transliterate words in the trademarks;
- (b) Substitute images for words or other descriptions;
- (c) Combine the trademarks with your name or your marks;
- (d) Add any words, symbols, numbers, spaces, punctuation, devices, designs, images, or other matter to any trademarks;
- (e) Abbreviate or delete any words, symbols, numbers, spaces, punctuation, devices, designs, images, or other matter from any trademarks;
- (f) Make singular words plural or plural words singular;
- (g) Insert the trademarks into a tagline or slogan; or
- (h) Misspell words within the trademarks.

DO NOT use Walmart’s trademarks within or as a component of:

- (a) A domain name, subdomain, top-level domain name, or URL (including without limitation vanity URLs on third party services);
- (b) An email address;
- (c) A telephone number (e.g. using the numerical string 925-6278 to represent WALMART with reference to standard United States telephone letter mapping);
- (d) An app name or software title;
- (e) A trade name, business name, fictitious or assumed name, or company name;
- (f) An account name, handle, or profile name on any service;
- (g) The name of any product, service, or other commercial activity;
- (h) The name of any fan group, user group, technology community, or any other organization; or
- (i) The title of any book, film, magazine, website, interactive media, or other expressive content.

DO NOT display Walmart’s trademarks except in a positive manner and do not use the trademarks to depict or refer to Walmart or any third party, their products, their services, or their commercial activities in a negative way.

DO NOT associate Walmart’s trademarks with—or use them in proximity to—any content or activities that are vulgar, obscene, profane, indecent, sexually explicit, immoral, scandalous, defamatory, disparaging, unlawful or that tend to shock, insult, or offend the broader community or any identifiable class or group of people.

DO NOT use any trademarks or other designations that are confusingly similar to any trademarks that Walmart owns.

Word Marks
Some Walmart trademarks consist of only words and do not feature any particular stylization, such as a specific font, typeface, or color (collectively “Word Marks” and each a “Word Mark”).

Walmart’s Word Marks may be used with Walmart’s prior written consent and in compliance with these Guidelines to the extent that such use is not likely confusing and is needed to truthfully convey information about products, services, or commercial activities, which might include:

- (a) Indicating the location of an independent business or event within or nearby a Walmart location (e.g. “located next to the Walmart Vision Center” or “taking place in the Walmart store parking lot on Main Street”);
- (b) Indicating that a product, service, or solution is interoperable or compatible with a product, service, or solution offered by Walmart;
- (c) Accurately and directly referring to Walmart, its businesses, and their products, services, or commercial activities; or
- (d) In the titles of news publications and other factual content about Walmart, its businesses, and their products, services, or commercial activities, provided that the Walmart Word Mark is not the leading word or most prominent element of that title.

DO NOT use Walmart’s Word Marks in the context of the text, such as within advertising copy, unless they are shown in a manner that differentiates them from that text by showing the Word Marks in:

- (a) Title Case (i.e. capitalizing the first letter in each word);
- (b) ALL CAPITAL CASE;
- (c) Bold Font;
- (d) Underlined Font;
- (e) Italic Font; or
- (f) Some other visually distinct style.

Only use Walmart Word Marks in text as adjectives accompanied by an appropriate generic noun that refers to the relevant product or service, except when it is appropriate to use a Word

Mark as a noun to refer to a relevant Walmart entity or business. For example, the WALMART trademark may be used to refer accurately to Walmart Inc. in statements like “Walmart is one of the world’s largest merchandise and grocery retailers.”

DO NOT use any Walmart trademark as a verb, adverb, or in a manner that suggests they have a common, descriptive, or generic meaning.

Logos & Designs
Some Walmart trademarks feature stylization (including a particular font, typeface, or color) or include a device, design, or other image (all collectively “Logos” and each a “Logo”). Walmart may own both trademark rights and copyright rights in its Logos. These Logos may only be used subject to the following guidelines.

DO NOT use Walmart’s Logos without Walmart’s prior written consent.

DO NOT use the Logos on a background color into which they blend, in whole or in part.

DO NOT use the Logos within enclosing text or in the middle of a phrase or sentence.

DO NOT modify, distort, rotate, animate, or alter Walmart’s Logos in any manner and only use the Logos in the form, orientation, and colors supplied by Walmart. You may change the overall size of the Logos, but all elements of the Logos must change in size proportionately.

DO NOT incorporate Walmart’s Logos into any texture, repeating pattern, or motif.

DO NOT use Walmart’s Logos, including without limitation its Spark Design, as a letter or as punctuation in any word or phrase.

DO NOT display Walmart’s Logos in a manner that overlaps the Logo with any shapes, images, photographs, or other trademarks

Trademark & Copyright Notices and Legends
Always use a notice of trademark (the “TM” symbol), notice of service mark (the “SM” symbol), or the notice of registration (the encircled “R” symbol), as each may be appropriate, with the first or most prominent instance of a Walmart trademark, when it is used in media intended for a United States audience, distributed through a United States website or publication, or displayed at a United States event.

DO NOT use a notice of registration (the encircled “R” symbol) with a trademark that is not registered with the United States Patent and Trademark Office or one that is not registered in connection with the goods and services relevant to the use in question.

DO NOT use a notice of service mark (the “SM” symbol) with a trademark where the use in question does not relate to services.

DO NOT use any trademark notices with Walmart trademarks intended for an audience outside of the United States, distributed through a website or publication originating outside of the United States, or displayed at an event outside of the United States unless so instructed by Walmart or its affiliates.

Always include a footnote stating that any Walmart trademarks you use, listed in alphabetical order, are “trademarks of Walmart Inc. and its affiliates” or include that information in another notice appropriate for the relevant media.

Always include a footnote stating that any Walmart Logos are “© 2xxx Walmart Apollo, LLC” (where the “2xxx” year is as may be indicated by Walmart) or include that information in another notice appropriate for the relevant media. For the Spark Design, all notices shall read “Walmart Spark Design © 2008 Walmart Apollo, LLC.”

Vendor Advertising
Walmart considers requests to use certain Logos as “vendor tags,” which relate to the availability of products or services from Walmart, in third party advertisements through its Vendor

Tagged Advertising process. The details of this process are explained in the “Vendor advertising” section of this guide.

DO NOT use any Walmart Logos in advertisements without prior written approval.

Search Placement & Content Targeting
Walmart considers requests to use its trademarks in connection with the Google AdWords advertising service, or in connection with any other search placement, content targeting, or other advertising placement services, through its Vendor Tagged Advertising process. The details of this process are explained in the “Vendor advertising” section of this guide.

DO NOT use any Walmart trademarks in any search placement, content targeting, or other advertising placement services without prior written approval.

Requesting Permission to Use
Walmart considers requests to make limited use of some trademarks, including stylized lockups of its Logos and the Spark Design, from entities with which it has existing relationships, such as vendors, suppliers, service providers, charities, community organizations, and industry associations.

Requests to use Walmart trademarks in a manner that is not addressed by this form should be directed to an appropriate Walmart business contact.

Thank You
